Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2020099022

Project Title: Dinuba Water Well Project

Lead Agency: City of Dinuba

Contact Name: Ismael Hernandez, Public Works Director

Email: ihernandez@dinuba.ca.gov Phone Number: 559-591-5924

Project Location: Dinuba, CA (*City*) Tulare (*County*)

Project Decription (Proposed actions, location, and/or consequences).

PROJECT DESCRIPTION: This is an Addendum to the original Initial Study / Mitigated Negative Declaration (IS/MND) prepared for the Project. After filing the Notice of Determination, minor changes were made to the original Approved Project description. These changes consist of moving the storm drain basin directly to the north of the existing storm drain basin; adding approximately 2,000 linear feet of sewer main from the new well site east along El Monte Way; and adding approximately 3,200 linear feet of water main within El Monte Way to complete a looped system and to create a more uniform water pressure for the west side of the City. As demonstrated in the Addendum, the minor changes to the Project Description do not significantly increase the environmental impacts of the Project and the IS/MND continues to serve as the appropriate document addressing the environmental impacts of these changes, pursuant to California Environmental Quality Act (CEQA).
PROJECT LOCATION: The proposed well site will be located just outside the western boundary of the City, east of the Alta Irrigation Ditch. The site is outside the City limits but is owned by the City and is within the City's Sphere of Influence. The site is located generally north of El Monte Way/Avenue 416 and east of Road 64. The proposed water well will be located within an existing fenced area utilized for a City-operated storm drain outfall structure.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

BIO – 1 Protect burrowing owls (includes restrictions on timing of construction, preconstruction surveys, and other protective measures)

BIO - 2 Protect nesting birds (includes restrictions on timing of construction, preconstruction surveys, and other protective measures).

Cultural Resources

- In the event that archaeological remains are encountered at any time during development or ground-moving activities within the entire Project area, all work in the vicinity of the find should be halted until a qualified archaeologist can assess the discovery and take appropriate actions as necessary.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Controversy known to the Lead Agency:

No known areas of controversy are known regarding this project. A public hearing was held on October 27, 2020 for the original IS/MND and no public comments were received. A public hearing for the Addendum will occur on May 11, 2021.

Provide a list of the responsible or trustee agencies for the project.
