Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Markleeville Water System Improvements Project

Lead Agency: State Water Resources Control Board

Contact Name: Gabriel Edwards

Email: gabriel.edwards@waterboards.ca.gov Phone Number: (916) 449-5990

Project Location: Markleeville, Alpine County
City *County*

Project Description (Proposed actions, location, and/or consequences).

The objectives of the project are to replace aging, failure-prone water distribution system piping and to implement distribution system changes intended to increase turnover of stored water and reduce the incidence of disinfection byproduct (DBP) exceedances. The project would: replace existing pipelines (within public rights-of-way) most vulnerable to failure, reducing lifetime operation and maintenance costs associated with pipeline repair; implement hydraulic improvements, achieving improvements to available fire flows and increased turnover of the Pleasant Valley water storage tank; increase system reliability by placing the Pleasant Valley Tank feed pumps at the WTP, where a standby generator can provide power during a utility outage; and provide two tiers of DBP control approaches: source control at the WTP and mixing and ventilation at the Pleasant Valley Tank.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant impacts to biological resources, cultural resources, hazards/hazardous materials, and wildfire hazard. Mitigation measures include biological surveys and avoidance measures, no disturbance buffers for cultural resources, and fire prevention and cessation measures.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A.

Provide a list of the responsible or trustee agencies for the project.
