Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Santa Ana River Trail- Phase 6 Through Green River Golf Club

Lead Agency: Riverside County Park and Open-Space District

Contact Name: Erin Gettis

Email: egettis@rivco.org Phone Number: (951) 955-4558

Project Location: Corona, Chino Hills (*City*) Riverside County, San Bernardino County (*County*)

Project Decription (Proposed actions, location, and/or consequences).

The proposed project would consist of an approximately 1.5-mile trail segment through Green River Golf Club and a 0.2-mile segment between the existing Phase 5 and planned Phase 3 of the larger 110-mile regional SART system. The project would construct a recreational dual-track Class I multi-use path/natural surface trail, connecting the Santa Ana River Parkway Extension (currently in final design) located west of the project site in Orange County, with the existing SART-Phase 5 in Chino Hills State Park on the east within Riverside County. Additionally, the project involves a dual-track Class I multi-use path/natural surface trail, connecting the eastern terminus of the existing SART-Phase 5 and the western terminus of the planned SART-Phase 3, near the SR-91 and SR-71 interchange in Riverside County. The project would generally extend along the western boundary of the golf course.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Draft Initial Study with Mitigated Negative Declaration (IS/MND) identified the following factors as having impacts that are "Less Than Significant" or "Less Than Significant Impact with Mitigation Incorporated": aesthetics, biological resources, cultural resources, geology and soils, hazards and hazardous materials, tribal cultural resources, and mandatory findings of significance. Impacts would be reduced to "Less Than Significant with Mitigation Incorporated" through the implementation of Mitigation Measure AES-2 (directional construction lighting), GEO-1 (bridge design), GEO-2 (final design recommendations), GEO-3 (expansive soils), GEO-4 (paleontological resources), HAZ-1 (Phase II/ Site Characterization), HAZ-2 (discovery of unknown wastes), HAZ-3 (electrical transformers), and CUL-1 through CUL-5 (archaeological/tribal cultural resources). Impacts to the majority of animal species having the potential to occur within project boundaries are covered by the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP). Impacts to sensitive species not covered by the MSHCP would be minimized through implementation of Mitigation Measures BIO-1 through BIO-13.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No areas of controversy have been identified.

Provide a list of the responsible or trustee agencies for the project.

The proposed project would require permits and approvals from various public agencies prior to construction.
