Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Cypress Sports Park

Lead Agency: City of Cypress

Contact Name: Amy Stonich, City Planner

Email: cityplanner@cypressca.org Phone Number: (714) 229-6720

Project Location: City of Cypress, Orange County
City *County*

Project Decription (Proposed actions, location, and/or consequences).

The City of Cypress (City) proposes to construct a 6-acre multi-use sports park on an approximately 9-acre site at the southeast corner of the intersection of Cerritos Avenue and Lexington Drive in the City that is currently used by the Los Alamitos Race Course as a maintenance and storage facility. The project includes a multi-use athletic field with shaded bleachers that would feature sports fields, play areas with an adjacent mural, an exercise station, picnic shelters, restrooms, two half-basketball courts, a walking path, a storage building, and associated landscaping and utility improvements.

The City has prepared the Draft IS/MND to analyze environmental impacts associated with implementation of the proposed project, and to propose mitigation measures for identified potentially significant impacts that will minimize, offset, or otherwise reduce or avoid those environmental impacts.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Impacts to Aesthetics would be reduced to a less than significant level with Mitigation Measure (MM) AES-1, which requires that all onsite lighting be shielded or directed so as not to cause spill or glare, and the preparation of lighting plans that comply with the City security requirements and lighting standards in the City's Municipal Code. Impacts to Cultural Resources would be reduced to a less than significant level with MM-CUL-1, which requires Archaeological Monitoring during construction. Impacts to Geology and Soils would be reduced to a less than significant level with MM-GEO-1, which establishes procedures for protecting paleontological resources that could be encountered during excavation or ground-disturbing activities. Impacts to Noise would be reduced to a less than significant level with MM-NOI-1, which establishes noise abatement measures during construction, and MM-NOI-2, which prohibits the use of heavy construction equipment within 15 feet of structures. Impacts to Tribal Cultural Resources would be reduced to a less than significant level with MM-TCR-1, which allows for monitoring during construction activities, if necessary.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
