Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Sump Station Facilities Improvement Project

Lead Agency: City of Sacramento, Community Development Department

Contact Name: Scott Johnson, Senior Planner

Email: srjohnson@cityofsacramento.org Phone Number: (916) 808-5842

Project Location: Sacramento (*City*) Sacramento (*County*)

Project Decription (Proposed actions, location, and/or consequences).

The proposed project consists of five existing sump stations within the City of Sacramento: Sump 089, Sump 151, Sump 155, Sump 058, and Sump 102. The sump stations direct treated stormwater through underground piping to stormwater outfalls along waterways within the City. The proposed project entails the complete replacement of the pump discharge pipe for three drainage sump station facilities (Sump 089, Sump 151, and Sump 155) and installation of stairs on the waterside slope for two additional drainage sump station facilities (Sump 058 and Sump 102). The project also includes three proposed staging areas: one on the land side of the levee at Sump 089, one on La Riviera Drive just east of Howe Avenue, and one west of and adjacent to the southeast corner of Lathrop Way. Implementation of the proposed project would require City approval of 100% Issued for Bid Plan.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Initial Study/Mitigated Negative Declaration (IS/MND) identifies potentially significant impacts for the following issue areas: Air Quality, Biological Resources, Cultural Resources, and Tribal Cultural Resources. However, the IS/MND includes mitigation measures to reduce all potentially significant impacts to less-than-significant levels. For example, the IS/MND measures require the following: implementation of SMAQMD Best Available Control Technology and Basic Construction Emission Control Practices, specific avoidance and minimization measures to protect sensitive habitats, take avoidance surveys for protected wildlife species, cultural resources and tribal cultural resources sensitivity and awareness training, and specific protocols if any previously unknown cultural resources or tribal cultural resources are discovered during ground-disturbing activities.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Significant areas of controversy have not been identified for the proposed project.

Provide a list of the responsible or trustee agencies for the project.

California Department of Fish and Wildlife;
Central Valley Flood Protection Board;
Regional Water Quality Control Board;
Sacramento Metropolitan Air Quality Management District;
United States Army Corps of Engineers; and
United States Fish and Wildlife Service.
