Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Updated Facilities Master Plan Draft Environmental Impact Report

Lead Agency: City College of San Francisco

Contact Name: Alberto Vasquez

Email: Facilities@ccsf.edu Phone Number: (415) 239-3055

Project Location: San Francisco (City) San Francisco (County)
City *County*

Project Description (Proposed actions, location, and/or consequences).

The City College of San Francisco (CCSF or “ College ”) Updated Facilities Master Plan (FMP) provides a framework for future developments to support the goals and strategies of the College ’ s Education Master Plan. The Updated FMP is a long-range plan, designed to guide future development through the year 2030. The framework encompasses modernized and efficient space use through demolition or decommissioning of certain aging facilities, renovation of other existing facilities, and construction of a new facility. The Updated FMP would support enhanced student experience on campus and sets the framework for improvements to indoor and outdoor student gathering and learning spaces, campus infrastructure, accessibility, and paths of travel. The Updated FMP would also support sustainability and resilience measures of the campus.

Identify the project’s significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Based on analysis provided in the Draft EIR, it was determined that there would be less than significant impacts or no impacts related to agricultural and forestry resources, energy, greenhouse gas emissions, land use and planning, mineral resources, noise, population and housing, public services, recreation, utilities and service systems, and wildfire. There would be less than significant impacts with mitigation related to aesthetics, air quality, archaeological resources and human remains, biological resources, geology and soils, hazards and hazardous materials, hydrology and water quality, and tribal cultural resources. The Draft EIR also determined that the proposed project would have significant and unavoidable environmental impacts that cannot be mitigated to below a level of significance related to historical resources and transportation.

See Draft EIR - Pages 1.0-2 to 1.0-40 for further detail.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

During the scoping meeting, comments were received on: 1) existing conditions, 2) Project Description, 3) biological resources, 4) hydrology and water resources, 5) noise, and 6) transportation.

See Draft EIR - Pages 1.0-41 to 1.0-43 for further detail.

Provide a list of the responsible or trustee agencies for the project.
