Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2018191025

Project Title: Livingston 1,2,3 - TCP Removal Treatment System Project

Lead Agency: City of Livingston

Contact Name: Randy Hatch

Email: rhatch@livingstoncity.com Phone Number: 209.394.8041

Project Location: Livingston (*City*) Merced (*County*)

Project Decription (Proposed actions, location, and/or consequences).

This is an Addendum to a previously adopted Mitigated Negative Declaration (MND). The City plans to make several improvements to increase the City's water system capacity and improve centralized proposed trichloropropane (TCP) treatment. Minor changes were made to the original Project Description in the previous MND which consist of adding additional water wells, additional TCP treatment facilities and additional connecting pipelines to the Project. The additional Project components and their locations are as follows:

• New water well (Well 19) and a centralized TCP treatment site on approximately 7.8 acres located 330 feet west of Davis Street and 100 feet north of Campbell Boulevard, adjacent to the Southern Pacific Railroad and Foster Farms.

• New TCP treatment site at Arakelian Park (approximately 1.3 acres); a new pipeline installation (approximately one mile of pipeline) from existing Well 12 and existing Well 17 to the new TCP treatment site at Arakelian Park; and a new pipeline (approximately 2,400 linear feet of pipeline) along Mont Cliff Avenue between existing Well 13 at Joseph Gallo Park and the proposed TCP treatment site at Arakelian Park. Arakelian Park is located south of Mont Cliff Way and northeast of the Arena Canal.

• New water well (Well 18) on approximately 0.33 acres northwest of the intersection of Davis Street and White Avenue.

• Existing TCP treatment facility at existing Well 8 will be expanded by approximately 1.5 acres and a new pipeline will be installed from Wells 9 and 18 to the TCP treatment site at Well 8.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Biological Resources

• To the extent feasible, construction shall be scheduled to avoid the nesting season, which extends from February through August.

• If it is not possible to schedule construction between September and January, pre-construction surveys for nesting birds shall be conducted by a qualified biologist to ensure that no active nests will be disturbed during Project implementation. A pre-construction survey shall be conducted no more than 14 days prior to the initiation of construction activities. During this survey, the qualified biologist shall inspect all potential nest substrates in and immediately adjacent to the impact areas for nests. If an active nest is found close enough to the construction area to be disturbed by these activities, the qualified biologist shall determine the extent of a construction-free buffer to be established around the nest. If work cannot proceed without disturbing the nesting birds, work may need to be halted or redirected to other areas until nesting and fledging are completed or the nest has otherwise failed for non-construction related reasons.

Cultural Resources

• In the event that archaeological remains are encountered at any time during development or ground-moving activities within the entire Project area, all work in the vicinity of the find should be halted until a qualified archaeologist can assess the discovery and take appropriate actions as necessary.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Controversy known to the Lead Agency:

No known areas of controversy are known regarding this project.

Provide a list of the responsible or trustee agencies for the project.
