# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2020050533

Project Title: Initial Study No. 7334 - Fresno Canal at Del Rey Bridge Replacement Project

Lead Agency: County of Fresno

Contact Name: Jeremy Shaw

Email: jshaw@fresnocountyca.gov Phone Number: 559 600-4207

Project Location: Unincorporated Fresno County, at the intersection of Del Rey Avenue and Fresno Canal

*City* *County*

Project Description (Proposed actions, location, and/or consequences).

The proposed project consists of replacing the functionally obsolete Fresno Canal Bridge on N. Del Rey Avenue, 0.5 miles south of E. McKinley. The existing 2-lane timber bridge would be replaced with a new 2-lane concrete bridge that meets current standards.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

It has been determined that there would be no impacts to Land Use and Planning, Mineral Resources, Population and Housing, Public Services, Recreation, and Wildfire.

Potential impacts related to Aesthetics, Agricultural and Forestry Resources, Air Quality, Energy, Greenhouse Gas Emissions, Hazards and Hazardous Materials, Hydrology and Water Quality, Noise, Transportation, and Utilities and Service Systems. have been determined to be less than significant.

Potential impacts relating to Biological Resources, Cultural Resources, Geology and Soils, and Tribal Cultural Resources have determined to be less than significant with compliance with the identified Mitigation measures. Mitigation measures relating to biological resources require pre-construction surveys during high risk times (such as nesting/breeding season) and define avoidance and minimization actions to reduce impacts if such species are identified. Impacts to Tribal and Cultural Resources are mitigated through the adoption of avoidance measures in the event of a new discovery of a resource. The mitigation measures define the actions required in the event of such a find and also require that consultation with native American tribal governments occurs before a decision regarding disposition of the find is made.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No known areas of controversy exist for this project.

Provide a list of the responsible or trustee agencies for the project.

California Department of Fish and Wildlife
California Department of Transportation
Central Valley Regional Water Quality Control Board
Fresno Irrigation District
San Joaquin Valley Air Pollution Control District
State Water Resources Control Board
U.S. Department of Fish and Wildlife
U.S. Environmental Protection Agency
