Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Marshall Elementary School Expansion Project

Lead Agency: Fowler Unified School District

Contact Name: May Yang

Email: may.yang@fowler.k12.ca.us Phone Number: (559) 834-6084

Project Location: Fowler, Fresno
City *County*

Project Description (Proposed actions, location, and/or consequences).

The Fowler Unified School District is proposing the expansion of the existing Marshall Elementary School on an adjacent 3-acre portion of an undeveloped site located on North Armstrong Avenue in the City of Fowler, California (Project). The expansion of the elementary school campus is to serve the existing student population and relocate the District's early learning program. The preschool is a year-round program with hours between 7:30 a.m. and 5:30 p.m., Monday through Friday, and will serve 90 students at build-out. The site will include up to 6 classrooms, administration offices, parking, and play areas. There will be three modular buildings, with an approximate area totaling almost 16,000 square feet (sq. ft.). The school expansion site will be annexed into the City of Fowler and connect to the City of Fowler's water systems and to the Selma-Kingsburg-Fowler Sanitation District sewer systems. Construction of the Project is anticipated to take approximately 9-12 months.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

MM AES-1 would reduce any potentially significant impacts to aesthetics to less than significant levels.
MM BIO-1 through MM BIO-6 would reduce any potentially significant impacts to biological resources to less than significant levels.
MM CUL-1 and MM CUL-2 would reduce any potentially significant impacts to cultural resources to less than significant levels.
MM GEO-1 through MM GEO-3 would reduce any potentially significant impacts to geological resources to less than significant levels.
MM HAZ-1 would reduce any potentially significant impacts to hazards and hazardous materials to less than significant levels.
MM HYD-1 would reduce any potentially significant impacts to water quality to less than significant.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A

Provide a list of the responsible or trustee agencies for the project.
