Project Description (Proposed actions, location, and/or consequences).

The Federal Lands Permit involves the proposed development of General Waste Discharge requirements for nonpoint source discharges from certain land management activities on federal lands in the North Coast Region. The permit proposes to regulate discharges from timber harvest, fuels management, road and trail work, livestock grazing, fire recovery, and recreational facilities management.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project includes one potentially significant impact to biological resources. Mitigation Measure BIO-1, included in the Mitigation Monitoring and Reporting Program, addresses the potential impacts.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
