# NOTICE OF PREPARATION AND SCOPING MEETING CITY OF ONTARIO

| | |
|---|---|
| **Date:** | July 7, 2021 |
| **Subject:** | Notice of Preparation (NOP) and Scoping Meeting for The Ontario Plan 2050 Supplemental Environmental Impact Report |
| **To:** | State Clearinghouse, State Responsible Agencies, State Trustee Agencies, Other Public Agencies, Interested Organizations |
| **Lead Agency/Sponsor:** | City of Ontario, Planning Department |
| **Project Title:** | The Ontario Plan (TOP) 2050 Supplemental Environmental Impact Report |

NOTICE IS HEREBY GIVEN that the City of Ontario (Latitude 34°03'N / Longitude 117°39'W) will prepare a Supplemental Environmental Impact Report (SEIR) for The Ontario Plan 2050 (TOP 2050). The City is the lead agency for the project. The purpose of this notice is (1) to serve as a Notice of Preparation of an EIR pursuant to the California Environmental Quality Act (CEQA) Guidelines § 15082, (2) to advise and solicit comments and suggestions regarding the scope and content of the EIR to be prepared for the proposed project, and (3) to notice the public scoping meeting.

Consistent with § 15168 and § 15163 of the CEQA Guidelines, the City will prepare a Supplemental EIR to address program-level environmental impacts associated with amendments to the City's previous The Ontario Plan, which was adopted pursuant to the EIR (SCH 2008101140) certified in January 2010 (Certified EIR). The proposed project is an update to the City's long-term plan of policies that will guide future development activities and City actions (TOP 2050). No specific development projects are proposed as part of this TOP 2050. However, the program-level SEIR can serve to streamline environmental review of future projects.

**Notice of Preparation:** The City of Ontario, as lead agency, requests that responsible and trustee agencies respond in a manner consistent with § 15082(b) of the CEQA Guidelines and § 21080.4 of the Public Resources Code. Responsible agencies must submit any comments in response to this notice during the 30-day public review period. The public review period will commence on **Tuesday, July 20, 2021**, and will close on **Thursday, August 19, 2021**. A copy of the NOP can be viewed electronically on the City's web page at: https://www.ontarioplan.org/top2050/.

**Written Comments:** Comments in response to this notice can be emailed to Thomas Grahn at tgrahn@ontarioca.gov or can be physically mailed in writing to the address below by the close of the 30-day NOP review period at 5:00 pm on August 19, 2021:

City Hall, Planning Department
303 East "B" Street
Ontario, CA 91764

Please include the name, email, and/or telephone number of a contact person at your agency or organization who can answer questions about the comment.

**Scoping Meeting:** The City will hold a scoping meeting in conjunction with this NOP in order to present the project and the SEIR process and to provide an opportunity for agency representatives and the public to assist the lead agency in determining the scope and content of the environmental analysis for the SEIR. As a result of COVID-19 and restrictions placed on in-person gatherings throughout the State of California under Executive Order N-29-20 and N-08-21, the City will host an online public meeting to receive public comments on the scope of the SEIR rather than an

in-person event. The online public meeting will be hosted on the evening of **Thursday, August 5, 2021, at 6:00 pm** and conducted via a live Zoom meeting. To participate in the scoping meeting, please access the TOP 2050 Update website for meeting information. Information on how to participate will be posted 72 hours before the scoping meeting. The scoping meeting will begin with a presentation at 6:00 pm, followed by questions from the public.

# Project Location

The City of Ontario is located in the southwestern corner of San Bernardino County and is surrounded by the cities of Chino and Montclair and unincorporated San Bernardino County to the west; the cities of Upland and Rancho Cucamonga to the north; the City of Fontana and unincorporated San Bernardino County to the east; and the City of Eastvale and unincorporated Riverside County to the south (see Figures 1, *Regional Location*, and 2, *Aerial Photograph)*. Regional circulation to and through the city is provided by Interstate 10 and State Route 60 (east-west) and by Interstate 15 and State Route 83 (north-south).

# Project Description

## THE ONTARIO PLAN

The Ontario Plan (TOP) is the City's policy and implementation framework that guides the long-term growth and improvement of the Ontario community through six interrelated components of city governance:

- **A Vision** that provides a sense of the purpose and mission for city governance and sets the tone for the other components of TOP. The Vision's central theme is a sustained, community-wide prosperity that continuously adds value and yields benefits.
- **A Governance Manual** that establishes a set of goals and policies to promote consistent City leadership based on the principles of regional leadership, transparency, long-term value, accountability, and inclusivity.
- **A Policy Plan** that serves as the City's legally required General Plan and that states long-term goals, principles, and policies to achieve Ontario's Vision through nine elements: land use, housing, mobility, safety, environmental resources, parks and recreation, community economics, community design, and social resources.
- A list of **City Council Priorities** that shape the City's ongoing annual budgeting process, with a focus on a variety of short- and long-term goals and objectives.
- An **Implementation Plan** that identifies the actions needed to carry out the TOP's policies. This includes initiatives by the City as well as decisions on public and private development projects and City activity programs.
- A **Tracking and Feedback** system that charts the City's progress toward achieving the Policy Plan goals, providing data and analysis that enables decision makers to make strategic course corrections in response to changing circumstances and monitor ongoing operational effectiveness.

## TOP 2050

The proposed project, TOP 2050, is an update to TOP to guide the City's development and conservation for the next 30 years through 2050. The proposed project is a focused effort, with particular emphasis on conducting technical refinements to the Policy Plan to comply with state housing mandates; conform with new state laws related to community health, environmental justice, climate adaption, resiliency, and mobility; bring long-term growth and fiscal projections into alignment with current economic conditions; and advance the Tracking and Feedback system and Implementation Plan.

## Policy Plan

The TOP 2050 update focuses on technical updates to the Policy Plan to comply with state housing mandates and conform with new state laws related to community health, environmental justice, climate adaption, resiliency, and

mobility. The majority of updates created through the proposed project will weave refinements throughout the existing structure of the Policy Plan, which is organized into nine broad categories:

» **Land Use Element** establishes how land is developed, used, and arranged to ensure compatibility and add value to the community in terms of function, design, and fiscal return.

» **Housing Element** ensures greater production, preservation, and improvement of housing in the community in the context of existing and future housing needs, constraints to the production of housing, and available land and financial resources.

» **Parks and Recreation Element** establishes broad direction for the Ontario park system and recreation programs, emphasizing the vital role parks and recreation programs play in economic development, land use, housing, community health, infrastructure, and transportation goals.

» **Environmental Resources Element** addresses how resources are managed comprehensively using systems that are environmentally and economically sustainable and meet growth demand in Ontario.

» **Community Economics Element** articulates the City's approach to developing and maintaining the local economy, retaining and attracting further investments, and connecting economic development with the City's long-term fiscal health.

» **Safety Element** addresses how the City protects life, property, and commerce from impacts associated with human-made and natural hazards, disasters, and other threats to public safety; also identifies ways the City can establish strategies to adapt to increased hazard risks and strategies to become more resilient.

» **Mobility Element** coordinates the circulation system with future land use patterns and buildout to satisfy local and subregional mobility needs, as well as access and connectivity among the various neighborhoods, villages, and districts.

» **Community Design Element** establishes design guidance and requirements to protect existing investments; achieve sustainable environments; add value to the community; and create safe and pleasant places where people want to live, work, and recreate.

» **Social Resources Element** improves access to quality and accessible health care, education, community services and cultural activities—critical components to achieving a prosperous, more equitable, and complete community.

The land use designations in the City of Ontario will remain as designated under the current General Plan, with adjustments made to the projected land use mix and boundaries of the mixed-use areas. Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the TOP 2050 Policy Plan compared to existing conditions and compared to the buildout potential under the currently approved TOP ("approved project" or "approved TOP"). Figures 3, *Current Land Use Plan Map*, and 4, *Proposed Land Use Plan Map*, include the approved TOP and proposed TOP 2050 land use maps for the City.

Table 1 Buildout Statistical Summary

| Scenario | Acres | Units | Population | Nonresidential Square Feet | Employment |
|---|---|---|---|---|---|
| Existing Conditions | 32,022 | 52,466 | 179,597 | 156,065,382 | 131,999 |
| Approved TOP | 32,022 | 102,358 | 350,716 | 260,399,271 | 313,067 |
| Proposed TOP 2050 | 32,022 | 128,419 | 414,704 | 253,472,682 | 285,577 |
| **Net Difference (Proposed TOP 2050 -Approved TOP)** | **0** | **26,061** | **63,988** | **6,926,589** | **-27,490** |

### Other Components of The Ontario Plan

Originally adopted in 2010, the City's Vision still provides a strong foundation for the TOP 2050 and does not need to be overhauled or altered in any way. The City Council Priorities are updated concurrently with the annual budgeting process. The Governance Manual will receive minor (if any) refinements to reflect new information and available technologies that could improve municipal operations and decision making. The Implementation Plan will be updated to reflect changes to the Policy Plan. The Tracking and Feedback system will be advanced and formalized through additional coordination and software improvements.

### Related Implementation Actions

To implement the update Policy Plan and new requirements in state housing law, the proposed project will also include minor refinements to the City's Development Code—primarily to the Medium-High Density Residential and Mixed-Use Zoning Districts—to facilitate affordable housing and implement changes from the Housing Element update.

## Public Agency Approvals

The proposed TOP 2050 will require adoption by the Ontario City Council. The Planning Commission and other decision-making bodies will review the proposed project and make recommendations to City Council. Though other agencies may be consulted during the project process, their approval is not required for adoption of TOP 2050. However, subsequent development under TOP 2050 may require approval of state or federal responsible or trustee agencies that may rely on the programmatic SEIR for decisions in their areas of expertise.

## Environmental Factors Potentially Affected

The City determined that the TOP 2050 would require preparation of a SEIR to address all 20 environmental topics identified in the CEQA Guidelines; thus, an Initial Study was not prepared in conjunction with this NOP.

The TOP 2050 could potentially affect the following environmental factors, and each will be addressed in the Supplemental EIR:

- Aesthetics
- Agriculture & Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Energy
- Geology/Soils
- Greenhouse Gas Emissions
- Hazards & Hazardous Materials
- Hydrology/Water Quality
- Land Use & Planning
- Mineral Resources
- Noise
- Population & Housing
- Public Services
- Recreation
- Transportation
- Tribal Cultural Resources
- Utilities & Service Systems
- Wildfire

The City includes properties that are on a list compiled pursuant to Government Code Section 65962.5.

If you have further questions or require additional information, please contact Thomas Grahn, Senior Planner at 909-395-2413, or email at tgrahn@ontarioca.gov.

**From:** MATHEW, JACOB K@DOT <Jacob.MATHEW@dot.ca.gov>
**Sent:** Thursday, July 22, 2021 11:38 AM
**To:** Thomas Grahn <TGrahn@ontarioca.gov>
**Subject:** Ontario Plan 2050

Hi,
Thank you for providing the California Department of Transportation (Caltrans) the opportunity to review and comment on the Notice of Preparation (NOP)of a Supplemental Environmental Report for the Ontario Plan 2050 (Project), for the City of Ontario. The proposed plan is an update to the City's long-term plan of policies that will guide development activities and City actions (TOP 2050).

As the owner and operator of the State Highway System (SHS), it is our responsibility to coordinate and consult with local jurisdictions when a proposed development may impact our facilities. As the responsible agency under the California Environmental Quality Act, it is also our responsibility to make recommendations to offset associated impacts with the proposed project. Although the project is under the jurisdiction of the City of Ontario, due to the project's potential impact to the State facilities, it is also subject to the policies and regulations that govern the SHS.

In the preceding Supplemental EIR, we recommend a Traffic Impact Analysis (TIA) be prepared to accurately evaluate the extent of potential impacts of the project to the operational characteristics of the existing State facilities by the project area. We recommend the TIA be submitted prior to the circulation of the Supplemental EIR to ensure timely review of the submitted materials to address any potential issues. We offer the following comments:

1) **<u>Submit copies of all traffic related documents for review.</u>** The data used in the TIA should not be more than 2 years old, and shall be based on the Southern California Association of Governments 2016 Regional Transportation Plan Model. Use the Highway Capacity Manual 6 methodology for all traffic analyses.

Caltrans is committed to providing a safe transportation system for all users. We encourage the City to embark a safe, sustainable, integrated and efficient transportation system and complete street to enhance California's economy and livability. A pedestrian/bike-friendly environment served by multimodal transportation would reduce traffic congestion prevalent in the surrounding areas.

2) Design the local streets to serve vehicular and pedestrian circulation equally, and for safe pedestrian friendly environment. Consider both Americans with Disability Act and California Highway Design Manual standards and requirements to provide transportation routes for all users and modes, including pedestrian and bicyclists. Provide a continuous multi-modal circulation system throughout the City, specifically for pedestrians, allowing current/future residents, employees, and guests to access the attraction places.

3) Relegate the parking spaces to the back of the buildings and locate preferential parking for vanpools and carpools, along with, secure, visible, and convenient bicycle parking/racks accessible to retail and office locations. Consider installing electric vehicle charging stations, and locate parking space for low-emitting, fuel-efficient, alternative-fueled vehicle visitor parking in commercial and office uses.

These recommendations are preliminary and summarize our review of materials provided for our evaluation. If you have any questions regarding this email, please contact me.

Thanks,
Jacob Mathew
D-8, Planning

**Re: 2021070364, The Ontario Plan (TOP) 2050 Supplemental Environmental Impact Report (SEIR) Project, San Bernardino County**

Dear Mr. Grahn:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, §15064.5 (b) (CEQA Guidelines §15064.5 (b)). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines §15064 (a)(1)). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). **AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements.** If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

**Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.**

AB 52

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

**1.** Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project: Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

- **a.** A brief description of the project.
- **b.** The lead agency contact information.
- **c.** Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).
- **d.** A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).

**2.** Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report: A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subds. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1(b)).

- **a.** For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).

**3.** Mandatory Topics of Consultation If Requested by a Tribe: The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

- **a.** Alternatives to the project.
- **b.** Recommended mitigation measures.
- **c.** Significant effects. (Pub. Resources Code §21080.3.2 (a)).

**4.** Discretionary Topics of Consultation: The following topics are discretionary topics of consultation:

- **a.** Type of environmental review necessary.
- **b.** Significance of the tribal cultural resources.
- **c.** Significance of the project's impacts on tribal cultural resources.
- **d.** If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).

**5.** Confidentiality of Information Submitted by a Tribe During the Environmental Review Process: With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).

**6.** Discussion of Impacts to Tribal Cultural Resources in the Environmental Document: If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

- **a.** Whether the proposed project has a significant impact on an identified tribal cultural resource.
- **b.** Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

**7.** Conclusion of Consultation: Consultation with a tribe shall be considered concluded when either of the following occurs:

**a.** The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or

**b.** A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).

**8.** Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document: Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).

**9.** Required Consideration of Feasible Mitigation: If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b). (Pub. Resources Code §21082.3 (e)).

**10.** Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:

**a.** Avoidance and preservation of the resources in place, including, but not limited to:

**i.** Planning and construction to avoid the resources and protect the cultural and natural context.

**ii.** Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.

**b.** Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:

**i.** Protecting the cultural character and integrity of the resource.

**ii.** Protecting the traditional use of the resource.

**iii.** Protecting the confidentiality of the resource.

**c.** Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.

**d.** Protecting the resource. (Pub. Resource Code §21084.3 (b)).

**e.** Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).

**f.** Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).

**11.** Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource: An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:

**a.** The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.

**b.** The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.

**c.** The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf

SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf.

Some of SB 18's provisions include:

**1.** Tribal Consultation: If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code §65352.3 (a)(2)).

**2.** No Statutory Time Limit on SB 18 Tribal Consultation. There is no statutory time limit on SB 18 tribal consultation.

**3.** Confidentiality: Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).

**4.** Conclusion of SB 18 Tribal Consultation: Consultation should be concluded at the point in which:

- **a.** The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
- **b.** Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: http://nahc.ca.gov/resources/forms/.

NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

**1.** Contact the appropriate regional California Historical Research Information System (CHRIS) Center (http://ohp.parks.ca.gov/?page_id=1068) for an archaeological records search. The records search will determine:

- **a.** If part or all of the APE has been previously surveyed for cultural resources.
- **b.** If any known cultural resources have already been recorded on or adjacent to the APE.
- **c.** If the probability is low, moderate, or high that cultural resources are located in the APE.
- **d.** If a survey is required to determine whether previously unrecorded cultural resources are present.

**2.** If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.

- **a.** The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.

**b.** The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

**3.** Contact the NAHC for:

**a.** A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.

**b.** A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.

**4.** Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.

**a.** Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, §15064.5(f) (CEQA Guidelines §15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.

**b.** Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.

**c.** Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code §7050.5, Public Resources Code §5097.98, and Cal. Code Regs., tit. 14, §15064.5, subdivisions (d) and (e) (CEQA Guidelines §15064.5, subds. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

**To:** Thomas Grahn <TGrahn@ontarioca.gov>
**Subject:** Ontario GP transmittal

Hi Thomas,

Thank you for transmitting the above reference project to ALUC for review.

While the project is located outside the jurisdictions of the Riverside County ALUC, it is important to note that the ALUC has prepared an airport land use compatibility plan for the Chino Airport, which includes properties on both sides of the Riverside County and San Bernardino County sides of the boundary line. This plan identifies the City property located within Zones B1, C, D and E of the Chino Municipal Airport Land Use Compatibility Plan. You can find the plan criteria at the following website http://www.rcaluc.org/Plans/New-Compatibility-Plan [rcaluc.org].

The inevitable corollary of continued encroachment of urbanization in the vicinity of an airport, unless open areas are planned in advance, is a continual reduction in the number and size of open areas where an aircraft may safely land without endangering the populace.

If you have any questions, please feel free to contact me.

Paul Rull
ALUC Director

**Subject:** RE: Notice of Preparation (NOP) for The Ontario Plan (TOP) 2050 Supplemental Environmental Impact Report (SEIR)

Hello Thomas,

Thank you for contacting the San Manuel Band of Mission Indians (SMBMI) regarding the above referenced project. SMBMI appreciates the opportunity to review the project documentation, which was received by our Cultural Resources Management Department on July 20th. The project is located within Serrano ancestral territory, and the area for the project is of interest, but Tribe sees no conflicts with the zoning changes at this time. However, when specific projects are planned and implemented, SMBMI might have comments and/or request formal consultation with the Lead Agency pursuant to CEQA (as amended, 2015) and CA PRC 21080.3.1.

This communication concludes SMBMI's input on this project, at this time, and no additional consultation under SB18 is required. If you should have any further questions with regard to this matter, please do not hesitate to contact me at your convenience, as I will be your Point of Contact (POC) for SMBMI with respect to this project.

Respectfully,
Ryan Nordness

**RE: SCAG Comments on the Notice of Preparation of a Supplemental Environmental Impact Report for The Ontario Plan 2050 [SCAG NO. IGR6519]**

Dear Mr. Grahn,

Thank you for submitting the Notice of Preparation of a Supplemental Environmental Impact Report for The Ontario Plan 2050 ("proposed project") to the Southern California Association of Governments (SCAG) for review and comment. SCAG is responsible for providing informational resources to regionally significant plans, projects, and programs per the California Environmental Quality Act (CEQA) to facilitate the consistency of these projects with SCAG's adopted regional plans, to be determined by the lead agencies.[1]

Pursuant to Senate Bill (SB) 375, SCAG is the designated Regional Transportation Planning Agency under state law and is responsible for preparation of the Regional Transportation Plan (RTP) including the Sustainable Communities Strategy (SCS). SCAG's feedback is intended to assist local jurisdictions and project proponents to implement projects that have the potential to contribute to attainment of Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) goals and align with RTP/SCS policies. Finally, SCAG is also the authorized regional agency for Inter-Governmental Review (IGR) of programs proposed for Federal financial assistance and direct Federal development activities, pursuant to Presidential Executive Order 12372.

SCAG staff has reviewed the Notice of Preparation of a Supplemental Environmental Impact Report for The Ontario Plan 2050 in San Bernardino County. The proposed project includes an update to the City's long-term plan of policies, including technical updates to the Policy Plan to comply with state housing mandates and conform with new state laws related to community health, environmental justice, climate adaptation, resiliency, and mobility.

**When available, please email environmental documentation to *IGR@scag.ca.gov* providing, at a minimum, the full public comment period for review.**

If you have any questions regarding the attached comments, please contact the Intergovernmental Review (IGR) Program, attn.: Anita Au, Senior Regional Planner, at (213) 236-1874 or IGR@scag.ca.gov. Thank you.

Sincerely,

Frank Wen, Ph.D.
Manager, Planning Strategy Department

[1] Lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with the 2020 RTP/SCS (Connect SoCal) for the purpose of determining consistency for CEQA.

**COMMENTS ON THE NOTICE OF PREPARATION OF A SUPPLEMENTAL ENVIRONMENTAL IMPACT REPORT FOR THE ONTARIO PLAN 2050 [SCAG NO. IGR6519]**

## CONSISTENCY WITH CONNECT SOCAL

SCAG provides informational resources to facilitate the consistency of the proposed project with the adopted 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS or Connect SoCal). For the purpose of determining consistency with CEQA, lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with Connect SoCal.

## CONNECT SOCAL GOALS

The SCAG Regional Council fully adopted Connect SoCal in September 2020. Connect SoCal, also known as the 2020 – 2045 RTP/SCS, builds upon and expands land use and transportation strategies established over several planning cycles to increase mobility options and achieve a more sustainable growth pattern. The long-range visioning plan balances future mobility and housing needs with goals for the environment, the regional economy, social equity and environmental justice, and public health. The goals included in Connect SoCal may be pertinent to the proposed project. These goals are meant to provide guidance for considering the proposed project. Among the relevant goals of Connect SoCal are the following:

| SCAG CONNECT SOCAL GOALS | |
|---|---|
| Goal #1: | *Encourage regional economic prosperity and global competitiveness* |
| Goal #2: | *Improve mobility, accessibility, reliability and travel safety for people and goods* |
| Goal #3: | *Enhance the preservation, security, and resilience of the regional transportation system* |
| Goal #4: | *Increase person and goods movement and travel choices within the transportation system* |
| Goal #5: | *Reduce greenhouse gas emissions and improve air quality* |
| Goal #6: | *Support healthy and equitable communities* |
| Goal #7: | *Adapt to a changing climate and support an integrated regional development pattern and transportation network* |
| Goal #8: | *Leverage new transportation technologies and data-driven solutions that result in more efficient travel* |
| Goal #9: | *Encourage development of diverse housing types in areas that are supported by multiple transportation options* |
| Goal #10: | *Promote conservation of natural and agricultural lands and restoration of habitats* |

For ease of review, we encourage the use of a side-by-side comparison of SCAG goals with discussions of the consistency, non-consistency or non-applicability of the goals and supportive analysis in a table format. Suggested format is as follows:

| SCAG CONNECT SOCAL GOALS | | |
|---|---|---|
| | Goal | Analysis |
| Goal #1: | *Encourage regional economic prosperity and global competitiveness* | *Consistent: Statement as to why;*<br>*Not-Consistent: Statement as to why;*<br>*Or*<br>*Not Applicable: Statement as to why;*<br>*SEIR page number reference* |
| Goal #2: | *Improve mobility, accessibility, reliability and travel safety for people and goods* | *Consistent: Statement as to why;*<br>*Not-Consistent: Statement as to why;*<br>*Or*<br>*Not Applicable: Statement as to why;*<br>*SEIR page number reference* |
| etc. | | etc. |

**Connect SoCal Strategies**

To achieve the goals of Connect SoCal, a wide range of land use and transportation strategies are included in the accompanying twenty (20) technical reports. Of particular note are multiple strategies included in Chapter 3 of Connect SoCal intended to support implementation of the regional Sustainable Communities Strategy (SCS) framed within the context of focusing growth near destinations and mobility options; promoting diverse housing choices; leveraging technology innovations; supporting implementation of sustainability policies; and promoting a Green Region. To view Connect SoCal and the accompanying technical reports, please visit the Connect SoCal webpage. Connect SoCal builds upon the progress from previous RTP/SCS cycles and continues to focus on integrated, coordinated, and balanced planning for land use and transportation that helps the SCAG region strive towards a more sustainable region, while meeting statutory requirements pertinent to RTP/SCSs. These strategies within the regional context are provided as guidance for lead agencies such as local jurisdictions when the proposed project is under consideration.

SCAG staff would like to call your attention to resources available from SCAG's Regional Climate Adaptation Framework including the Southern California Climate Adaptation Planning Guide, Communication and Outreach Toolkit, Library of Model Policies, and SB 379 Compliance Curriculum for Local Jurisdictions.

**DEMOGRAPHICS AND GROWTH FORECASTS**

A key, formative step in projecting future population, households, and employment through 2045 for Connect SoCal was the generation of a forecast of regional and county level growth in collaboration with expert demographers and economists on Southern California. From there, jurisdictional level forecasts were ground-truthed by subregions and local agencies, which helped SCAG identify opportunities and barriers to future development. This forecast helps the region understand, in a very general sense, where we are expected to grow, and allows SCAG to focus attention on areas that are experiencing change and may have increased transportation needs. After a year-long engagement effort with all 197 jurisdictions one-on-one, 82 percent of SCAG's 197 jurisdictions provided feedback on the forecast of future growth for Connect SoCal. SCAG also sought feedback on potential sustainable growth strategies from a broad range of stakeholder groups – including local jurisdictions, county transportation commissions, other partner agencies, industry groups, community-based organizations, and the general public. Connect SoCal utilizes a bottom-up approach in that total projected growth for each jurisdiction reflects feedback received from jurisdiction staff, including city managers, community development/planning directors, and local staff. Growth at the neighborhood level (i.e., transportation analysis zone (TAZ) reflects entitled projects and adheres to current general and specific plan maximum densities as conveyed by jurisdictions (except in cases where entitled projects and development agreements exceed these capacities as calculated by SCAG). Neighborhood level growth projections also feature strategies that help to reduce greenhouse gas emissions (GHG) from automobiles and light trucks to achieve Southern California's GHG reduction target, approved by the California Air Resources Board (CARB) in accordance

with state planning law. Connect SoCal's Forecasted Development Pattern is utilized for long range modeling purposes and does not supersede actions taken by elected bodies on future development, including entitlements and development agreements. SCAG does not have the authority to implement the plan -- neither through decisions about what type of development is built where, nor what transportation projects are ultimately built, as Connect SoCal is adopted at the jurisdictional level. Achieving a sustained regional outcome depends upon informed and intentional local action. To access jurisdictional level growth estimates and forecasts for years 2016 and 2045, please refer to the Connect SoCal Demographics and Growth Forecast Technical Report. The growth forecasts for the region and applicable jurisdictions are below.

| | Adopted SCAG Region Wide Forecasts | | | | Adopted City of Ontario Forecasts | | | |
|---|---|---|---|---|---|---|---|---|
| | **Year 2020** | **Year 2030** | **Year 2035** | **Year 2045** | **Year 2020** | **Year 2030** | **Year 2035** | **Year 2045** |
| Population | 19,517,731 | 20,821,171 | 21,443,006 | 22,503,899 | 192,072 | 221,806 | 236,012 | 269,050 |
| Households | 6,333,458 | 6,902,821 | 7,170,110 | 7,633,451 | 51,841 | 60,602 | 64,787 | 74,521 |
| Employment | 8,695,427 | 9,303,627 | 9,566,384 | 10,048,822 | 124,571 | 143,699 | 152,116 | 169,331 |

## MITIGATION MEASURES

SCAG staff recommends that you review the Final Program Environmental Impact Report (Final PEIR) for Connect SoCal for guidance, as appropriate. SCAG's Regional Council certified the PEIR and adopted the associated Findings of Fact and a Statement of Overriding Considerations (FOF/SOC) and Mitigation Monitoring and Reporting Program (MMRP) on May 7, 2020 and also adopted a PEIR Addendum and amended the MMRP on September 3, 2020 (please see the PEIR webpage and scroll to the bottom of the page for the PEIR Addendum). The PEIR includes a list of project-level performance standards-based mitigation measures that may be considered for adoption and implementation by lead, responsible, or trustee agencies in the region, as applicable and feasible. Project-level mitigation measures are within responsibility, authority, and/or jurisdiction of project-implementing agency or other public agency serving as lead agency under CEQA in subsequent project- and site- specific design, CEQA review, and decision-making processes, to meet the performance standards for each of the CEQA resource categories.

## REGIONAL HOUSING NEEDS ALLOCATION

On March 4, 2021 SCAG's Regional Council adopted the 6th cycle Final Regional Housing Needs Assessment (RHNA) Allocation Plan which covers the planning period October 2021 through October 2029. The 6th cycle Final RHNA allocation for the applicable jurisdiction is below.

| SCAG 6th Cycle Final RHNA Allocation for City of Ontario | |
|---|---|
| Very low income | 5,640 |
| Low income | 3,286 |
| Moderate income | 3,329 |
| Above moderate income | 8,599 |
| Total RHNA Allocation | 20,854 |

Sixth cycle housing elements are due to the California Department of Housing and Community Development (HCD) by October 15, 2021. SCAG encourages jurisdictions to prepare the draft housing element in advance of the due date to ensure adequate time to address HCD comments and adopt a final housing element. Jurisdictions that do not have a compliant housing element may be ineligible for certain State funding and grant opportunities and may be at risk for legal action from stakeholders or HCD.

SCAG staff would like to call your attention to SCAG's HELPR 2.0, a web-mapping tool developed by SCAG to help local jurisdictions and stakeholders understand local land use, site opportunities, and environmental sensitivities for aligning housing planning with the state Department of Housing and Community Development's (HCD) 6th cycle housing element requirements.

**ENVIRONMENTAL JUSTICE**

Per Senate Bill 1000 (SB 1000), local jurisdictions in California with disadvantaged communities are required to develop an Environmental Justice (EJ) Element or consider EJ goals, policies, and objectives in their General Plans when updating two or more General Plan Elements. SCAG staff recommends that you review the Environmental Justice Technical Report and the updated Environmental Justice Toolbox, which is a resource document to assist local jurisdictions in developing EJ-related goals and policies regarding solutions for EJ-related community issues.

Ontario, California 91764

**Notice of Preparation of a Supplemental Environmental Impact Report for the Ontario Plan 2050**

South Coast Air Quality Management District (South Coast AQMD) staff appreciates the opportunity to comment on the above-mentioned document. Our comments are recommendations on the analysis of potential air quality impacts from the Proposed Project that should be included in the Supplemental Environmental Impact Report (EIR). Please send a copy of the Supplemental EIR upon its completion and public release directly to South Coast AQMD as copies of the Supplemental EIR submitted to the State Clearinghouse are not forwarded. **In addition, please send all appendices and technical documents related to the air quality, health risk, and greenhouse gas analyses and electronic versions of all emission calculation spreadsheets, and air quality modeling and health risk assessment input and output files (not PDF files). Any delays in providing all supporting documentation for our review will require additional review time beyond the end of the comment period.**

**CEQA Air Quality Analysis**

Staff recommends that the Lead Agency use South Coast AQMD's CEQA Air Quality Handbook and website[1] as guidance when preparing the air quality and greenhouse gas analyses. It is also recommended that the Lead Agency use the CalEEMod[2] land use emissions software, which can estimate pollutant emissions from typical land use development and is the only software model maintained by the California Air Pollution Control Officers Association.

South Coast AQMD has developed both regional and localized significance thresholds. South Coast AQMD staff recommends that the Lead Agency quantify criteria pollutant emissions and compare the emissions to South Coast AQMD's CEQA regional pollutant emissions significance thresholds[3] and localized significance thresholds (LSTs)[4] to determine the Proposed Project's air quality impacts. The localized analysis can be conducted by either using the LST screening tables or performing dispersion modeling.

The Lead Agency should identify any potential adverse air quality impacts that could occur from all phases of the Proposed Project and all air pollutant sources related to the Proposed Project. Air quality impacts from both construction (including demolition, if any) and operations should be calculated. Construction-related air quality impacts typically include, but are not limited to, emissions from the use of heavy-duty equipment from grading, earth-loading/unloading, paving, architectural coatings, off-road mobile sources (e.g., heavy-duty construction equipment) and on-road mobile sources (e.g., construction worker vehicle trips, material transport trips, and hauling trips). Operation-related air quality impacts may include, but are not limited to, emissions from

[1] South Coast AQMD's CEQA Handbook and other resources for preparing air quality analyses can be found at: http://www.aqmd.gov/home/rules-compliance/ceqa/air-quality-analysis-handbook.
[2] CalEEMod is available free of charge at: www.caleemod.com.
[3] South Coast AQMD's CEQA regional pollutant emissions significance thresholds can be found at: http://www.aqmd.gov/docs/default-source/ceqa/handbook/scaqmd-air-quality-significance-thresholds.pdf.
[4] South Coast AQMD's guidance for performing a localized air quality analysis can be found at: http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/localized-significance-thresholds.

stationary sources (e.g., boilers and air pollution control devices), area sources (e.g., solvents and coatings), and vehicular trips (e.g., on- and off-road tailpipe emissions and entrained dust). Air quality impacts from indirect sources, such as sources that generate or attract vehicular trips, should be included in the analysis. Furthermore, emissions from the overlapping construction and operational activities should be combined and compared to South Coast AQMD's regional air quality CEQA *operational* thresholds to determine the level of significance.

If the Proposed Project generates diesel emissions from long-term construction or attracts diesel-fueled vehicular trips, especially heavy-duty diesel-fueled vehicles, it is recommended that the Lead Agency perform a mobile source health risk assessment[5].

The California Air Resources Board's (CARB) *Air Quality and Land Use Handbook: A Community Health Perspective*[6] is a general reference guide for evaluating and reducing air pollution impacts associated with new projects that go through the land use decision-making process with additional guidance on strategies to reduce air pollution exposure near high-volume roadways available in CARB's technical advisory[7].

The South Coast AQMD's *Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning*[8] includes suggested policies that local governments can use in their General Plans or through local planning to prevent or reduce potential air pollution impacts and protect public health. It is recommended that the Lead Agency review this Guidance Document as a tool when making local planning and land use decisions.

**Mitigation Measures**

In the event that the Proposed Project results in significant adverse air quality impacts, CEQA requires that all feasible mitigation measures that go beyond what is required by law be utilized to minimize these impacts. Any impacts resulting from mitigation measures must also be analyzed. Several resources to assist the Lead Agency with identifying potential mitigation measures for the Proposed Project include South Coast AQMD's CEQA Air Quality Handbook[1], South Coast AQMD's Mitigation Monitoring and Reporting Plan for the 2016 Air Quality Management Plan[9], and Southern California Association of Government's Mitigation Monitoring and Reporting Plan for the 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy[10].

South Coast AQMD staff is available to work with the Lead Agency to ensure that air quality, greenhouse gas, and health risk impacts from the Proposed Project are accurately evaluated and mitigated where feasible. If you have any questions regarding this letter, please contact me at lsun@aqmd.gov.

Sincerely,

| LU2-8 | **Transitional Areas.** We require development in transitional areas to protect the quality of life of current residents. | |
| LU2-9 | **Methane Gas Sites.** We require sensitive land uses and new uses on former dairy farms or other methane-producing sites to be designed to minimize health risks. | |
| LU2-10 | **NEW POLICY proposed to meet requirements of new State laws.** | **Sensitive Uses.** We monitor and share information with the community about stationary and non-stationary emission sources. We encourage siting and design of facilities to minimize health and safety risks on existing and proposed sensitive uses, especially in environmental justice areas. |
| LU2-11 | **NEW POLICY to integrate with changed to the Community Design Element** | **Context-Aware Transitions and Connections**. We require new development projects and land-planning efforts to provide context-aware and appropriate transitions and connections between existing and planned neighborhoods, blocks, sites, and buildings.<br><br>(Link to Community Design Element Policies CD-1.1, CD-1.3, CD-3.4) |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| **LU3** | **Flexibility** | |
| **LU3** | **Staff, regulations, and processes that support and allow flexible responses to conditions and circumstances in order to achieve the Vision.** | |
| LU3-1 | **Development Standards.** We maintain clear development standards that allow flexibility to achieve our Vision. | **Development Standards.** We maintain clear development standards that allow flexibility to achieve our Vision and provide objective standards that ensure predictability and deliver the intended physical outcomes.<br><br>(Link to Community Design Element *Design Quality* and *Urban, Mixed Use, and Transit-oriented Place Types* Sections) |
| LU3-2 | **Design Incentives.** We offer design incentives to help projects achieve the Vision. (Link to Community Design Element) | |
| LU3-3 | **Land Use Flexibility.** We consider uses not typically permitted within a land-use category if doing so improves livability, reduces vehicular trips, creates community gathering places and activity nodes, and helps create identity. | |
| **LU4** | **Phased Growth** | |
| **LU4** | **Development that provides short-term value only when the opportunity to achieve our Vision can be preserved.** | |
| LU4-1 | **Commitment to Vision.** We are committed to achieving our Vision but realize that it may take time and several interim steps to get there. | |
| LU4-2 | **Interim Development.** We allow development in growth areas that is not immediately reflective of our ultimate Vision, provided it can be modified or replaced when circumstances are right. We will not allow development that impedes, precludes, or compromises our ability to achieve our Vision. (Refer to Community Economics Policy CE2-3). | **Interim Development.** We allow development in urban, mixed-use, and transit-oriented Place Types ~~growth areas~~ that is not immediately reflective of our ultimate Vision for the Place Type, provided~~.~~ ~~I~~it can be modified or replaced when circumstances are right to support development aligned with the Place Type Vision. We will not allow development that impedes, precludes, or compromises our ability to achieve our Vision.<br><br>(~~Refer~~Link to Community Economics Element Policy CE-2.3, and Community Design Element *Urban, Mixed Use, and Transit-oriented Place Types* section). |
| LU4-3 | **Infrastructure Timing.** We require that the necessary infrastructure and services be in place prior to or concurrently with development. | |
| LU4-4 | **NEW POLICY to integrate with changed to the Community Design Element** | **Shared Infrastructure:** We encourage and facilitate the use of shared infrastructure (including shared or managed parking) in urban, mixed-use, and transit-oriented Place Types**.**<br><br>(Link to Community Design Element Policy CD-3.6*)* |
| **LU5** | **Airport Planning** | |
| **LU5** | **Integrated airport facilities that minimize negative impacts and maximize economic benefit.** | |
| LU5-1 | **Coordination with Airport Authorities.** We collaborate with FAA, Caltrans Division of Aeronautics, airport owners, neighboring jurisdictions, and other shareholders in the preparation, update, and maintenance of airport-related plans. | |
| LU5-2 | **Airport Planning Consistency.** We coordinate with airport authorities to ensure The Ontario Plan is consistent with state law, federal regulations, and/or adopted master plans, and airport land use compatibility plans for ONT and Chino Airport. | |
| LU5-3 | **Airport Impacts.** We work with agencies to maximize resources to mitigate the impacts and hazards related to airport operations – their homes. | |
| LU5-4 | **ONT Growth Forecast.** We support and promote an ONT that accommodates 30 million annual passengers and 1.6 million tons of cargo per year, as long as the impacts associated with that level of operations are planned for and mitigated. | |
| LU5-5 | **Airport Compatibility Planning for ONT.** We create and maintain the Airport Land Use Compatibility Plan for ONT. | |
| LU5-6 | **Alternative Process.** We fulfill our responsibilities and comply with state law with regard to the Alternative Process for proper airport land use compatibility planning. | |
| LU5-7 | **ALUCP Consistency with Land Use Regulations.** We comply with state law that requires general plans, specific plans, and all new development to be consistent with the policies and criteria set forth within an Airport Land Use Compatibility Plan for any public-use airport. | |
| LU5-8 | **Chino Airport.** We will support the creation and implementation of the Airport Land Use Compatibility Plan for Chino Airport. | |
| **HOUSING ELEMENT** | | |
| **H1** | **Neighborhoods & Housing** | |
| **H1** | **Stable neighborhoods of quality housing, ample community services and public facilities, well-maintained infrastructure, and public safety that foster a positive sense of identity.** | |
| H1-1 | **Housing Rehabilitation.** We support the rehabilitation, maintenance, and improvement of single-family, multiple-family, and mobile homes through code compliance, removal of blight where necessary, and provision of rehabilitation assistance where feasible. | |
| H1-2 | **Neighborhood Conditions.** We direct efforts to improve the long-term sustainability of neighborhoods through comprehensive planning, provision of neighborhood amenities, rehabilitation and maintenance of housing, and community building efforts. | |
| H1-3 | **Community Amenities.** We shall provide adequate public services, infrastructure, open space, parking and traffic management, pedestrian, bicycle, and equestrian routes and public safety for neighborhoods consistent with City master plans and neighborhood plans. | |
| H1-4 | **Historical Preservation.** We support the preservation and enhancement of residential structures, properties, street designs, lot configurations, and other reminders of Ontario's past that are considered to be local historical or cultural resources. | |
| H1-5 | **Neighborhood Identity.** We strengthen neighborhood identity through creating parks and recreational outlets, sponsoring neighborhood, events and encouraging resident participation in the planning and improvement of their neighborhoods. | |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| **H2** | **Housing Supply & Diversity** | |
| **H2** | **Diversity of types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario.** | |
| H2-1 | **Corridor Housing.** We revitalize transportation corridors by encouraging the production of higher density residential and mixed-uses that are architecturally, functionally, and aesthetically suited to corridors. | |
| H2-2 | **Historic Downtown.** We foster a vibrant historic downtown through facilitating a wide range of housing types and affordability levels for households of all ages, housing preferences, and income levels. | |
| H2-3 | **Ontario Airport Metro Center.** We foster a vibrant, urban, intense, and highly amenitized community in the Ontario Airport Metro Center Area through a mix of residential, entertainment, retail, and office-oriented uses. | |
| H2-4 | **New Model Colony.** We support a premier lifestyle community in the New Model Colony distinguished by diverse housing, highest design quality, and cohesive and highly amenities neighborhoods. | **~~New Model Colony~~Ontario Ranch.** We support a premier lifestyle community in the ~~New Model Colony~~Ontario Ranch, distinguished by diverse housing, highest design quality, and cohesive and highly amenitized neighborhoods. |
| H2-5 | **Housing Design.** We require architectural excellence through adherence to City design guidelines, thoughtful site planning, environmentally sustainable practices, and other best practices. | |
| H2-6 | **Infill Development.** We support the revitalization of neighborhoods through the construction of higher-density residential developments on underutilized residential and commercial sites. | |
| **H3** | **Governmental Regulations** | |
| **H3** | **A City regulatory environment that balances the need for creativity and excellence in residential design, flexibility and predictability in the project approval process, and the provision of an adequate supply and prices of housing.** | |
| H3-1 | **Incentives.** We maintain incentive programs that can be offered to projects that provide benefits to the community such as exceptional design quality, economic advantages, environmental sustainability, or other benefits that would otherwise be unrealized. | |
| H3-2 | **Flexible Standards.** We allow flexibility in the application of residential and mixed-use development standards in order to gain benefits such as exceptional design quality, economic advantages, sustainability, or other benefits that would otherwise be unrealized. | |
| H3-3 | **Development Review.** We maintain a residential development review process that provides certainty and transparency for project stakeholders and the public, yet allows for the appropriate review to facilitate quality housing development. | |
| H3-4 | **Financial Incentives.** We consider financial incentives to facilitate and encourage the production, rehabilitation or improvement of housing, or provision of services where such activity furthers housing and community-wide goals. | |
| **H4** | **Housing Assistance** | |
| **H4** | **Increased opportunities for low and moderate income households and families to afford and maintain quality ownership and rental housing opportunities, including move-up opportunities.** | **Increased opportunities for low- and moderate-income households and families to afford and maintain quality ownership and rental housing opportunities, including move-up opportunities. Inclusive communities, racial equity, fair housing choice and access to opportunity.** |
| H4-1 | **Preservation of Affordable Apartments.** We strive to facilitate the preservation of the affordability of publicly assisted apartments for lower-income households through financial assistance, technical assistance, rehabilitation, and collaborative partnerships. | |
| H4-2 | **Homeownership Opportunities.** We increase and expand homeownership rates for lower- and moderate-income households by offering financial assistance, low-interest loans, and educational resources, and by working in collaboration with partnerships. | |
| H4-3 | **Rental Assistance.** We support the provision of rental assistance for individuals and families earning extremely low, very low, and low income with funding from the state and federal government. | |
| H4-4 | **Mixed-income Housing.** We encourage the integration of affordable housing in the New Model Colony, Ontario Airport Metro Center Area, and existing neighborhoods. | **Mixed-income Housing.** We encourage the integration of affordable housing in the ~~New Model Colony~~Ontario Ranch, Ontario Airport Metro Center area, and existing neighborhoods. |
| H4-5 | **Collaborative Partnerships.** We support collaborative partnerships of nonprofit organizations, affordable housing developers, major employers, and for-profit developers to produce affordable housing. | |
| H4-6 | **Fair Housing.** We further fair housing by prohibiting discrimination in the housing market and providing education, support, and enforcement services to address discriminatory practices | **Fair Housing.** We further fair housing by prohibiting discrimination in the housing market, lifting barriers that restrict access to housing, and providing education, support, and enforcement services to address discriminatory practices. |
| **H5** | **Special Needs** | |
| **H5** | **A full range of housing types and community services that meet the special housing needs for all individuals and families in Ontario, regardless of income level, age, or other status.** | |
| H5-1 | **Senior Housing.** We support the development of accessible and affordable senior housing and provide financial assistance for seniors to maintain and improve their homes. | |
| H5-2 | **Family Housing.** We support the development of larger rental apartments that are appropriate for families with children, including, as feasible, the provision of services, recreation, and other amenities. | |
| H5-3 | **Disabled People.** We increase the supply of permanent, affordable, and accessible housing for people with disabilities, and provide assistance to allow them to maintain and improve their homes. | |
| H5-4 | **Homeless People**. We partner with nonprofit partners to provide emergency shelters, transitional housing, permanent supportive housing, and supportive services for people who are homeless. | |
| H5-5 | **Supportive Services**. We financially support organizations, as feasible, that provide support services that meet the needs of those with special needs and further the greatest level of independence. | |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| H5-6 | **Partnerships.** We collaborate with nonprofit organizations, private developers, employers, government agencies, and other interested parties to develop affordable housing and provide support services. | |
| **PARKS & RECREATION ELEMENT** | | |
| **PR1** | **Planning & Design** | |
| **PR1** | **A system of safe and accessible parks that meets the needs of the community.** | |
| PR1-1 | **Access to Parks.** We strive to provide a park and/or recreational facility within walking distance (¼ mile) of every residence. | **Access to Parks.** In all new residential development areas, we strive to provide a park and/or recreational facility within walking distance (¼ mile) of every residence and prioritize the establishment of parks in environmental justice areas that do not have adequate access to parks. |
| PR1-2 | **Adjacency to Schools.** We examine locating parks adjacent to school sites to promote joint-use opportunities. | |
| PR1-3 | **Funding.** We shall seek outside, one-time sources of funding for capital improvements and reserve ongoing City funds primarily for operations and maintenance. | |
| PR1-4 | **Joint-use Opportunities.** In areas where there is a need but no City recreational facility, we explore joint-use opportunities (e.g., school sites). | |
| PR1-5 | **Acreage Standard.** We strive to provide 5 acres of parkland (private and public) per 1,000 residents. | |
| PR1-6 | **Private Parks.** We expect the development to provide a minimum of 2 acres of developed private park space per 1,000 residents. | |
| PR1-7 | **Special Needs/Universal Design.** We attempt to provide recreational opportunities at parks for people of all ages and abilities. | |
| PR1-8 | **Renovation.** We examine renovating existing facilities prior to building replacement facilities. | |
| PR1-9 | **Phased Development.** We require parks to be built in new communities before a significant proportion of residents move in. | |
| PR1-10 | **Master Plans for Individual Park Facilities.** We require an individual park master plan for parks in excess of 10 acres. | |
| PR1-11 | **Environmental Function of Parks.** We require new parks to meet environmental management objectives. | |
| PR1-12 | **Trails.** We promote connections between parks and local trails, including those managed by other public agencies. | |
| PR1-13 | **Equestrian Trails.** We require the design, construction, and maintenance of equestrian trails in Rural Residential designated areas. | |
| PR1-14 | **Multi-family Residential Developments.** We require that new multi-family residential developments of five or more units provide recreational facilities or open space, in addition to paying adopted impact fees. | |
| PR1-15 | **Trail Connectivity.** We strengthen and improve the equestrian, bike, and multipurpose trail connections within the City and work to improve trail connections into adjacent jurisdictions. | |
| PR1-16 | **Equestrian Master Plan.** We use Homer Briggs Park as the primary focal point for the development of a Master Plan of Equestrian Trails in the Rural Residential area. | |
| **PR2** | **Recreational Programs** | |
| **PR2** | **A range of recreational programs provided by public, private, and nonprofit organizations that meet the needs of the community's varied interests, age groups, and abilities** | |
| PR2-1 | **Participation.** We program park facilities to maximize utilization and participation while considering park size, location, and population served. | |
| PR2-2 | **Needs Assessment.** We track the needs and priorities for recreational programming and look for ways to meet demand. | |
| PR2-3 | **Community Involvement.** We involve the local community in planning programs for neighborhood and community park facilities. | |
| PR2-4 | **Access to Programs.** We provide a range of program opportunities for residents of all income levels. | **Access to Programs.** We provide a range of recreational and physical exercise programs that are accessible to ~~opportunities for~~ residents of all income levels throughout the community and prioritize establishing and maintaining equitable access for residents in environmental justice areas. |
| PR2-5 | **Partnerships.** We partner with local and regional agencies, nonprofit organizations, and the private sector to provide a comprehensive range of recreational programs. | |
| PR2-6 | **Crime Deterrents.** We promote and participate in recreational programming as part of our crime prevention effort. | |
| **ENVIRONMENTAL RESOURCE ELEMENT** | | |
| **ER1** | **Water and Wastewater** | |
| **ER1** | **A reliable and cost-effective system that permits the City to manage its diverse water resources and needs.** | |
| ER1-1 | **Local Water Supply.** We increase local water supplies to reduce our dependence on imported water. | **Local Water Supply.** We increase local water supplies to reduce our dependence on imported water. New and redevelopment projects are aligned with our available water supply and/or to enhance our available water supply. |
| ER1-2 | **Matching Supply to Use.** We match the water supply and quality to the appropriate use. | |
| ER1-3 | **Conservation.** We require conservation strategies that reduce water usage. | **Conservation and Sustainable Water Supply.** We work with regional water providers and users to conserve water and ensure sustainable local water supplies as more frequent droughts reduce long term local and regional water availability. ~~We require conservation strategies that reduce water usage.~~ |
| ER1-4 | **Supply-Demand Balance.** We require that available water supply and demands be balanced. | |
| ER1-5 | **Groundwater Management.** We protect groundwater quality by incorporating strategies that prevent pollution, require remediation where necessary, capture and treat urban runoff, and recharge the aquifer. | ~~Groundwater~~ **Water Resource Management.** Environmental justice areas are prioritized as we coordinate with local agencies to protect water quality, prevent pollution, address existing contamination, and remediate contaminated surface water and groundwater. ~~We protect groundwater quality by incorporating strategies that prevent pollution, require remediation where necessary, capture and treat urban runoff, and recharge the aquifer.~~ |
| ER1-6 | **Urban Run-Off Quantity.** We encourage the use of low impact development strategies to intercept run-off, slow the discharge rate, increase infiltration, and ultimately reduce discharge volumes to traditional storm drain systems. | **Urban Run-off Quantity.** We encourage the use of low impact development strategies, including green infrastructure, to intercept run-off, slow the discharge rate, increase infiltration, and ultimately reduce discharge volumes to traditional storm drain systems. |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| ER1-7 | **Urban Run-Off Quality.** We require the control and management of urban runoff, consistent with Regional Water Quality Control Board regulations. | |
| ER1-8 | **Wastewater Management.** We require the management of wastewater discharge and collection consistent with waste discharge requirements adopted by the Regional Water Quality Control Board. | |
| **ER2** | **Solid Waste & Recycling** | |
| **ER2** | **Cost-effective integrated waste management system that meets or exceed state and federal recycling and waste diversion mandates.** | |
| ER2-1 | **Waste Diversion.** We shall meet or exceed the AB 939 requirements. | |
| ER2-2 | **Hazardous and Electronic Wastes.** We prohibit the disposal of hazardous and electronic waste into the municipal waste stream pursuant to state law. | |
| ER2-3 | **Purchase Products Made from Recycled Materials.** We purchase recycled-content products where it is cost-effective. | |
| **ER3** | **Energy** | |
| **ER3** | **Cost-effective and reliable energy system sustained through a combination of low impact buildings, site and neighborhood energy conservation, and diverse sources of energy generation that collectively helps to minimize the region's carbon footprint.** | |
| ER3-1 | **Conservation Strategy.** We require conservation as the first strategy to be employed to meet applicable energy-saving standards. | |
| ER3-2 | **Green Development – Communities.** We require the use of best practices identified in green community rating systems to guide the planning and development of all new communities. | **Green Development – Communities.** We ~~require~~ encourage the use of ~~best practices identified in green community~~ the LEED Neighborhood Development rating system~~s~~, or similar mechanism, to guide the planning and development of all new communities. |
| ER3-3 | **Building and Site Design.** We require new construction to incorporate energy-efficient building and site design strategies, which could include appropriate solar orientation, maximum use of natural daylight, passive solar, and natural ventilation. | |
| ER3-4 | **Green Development – Public Buildings.** We require all new and substantially renovated City buildings in excess of 10,000 square feet to achieve a LEED Silver Certification standard, as determined by the U.S. Green Building Council. | |
| ER3-5 | **Fuel-Efficient and Alternative Energy Vehicles and Equipment.** We purchase and use vehicles and equipment that are fuel-efficient and meet or surpass state emissions requirements and/or use renewable sources of energy. | **Fuel-Efficient and Alternative Energy Vehicles and Equipment.** We require purchase and use vehicles and equipment that are fuel-efficient and meet or surpass state emissions requirements and/or use renewable sources of energy. |
| ER3-6 | **Generation - Renewable Sources.** We promote the use of renewable energy sources to serve public and private sector development. | **Generation - Renewable Sources.** We promote the use of renewable energy sources (e.g., solar, wind, biomass) in ~~to serve~~ public and private sector development. |
| **ER4** | **Air Quality** | |
| **ER4** | **Improve indoor and outdoor air quality and reduced locally generated pollutant sources.** | |
| ER4-1 | **Land Use.** We reduce GHG and other local pollutant emissions through compact, mixed use, and transit-oriented development and development that improves the regional jobs-housing balance. | |
| ER4-2 | **Sensitive Land Uses.** We prohibit the future siting of sensitive land uses within the distances defined by the California Air Resources Board for specific source categories without sufficient mitigation. | |
| ER4-3 | **Greenhouse Gases (GHG) Emissions Reductions.** We reduce GHG emissions in accordance with regional, state, and federal regulations. | |
| ER4-4 | **Indoor Air Quality.** We will comply with State Green Building Codes relative to indoor air quality. | **Indoor Air Quality.** We will comply with State Green Building Codes relative to indoor air quality. We seek funding to improve indoor air quality for households with poor indoor air quality, with priority for lower income households in environmental justice areas. |
| ER4-5 | **Transportation.** We promote mass transit and non-motorized mobility options (walking, biking) to reduce air pollutant emissions. | |
| ER4-6 | **Particulate Matter.** We support efforts to reduce particulate matter to meet State and Federal Clean Air Standards. | |
| ER4-7 | **Other Agency Collaboration.** We collaborate with other agencies within the South Coast Air Basin to improve regional air quality at the emission source. | **Other Agency Collaboration.** We collaborate with other agencies within the South Coast Air Basin to improve regional air quality at the emission source, with a particular focus on sources that affect environmental justice areas in Ontario. |
| ER4-8 | **Tree Planting.** We protect healthy trees within the City and plant new trees to increase carbon sequestration and help the regional/local air quality. | **Tree Planting.** We protect healthy trees within the City and plant new trees to increase carbon sequestration and help the regional/local air quality. We expand the tree canopy in environmental justice areas to enhance air quality and reduce the "heat island" effect. |
| ER4-9 | **NEW POLICY proposed to meet requirements of new State laws.** | **New Localized Air Polution Sources Near Existing Sensitive Receptors.** We require new developments to conduct a Health Risk Assessment for land uses that generate more than 100 trucks per day or 40 trucks per day by trucks operating transportation refrigeration units (TRU's) within 1,000 feet from sensitive land uses (California Health and Safety Code § 42705.5(a)(5)). If the health risk assessment determines the new development poses health hazards that increase the incremental cancer risk above the threshold established by the South Coast Air Quality Management District (AQMD), we will only approve permits upon the condition that adequate mitigation measures are proposed and implemented for potential impacts on the sensitive uses around the site and along the route within Ontario taken by the trucks to and from freeways. We require new developments that must perform a health risk assessment to conduct additional public outreach by sending notifications in multiple languages to all residents living within 500 feet, and encourage hosting a public meeting. |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| **ER5** | **Biological, Mineral and Agricultural Resources** | |
| **ER5** | **Protect high-value habitat and farming and mineral resources extraction activities that are compatible with adjacent development.** | |
| ER5-1 | **Habitat Conservation Areas.** We support the protection of biological resources through the establishment, restoration, and conservation of high-quality habitat areas. | |
| ER5-2 | **Entitlement and Permitting Process.** We comply with state and federal regulations regarding protected species. | |
| ER5-3 | **Right to Farm.** We support the right of existing farms to continue their operations within the New Model Colony. | **Right to Farm.** We support the right of existing farms to continue their operations within the ~~New Model Colony~~Ontario Ranch. |
| ER5-4 | **Transition of Farms.** We protect both existing farms and sensitive uses around them as agricultural areas transition to urban uses. | |
| ER5-5 | **Mining Operations.** We prohibit future mining operations where the resource extraction activities are incompatible with existing or proposed adjacent land uses. | |
| **COMMUNITY ECONOMICS ELEMENT** | | |
| **CE1** | **Complete Community** | |
| **CE1** | **A complete community that provides for all incomes and stages of life.** | |
| CE1-1 | **Jobs-Housing Balance.** We pursue improvement to the Inland Empire's balance between jobs and housing by promoting job growth that reduces the regional economy's reliance on out-commuting. | |
| CE1-2 | **Jobs and Workforce Skills.** We use our economic development resources to 1) attract jobs suited for the skills and education of current and future City residents; 2) work with regional partners to provide opportunities for the labor force to improve its skills and education, and 3) attract businesses that increase Ontario's stake and participation in growing sectors of the regional and global economy. (Link to Social Resources Policy SR-2.2) | |
| CE1-3 | **Regional Approach to Workforce Development.** We work with our partners to provide workforce training and development services throughout the region, recognizing that Ontario employers rely on workers living outside of the City. | |
| CE1-4 | **Business Retention and Expansion.** We continuously improve two-way communication with the Ontario business community and emphasize customer service to existing businesses as part of our competitive advantage. | |
| CE1-5 | **Business Attraction.** We proactively attract new and expanding businesses to Ontario in order to increase the City's share of growing sectors of the regional and global economy. | |
| CE1-6 | **Diversity of Housing.** We collaborate with residents, housing providers and the development community to provide housing opportunities for every stage of life; we plan for a variety of housing types and price points to support our workforce, attract business and foster a balanced community. | **Diversity of Housing.** We collaborate with residents, housing providers, and the development community to provide housing opportunities for every stage of life; we plan for a variety of housing types and price points to encourage the development of housing supportive of our efforts to attract business in growing sectors of the community while being respectful of existing viable uses. ~~our workforce, attract business and foster a balanced community.~~ |
| CE1-7 | **Retail Goods and Services.** We seek to ensure a mix of retail businesses that provide the full continuum of goods and services for the community. | |
| CE1-8 | **Regional Attraction.** We encourage the development and programming of regional cultural and entertainment destinations in Ontario. | |
| CE1-9 | **Regional Leadership.** We provide leadership for public, quasi-public, and private-sector partners that help Ontario and its residents and businesses realize our goals and achieve our Vision. | |
| CE1-10 | **Life-Long Education.** We work with our partners who provide life-long learning to ensure that our residents and workforce have access to education at all stages of life. | |
| CE1-11 | **Socioeconomic Trends.** We continuously monitor, plan for, and respond to changing socioeconomic trends. | |
| CE1-12 | **Circulation.** We continuously plan and improve public transit and non-vehicular circulation for the mobility of all, including those with limited or no access to private automobiles. (Link to Mobility Element *Public Transit* Section) | |
| CE1-13 | **Safety and Security.** We invest in public safety and communicate our successes because the perception and reality of safety and security are necessary prerequisites for private investment and economic growth. | |
| **CE2** | **Placemaking** | |
| **CE2** | **A City of distinctive neighborhoods, districts, and corridors, where people choose to be.** | **A City of distinctive neighborhoods, districts, ~~and~~ corridors, and centers where people choose to be.** |
| CE2-1 | **Development Projects.** We require new development and redevelopment to create unique, high-quality places that add value to the community. (Link to Community Design Element) | |
| CE2-2 | **Development Review.** We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional, and sustainable places that will compete well with their competition within the region. | |
| CE2-3 | **Interim Development.** We require interim development that does not reflect the long-term Vision, be limited in the scale of development so that the investment can be sufficiently amortized to make Vision-compatible redevelopment financially feasible. | |
| CE2-4 | **Protection of Investment.** We require that new development and redevelopment protect the existing investment by providing architecture and urban design of equal or greater quality. | |
| CE2-5 | **Private Maintenance.** We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values. (Link to Community Design Element Policy CD-5.1) | |
| CE2-6 | **Public Maintenance.** We require the establishment and operation of maintenance districts or other vehicles to fund the long-term operation and maintenance of the public realm, whether on private land, in rights-of-way, or on publicly owned property. (Link to Community Design Element Policy CD-5.1) | |
| **CE3** | **Fiscal Decision Making** | |
| **CE3** | **Decision-making deliberations that incorporate the full short-term and long-term economic and fiscal implications of proposed City Council actions.** | |
| CE3-1 | **Fiscal Impact Disclosure.** We require requests for City Council action to disclose the full fiscal impacts, including direct and indirect costs. | |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| CE3-2 | **General Plan Amendments.** We require those proposing General Plan amendments to disclose reasonably foreseeable impacts through a fiscal analysis. | |
| CE3-3 | **Long-Term Funding Disclosure.** We require those requesting City support or funding for projects or programs to disclose if and how they can be continued without further City support. | |
| CE3-4 | **Improving Fiscal Decision-Making.** We periodically assess the accuracy of projections for staff time and City resources and use the assessment results to improve our fiscal decision-making process. | |
| CE3-5 | **Sustainable Development**. We recognize impacts to municipal finances as an element of sustainability, and we require claims of sustainability to assess fiscal impacts. | |
| CE3-6 | **Fully Funded Liability.** We require long term liabilities such are retiree medical benefits, employee accrued leave balances, and self-insured liability claims to be fully funded to ensure sound, long term fiscal health. | |
| CE3-7 | **Programmatically Balanced Budget.** We require that the annual budget include appropriations allocated in a manner to meet the goal of the programmatically balanced budget. | |
| CE3-8 | **Budget Margins.** We require that the adopted budget for revenues and expenditures reflect sufficient budget margins to minimize negative impacts to City services due to economic uncertainties. | |
| CE3-9 | **Complete Comparative Context.** We require that our annual budget process provide the complete comparative context for proposed new and increased funding so decision makers can fully understand the trade-offs among budget choices. | |
| **SAFETY ELEMENT** | | |
| **S1** | **Seismic/Geologic Hazards** | |
| **S1** | **Minimize risk of injury, loss of life, property damage, and economic and social disruption caused by earthquake-induced or other geological hazards.** | |
| S1-1 | **Implementation of Regulations and Standards.** We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading. | |
| S1-2 | **Entitlement and Permitting Process.** We follow state guidelines and the California Building Code to determine when development proposals must conduct geotechnical and geological investigations. | |
| S1-3 | **Continual Update of Technical Information.** We maintain up-to-date California Geological Survey seismic hazard maps. | |
| S1-4 | **Seismically Vulnerable Structures.** We conform to state law regarding unreinforced masonry structures. | **Seismically Vulnerable Structures.** We conform to state law regarding unreinforced masonry structures and coordinate with not-for-profits to facilitate seismic retrofits in environmental justice areas and for low-income households. |
| **S2** | **Flood Hazards** | |
| **S2** | **Minimize risk of injury, loss of life, property damage and economic and social disruption caused by flooding and inundation hazards.** | |
| S2-1 | **Entitlement and Permitting Process**. We follow State guidelines and building codes to determine when development proposals require hydrological studies prepared by a State-certified engineer to assess the impact that the new development will have on the flooding potential of existing development down-gradient. | **Entitlement and Permitting Process.** We require hydrological studies prepared by a state-certified engineer when new development is located in a 100-year or 500-year floodplain ~~follow State guidelines and building codes to determine when development proposals require hydrological studies prepared by a State-certified engineer~~ to assess the impact that the new development will have on the flooding potential of existing development down-gradient. |
| S2-2 | **Flood Insurance.** We will limit development in flood plains and participate in the National Flood Insurance Program. | **Floodplain ~~Insurance~~ Mapping.** We require any new development partially or entirely in 100-year flood zones ~~or 100-year flood awareness areas~~ to provide detailed floodplain mapping for 100- and 200-year storm events as part of the development approval process ~~will limit development in flood plains and participate in the National Flood Insurance Program~~. |
| S2-3 | **Facilities that Use Hazardous Materials.** We comply with state and federal law and do not permit facilities using, storing, or otherwise involved with substantial quantities of onsite hazardous materials to be located in the 100-year flood zone unless all standards of elevation, floodproofing, and storage have been implemented to the satisfaction of the Building Department. | **Facilities that Use Hazardous Materials**. We comply with state and federal law and do not permit facilities using, storing, or otherwise involved with substantial quantities of onsite hazardous materials to be located in the 100-year flood zone or 500-year flood zone unless all standards of elevation, floodproofing, and storage have been implemented to the satisfaction of the Building Department. |
| S2-4 | **Prohibited Land Uses.** We prohibit the development of new essential and critical facilities in the 100-year floodplain. | **Prohibited Land Uses.** We prohibit the development of new essential and critical facilities in the 100-year floodplain and discourage the development of new essential and critical facilities in the 500-year floodplain unless all standards of elevation and flood proofing demonstrate that a facility can be safe and operational during a flood event, implemented to the satisfaction of the Building Department. |
| S2-5 | **Storm Drain System.** We maintain and improve the storm drain system to minimize flooding. | **Stormwater Management ~~Drain System~~.** We maintain ~~and improve~~ the storm drain system to convey a 100-year storm, when feasible, and encourage environmental site design practices to minimize flooding and increase groundwater recharge, including natural drainage, green infrastructure, and permeable ground surfaces.<br><br>(Link to Environmental Resources Element) |
| S2-6 | **Use of Flood Control Facilities.** We encourage the joint use of flood control facilities as open space or other types of recreational facilities. | |
| S2-7 | **NEW POLICY to address requirements of Gov. Code.** | **Collaboration Between Agencies.** Collaborate with the San Bernardino County Flood Control District and other state and federal agencies to maintain flood-control infrastructure to minimize flood damage. |
| **S3** | **Fire & Rescue & Related Services** | |
| **S3** | **Reduce the risk of death, injury, property damage and economic loss due to fires, accidents and normal everyday occurrences through prompt and capable emergency services.** | |
| S3-1 | **Prevention Services.** We proactively mitigate or reduce the negative effects of fire, hazardous materials release, and structural collapse by implementing the adopted Fire Code. | **Prevention Services.** We proactively mitigate or reduce the negative effects of fire, hazardous materials release, and structural collapse by implementing the regularly adopted California Fire Code and California Building Code. |
| S3-2 | **Community Outreach.** We provide education to local schools and community groups to promote personal and public safety. | |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| S3-3 | **Fire and Emergency Medical Services.** We maintain sufficient fire stations, equipment, and staffing to respond effectively to emergencies. | **Fire and Emergency Medical Services.** We maintain sufficient fire stations, equipment and staffing to respond effectively to emergencies and meet the needs of the community and state requirements. |
| S3-4 | **Special Team Services.** We maintain effective special rescue services. | |
| S3-5 | **Emergency Communication Services.** We maintain a 9-1-1 emergency communication and dispatch center. | **Emergency Notifications ~~Communication Services~~.** We maintain a public alert notification system that efficiently conveys information about imminent, developing, ongoing, and concluding emergency events to all residents and visitors working with network providers that translate information into other languages. |
| S3-6 | **Interagency Cooperation.** In order to back up and supplement our capabilities to respond to emergencies, we participate in the California Fire Rescue and Mutual Aid Plan. | |
| S3-7 | **Water Supply and System Redundancy.** We monitor our water system to manage firefighting water supplies. | **Water Supply and System Redundancy.** We monitor our water system to manage and ensure adequate firefighting water supplies. |
| S3-8 | **Fire Prevention through Environmental Design.** We require new development to incorporate fire prevention considerations in the design of streetscapes, sites, open spaces, and buildings. (Link to Community Design Element). | |
| S3-9 | **Resource Allocation.** We analyze fire data to evaluate the effectiveness of our fire prevention and reduction strategies and allocate resources accordingly. | |
| **S4** | **Noise** | |
| **S4** | **An environment where noise does not adversely affect the public's health, safety, and welfare.** | |
| S4-1 | **Noise Mitigation.** We utilize the City's Noise Ordinance, building codes, and subdivision and development code regulations to mitigate noise impacts. | |
| S4-2 | **Coordination with Transportation Authorities.** We collaborate with airport owners, FAA, Caltrans, SANBAG, SCAG, neighboring jurisdictions, and other transportation providers in the preparation and maintenance of and updates to transportation-related plans to minimize noise impacts and provide appropriate mitigation measures. | **Coordination with Transportation Authorities**. We collaborate with airport owners, FAA, Caltrans, ~~SANBAG~~SBCTA, SCAG, neighboring jurisdictions, and other transportation providers in the preparation and maintenance of and updates to transportation-related plans to minimize noise impacts and provide appropriate mitigation measures. |
| S4-3 | **Airport Noise Mitigation.** We aggressively pursue funding and utilize programs to reduce the effects of aircraft noise in impacted areas of our community. | |
| S4-4 | **Truck Traffic.** We manage truck traffic to minimize noise impacts on sensitive land uses. | |
| S4-5 | **Roadway Design.** We design streets and highways to minimize noise impacts. | |
| S4-6 | **Airport Noise Compatibility.** We utilize information from Airport Land Use Compatibility Plans to prevent the construction of new noise-sensitive land uses within airport noise impact zones. | |
| S4-7 | **New Policy to address noise and vibration near rail lines** | **Rail Noise Mitigation.** We require residential and mixed use development of vibration-sensitive uses in areas within 200 feet of rail to evaluate for indoor vibration levels and mitigate any exceedances of the Federal Transit Administration vibration-annoyance criteria. |
| **S5** | **Wind-related Hazards** | |
| **S5** | **Reduce risk of injury, property damage, and economic loss resulting from windstorms and wind-related hazards.** | **~~Reduced~~ Minimize the risk of injury, property damage, and economic loss resulting from windstorms and wind-related hazards.** |
| ~~S5-1~~ | **Backup Power in Critical Facilities.** We require backup power to be maintained in critical facilities. | Relocate to S8-9<br>[This policy applies to more than windstorms and wind related hazards] |
| S5-~~2~~1 | **Dust Control Measures.** We require the implementation of Best Management Practices for dust control at all excavation and grading projects. | |
| S5-~~3~~2 | **Grading in High Winds.** We prohibit excavation and grading during strong wind conditions, as defined by the Building Code. | |
| S5-3 | **NEW POLICY to address resiliency requirements related to wind events** | **Public Safety Power Shutoffs.** We coordinate with utility companies to minimize service interruptions, such as Public Safety Power Shutoffs, before, during, and after windstorms and wind-related hazards. |
| **S6** | **Hazardous Materials** | |
| **S6** | **Reduce the potential for hazardous materials exposure and contamination.** | |
| S6-1 | **Disclosure and Notification.** We enforce disclosure laws that require all users, producers, and transporters of hazardous materials and wastes to clearly identify the materials that they store, use, or transport. | |
| S6-2 | **Response to Hazardous Materials Releases.** We respond to hazardous materials incidents and coordinate these services with other jurisdictions. | |
| S6-3 | **Safer Alternatives.** We minimize our use of hazardous materials by choosing non-toxic alternatives that do not pose a threat to the environment. | **Safer Alternatives.** We minimize our use of pesticides and other hazardous materials by choosing non-toxic alternatives that do not pose a threat to the environment, especially when it could affect public park facilities and open spaces. |
| S6-4 | **Safe Storage and Maintenance Practices.** We require that the users of hazardous materials be adequately prepared to prevent and mitigate hazardous materials releases. | |
| S6-5 | **Location of Hazardous Material Facilities.** We regulate facilities that will be involved in the production, use, storage, or disposal of hazardous materials, pursuant to federal, state, county, and local regulations so that impacts to the environment and sensitive land uses are mitigated. | **Location of Hazardous Material Facilities.** We regulate facilities that will be involved in the production, use, storage, or disposal of hazardous materials, pursuant to federal, state, county, and local regulations, so that impacts to the environment and sensitive land uses are mitigated. We prohibit new hazardous waste facilities in close proximity to sensitive land uses and environmental justice areas. |
| S6-6 | **Location of Sensitive Uses.** We prohibit new sensitive land uses from locating within airport Safety Zones and near existing sites that use, store, or generate large quantities of hazardous materials. (Refer to Land Use Element) | **Location of Sensitive Uses.** We prohibit new sensitive land uses from locating within airport ~~S~~safety ~~Z~~zones and near existing sites that use, store, or generate large quantities of hazardous materials. (~~Refer~~Link to Land Use Element) |
| S6-7 | **Household Hazardous Waste.** We support the proper disposal of household hazardous substances. | |
| S6-8 | **Mitigation and Remediation of Groundwater Contamination.** We actively participate in local and regional efforts directed at both mitigating environmental exposure to contaminated groundwater and taking action to clean up contaminated groundwater once exposure occurs. | |
| S6-9 | **Remediation of Methane.** We require development to assess and mitigate the presence of methane, per regulatory standards and guidelines. | |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| **S7** | **Law Enforcement** | |
| **S7** | **Neighborhood and commercial and industrial districts that keep safe through a multi-faceted approach of prevention, enforcement, suppression, community involvement and a system of continuous monitoring.** | **Residential neighborhoods, ~~and~~ commercial areas, and industrial districts that keep safe through a multi-faceted approach of prevention, enforcement, and community involvement in public safety ~~and a system of continuous monitoring~~.** |
| S7-1 | **Police Unit Response.** We respond to calls requiring service in a timely manner. | |
| S7-2 | **Community Oriented Problem Solving (C.O.P.S.).** We support and maintain the mission of COPS to identify and resolve community problems. | |
| S7-3 | **Prevention Services.** We provide crime prevention programs targeted to youth, parents, seniors, businesses, and neighborhoods. | |
| S7-4 | **Crime Prevention through Environmental Design (CPTED).** We require new development to incorporate CPTED in the design of streetscapes, sites, open spaces, and buildings. | |
| S7-5 | **Interdepartmental Coordination.** We utilize all City departments to help reduce crime and promote public safety. | |
| S7-6 | **Partnerships.** We partner with other local, state, and federal law enforcement agencies and private security providers to enhance law enforcement service to Ontario. | **Partnerships.** We partner with other local, state, and federal law enforcement agencies and private security providers to enhance ~~law enforcement~~ public safety services ~~to~~ in Ontario. |
| S7-7 | **Resource Allocation.** We analyze crime data to evaluate the effectiveness of crime prevention and reduction strategies and allocate resources accordingly. | |
| S7-8 | **NEW POLICY to reflect community minded public safety** | **Social Services**. We support behavioral health and social services as part of the public safety solution. |
| **S8** | **Emergency Management** | |
| **S8** | **Disaster resilient, prepared community through effective emergency/disaster preparedness, response, mitigation, and recovery** | |
| S8-1 | **State and Federal Mandates.** We maintain emergency management programs that meet the requirements of the State of California Standardized Emergency Management System (SEMS) and the National Incident Management System (NIMS). | |
| S8-2 | **Emergency Management Plans.** We maintain, update, and adopt the Emergency Operations Plan (EOP) and the Hazard Mitigation Plan (HMP). | **Emergency Management Plans.** We maintain, update, and adopt the Emergency Operations Plan (EOP) and incorporate, by reference the City's Hazard Mitigation Plan (HMP). |
| S8-3 | **Emergency/Disaster Training and Exercises.** We conduct training and exercises to prepare for and evaluate emergency/disaster response and recovery procedures. | |
| S8-4 | **Interagency Collaboration.** We partner with public and private organizations, such as participation in the California Mutual Aid Agreement, in order to enhance and complement our planning and response capabilities. | **Interagency Emergency Cooperation.** We maintain partnerships, including automatic aid agreements, with fire protection, police and sheriff departments, and emergency management agencies in San Bernardino and Riverside County to strengthen emergency response. ~~partner with public and private organizations, such as participation in the California Mutual Aid Agreement, in order to enhance and complement our planning and response capabilities.~~ |
| S8-5 | **Interdepartmental Coordination.** We utilize all City departments to help support emergency/disaster mitigation, preparedness, response mitigation, and recovery. | |
| S8-6 | **Community Outreach.** We provide education to the community to promote personal, family, and community emergency preparedness. | **Community Outreach.** We provide education to the community to promote personal, family, and community emergency preparedness to both natural and human-generated hazards. |
| S8-7 | **NEW POLICY to address resiliency requirements related to extreme heat and air quality** | **Extreme Heat and Air Quality.** We work to ensure that all community members are informed about and have access to community cooling centers and clean air centers during extreme heat events or wildfires, with a focus on serving environmental justice communities. We support the development of extreme heat emergency response policies and practices to address these critical health risks in the community. |
| S8-8 | **NEW POLICY to address resiliency requirements related to climate change** | **Regional Partnerships for Climate Adaptation.** We partner with local governments in San Bernardino County, Riverside County, and Inland Southern California Climate Collaborative to develop regional climate change adaptation strategies and programs. |
| S8-9 | **Relocated from S5-1 - this policy should encompass all critical facilities, not just those vulnerable to wind events** | **Backup Power in Critical Facilities.** We require backup power be maintained in critical facilities. We encourage backup power solutions that include renewable energy components. |
| **S9** | **Energy Resiliency (NEW SECTION to address energy resilience)** | |
| **S9** | **NEW GOAL to address energy resilience** | **Incorporate energy efficient practices and renewable energy systems to improve air quality, comfort, and energy reliability during temporary power outages.** |
| S9-1 | **NEW Policy to address energy resilience** | **Solar Energy.** We support and may incentivize the installation of residential and commercial solar panels and battery storage systems that can provide electricity during power outages. |
| S9-2 | **NEW Policy to address energy resilience** | **Renewable Energy.** Renovate existing city-owned facilities and plan future facilities to include renewable energy generation capacity and battery storage as part of an effort to make public facilities and services greener and more resilient to power outages. |
| S9-3 | **NEW Policy to address energy resilience** | **Energy Efficiency Retrofits.** We support and may incentivize retrofits to residential and commercial buildings that improve energy efficiency and insulation from extreme temperatures, giving priority towards low-income applicants. |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| **MOBILITY ELEMENT** | | |
| **M1** | **Roadway Systems** | |
| **M1** | **A system of roadways that meets the mobility needs of a dynamic and prosperous Ontario.** | |
| M1-1 | **Roadway Design and Maintenance.** We require our roadways to: 1) Comply with federal, state and local design and safety standards; 2) Meet the needs of multiple transportation modes and users; 3) Handle the capacity envisioned in the Functional Roadway Classification Plan; 4) Maintain a peak hour Level of Service (LOS) E or better at all intersections; 5) Be compatible with the streetscape and surrounding land uses, and 6) Be maintained in accordance with best practices and our Right-Of-Way Management Plan. | **Roadway Design and Maintenance**. We require our roadways to: 1) Comply with federal, state,and local design and safety standards; 2) Meet the needs of multiple transportation modes and users; 3) Handle the capacity envisioned in the City of Ontario Master Plan of Streets and Highways ~~Functional Roadway Classification Plan~~; 4) Be ~~M~~maintained in accordance with best practices ~~a peak hour Level of Service (LOS) E or better at all intersections~~; 5) Be compatible with the streetscape and surrounding land uses; and 6) Promote the efficient flow of all modes of traffic through the implementation of intelligent transportation systems and travel demand management strategies. ~~Be maintained in accordance with best practices and our Right-Of-Way Management Plan.~~<br><br>(Link to Community Design Element Policies CD-2.5, CD-2.6, CD-2.16, CD-3.3) |
| M1-2 | **Mitigation of Impacts.** We require development to mitigate its traffic impacts. | |
| M1-3 | **Roadway Improvements.** We work with Caltrans, SANBAG, and others to identify, fund, and implement needed improvements to roadways identified in the Functional Roadway Classification Plan. | **Agency Coordination on Roadway Improvements.** We work with Caltrans, ~~SANBAG,~~ SBCTA, and others to identify, fund, and implement needed improvements to roadways when necessary. We work with neighboring jurisdictions to promote regional connectivity and access and meet operational level of service standards at the City limits. ~~identified in the Functional Roadway Classification Plan.~~ |
| ~~M1-4~~ | **Adjacent Jurisdictions.** We work with neighboring jurisdictions to meet our level of service standards at the City limits. | ~~**Adjacent Jurisdictions.** We work with neighboring jurisdictions to meet our level of service standards at the City limits.~~ |
| M1-~~5~~4 | **Complete Streets.** We work to provide a balanced context sensitive, multimodal transportation network that meets the needs of all users of streets, roads, and highways, including motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods and users of public transportation. | **Complete Streets.** We work to provide a complete, balanced, context-aware ~~sensitive~~, multimodal transportation network that meets the needs of all users of streets, roads, and highways, including motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods, and users of public transportation. We prioritize implementation of complete streets improvements in environmental justice areas to facilitate opportunities for residents to use active transportation systems. |
| M1-5 | **NEW POLICY proposed to help mitigate LOS impacts** | **Level of Service.** Maintain a peak hour Level of Service (LOS) E or better at all intersections. Maintain Level of Service D or better on arterial streets in the City. Develop and maintain a list of locations where LOS E or LOS F are considered acceptable and would be exempt from this level of service policy. Considerations for LOS exemption include being restricted by environmental constraints, lacking available right-of-way, deterring an increase in VMT, or degrading other modes of travel (such as bicycle or pedestrian infrastructure). |
| M1-6 | **NEW POLICY proposed to reflect changes in CEQA requirements (VMT)** | **Reduce Vehicle Miles Traveled**. We will strive to reduce VMT through a combination of land use, transportation projects, travel demand management strategies, and other trip reduction measures in coordination with development projects and public capital improvement projects. |
| **M2** | ~~**Bicycles and Pedestrians**~~ **Active Transportation** | |
| **M2** | **A system of trails and corridors that facilitate and encourage bicycling and walking.** | **A system of trails and corridors that facilitate and encourage ~~bicycling and walking~~active modes of transportation.** |
| M2-1 | **Bikeway Plan.** We maintain our Multipurpose Trails and Bikeway Corridor Plan to create a comprehensive system of on-and off-street bikeways that connect residential areas, businesses, schools, parks, and other key destination points. | ~~**Bikeway Plan**~~ **Active Transportation.** We maintain our ~~Multipurpose Trails and Bikeway Corridor~~ Active Transportation Master Plan to create a comprehensive system of on- and off-street bikeways and pedestrian facilities that are safe, comfortable, and accessible and ~~that~~ connect residential areas, businesses, schools, parks, and other key destination points. |
| M2-2 | **Bicycle System.** We provide off-street multipurpose trails and Class II bikeways as our primary paths of travel and use the Class III for connectivity in constrained circumstances. | **Bicycle System.** We provide off-street multipurpose trails and Class II bikeways as our ~~primary~~ preferred paths of travel and use the Class III for connectivity in constrained circumstances. When truck routes and bicycle facilities share a right-of-way, we prefer Class I or Class IV bicycle facilities. We require new development to include bicycle facilities, such as bicycle parking and secure storage areas. |
| M2-3 | **Pedestrian Walkways.** We require walkways that promote safe and convenient travel between residential areas, businesses, schools, parks, recreation areas, and other key destination points. | **Pedestrian Walkways.** We require streets to include sidewalks and visible crosswalks at major intersections where necessary to ~~walkways that~~ promote safe and ~~conveniet travel~~ comfortable mobility between residential areas, businesses, schools, parks, recreation areas, and other key destination points.<br><br>(Link to Community Design Policy CD-3.3) |
| M2-4 | **Network Opportunities.** We explore opportunities to expand pedestrian and bicycle networks. This includes consideration of utility easements, levees, drainage corridors, road rights-of-way, medians and other potential options. | **Network Opportunities.** We use public rights-of-way and easements such as, ~~explore opportunities to expand pedestrian and bicycle networks. This includes consideration of~~ utility easements, levees, drainage corridors, road rights-of-way, medians, and other potential options to maintain and expand our bicycle and pedestrian network. In urban, mixed use, and transit-oriented Place Types, we encourage the use of underutilized public and private spaces to expand our public realm and improve pedestrian and bicycle connectivity.<br><br>(Link to Community Design Element *Urban, Mixed Use, and Transit-oriented Place Types* Section) |
| **M3** | **Public Transit** | |
| **M3** | **A public transit system that is a viable alternative to automobile travel and meets the basic transportation needs of transit-dependent.** | |
| M3-1 | **Transit Partners.** We maintain a proactive working partnership with transit providers to ensure that adequate public transit service is available | **Transit Partners.** We maintain a proactive working partnership with transit providers to ensure that adequate public transit service is available, cost-efficient, and convenient, particularly for residents in environmental justice areas. |
| M3-2 | **Transit Facilities at New Development.** We require new development to provide transit facilities, such as bus shelters, transit bays, and turnouts, as necessary. | **Alternative Transit Facilities at New Development.** We require new development adjacent to an existing or planned transit stop to contribute to the creation of transit facilities, ~~provide transit facilities,~~ such as bus shelters, transit bays and turnouts, and bicycle facilities, such as secure storage areas. |
| M3-3 | **Transit-Oriented Development**. We may provide additional development-related incentives to those inherent in the Land Use Plan for projects that promote transit use. | **Transit-Oriented Development.** We may provide additional development-related incentives to those inherent in the Land Use Plan for projects that promote transit use and reduce vehicle miles traveled. |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| M3-4 | **Bus Rapid Transit (BRT) Corridors**. We work with regional transit agencies to implement BRT service to target destinations and along corridors, as shown in the Transit Plan. | **Bus Rapid Transit (BRT) Corridors.** We work with regional transit agencies to implement BRT service and reduce vehicle miles traveled by ~~to~~ targeting destinations and ~~along~~ corridors~~, as shown in the Transit Plan~~ with the highest number of potential riders. |
| M3-5 | **Light Rail.** We support the extension of the Metro Rail Gold Line to Ontario and will work to secure station locations adjacent to the Meredith site and at the proposed multimodal transit center. | **Light Rail.** We support the extension of the Metro Rail Gold Line to Ontario and will work to secure station locations ~~adjacent to the Meredith site and~~ at the proposed multimodal transit center. |
| M3-6 | **Metrolink Expansion.** We advocate expansion of Metrolink service to include the Downtown and the multimodal transit center. | |
| M3-7 | **High-Speed Rail.** We encourage the development of high-speed rail systems that would enhance regional mobility in southern California and serve the City of Ontario. | |
| M3-8 | **Feeder Systems.** We work with regional transit agencies to secure convenient feeder service from the Metrolink station and the proposed multimodal transit center to employment centers in Ontario. | |
| M3-9 | **Ontario Airport Metro Center Circulator.** We will explore the development of a convenient mobility system, including but not limited to shuttle service, people mover, and shared car system for the Ontario Airport Metro Center. | |
| M3-10 | **Multimodal Transit Center.** We intend to ensure the development of a multimodal transit center near LAONT airport to serve as a transit hub for local buses, BRT, the Gold Line, high-speed rail, the proposed Ontario Airport Metro Center circulator, and other future transit modes. | **Multimodal ~~Transit~~ Transportation Center.** We intend to ensure the development of a multimodal ~~transit~~ transportation center near ~~LA~~ONT airport to serve as a transit hub with amenities for transit riders, pedestrians, and bicyclists transitioning to ~~for~~ local buses, BRT, the Gold Line, high-speed rail, the proposed Ontario Airport Metro Center C~~c~~irculator, and other future transit modes. We support locations for the multimodal trasportation center that are north of ONT airport, between Vineyard Avenue and Interstate 15. |
| M3-11 | **Transit and Community Facilities.** We require the future development of community-wide serving facilities to be sited in transit-ready areas that can be served and made accessible by public transit. Conversely, we plan (and coordinate with other transit agencies to plan) future transit routes to serve existing community facilities. | |
| **M4** | **Goods Movement** | |
| **M4** | **An efficient flow of goods through the City that maximizes economic benefit and minimizes negative impacts.** | |
| M4-1 | **Truck Routes.** We designate and maintain a network of City truck routes that provide for the effective transport of goods while minimizing negative impacts on local circulation and noise-sensitive land uses, as shown in the Truck Routes Plan. | **Truck Routes.** We designate and maintain a network of City truck routes that provide for the safe and efficient ~~effective~~ transport of goods while minimizing negative impacts on local circulation and noise-sensitive land uses, as shown on Exhibit M-04, Truck Routes ~~in the Truck Routes Plan~~. We will minimize conflicts on truck routes through the design and implementation of buffers between travel lanes and pedestrian and bicycle facilities on designated truck routes. |
| M4-2 | **Regional Participation.** We work with regional and sub-regional transportation agencies to plan and implement goods movement strategies, including those that improve mobility, deliver goods efficiently, and minimize negative environmental impacts. (Refer to Environmental Resources Policy ER4-3) | **Regional Planning.** We work with regional and subregional transportation agencies and adjacent cities to plan and implement goods movement strategies, including regional truck routes, plans and projects ~~those~~ that improve mobility, support the efficient movement of ~~deliver~~ goods ~~efficiently~~, and minimize negative environmental impacts.<br><br>(~~Refer~~Link to Environmental Resources Policy ER-4.3) |
| M4-3 | **Railroad Grade Separations.** We eliminate at-grade rail crossings identified on the Functional Roadway Classifications Plan. | **Railroad Grade Separations.** We eliminate at-grade rail crossings identified on ~~the~~ Exhibit M-01, ~~Functional~~ Roadway Classifications ~~Plan~~. |
| M4-4 | **Environmental Considerations.** We support efforts to reduce/eliminate the negative environmental impacts of goods movement. | **Environmental Considerations.** We support both local and regional efforts to reduce/eliminate the negative environmental impacts of goods movement through the planning and implementation of truck routing and the development of a plan to evaluate the future needs of clean fueling/recharging and electrified truck parking. |
| M4-5 | **Air Cargo.** We support and promote a LAONT that accommodates 1.6 million tons of cargo per year, as long as the impacts associated with that level of operations are planned for and mitigated. | **Air Cargo.** We support and promote an ~~LA~~ONT that accommodates 1.6 million tons of cargo per year, as long as the impacts associated with that level of operations are planned for and mitigated. |
| **M5** | **Regional Transportation** | |
| **M5** | **A productive leadership role to help identify and facilitate the implementation of strategies that address regional transportation challenges.** | **A productive leadership role ~~to help~~ in helping identify and facilitate the implementation of strategies that address regional transportation challenges.** |
| M5-1 | **Regional Leadership.** We maintain a leadership role to help identify and implement potential solutions to long-term regional transportation problems. | |
| M5-2 | **Land Use Compatibility with Regional Transportation Facilities.** We work with LAWA, railroads, Caltrans, SANBAG, and other transportation agencies to minimize impacts. | **Land Use Compatibility with Regional Transportation Facilities.** We work with ~~LAWA~~ONT, railroads, Caltrans, ~~SANBAG~~SBCTA, and other transportation agencies to minimize impacts. |
| **COMMUNITY DESIGN ELEMENT** | | |
| **CD1** | **Image & Identity** | |
| **CD1** | **A dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses.** | **A dynamic, progressive city containing distinct and complete places ~~neighborhoods and commercial districts~~ that foster a positive sense of identity and belonging among residents, visitors, and businesses.** |
| CD1-1 | **City Identity.** We take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods. | **City Identity.** We take actions that are consistent with the City being a leading urban center in Southern California while recognizing, enhancing, and preserving the ~~diverse~~ character of our existing viable neighborhoods. |
| CD1-2 | **Growth Areas.** We require development in growth areas to be distinctive and unique places within which there are cohesive design themes. | **~~Growth Areas~~ Places Types.** We establish Place Types in urban, mixed use, and transit-oriented areas to foster the City's identity as a premier community and require new development within each Place Type to incorporate prescribed urban patterns, forms, and placemaking priorities. ~~require development in growth areas to be distinctive and unique places within which there are cohesive design themes.~~<br><br>(Link to Community Design Element *Urban, Mixed Use, and Transit-oriented Place Types* Section) |
| CD1-3 | **Neighborhood Improvement.** We require viable existing residential and non-residential neighborhoods to be preserved, protected, and enhanced in accordance with our land-use policies and themes. | **Exising Neighborhoods ~~Improvement~~.** We require the existing character of viable ~~existing~~ residential and non-residential neighborhoods ~~to~~ be preserved, protected, and enhanced ~~in accordance with our land-use policies and themes~~. |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| CD1-4 | **Transportation Corridors.** We will enhance our major transportation corridors within the City through landscape, hardscape, signage, and lighting. | **Transportation Corridors**. We will enhance our major transportation corridors within the City through landscape, hardscape, signage, and lighting. The extent of enhancement should be appropriate to the use, type, and context of each corridor. |
| CD1-5 | **View Corridors.** We require all major north-south streets be designed and redeveloped to feature views of the San Gabriel Mountains, which are part of the City's visual identity and a key to geographic orientation. Such views should be free of visual clutter, including billboards, and maybe enhanced by framing with trees. | |
| **CD2** | **Design Quality** | |
| **CD2** | **A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional, and distinct.** | **A high level of design quality resulting in neighborhoods, commercial areas, public spaces, parks, and streetscapes~~, and developments~~ that are attractive, safe, functional, human-scale, and distinct.** |
| CD2-1 | **Quality Architecture.** We encourage all development projects to convey visual interest and character through 1) Building volume, massing, and height to provide appropriate scale and proportion; 2) A true architectural style which is carried out in the plan, section and elevation through all aspects of the building and site design and appropriate for its setting; 3) Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style. | **Quality Building Design and Architecture.** We encourage all development projects to convey visual interest and character through:<br>1) Building volume, massing, and height to provide context-appropriate scale and proportion;<br>2) A true architectural style which is carried out in the plan, section, and elevation through all aspects of the building and site design and appropriate for its setting; and<br>3) Exterior building materials that are articulated, ~~visually interesting,~~ high quality, durable, and appropriate for the architectural style. |
| CD2-2 | **Neighborhood Design.** We create distinct residential neighborhoods that are functional, have a sense of community, emphasize livability and social interaction, and are uniquely identifiable places through such elements as 1) A pattern of smaller, walkable blocks that promote access, activity, and safety; 2) Variable setbacks and parcel sizes to accommodate a diversity of housing types; 3) Traffic calming measures to slow traffic and promote walkability while maintaining acceptable fire protection and traffic flows; 4) Floor plans that encourage views onto the street and de-emphasize the visual and physical dominance of garages (introducing the street frontage as the "outdoor living room") and porches in front of homes, as appropriate; and 5) Landscaped parkways, with sidewalks separated from the curb. | **Neighborhood Design.** We create distinct residential neighborhoods that ~~are functional, have~~ promote a sense of community and identity~~,~~ by emphasizeing access, connectivity, livability, and social interaction~~, and are uniquely identifiable places~~ through such elements as:<br>1) A pattern of smaller, walkable blocks that promote activity, safety, and access to nearby amenities and services ~~activity and safety~~;<br>2) Varied ~~Variable~~ parcel sizes and lot configurations to accommodate a diversity of housing types;<br>3) Traffic calming measures to slow traffic and promote walkability while maintaining acceptable ~~fire protection and~~ traffic flows and emergency and evacuation access;<br>4) Floor plans that encourage views onto the street and de-emphasize the visual and physical dominance of garages (introducing the street frontage as the "outdoor living room") and porches in front of homes, as appropriate; and<br>5) landscaped parkways, with sidewalks separated from the curb and designed to maximize safety, comfort, and aesthetics for all users. |
| CD2-3 | **Commercial Centers.** We desire commercial centers to be distinctive, pedestrian-friendly, functional, and vibrant with a range of businesses, places to gather, and connectivity to the neighborhoods they serve. | **Commercial ~~Centers~~Areas.** We desire commercial areas and centers to be distinctive, pedestrian-friendly, functional, and vibrant with a range of businesses, places to gather, and connectivity to the neighborhoods they serve. |
| CD2-4 | **Mixed-Use, Urban Office, and Transit Serving Areas.** We require mixed-use, urban office and transit serving areas to be designed and developed as pedestrian-oriented "villages" that promote a vibrant, comfortable, and functional environment. | **Urban, Mixed Use, ~~Urban Office,~~ and Transit-oriented ~~Serving~~ Areas.** We establish Place Types to require mixed use, urban, ~~office~~ and transit-oriented ~~serving~~ areas to be designed and developed as pedestrian-oriented ~~"villages"~~areas that are integrated with adjacent neighborhoods and promote a vibrant, comfortable, and functional environment, as defined for each Place Type.<br><br>(Link to Community Design Element *Urban, Mixed Use, and Transit-oriented Place Types* Section) |
| CD2-5 | **Streetscapes.** We design new and, when necessary, retrofit existing streets to improve walkability, bicycling and transit integration, strengthen connectivity, and enhance community identity through improvements to the public right-of-way such as sidewalks, street trees, parkways, curbs, street lighting, and street furniture. | |
| CD2-6 | **Connectivity.** We promote development of street patterns and pedestrian networks that create and unify neighborhoods, rather than divide them, and create cohesive and continuous corridors, rather than independent "islands" through the following means (Link to Mobility): 1) Local street patterns that provide access between subdivisions, and within neighborhoods and discourage through traffic; 2) A local street system that is logical and understandable for the user. A grid system is preferred to avoid circuitous and confusing travel paths between internal neighborhood areas and adjacent arterials; and 3) Neighborhoods, centers, public schools, and parks that are linked by pedestrian greenways/open space networks. These may also be used to establish clear boundaries between distinct neighborhoods and/or centers. | **Connectivity.** We promote development of street patterns, ~~and pedestrian~~ multimodal networks, and connected public spaces that create and unify neighborhoods, rather than divide them, and create cohesive and continuous corridors, rather than independent "islands" through the following means (Link to Mobility):<br>1) Local street networks ~~patterns~~ that provide access both between subdivisions and within a neighborhood and discourage through traffic;<br>2) A local street system that is logical and understandable for the user. A grid system is preferred to avoid circuitous and confusing travel paths between internal neighborhood areas and adjacent arterials, and to provide adequate emergency and evacuation access; and<br>3) Pedestrian and bicycle networks that provide convenient access to neighborhoods and nearby destinations, such as ~~centers, public~~ schools, ~~and~~ parks, other public spaces, commercial areas, and transit stops. ~~that are linked by the pedestrian and bicycle greenways/open space networks. These may also be used to establish clear boundaries between distinct neighborhoods and/or centers.~~ |
| CD2-7 | **Sustainability.** We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping, and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials, and construction techniques. | |
| CD2-8 | **Safe Design.** We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintaining visibility and accessibility, and using lighting. | |
| CD2-9 | **Landscape Design.** We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits. | **Landscape Design.** We encourage durable, sustainable, and drought-tolerant landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits. |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| CD2-10 | **Surface Parking Areas.** We require parking areas visible to or used by the public to be landscaped in an aesthetically pleasing, safe, and environmentally sensitive manner. Examples include shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field. | **Parking Areas.** We require all development, including single-family residential, to minimize the visual impact of surface, structured, and garage parking areas visible from the public realm~~ to or used by the public to be landscaped~~ in an aesthetically pleasing, safe, and environmentally sensitive manner. Examples include:<br>1) Surface parking: S~~s~~hade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field.<br>2) Structured parking: facade articulation, screening, appropriate lighting, and landscaping.<br>3) Garage parking: providing access to single-family residential garages through alley access, recessing garages from the frontage to emphasize front doors or active living spaces. |
| CD2-11 | **Entry Statements.** We encourage the inclusion of amenities, signage, and landscaping at the entry to neighborhoods, commercial centers, mixed-use areas, industrial developments, and public places that reinforce them as uniquely identifiable places. | |
| CD2-12 | **Site and Building Signage.** We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures. | |
| CD2-13 | **Entitlement Process.** We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits. | |
| CD2-14 | **Availability of Information.** We provide easy access to information for developers, builders, and the public about design quality, construction quality, and sustainable building practices. | |
| CD2-15 | **Leverage Professional and Trade Organizations.** We support excellence in design and construction quality through collaboration with trade and professional organizations that provide expertise, resources, and programs for developers, builders, and the public. | |
| CD~~3-7~~ 2-16 | **Transit Stops.** We require transit stops be well lit, safe, appealing to, and accessible by pedestrians. | **Transit Stops**. We require transit stops be conveniently located, well lit, safe, ~~appealing to~~ and clearly accessible ~~by~~to pedestrians, bicyclists, and people of all abilities. |
| **CD3** | **~~Pedestrian Environment~~ Urban, Mixed Use, and Transit-Oriented Place Types** | |
| **CD3** | **Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.** | |
| CD3-1 | **New policy** | **Unique Identity.** We promote development that heightens the unique character and identity of each Place Type by requiring compatible land uses and land planning, site design, and building design that promotes an active public realm. |
| CD3-~~1~~2 | **Design.** We require that pedestrian, vehicular, bicycle, and equestrian circulation on both public and private property be coordinated and designed to maximize safety, comfort, and aesthetics. | **Comfortable, Safe, Human-Scale Public Realm~~ Design~~.** We require that public spaces, including streets, parks, and plazas ~~pedestrian, vehicular, bicycle, and equestrian circulation~~ on both public and private property be ~~coordinated and~~ designed to maximize safety, comfort, and aesthetics and connect to the citywide pedestrian, vehicular, and bicycle networks. |
| CD3-~~2~~3 | **Connectivity Between Streets, Sidewalks, Walkways, and Plazas.** We require landscaping and paving to be used to optimize visual connectivity between streets, sidewalks, walkways, and plazas for pedestrians. | **Complete and Connected Network~~ Connectivity Between Streets, Sidewalks, Walkways, and Plazas.~~** We require that pedestrian, vehicular, and bicycle~~, and equestrian~~ circulation on both public and private property be coordinated to provide connections internally and externally to adjacent neighborhoods and properties (existing and planned) through a system of local roads and trails that promote walking and biking to nearby destinations (including existing and planned parks, commercial areas, and transit stops) and are designed to maximize safety, comfort, and aesthetics. ~~landscaping and paving to be used to optimize visual connectivity between streets, sidewalks, walkways, and plazas for pedestrians.~~ |
| CD3-~~3~~4 | **Building Entrances.** We require all building entrances to be accessible and visible from adjacent streets, sidewalks, or public open spaces. | **Context-Aware and Appropriate Design**. We require appropriate building and site design that complements existing development, respects the intent and identity of the Place Type, and provides appropriate transitions and connections between adjacent uses to ensure compatibility of scale, maintain an appropriate level of privacy for each use, and minimize potential conflicts. ~~**Building Entrances.** We require all building entrances to be accessible and visible from adjacent streets, sidewalks, or public open spaces.~~ |
| CD3-~~4~~5 | **Ground Floor Usage of Commercial Buildings**. We create lively pedestrian streetscapes by requiring the location of uses, such as shopping, galleries, restaurants, etc., on ground floors adjacent to sidewalks. | **Active Frontages~~ Ground Floor Usage of Commercial Buildings~~.** We create lively pedestrian streetscapes by requiring primary building, business, and residential entrances, outdoor dining, and storefronts ~~the location of uses, such as shopping, galleries, restaurants, etc.,~~ be located on ground floors adjacent to sidewalks or public spaces and designed to maximize safety, comfort, aesthetics, and the intended functionality (as defined by the Place Type). |
| CD3-~~5~~6 | **Paving.** We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public spaces. | **Managed Infrastructure.** We collaborate with developers and property owners to facilitate development that realizes the envisioned character and functionality of the Place Type through the use of green and shared infrastructure. ~~**Paving.** We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public spaces.~~ |
| ~~CD3-6~~ | **Landscaping.** We utilize landscaping to enhance the aesthetics, functionality, and sustainability of streetscapes, outdoor spaces, and buildings. | ~~**Landscaping.** We utilize landscaping to enhance the aesthetics, functionality, and sustainability of streetscapes, outdoor spaces, and buildings.~~ |
| ~~CD3-7~~ | **Transit Stops.** We require transit stops be well lit, safe, appealing to, and accessible by pedestrians. | ~~**Transit Stops.** We require transit stops be well lit, safe, appealing to, and accessible by pedestrians.~~ |
| **CD4** | **Historic Preservation** | |
| **CD4** | **Historic buildings, streets, landscapes, and neighborhoods, as well as the story of Ontario's people, businesses, and social and community organizations, have been preserved and serve as a focal point for civic pride and identity.** | **Historic buildings, streets, landscapes, and neighborhoods, as well as the story of Ontario's people, businesses, and social and community organizations, ~~that~~ have been preserved and serve as a focal point for civic pride and identity.** |
| CD4-1 | **Cultural Resource Management.** We update and maintain an inventory of historic sites and buildings, professional collections, artifacts, manuscripts, photographs, documents, maps, and other archives. | |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| CD4-2 | **Collaboration with Property Owners and Developers.** We educate and collaborate with property owners and developers to implement strategies and best practices that preserve the character of our historic buildings, streetscapes, and neighborhoods. | |
| CD4-3 | **Collaboration with Outside Agencies.** We pursue opportunities to team with other agencies, local organizations, and nonprofits in order to preserve and promote Ontario's heritage. | |
| CD4-4 | **Incentives.** We use the Mills Act and other federal, state, regional, and local programs to assist property owners with the preservation of select properties and structures. | |
| CD4-5 | **Adaptive Reuse.** We actively promote and support the adaptive reuse of historic sites and buildings to preserve and maintain their viability. | |
| CD4-6 | **Promotion of Public Involvement in Preservation.** We engage in programs to publicize and promote the City's and the public involvement in preservation efforts. | |
| CD4-7 | **Public Outreach.** We provide opportunities for our residents to research and learn about the history of Ontario through the Planning Department, Museum of History and Art, Ontario, and the Robert E. Ellingwood Model Colony History Room. | **Public Outreach.** We provide opportunities for our residents to research and learn about the history of Ontario through the Planning Department, the Ontario Museum of History and Art, ~~Ontario,~~ and the Robert E. Ellingwood Model Colony History Room. |
| **CD5** | **Protection of Investment** | |
| **CD5** | **A sustained level of maintenance and improvement of properties, buildings, and infrastructure that protects the property values and encourages additional public and private investments.** | |
| CD5-1 | **Maintenance of Buildings and Property**. We require all public and privately-owned buildings and property (including trails and easements) to be properly and consistently maintained. | |
| CD5-2 | **Maintenance of Infrastructure.** We require the continual maintenance of infrastructure. | |
| CD5-3 | **Improvements to Property & Infrastructure.** We provide programs to improve property and infrastructure. | |
| CD5-4 | **Neighborhood Involvement.** We encourage active community involvement to implement programs aimed at the beautification and improvement of neighborhoods. | |
| **SOCIAL RESOURCES ELEMENT** | | |
| **SR1** | **Health** | |
| **SR1** | **A community where residents have access to information, services, and goods that improve their health and wellbeing.** | **~~A community where r~~Residents have access to information, services, and goods that improve their health and wellbeing.** |
| SR1-1 | **Partnering for Healthcare.** We work with healthcare providers, and local, regional, state, and federal agencies to attract and retain a diversity of affordable, quality healthcare and facilities for the entire community. | |
| SR1-2 | **Nutrition Choices.** We support the promotion of healthy nutritional food choices in the community. | **Nutrition Choices.** We support the promotion of equitable access to affordable healthy ~~nutritional~~ food choices in the community, including community gardens, farmers markets, and cooking classes. |
| SR1-3 | **Healthy Education.** We promote health education, including disease prevention, mental health, nutrition, and physical fitness | **Health Education**. We promote equitable access to health education, including disease prevention, mental health, nutrition and physical fitness. |
| SR1-4 | **Physical Activity.** We encourage activities and community design that improves the physical fitness of our community members. | **Physical Activity.** We encourage activities and community design that improve the physical fitness of our community members, with an emphasis on the provision of activities and facilities in environmental justice areas. |
| **SR2** | **Education** | |
| **SR2** | **A range of educational and training opportunities for residents and workers of all ages and abilities that improves their life choices and provides a skilled workforce for our businesses.** | |
| SR2-1 | **Education Partners.** We partner with educational institutions throughout the region in order to expand the range and quality of educational offerings available to the community. | |
| SR2-2 | **Workforce Training.** We work with industrial organizations, businesses, and educational institutions to create opportunities for workforce training. | |
| SR2-3 | **Joint-use Facilities.** We partner with public and private educational institutions to jointly use facilities for both City and educational purposes | |
| SR2-4 | **Access to Schools.** We work with our local and regional partners to improve safety in and around schools and to improve access for all citizens of all ages and abilities to schools and community services such as afterschool and other programs. | |
| SR2-5 | **School Facilities.** We plan and coordinate with the school districts for designing and locating school facilities to meet the City's goals, such as for health, walkability, and safety, and to minimize impacts to the existing neighborhood. | |
| SR2-6 | **New policy to address civic engagement** | **Language.** We promote broad outreach in languages used by the community for proposed projects that could negatively affect environmental justice areas. |
| SR2-7 | **New policy to address civic engagement** | **Community Engagement.** We promote targeted outreach and education to historically underrepresented groups to encourage meaningful participation in decision-making process for projects whose outcomes will affect land use in environmental justice areas. |
| **SR3** | **Community and Leisure Activities** | |
| **SR3** | **A range of community and leisure programs and activities provided by public, private, and nonprofit organizations that meet the needs of the community's varied interests, age groups, and abilities** | |
| SR3-1 | **Partnerships.** We partner with local and regional agencies, nonprofit organizations, and the private sector to provide a comprehensive range of community activities and events to citizens. | |
| SR3-2 | **Needs Assessment.** We track the needs and priorities for community services and look for ways to meet demands and avoid duplication of offerings. | |
| SR3-3 | **Program Outreach.** We promote information about leisure activities, classes, and special events, and other services and activities in our community. | |
| SR3-4 | **Community Events.** We plan and actively participate in regularly scheduled community events and seasonal or yearly citywide events. | |
| SR3-5 | **Community Activities as a Crime Deterrent.** We promote and participate in community activities as part of our crime prevention efforts. (Link to Safety Element Policy S-7.3) | |

| Goal / Policy No. | Goal / Policy (Approved Project) | Proposed Goal / Policy Revision (Proposed Project)<br>*(where column is blank, no change from the approved project is proposed)* |
|---|---|---|
| **SR4** | **Library** | |
| **SR4** | **City libraries that connect community members of all ages and abilities to a broad range of programs, communication, and informational resources.** | |
| SR4-1 | **Community Needs.** We identify and monitor community needs for library services, technology, and facilities, and tailor them to effectively meet those needs. | |
| SR4-2 | **Interagency Coordination.** We leverage relationships with outside agencies, educational institutions, and neighboring jurisdictions to share the library resources to the benefit of Ontario residents. | |
| SR4-3 | **Library Outreach.** We outreach to the community to increase the patronage of the library. | |
| SR4-4 | **Coordination with other Community Services.** We coordinate library programs with other recreational and community programs and facilities. | |
| SR4-5 | **Focal Points of the Community.** We design and program Ontario's libraries as focal points of community engagement, including public outreach and community engagement. | |
| SR4-6 | **Robert E. Ellingwood Model Colony History Room.** We work with the Museum of History and Art, Ontario in order to collect, preserve and display artifacts and images from Ontario's heritage and connect the City's past to the present through the History Room. | **Robert E. Ellingwood Model Colony History Room.** We work with the Ontario Museum of History and Art~~, Ontario~~ in order to collect, preserve, and display artifacts and images from Ontario's heritage and connect the City's past to the present through the History Room |
| **SR5** | **Entertainment and Culture** | |
| **SR5** | **Local heritage, entertainment, and cultural experiences that enrich the lives of Ontario's residents, workers, and visitors and serve to attract residents and businesses to the City.** | |
| SR5-1 | **Provisions of Entertainment and Culture.** We support a range of entertainment and cultural experiences, such as public art, exhibitions, and performances. | **Provision of Entertainment and Culture.** We support equitable access to a range of entertainment and cultural experiences such as public art, exhibitions and performances. |
| SR5-2 | **Local Heritage Education.** We partner with educational providers to promote culture and heritage. (Link to Community Design Element *Historic Preservation* Section ). | |
| SR5-3 | **Public Art**. We encourage public art in buildings, parks, open spaces, and other public and private spaces. | |
| SR5-4 | **Private-Public Sector Events.** We partner with private and nonprofit sectors to provide and promote participation in cultural activities, including fairs, festivals, and other events geared to neighborhoods, the City as a whole, and the region. | |
| SR5-5 | **Promotion of Ontario Artists and Musicians.** We promote awareness of entertainment and culture produced in Ontario. | |

IX = Internal-External

XI = External- Internal

II = Internal-Internal

Modeling of vehicle miles traveled (VMT) provided by Fehr and Peers is based on the San Bernardino County Transit Authority's (SBCTA) San Bernardino Transportation Analysis Model (SBTAM). VMT from passenger vehicles and trucks that have an origin or destination in the City using a transportation origin-destination methodology. Accounting of VMT is based on the recommendations of CARB's Regional Targets Advisory Committee (RTAC) created under Senate Bill 375 (SB 375). For accounting purposes, there are three types of trips:

» Vehicle trips that originated and terminated within the City (Internal-Internal, I-I). Using the accounting rules established by RTAC, 100 percent of the length of these trips, and their emissions, are attributed to the
» Vehicle trips that either originated or terminated (but not both) within the City (Internal-External or External-Internal, I-X and X-I). Using the accounting rules established by RTAC, 50 percent of the trip length for
» Vehicle trips that neither originated nor terminated within the City. These trips are commonly called pass-through trips (External-External, X-X). Using the accounting rules established by RTAC, these trips are not

# Year 2021 Existing: Criteria Air Pollutants

Source: EMFAC2021 Version 1.0.1. PL Emission Rates. San Berndardino County - South Coast Air Basin
Uses 40 mph running exhaust emissions rates based on statewide average, as cited in the CalEEMod User's Guide.

[1.] Based on data provided Fehr & Peers.

# We Can Model Regional Emissions, But Are the Results Meaningful for CEQA?

Authors: AEP Climate Change Committee (Michael Hendrix, Dave Mitchell, Haseeb Qureshi, Jennifer Reed, Brian Schuster, Nicole Vermilion, and Rich Walters)

On December 24, 2018, the California Supreme Court, *Sierra Club v. County of Fresno (Friant Ranch, L.P.] (2018) 6 Cal.5th 502, Case No. S219783 (Friant Ranch*), held that simply identifying that a project exceeds an emissions threshold is not sufficient to identify a project's significant effect on the environment relative to the health effects of project emissions. The Court found that an EIR should make a reasonable effort to substantively connect a project's criteria pollutant emissions to likely health consequences, or explain why it is not currently feasible to provide such an analysis. In 2019, there were several CEQA documents that included health effects modeling to provide additional analysis for projects with criteria air pollutant emissions that exceed a significance threshold. While it is technically possible to conduct this modeling, we argue that this additional layer of quantitative analysis may not always provide decision-makers and the public with additional meaningful information. It is the air districts that are best suited to provide frameworks for how to identify health effects of regional criteria pollutant emissions under CEQA.

## Introduction

Significance thresholds for regional criteria pollutants used by California air districts and lead agencies represent the maximum emissions from a project that are not expected to cause or contribute to an exceedance of the most stringent applicable national or state ambient air quality standard (AAQS). By analyzing the project's emissions against these thresholds, the CEQA document assesses whether these emissions directly contribute to any regional or local exceedances of the applicable AAQS and exposure levels. The basis of the ruling in Friant Ranch was that the EIR did not provide a meaningful analysis of the adverse health effects that would be associated with the project's criteria pollutant emissions, which were identified as being far above the relevant thresholds. The discussion of the adverse health effects in the EIR was general in nature and did not connect the levels of the pollutants that would be emitted by the project to adverse health effects.

The process of correlating project-related criteria pollutant emissions to health-based consequences is called a health impact assessment (HIA). An HIA involves two steps: 1) running a regional photochemical grid model (PGM) to estimate the small increases in concentrations of ozone and particulate matter (PM) in the region as a result of a project's emissions of criteria and precursor pollutants; and 2) running the U.S. EPA Benefits Mapping and Analysis Program (BenMAP) to estimate the resulting health impacts from these increases in concentrations of ozone and PM.

## Limitations of Regional-Scale Dispersion Models

It is technically feasible to conduct regional-scale criteria pollutant modeling for a development project. Particulate matter (PM) can be divided into two categories: directly emitted PM and secondary PM. Secondary PM, is formed via complex chemical reactions in the atmosphere between precursor chemicals such as sulfur oxides ($SO_x$) and $NO_x$, Ozone ($O_3$) is a secondary pollutant formed from the oxidation of reactive organic gases (ROGs) and nitrogen oxides (NOx) in the presence of sunlight. Rates of ozone formation are a function of a variety of complex physical factors, including the presence of sunlight and precursor pollutants, natural topography, nearby structures that cause building downwash, atmospheric stability, and wind patterns.. Secondary formation of PM and ozone can occur far from the original emissions source from regional transport due to wind and topography (e.g. low-level jet stream). As such, modeling concentrations of secondary PM and ozone require photochemical grid models (PGMs), such as CMAQ and CAMx. These models have a much larger "grid" system and much lower resolution than localized dispersion modeling (e.g., AERMOD). For example, common grid cells in PGMs are 4x4 kilometers, while AERMOD can identify concentrations at the meter-level.

Photochemical modeling also depends on all emission sources in the entire domain. Low resolution and spatial averaging produces "noise" and model uncertainty that can exceed a project's specific emissions. Additionally, regional-scale models are highly contingent upon background concentrations. Factors such as meteorology and topography greatly affect the certainty levels of predicted concentrations at receptor points. As a result, there are statistical ranges of uncertainty through all the modeling steps. Due to these factors, it is difficult to predict ground-level secondary PM and ozone concentrations associated with relatively small emission sources with a high degree of certainty. While it is possible to use a regional-scale model to predict these regional concentrations, when a project's emissions are less than the regional model's resolution, the resultant ambient air quality concentrations will be within the margin of uncertainty. In CEQA terms, this would fit the definition of "speculative". Only when the scale of emissions would result in changes in ambient air quality beyond the model margin of uncertainty would the results not be "speculative" as defined by CEQA.

## Identifying Health Effects due to Ambient Air Quality Changes

BenMap is a model developed by the USEPA to understand the health effects from changes in ozone and PM concentrations. If there is an acceptable level of confidence that the results provided by the regional dispersion modeling are valid, then these concentrations can be translated into health outcomes using BenMap. The health outcomes in BenMap are based on changes in ambient air concentrations and the population exposed to these changes. Data provided by this analysis may indicate increased number of workdays lost to illness, hospital admissions (respiratory), emergency room visits (asthma), or mortality, among other health effects. These are called "health incidences."

Translating the incremental increase in PM and ozone concentrations to specific health effects is also subject to uncertainty. For example, regional models assign the same toxicity to PM regardless of the source of PM (such as road dust as exhaust), and thus potentially overpredict adverse health effects of PM. BenMap also assumes that health effects can occur at any concentration, including small incremental concentrations, and assumes that impacts seen at large concentration differences can be linearly scaled down to small increases in concentration, with no consideration of potential thresholds below which health impacts may not occur. Additionally, BenMap is used for assessing impacts over large areas and populations and was not intended to be used for individual projects. For health incidences, the number of hospitalizations or increase in morbidity predicted by BenMap is greatly affected by the population characteristics.[1] Small increases in emissions in an area with a high population have a much greater affect than large increases in emissions over an area with a small population. As a result, the same amount of emissions generated in an urban area could result in greater health consequences than if the same emissions occurred on the urban periphery, where fewer people may be affected. This will also depend on other factors including meteorology and photochemistry, as discussed above. Emissions in areas with conditions that favor high air dispersion or unfavorable ozone formation will likely have relatively lower effects on ambient air quality and health outcomes.

While BenMap provides additional statistical information about health consequences requested by the Court in the Friant Ranch decision, this information is only meaningful when presented with the full health context of the region or locality at hand. For example, if the BenMap analysis says that the project would result in two additional hospital admissions, this result alone is not useful unless one identifies how many hospital admissions are caused by poor air quality now (without the project) and how many hospital admissions occur

[1] BenMap assigns prevalence rate for asthma and other health effects based on indicators such as gender, race, age, ethnicity, etc. The BenMap user manual specifically states that there are a wide range of variables that can be included in the health effect function. The health effect function was developed based on epidemiological studies, and specifically states that "there are a number of issues that arise when deriving and choosing between health effect functions that go well beyond this user manual. Hence, it is important to have a trained health researcher assist in developing the impact function data file."

overall (due to air quality and other causes). Because health is not solely influenced by ambient air quality, and has many factors that are highly variable across geographies and populations, there is an added level of uncertainty in using a generalized identification of health effects due to air quality conditions overlaid onto a specific diverse set of health conditions and other factors. Regardless of the uncertainty levels, if regional health effects are identified for a project, then the CEQA analysis needs to provide a full health baseline for decision-makers and the public to be able to understand the marginal change due to project criteria pollutant emissions. Given the margin of uncertainty at each step in the process (regional scale modeling, existing ambient air quality effects on health, population health conditions vulnerability, and marginal health effects of air pollution), the identification of marginal health effects due to individual projects using regional air quality modelling and tools such as BenMap are likely to be within the level of uncertainty and thus defined as "speculative" per CEQA.

## The Role of Air Districts

Regional, community, multiscale air quality modeling conducted by the air districts for each individual air basin or locality within the air basin would be the most appropriate indictor of health effects for projects. The AQMPs provide a forecast of regional emissions based on regional dispersion modeling for all sources within the air basin. Regional-scale models attempt to account for all emissions sources within an air basin.

The regional scale model requires inputs such as existing and future regional sources of pollutants and global meteorological data, which are generally not accessible by CEQA practitioners. Modeling of future years should consider future concentrations of air pollutants based on regional growth projections and existing programs, rules, and regulations adopted by Federal, State, and local air districts. In general, air pollution in California is decreasing as a result of Federal and State laws. Based on the air quality management plans (AQMPs) required for air districts in a nonattainment area, air quality in the air basins are anticipated to improve despite an increase in population and employment growth. Air districts are charged with assessing programs, rules, and regulations so that the increase in population and employment does not conflict with the mandate to achieve the AAQS. Because emissions forecasting and health outcomes based on the regional growth projections to achieve the AAQS is under the purview of the air districts, it should also fall on the air districts to identify the potential health outcomes associated with individual project's criteria pollutant emissions.

The South Coast Air Quality Management District (South Coast AQMD) and the Sacramento Metropolitan Air Quality Management District (Sacramento Metropolitan AQMD) are exploring concepts for project-level analysis in light of Friant Ranch to assist local lead agencies.

- South Coast AQMD is looking at the largest land use development project they have had in the air basin and doing a sensitivity analysis (using CAMx for photochemical grid modeling and BenMap for health outcomes) to see how locating a very large project in different parts of the air basin (Los Angeles, Inland Empire, v. Orange County) would affect the health incidence.

- Sacramento Metropolitan AQMD is also looking at a screening process. Rather than looking at the upper end (i.e., largest project in the air basin), Sacramento Metropolitan AQMD is starting at the smallest project that exceeds the regional significance threshold and running CAMx and BenMap at different locations in the air basin to see how it affects regional health incidences.

Guidance from Air Districts would be the most effective way to incorporate meaningful information concerning regional health effects of project criteria pollutants in CEQA analyses, including guidance as to when modelling is and is not useful and meaningful, how modelling should be conducted, and how to best present additional information to inform decision-makers and the public about a project's impacts.

## So…until air districts do their part, what should we do?

### PROJECTS WITH CRITERIA POLLUTANT EMISSIONS BELOW AIR DISTRICT THRESHOLDS

The Friant Ranch ruling was about providing disclosure of health effects of project emissions that were well over the significance thresholds. Since the air district thresholds are tied to a level the air districts find to not have a significant effect on ambient air quality, there should be no need to discuss the health effects of criteria pollutant emissions that are less than the significance thresholds.

### PROJECTS WITH CRITERIA POLLUTANT EMISSIONS ABOVE AIR DISTRICT THRESHOLDS

Pursuant to Section 15125 of the CEQA Guidelines, the environmental setting will normally constitute the baseline physical conditions by which a lead agency determines whether an impact is significant. For CEQA, the health effects associated with buildout of a project would occur at the project's horizon year. Because CEQA requires an analysis of the change from existing conditions, the change in effects would be associated with changes in ambient air quality and associated health outcomes between existing conditions and the project's horizon year. Therefore, in order to show how a project affects health outcomes in an air basin, the CEQA documents will need to qualitatively or quantitatively address: (1) existing ambient criteria pollutant concentrations, health incidences due to existing air quality, and health incidences overall; 2) future (without project) ambient criteria pollutant concentrations and health incidences, and 3) future (with project) ambient criteria pollutant concentrations and health incidences.

Projects with significant criteria pollutant emissions could use regional modelling and BenMap to identify health effects of project emissions, but it is likely that many (or most) projects that are not regionally substantial in scale will be shown to have minimal regional changes in PM and ozone concentrations and therefore minimal changes in associated health effects. In addition, many projects may have emissions that are less than the uncertainty level of regional air quality models and BenMap health effects modeling; in these cases, quantitative results will not be meaningful. Thus, absent better direction from air districts, CEQA lead agencies will have to determine on a case by case basis whether a qualitative discussion of health effects will suffice, or whether regional modeling, despite its limitations, should be conducted for the project.

Where a project has substantial criteria pollutant emissions when considered on a regional scale, and there is reason to believe that the modeling of ambient air quality and regional health effects would produce non-speculative results when considering modeling uncertainties, then CEQA lead agencies should use regional modelling.

## Conclusion

The purpose of CEQA is to inform the public as to the potential for a project to result in one or more significant adverse effects on the environment (including health effects). A CEQA document must provide an understandable and clear environmental analysis and provide an adequate basis for decision making and public disclosure. Regional dispersion modeling of criteria pollutants and secondary pollutants like PM and ozone can provide additional information, but that information may be within the margin of modelling uncertainty and/or may not be meaningful for the public and decision-makers unless a full health context is presented in the CEQA document. Simply providing health outcomes based on use of a regional-scale model and BenMap may not satisfy the goal to provide decision-makers and the public with information that would assist in weighting the environmental consequences of a project. A CEQA document must provide an analysis that is understandable for decision making and public disclosure. Regional scale modeling may provide a technical method for this type of analysis, but it does not necessarily provide a meaningful way to connect the magnitude of a project's criteria pollutant emissions to health effects without speculation.

In order to accurately connect the dots, we urge California air districts to provide more guidance on how to identify and describe the health effects of exceeding regional criteria pollutant thresholds. The air districts are the primary agency responsible for ensuring that the air basins attain the AAQS and ensure the health and welfare of its residents relative to air quality. Because emissions forecasting and health outcomes are based on the regional growth projections to achieve the AAQS is under the purview of the air districts, it should fall on the air districts to identify the potential health outcomes associated with exceeding the CEQA thresholds for projects. The air districts should provide lead agencies with a consistent, reliable, and meaningful analytical approach to correlate specific health effects that may result from a project's criteria pollutant emissions.

## Glossary

AAQS – Ambient Air Quality Standards

BenMap – Benefits Mapping and Analysis Program

CAMx – Comprehensive Air Quality Model with extensions

CMAQ – Community Multiscale Air Quality

NOx – Nitrogen Oxides

PM – Particulate Matter

SOx – Sulfur Oxides

State – California

USEPA – United States Environmental Protection Agency

**TO THE HONORABLE CHIEF JUSTICE AND JUSTICES OF THE SUPREME COURT:**

## APPLICATION FOR LEAVE TO FILE *AMICUS CURIAE* BRIEF

Pursuant to Rule 8.520(f) of the California Rules of Court, the South Coast Air Quality Management District (SCAQMD) respectfully requests leave to file the attached *amicus curiae* brief. Because SCAQMD's position differs from that of either party, we request leave to submit this amicus brief in support of neither party.

## HOW THIS BRIEF WILL ASSIST THE COURT

SCAQMD's proposed amicus brief takes a position on two of the issues in this case. In both instances, its position differs from that of either party. The issues are:

1) Does the California Environmental Quality Act (CEQA) require an environmental impact report (EIR) to correlate a project's air pollution emissions with specific levels of health impacts?
2) What is the proper standard of review for determining whether an EIR provides sufficient information on the health impacts caused by a project's emission of air pollutants?

This brief will assist the Court by discussing the practical realities of correlating identified air quality impacts with specific health outcomes. In short, CEQA requires agencies to provide detailed information about a project's air quality impacts that is sufficient for the public and decisionmakers to adequately evaluate the project and meaningfully understand its impacts. However, the level of analysis is governed by a rule of reason; CEQA only requires agencies to conduct analysis if it is reasonably feasible to do so.

With regard to health-related air quality impacts, an analysis that correlates a project's air pollution emissions with specific levels of health impacts will be feasible in some cases but not others. Whether it is feasible depends on a variety of factors, including the nature of the project and the nature of the analysis under consideration. The feasibility of analysis may also change over time as air districts and others develop new tools for measuring projects' air quality related health impacts. Because SCAQMD has among the most sophisticated air quality modeling and health impact evaluation capability of any of the air districts in the State, it is uniquely situated to express an opinion on the extent to which the Court should hold that CEQA requires lead agencies to correlate air quality impacts with specific health outcomes.

SCAQMD can also offer a unique perspective on the question of the appropriate standard of review. SCAQMD submits that the proper standard of review for determining whether an EIR is sufficient as an informational document is more nuanced than argued by either party. In our view, this is a mixed question of fact and law. It includes determining whether additional analysis is feasible, which is primarily a factual question that should be reviewed under the substantial evidence standard. However, it also involves determining whether the omission of a particular analysis renders an EIR insufficient to serve CEQA's purpose as a meaningful, informational document. If a lead agency has not determined that a requested analysis is infeasible, it is the court's role to determine whether the EIR nevertheless meets CEQA's purposes, and courts should not defer to the lead agency's conclusions regarding the legal sufficiency of an EIR's analysis. The ultimate question of whether an EIR's analysis is "sufficient" to serve CEQA's informational purposes is predominately a question of law that courts should review de novo.

This brief will explain the rationale for these arguments and may assist the Court in reaching a conclusion that accords proper respect to a lead agency's factual conclusions while maintaining judicial authority over the ultimate question of what level of analysis CEQA requires.

## STATEMENT OF INTEREST OF *AMICUS CURIAE*

The SCAQMD is the regional agency primarily responsible for air pollution control in the South Coast Air Basin, which consists of all of Orange County and the non-desert portions of the Los Angeles, Riverside, and San Bernardino Counties. (Health & Saf. Code § 40410; Cal. Code Regs., tit. 17, § 60104.) The SCAQMD participates in the CEQA process in several ways. Sometimes it acts as a lead agency that prepares CEQA documents for projects. Other times it acts as a responsible agency when it has permit authority over some part of a project that is undergoing CEQA review by a different lead agency. Finally, SCAQMD also acts as a commenting agency for CEQA documents that it receives because it is a public agency with jurisdiction by law over natural resources affected by the project.

In all of these capacities, SCAQMD will be affected by the decision in this case. SCAQMD sometimes submits comments requesting that a lead agency perform an additional type of air quality or health impacts analysis. On the other hand, SCAQMD sometimes determines that a particular type of health impact analysis is not feasible or would not produce reliable and informative results. Thus, SCAQMD will be affected by the Court's resolution of the extent to which CEQA requires EIRs to correlate emissions and health impacts, and its resolution of the proper standard of review.

## CERTIFICATION REGARDING AUTHORSHIP AND FUNDING

No party or counsel in the pending case authored the proposed amicus curiae brief in whole or in part, or made any monetary contribution intended to fund the preparation or submission of the brief. No person or entity other than the proposed *Amicus Curiae* made any monetary contribution intended to fund the preparation or submission of the brief.

Respectfully submitted,

DATED: April 3, 2015

SOUTH COAST AIR QUALITY
MANAGEMENT DISTRICT
KURT R. WIESE, GENERAL COUNSEL
BARBARA BAIRD, CHIEF DEPUTY COUNSEL

By: Barbara Baird
Barbara Baird
*Attorneys for [proposed] Amicus Curiae*
*SOUTH COAST AIR QUALITY*
*MANAGEMENT DISTICT*

## BRIEF OF AMICUS CURIAE

## SUMMARY OF ARGUMENT

The South Coast Air Quality Management District (SCAQMD) submits that this Court should not try to establish a hard-and-fast rule concerning whether lead agencies are required to correlate emissions of air pollutants with specific health consequences in their environmental impact reports (EIR). The level of detail required in EIRs is governed by a few, core CEQA (California Environmental Quality Act) principles. As this Court has stated, "[a]n EIR must include detail sufficient to enable those who did not participate in its preparation to understand and to consider meaningfully the issues raised by the proposed project." (*Laurel Heights Improvement Assn. v. Regents of the Univ of Cal.* (1988) 47 Cal.3d 376, 405 ["*Laurel Heights I*"]) Accordingly, "an agency must use its best efforts to find out and disclose all that it reasonably can." (*Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 428 (quoting CEQA Guidelines § 15144)[1].). However, "[a]nalysis of environmental effects need not be exhaustive, but will be judged in light of what is reasonably feasible." (*Association of Irritated Residents v. County of Madera* (2003) 107 Cal.App.4th 1383, 1390; CEQA Guidelines §§ 15151, 15204(a).)

With regard to analysis of air quality related health impacts, EIRs must generally quantify a project's pollutant emissions, but in some cases it is not feasible to correlate these emissions to specific, quantifiable health impacts (e.g., premature mortality; hospital admissions). In such cases, a general description of the adverse health impacts resulting from the pollutants at issue may be sufficient. In other cases, due to the magnitude

---

[1] The CEQA Guidelines are found at Cal. Code Regs., tit. 14 §§ 15000, *et seq*.

or nature of the pollution emissions, as well as the specificity of the project involved, it may be feasible to quantify health impacts. Or there may be a less exacting, but still meaningful analysis of health impacts that can feasibly be performed. In these instances, agencies should disclose those impacts.

SCAQMD also submits that whether or not an EIR complies with CEQA's informational mandates by providing sufficient, feasible analysis is a mixed question of fact and law. Pertinent here, the question of whether an EIR's discussion of health impacts from air pollution is sufficient to allow the public to understand and consider meaningfully the issues involves two inquiries: (1) Is it feasible to provide the information or analysis that a commenter is requesting or a petitioner is arguing should be required?; and (2) Even if it is feasible, is the agency relying on other policy or legal considerations to justify not preparing the requested analysis? The first question of whether an analysis is feasible is primarily a question of fact that should be judged by the substantial evidence standard. The second inquiry involves evaluating CEQA's information disclosure purposes against the asserted reasons to not perform the requested analysis. For example, an agency might believe that its EIR meets CEQA's informational disclosure standards even without a particular analysis, and therefore choose not to conduct that analysis. SCAQMD submits that this is more of a legal question, which should be reviewed de novo as a question of law.

## ARGUMENT

## I. RELEVANT FACTUAL AND LEGAL FRAMEWORK.

### A. Air Quality Regulatory Background

The South Coast Air Quality Management District (SCAQMD) is one of the local and regional air pollution control districts and air quality

management districts in California. The SCAQMD is the regional air pollution agency for the South Coast Air Basin, which consists of all of Orange County and the non-desert portions of Los Angeles, Riverside, and San Bernardino Counties. (Health & Saf. Code § 40410, 17 Cal. Code Reg. § 60104.) The SCAQMD also includes the Coachella Valley in Riverside County (Palm Springs area to the Salton Sea). (SCAQMD, *Final 2012 AQMP (Feb. 2013)*, http://www.aqmd.gov/home/library/clean-air-plans/air-quality-mgt-plan/final-2012-air-quality-management-plan; then follow "chapter 7" hyperlink; pp 7-1, 7-3 (last visited Apr. 1, 2015).) The SCAQMD's jurisdiction includes over 16 million residents and has the worst or nearly the worst air pollution levels in the country for ozone and fine particulate matter. (SCAQMD, *Final 2012 AQMP (Feb. 2013)*, http://www.aqmd.gov/home/library/clean-air-plans/air-quality-mgt-plan/final-2012-air-quality-management-plan; then follow "Executive Summary" hyperlink p. ES-1 (last visited Apr. 1, 2015).)

Under California law, the local and regional districts are primarily responsible for controlling air pollution from all sources except motor vehicles. (Health & Saf. Code § 40000.) The California Air Resources Board (CARB), part of the California Environmental Protection Agency, is primarily responsible for controlling pollution from motor vehicles. (*Id.*) The air districts must adopt rules to achieve and maintain the state and federal ambient air quality standards within their jurisdictions. (Health & Saf. Code § 40001.)

The federal Clean Air Act (CAA) requires the United States Environmental Protection Agency (EPA) to identify pollutants that are widely distributed and pose a threat to human health, developing a so-called "criteria" document. (42 U.S.C. § 7408; CAA § 108.) These pollutants are frequently called "criteria pollutants." EPA must then establish "national ambient air quality standards" at levels "requisite to protect public health",

allowing "an adequate margin of safety." (42 U.S.C. § 7409; CAA § 109.) EPA has set standards for six identified pollutants: ozone, nitrogen dioxide, sulfur dioxide, carbon monoxide, particulate matter (PM), and lead. (U.S. EPA, National Ambient Air Quality Standards (NAAQS), http://www.epa.gov/air/criteria.html (last updated Oct. 21, 2014).)[2]

Under the Clean Air Act, EPA sets emission standards for motor vehicles and "nonroad engines" (mobile farm and construction equipment, marine vessels, locomotives, aircraft, etc.). (42 U.S.C. §§ 7521, 7547; CAA §§ 202, 213.) California is the only state allowed to establish emission standards for motor vehicles and most nonroad sources; however, it may only do so with EPA's approval. (42 U.S.C. §§ 7543(b), 7543(e); CAA §§ 209(b), 209(c).) Sources such as manufacturing facilities, power plants and refineries that are not mobile are often referred to as "stationary sources." The Clean Air Act charges state and local agencies with the primary responsibility to attain the national ambient air quality standards. (42 U.S.C. § 7401(a)(3); CAA § 101(a)(3).) Each state must adopt and implement a plan including enforceable measures to achieve and maintain the national ambient air quality standards. (42 U.S.C. § 7410; CAA § 110.) The SCAQMD and CARB jointly prepare portion of the plan for the South Coast Air Basin and submit it for approval by EPA. (Health & Saf. Code §§ 40460, et seq.)

The Clean Air Act also requires state and local agencies to adopt a permit program requiring, among other things, that new or modified "major" stationary sources use technology to achieve the "lowest achievable emission rate," and to control minor stationary sources as

---

[2] Particulate matter (PM) is further divided into two categories: fine particulate or $PM_{2.5}$ (particles with a diameter of less than or equal to 2.5 microns) and coarse particulate ($PM_{10}$) (particles with a diameter of 10 microns or less). (U.S. EPA, Particulate Matter (PM), http://www.epa.gov/airquality/particlepollution/ (last visited Apr. 1, 2015).)

needed to help attain the standards. (42 U.S.C. §§ 7502(c)(5), 7503(a)(2), 7410(a)(2)(C); CAA §§ 172(c)(5), 173(a)(2), 110(a)(2)(C).) The air districts implement these permit programs in California. (Health & Saf. Code §§ 42300, et seq.)

The Clean Air Act also sets out a regulatory structure for over 100 so-called "hazardous air pollutants" calling for EPA to establish "maximum achievable control technology" (MACT) for sources of these pollutants. (42 U.S.C. § 7412(d)(2); CAA § 112(d)(2).) California refers to these pollutants as "toxic air contaminants" (TACs) which are subject to two state-required programs. The first program requires "air toxics control measures" for specific categories of sources. (Health & Saf. Code § 39666.) The other program requires larger stationary sources and sources identified by air districts to prepare "health risk assessments" for impacts of toxic air contaminants. (Health & Saf. Code §§ 44320(b), 44322, 44360.) If the health risk exceeds levels identified by the district as "significant," the facility must implement a "risk reduction plan" to bring its risk levels below "significant" levels. Air districts may adopt additional more stringent requirements than those required by state law, including requirements for toxic air contaminants. (Health & Saf. Code § 41508; *Western Oil & Gas Assn. v. Monterey Bay Unified APCD* (1989) 49 Cal.3d 408, 414.) For example, SCAQMD has adopted a rule requiring new or modified sources to keep their risks below specified levels and use best available control technology (BACT) for toxics. (SCAQMD, *Rule 1401-New Source Review of Toxic Air Contaminants*, http://www.aqmd.gov/home/regulations/rules/scaqmd-rule-book/regulation-xiv; then follow "Rule 1401" hyperlink (last visited Apr. 1, 2015).)

## B. The SCAQMD's Role Under CEQA

The California Environmental Quality Act (CEQA) requires public agencies to perform an environmental review and appropriate analysis for projects that they implement or approve. (Pub. Resources Code § 21080(a).) The agency with primary approval authority for a particular project is generally the "lead agency" that prepares the appropriate CEQA document. (CEQA Guidelines §§ 15050, 15051.) Other agencies having a subsequent approval authority over all or part of a project are called "responsible" agencies that must determine whether the CEQA document is adequate for their use. (CEQA Guidelines §§ 15096(c), 15381.) Lead agencies must also consult with and circulate their environmental impact reports to "trustee agencies" and agencies "with jurisdiction by law" including "authority over resources which may be affected by the project." (Pub. Resources Code §§ 21104(a), 21153; CEQA Guidelines §§ 15086(a)(3), 15073(c).) The SCAQMD has a role in all these aspects of CEQA.

Fulfilling its responsibilities to implement its air quality plan and adopt rules to attain the national ambient air quality standards, SCAQMD adopts a dozen or more rules each year to require pollution reductions from a wide variety of sources. The SCAQMD staff evaluates each rule for any adverse environmental impact and prepares the appropriate CEQA document. Although most rules reduce air emissions, they may have secondary environmental impacts such as use of water or energy or disposal of waste—e.g., spent catalyst from control equipment.[3]

---

[3] The SCAQMD's CEQA program for its rules is a "Certified Regulatory Program" under which it prepares a "functionally equivalent" document in lieu of a negative declaration or EIR. (Pub. Resources Code § 21080.5, CEQA Guidelines § 15251(l).)

The SCAQMD also approves a large number of permits every year to construct new, modified, or replacement facilities that emit regulated air pollutants. The majority of these air pollutant sources have already been included in an earlier CEQA evaluation for a larger project, are currently being evaluated by a local government as lead agency, or qualify for an exemption. However, the SCAQMD sometimes acts as lead agency for major projects where the local government does not have a discretionary approval. In such cases, SCAQMD prepares and certifies a negative declaration or environmental impact report (EIR) as appropriate.[4] SCAQMD evaluates perhaps a dozen such permit projects under CEQA each year. SCAQMD is often also a "responsible agency" for many projects since it must issue a permit for part of the projects (e.g., a boiler used to provide heat in a commercial building). For permit projects evaluated by another lead agency under CEQA, SCAQMD has the right to determine that the CEQA document is inadequate for its purposes as a responsible agency, but it may not do so because its permit program already requires all permitted sources to use the best available air pollution control technology. (SCAQMD, *Rule 1303(a)(1) – Requirements*, http://www.aqmd.gov/home/regulations/rules/scaqmd-rule-book/regulation-xiii; then follow "Rule 1303" hyperlink (last visited Apr. 1, 2015).)

Finally, SCAQMD receives as many as 60 or more CEQA documents each month (around 500 per year) in its role as commenting agency or an agency with "jurisdiction by law" over air quality—a natural resource affected by the project. (Pub. Resources Code §§ 21104(a), 21153; CEQA Guidelines § 15366(a)(3).) The SCAQMD staff provides comments on as many as 25 or 30 such documents each month.

---

[4] The SCAQMD's permit projects are not included in its Certified Regulatory Program, and are evaluated under the traditional local government CEQA analysis. (Pub. Resources Code §§ 21150-21154.)

(SCAQMD Governing Board Agenda, Apr. 3, 2015, Agenda Item 16, Attachment A, http://www.aqmd.gov/home/library/meeting-agendas-minutes/agenda?title=governing-board-meeting-agenda-april-3-2015; then follow "16. Lead Agency Projects and Environmental Documents Received by SCAQMD" hyperlink (last visited Apr. 1, 2015).) Of course, SCAQMD focuses its commenting efforts on the more significant projects.

Typically, SCAQMD comments on the adequacy of air quality analysis, appropriateness of assumptions and methodology, and completeness of the recommended air quality mitigation measures. Staff may comment on the need to prepare a health risk assessment detailing the projected cancer and noncancer risks from toxic air contaminants resulting from the project, particularly the impacts of diesel particulate matter, which CARB has identified as a toxic air contaminant based on its carcinogenic effects. (California Air Resources Board, Resolution 98-35, Aug. 27, 1998, http://www.arb.ca.gov/regact/diesltac/diesltac.htm; then follow Resolution 98-35 hyperlink (last visited Apr. 1, 2015).) Because SCAQMD already requires new or modified stationary sources of toxic air contaminants to use the best available control technology for toxics and to keep their risks below specified levels, (SCAQMD Rule 1401, supra, note 15), the greatest opportunity to further mitigate toxic impacts through the CEQA process is by reducing emissions—particularly diesel emissions—from vehicles.

## II. THIS COURT SHOULD NOT SET A HARD-AND-FAST RULE CONCERNING THE EXTENT TO WHICH AN EIR MUST CORRELATE A PROJECT'S EMISSION OF POLLUTANTS WITH RESULTING HEALTH IMPACTS.

Numerous cases hold that courts do not review the correctness of an EIR's conclusions but rather its sufficiency as an informative document. (*Laurel Heights 1*, *supra*, 47 Cal.3d at p. 392; *Citizens of Goleta Valley v.*

*Bd. of Supervisors* (1990) 52 Cal.3d 553, 569; *Bakersfield Citizens for Local Control v. City of Bakersfield* (2004) 124 Cal.App.4th 1184, 1197.)

As stated by the Court of Appeal in this case, where an EIR has addressed a topic, but the petitioner claims that the information provided about that topic is insufficient, courts must "draw[] a line that divides *sufficient* discussions from those that are *insufficient*." (*Sierra Club v. County of Fresno* (2014) 226 Cal.App.4th 704 (superseded by grant of review) 172 Cal.Rptr.3d 271, 290.) The Court of Appeal readily admitted that "[t]he terms themselves – sufficient and insufficient – provide little, if any, guidance as to where the line should be drawn. They are simply labels applied once the court has completed its analysis." (*Id.*)

The CEQA Guidelines, however, provide guidance regarding what constitutes a sufficient discussion of impacts. Section 15151 states that "the sufficiency of an EIR is to be reviewed in light of what is reasonably feasible." Case law reflects this: "Analysis of environmental effects need not be exhaustive, but will be judged in light of what was reasonably feasible." (*Association of Irritated Residents v. County of Madera, supra,* 107 Cal.App.4th at p. 1390; see also CEQA Guidelines § 15204(a).)

Applying this test, this Court cannot realistically establish a hard-and-fast rule that an analysis correlating air pollution impacts of a project to quantified resulting health impacts is always required, or indeed that it is never required. Simply put, in some cases such an analysis will be "feasible"; in some cases it will not.

For example, air pollution control districts often require a proposed new source of toxic air contaminants to prepare a "health risk assessment" before issuing a permit to construct. District rules often limit the allowable cancer risk the new source may cause to the "maximally exposed individual" (worker and residence exposures). (*See, e.g.*, SCAQMD Rule 1401(c)(8); 1401(d)(1), *supra* note 15.) In order to perform this analysis, it

is necessary to have data regarding the sources and types of air toxic contaminants, location of emission points, velocity of emissions, the meteorology and topography of the area, and the location of receptors (worker and residence). (SCAQMD, *Supplemental Guidelines for Preparing Risk Assessments for the Air Toxics "Hot Spots" Information and Assessment Act (AB2588), pp. 11-16*; (last visited Apr. 1, 2015) http://www.aqmd.gov/home/library/documents-support-material; "Guidelines" hyperlink; AB2588; then follow AB2588 Risk Assessment Guidelines hyperlink.)

Thus, it is feasible to determine the health risk posed by a new gas station locating at an intersection in a mixed use area, where receptor locations are known. On the other hand, it may not be feasible to perform a health risk assessment for airborne toxics that will be emitted by a generic industrial building that was built on "speculation" (i.e., without knowing the future tenant(s)). Even where a health risk assessment can be prepared, however, the resulting maximum health risk value is only a calculation of risk—it does not necessarily mean anyone will contract cancer as a result of the project.

In order to find the "cancer burden" or expected additional cases of cancer resulting from the project, it is also necessary to know the numbers and location of individuals living within the "zone of impact" of the project: i.e., those living in areas where the projected cancer risk from the project exceeds one in a million. (SCAQMD, Health Risk Assessment Summary form, http://www.aqmd.gov/home/forms ; filter by "AB2588" category; then "Health Risk Assessment" hyperlink (last visited Apr. 1, 2015).) The affected population is divided into bands of those exposed to at least 1 in a million risk, those exposed to at least 10 in a million risk, etc. up to those exposed at the highest levels. (*Id.*) This data allows agencies to calculate an approximate number of additional cancer cases expected from

the project. However, it is not possible to predict which particular individuals will be affected.

For the so-called criteria pollutants[5], such as ozone, it may be more difficult to quantify health impacts. Ozone is formed in the atmosphere from the chemical reaction of the nitrogen oxides ($NO_x$) and volatile organic compounds (VOC) in the presence of sunlight. (U.S. EPA, Ground Level Ozone, http://www.epa.gov/airquality/ozonepollution/ (last updated Mar. 25, 2015).) It takes time and the influence of meteorological conditions for these reactions to occur, so ozone may be formed at a distance downwind from the sources. (U.S. EPA, *Guideline on Ozone Monitoring Site Selection* (Aug. 1998) EPA-454/R-98-002 § 5.1.2, http://www.epa.gov/ttnamti1/archive/cpreldoc.html (last visited Apr. 1, 2015).) $NO_x$ and VOC are known as "precursors" of ozone.

Scientifically, health effects from ozone are correlated with increases in the ambient level of ozone in the air a person breathes. (U.S. EPA, *Health Effects of Ozone in the General Population,* Figure 9, http://www.epa.gov/apti/ozonehealth/population.html#levels (last visited Apr. 1, 2015).) However, it takes a large amount of additional precursor emissions to cause a modeled increase in ambient ozone levels over an entire region. For example, the SCAQMD's 2012 AQMP showed that reducing $NO_x$ by 432 tons per day (157,680 tons/year) and reducing VOC by 187 tons per day (68,255 tons/year) would reduce ozone levels at the SCAQMD's monitor site with the highest levels by only 9 parts per billion. (South Coast Air Quality Management District, *Final 2012 AQMP (February 2013)*, http://www.aqmd.gov/home/library/clean-air-plans/air-quality-mgt-plan/final-2012-air-quality-management-plan; then follow "Appendix V: Modeling & Attainment Demonstrations" hyperlink,

---

[5] See discussion of types of pollutants, supra, Part I.A.

pp. v-4-2, v-7-4, v-7-24.) SCAQMD staff does not currently know of a way to accurately quantify ozone-related health impacts caused by $NO_x$ or VOC emissions from relatively small projects.

On the other hand, this type of analysis may be feasible for projects on a regional scale with very high emissions of $NO_x$ and VOCs, where impacts are regional. For example, in 2011 the SCAQMD performed a health impact analysis in its CEQA document for proposed Rule 1315, which authorized various newly-permitted sources to use offsets from the districts "internal bank" of emission reductions. This CEQA analysis accounted for essentially *all* the increases in emissions due to new or modified sources in the District between 2010 and 2030.[6] The SCAQMD was able to correlate this very large emissions increase (e.g., 6,620 pounds per day $NO_x$ (1,208 tons per year), 89,180 pounds per day VOC (16,275 tons per year)) to expected health outcomes from ozone and particulate matter (e.g., 20 premature deaths per year and 89,947 school absences in the year 2030 due to ozone).[7] (SCAQMD Governing Board Agenda, February 4, 2011, Agenda Item 26, *Assessment for: Re-adoption of Proposed Rule 1315 – Federal New Source Review Tracking System* (see hyperlink in fn 6) at p. 4.1-35, Table 4.1-29.)

---

[6] (SCAQMD Governing Board Agenda, February 4, 2011, Agenda Item 26, Attachment G, *Assessment for: Re-adoption of Proposed Rule 1315 – Federal New Source Review Tracking System, Vol. 1, p.4.0-6*, http://www.aqmd.gov/home/library/meeting-agendas-minutes/agenda?title=governing-board-meeting-agenda-february-4-2011; the follow "26. Adopt Proposed Rule 1315 – Federal New Source Review Tracking System" (last visited April 1, 2015).)

[7] The SCAQMD was able to establish the location of future $NO_x$ and VOC emissions by assuming that new projects would be built in the same locations and proportions as existing stationary sources. This CEQA document was upheld by the Los Angeles County Superior Court in *Natural Res. Def. Council v SCAQMD*, Los Angeles Superior Court No. BS110792).

However, a project emitting only 10 tons per year of $NO_x$ or VOC is small enough that its regional impact on ambient ozone levels may not be detected in the regional air quality models that are currently used to determine ozone levels. Thus, in this case it would not be feasible to directly correlate project emissions of VOC or $NO_x$ with specific health impacts from ozone. This is in part because ozone formation is not linearly related to emissions. Ozone impacts vary depending on the location of the emissions, the location of other precursor emissions, meteorology and seasonal impacts, and because ozone is formed some time later and downwind from the actual emission. (EPA Guideline on Ozone Monitoring Site Selection (Aug. 1998) EPA-454/R-98-002, § 5.1.2; https://www.epa.gov/ttnamti1/archive/cpreldoc.html; then search "Guideline on Ozone Monitoring Site Selection" click on pdf) (last viewed Apr. 1, 2015).)

SCAQMD has set its CEQA "significance" threshold for $NO_x$ and VOC at 10 tons per year (expressed as 55 lb/day). (SCAQMD, *Air Quality Analysis Handbook*, http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook; then follow "SCAQMD Air Quality Significance Thresholds" hyperlink (last visited Apr. 1, 2015).) This is because the federal Clean Air Act defines a "major" stationary source for "extreme" ozone nonattainment areas such as SCAQMD as one emitting 10 tons/year. (42 U.S.C. §§ 7511a(e), 7511a(f); CAA §§ 182(e), 182(f).) Under the Clean Air Act, such sources are subject to enhanced control requirements (42 U.S.C. §§ 7502(c)(5), 7503; CAA §§ 172(c)(5), 173), so SCAQMD decided this was an appropriate threshold for making a CEQA "significance" finding and requiring feasible mitigation. Essentially, SCAQMD takes the position that a source that emits 10 tons/year of $NO_x$ or VOC would contribute cumulatively to ozone formation. Therefore, lead agencies that use SCAQMD's thresholds of significance may determine

that many projects have "significant" air quality impacts and must apply all feasible mitigation measures, yet will not be able to precisely correlate the project to quantifiable health impacts, unless the emissions are sufficiently high to use a regional modeling program.

In the case of particulate matter ($PM_{2.5}$)[8], another "criteria" pollutant, SCAQMD staff is aware of two possible methods of analysis. SCAQMD used regional modeling to predict expected health impacts from its proposed Rule 1315, as mentioned above. Also, the California Air Resources Board (CARB) has developed a methodology that can predict expected mortality (premature deaths) from large amounts of $PM_{2.5}$. (California Air Resources Board, *Health Impacts Analysis: PM Premature Death Relationship*, http://www.arb.ca.gov/research/health/pm-mort/pm-mort_arch.htm (last reviewed Jan. 19, 2012).) SCAQMD used the CARB methodology to predict impacts from three very large power plants (e.g., 731-1837 lbs/day). (Final Environmental Assessment for Rule 1315, *supra*, pp 4.0-12, 4.1-13, 4.1-37 (e.g., 125 premature deaths in the entire SCAQMD in 2030), 4.1-39 (0.05 to 1.77 annual premature deaths from power plants.) Again, this project involved large amounts of additional $PM_{2.5}$ in the District, up to 2.82 tons/day (5,650 lbs/day of $PM_{2.5}$, or, or 1029 tons/year. (*Id.* at table 4.1-4, p. 4.1-10.)

However, the primary author of the CARB methodology has reported that this $PM_{2.5}$ health impact methodology is not suited for small projects and may yield unreliable results due to various uncertainties.[9] (SCAQMD, *Final Subsequent Mitigated Negative Declaration for: Warren*

---

[8] SCAQMD has not attained the latest annual or 24-hour national ambient air quality standards for "$PM_{2.5}$" or particulate matter less than 2.5 microns in diameter.

[9] Among these uncertainties are the representativeness of the population used in the methodology, and the specific source of PM and the corresponding health impacts. (*Id.* at p. 2-24.)

*E&P, Inc. WTU Central Facility, New Equipment Project (certified July 19, 2011)*, http://www.aqmd.gov/home/library/documents-support-material/lead-agency-permit-projects/permit-project-documents---year-2011; then follow "Final Subsequent Mitigated Negative Declaration for Warren E&P Inc. WTU Central Facility, New Equipment Project" hyperlink, pp. 2-22, 2-23 (last visited Apr. 1, 2015).) Therefore, when SCAQMD prepared a CEQA document for the expansion of an existing oil production facility, with very small $PM_{2.5}$ increases (3.8 lb/day) and a very small affected population, staff elected not to use the CARB methodology for using estimated $PM_{2.5}$ emissions to derive a projected premature mortality number and explained why it would be inappropriate to do so. (*Id.* at pp 2-22 to 2-24.) SCAQMD staff concluded that use of this methodology for such a small source could result in unreliable findings and would not provide meaningful information. (*Id.* at pp. 2-23, 2-25.) This CEQA document was not challenged in court.

In the above case, while it may have been technically possible to plug the data into the methodology, the results would not have been reliable or meaningful. SCAQMD believes that an agency should not be required to perform analyses that do not produce reliable or meaningful results. This Court has already held that an agency may decline to use even the "normal" "existing conditions" CEQA baseline where to do so would be misleading or without informational value. (*Neighbors for Smart Rail v. Exposition Metro Line* (2013) 57 Cal.4th 439, 448, 457.) The same should be true for a decision that a particular study or analysis would not provide reliable or meaningful results.[10]

---

[10] Whether a particular study would result in "informational value" is a part of deciding whether it is "feasible." CEQA defines "feasible" as "capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, and

Therefore, it is not possible to set a hard-and-fast rule on whether a correlation of air quality impacts with specific quantifiable health impacts is required in all cases. Instead, the result turns on whether such an analysis is reasonably feasible in the particular case.[11] Moreover, what is reasonably feasible may change over time as scientists and regulatory agencies continually seek to improve their ability to predict health impacts. For example, CARB staff has been directed by its Governing Board to reassess and improve the methodology for estimating premature deaths. (California Air Resources Board, *Health Impacts Analysis: PM Mortality Relationship*, http://www.arb.ca.gov/research/health/pm-mort/pm-mort.htm (last reviewed Dec. 29, 2010).) This factor also counsels against setting any hard-and-fast rule in this case.

## III. THE QUESTION OF WHETHER AN EIR CONTAINS SUFFICIENT ANALYSIS TO MEET CEQA'S REQUIREMENTS IS A MIXED QUESTION OF FACT AND LAW GOVERNED BY TWO DIFFERENT STANDARDS OF REVIEW.

### A. Standard of Review for Feasibility Determination and Sufficiency as an Informative Document

A second issue in this case is whether courts should review an EIR's informational sufficiency under the "substantial evidence" test as argued by Friant Ranch or the "independent judgment" test as argued by Sierra Club.

---

technological factors." (Pub. Resources Code § 21061.1.) A study cannot be "accomplished in a *successful* manner" if it produces unreliable or misleading results.

[11] In this case, the lead agency did not have an opportunity to determine whether the requested analysis was feasible because the comment was non-specific. Therefore, SCAQMD suggests that this Court, after resolving the legal issues in the case, direct the Court of Appeal to remand the case to the lead agency for a determination of whether the requested analysis is feasible. Because Fresno County, the lead agency, did not seek review in this Court, it seems likely that the County has concluded that at least some level of correlation of air pollution with health impacts is feasible.

As this Court has explained, "a reviewing court must adjust its scrutiny to the nature of the alleged defect, depending on whether the claim is predominantly one of improper procedure or a dispute over the facts." (*Vineyard Area Citizens v. City of Rancho Cordova, supra,* 40 Cal.4th at 435.) For questions regarding compliance with proper procedure or other legal questions, courts review an agency's action de novo under the "independent judgment" test. (*Id.*) On the other hand, courts review factual disputes only for substantial evidence, thereby "accord[ing] greater deference to the agency's substantive factual conclusions." (*Id.*)

Here, Friant Ranch and Sierra Club agree that the case involves the question of whether an EIR includes sufficient information regarding a project's impacts. However, they disagree on the proper standard of review for answering this question: Sierra Club contends that courts use the independent judgment standard to determine whether an EIR's analysis is sufficient to meet CEQA's informational purposes,[12] while Friant Ranch contends that the substantial evidence standard applies to this question.

///

///

///

///

///

///

///

///

///

---

[12] Sierra Club acknowledges that courts use the substantial evidence standard when reviewing predicate factual issues, but argues that courts ultimately decide as a matter of law what CEQA requires. (Answering Brief, pp. 14, 23.)

SCAQMD submits that the issue is more nuanced than either party contends. We submit that, whether a CEQA document includes sufficient analysis to satisfy CEQA's informational mandates is a mixed question of fact and law,[13] containing two levels of inquiry that should be judged by different standards.[14]

The state CEQA Guidelines set forth standards for the adequacy of environmental analysis. Guidelines Section 15151 states:

> An EIR should be prepared with a sufficient degree of analysis to provide decision makers with information which enables them to make a decision which intelligently takes account of environmental consequences. An evaluation of the environmental effects of a proposed project need not be exhaustive, but the sufficiency of an EIR is to be reviewed in light of what is reasonably feasible. Disagreement among experts does not make an EIR inadequate, but the EIR should summarize the main points of disagreement among the experts. The courts have looked not for perfection, but for adequacy, completeness, and a good-faith effort at full disclosure.

In this case, the basic question is whether the underlying analysis of air quality impacts made the EIR "sufficient" as an informative document. However, whether the EIR's analysis was sufficient is judged in light of what was reasonably feasible. This represents a mixed question of fact and law that is governed by two different standards of review.

---

[13] Friant Ranch actually states that the claim that an EIR lacks sufficient relevant information is, "most properly thought of as raising mixed questions of fact and law." (Opening Brief, p. 27.) However, the remainder of its argument claims that the court should apply the substantial evidence standard of review to all aspects of the issue.

[14] Mixed questions of fact and law issues may implicate predominantly factual subordinate questions that are reviewed under the substantial evidence test even though the ultimate question may be reviewed by the independent judgment test. *Crocker National Bank v. City and County of San Francisco* (1989) 49 Cal.3d 881, 888-889.

SCAQMD submits that an EIR's sufficiency as an informational document is ultimately a legal question that courts should determine using their independent judgment. This Court's language in *Laurel Heights I* supports this position. As this Court explained: "The court does not pass upon the correctness of the EIR's environmental conclusions, but only upon its *sufficiency as an informative document*." (*Laurel Heights I, supra*, 47 Cal.3d at 392-393) (emphasis added.) As described above, the Court in *Vineyard Area Citizens v. City of Rancho Cordova, supra,* 40 Cal.4th at 431, also used its independent judgment to determine what level of analysis CEQA requires for water supply impacts. The Court did not defer to the lead agency's opinion regarding the law's requirements; rather, it determined for itself what level of analysis was necessary to meet "[t]he law's informational demands." (*Id.* at p. 432.) Further, existing case law also holds that where an agency fails to comply with CEQA's information disclosure requirements, the agency has "failed to proceed in the manner required by law." (*Save Our Peninsula Comm. v. Monterey County Bd. of Supervisors* (2001) 87 Cal.App.4th 99, 118.)

However, whether an EIR satisfies CEQA's requirements depends in part on whether it was reasonably feasible for an agency to conduct additional or more thorough analysis. EIRs must contain "a detailed statement" of a project's impacts (Pub. Res. Code § 21061), and an agency must "use its best efforts to find out and disclose all that it reasonably can." (CEQA Guidelines § 15144.) Nevertheless, "the sufficiency of an EIR is to be reviewed in light of what is reasonably feasible." (CEQA Guidelines § 15151.)

SCAQMD submits that the question of whether additional analysis or a particular study suggested by a commenter is "feasible" is generally a question of fact. Courts have already held that whether a particular alternative is "feasible" is reviewed by the substantial evidence test.

(*Uphold Our Heritage v. Town of Woodside* (2007) 147 Cal.App.4th 587, 598-99; *Center for Biological Diversity v. County of San Bernardino* (2010) 185 Cal.App.4th 866, 883.) Thus, if a lead agency determines that a particular study or analysis is infeasible, that decision should generally be judged by the substantial evidence standard. However, SCAQMD urges this Court to hold that lead agencies must explain the basis of any determination that a particular analysis is infeasible in the EIR itself. An EIR must discuss information, including issues related to the feasibility of particular analyses "in sufficient detail to enable meaningful participation and criticism by the public. '[W]hatever is required to be considered in an EIR must be in that formal report; what any official might have known from other writings or oral presentations cannot supply what is lacking in the report.'" (*Laurel Heights I*, *supra*, 47 Cal.3d at p. 405 (quoting *Santiago County Water District v. County of Orange* (1981) 118 Cal.App.3d 818, 831) (discussing analysis of alternatives).) The evidence on which the determination is based should also be summarized in the EIR itself, with appropriate citations to reference materials if necessary. Otherwise commenting agencies such as SCAQMD would be forced to guess where the lead agency's evidence might be located, thus thwarting effective public participation.

Moreover, if a lead agency determines that a particular study or analysis would not result in reliable or useful information and for that reason is not feasible, that determination should be judged by the substantial evidence test. (See *Neighbors for Smart Rail v. Exposition Metro Line Construction Authority*, *supra*, 57 Cal.4th 439, 448, 457:

whether "existing conditions" baseline would be misleading or uninformative judged by substantial evidence standard.[15])

If the lead agency's determination that a particular analysis or study is not feasible is supported by substantial evidence, then the agency has not violated CEQA's information disclosure provisions, since it would be infeasible to provide additional information. This Court's decisions provide precedent for such a result. For example, this Court determined that the issue of whether the EIR should have included a more detailed discussion of future herbicide use was resolved because substantial evidence supported the agency's finding that "the precise parameters of future herbicide use could not be predicted." *Ebbetts Pass Forest Watch v. California Dept. of Forestry & Fire Protection* (2008) 43 Cal.4th 936, 955.

Of course, SCAQMD expects that courts will continue to hold lead agencies to their obligations to consult with, and not to ignore or misrepresent, the views of sister agencies having special expertise in the area of air quality. (*Berkeley Keep Jets Over the Bay v. Board of Port Commissioners* (2007) 91 Cal.App.4th 1344, 1364 n.11.) In some cases, information provided by such expert agencies may establish that the purported evidence relied on by the lead agency is not in fact "substantial". (*Id.* at pp. 1369-1371.)

In sum, courts retain ultimate responsibility to determine what CEQA requires. However, the law does not require exhaustive analysis, but only what is reasonably feasible. Agencies deserve deference for their factual determinations regarding what type of analysis is reasonably feasible. On the other hand, if a commenter requests more information, and the lead agency declines to provide it but does *not* determine that the

---

[15] The substantial evidence standard recognizes that the courts "have neither the resources nor the scientific expertise" to weigh conflicting evidence on technical issues. (*Laurel Heights I, supra,* 47 Cal.3d 376, 393.)

requested study or analysis would be infeasible, misleading or uninformative, the question becomes whether the omission of that analysis renders the EIR inadequate to satisfy CEQA's informational purposes. (*Id.* at pp. 1370-71.) Again, this is predominantly a question of law and should be judged by the de novo or independent judgment standard of review. Of course, this Court has recognized that a "project opponent or reviewing court can always imagine some additional study or analysis that might provide helpful information. It is not for them to design the EIR. That further study...might be helpful does not make it necessary." (*Laurel Heights I, supra,* 47 Cal.3d 376, 415 – see also CEQA Guidelines § 15204(a) [CEQA "does not require a lead agency to conduct every test. . . recommended or demanded by commenters."].) Courts, then, must adjudicate whether an omission of particular information renders an EIR inadequate to serve CEQA's informational purposes.[16]

---

[16] We recognize that there is case law stating that the substantial evidence standard applies to "challenges to the scope of an EIR's analysis of a topic" as well as the methodology used and the accuracy of the data relied on in the document "because these types of challenges involve factual questions." (*Bakersfield Citizens for Local Control v. City of Bakersfield*, *supra*, 124 Cal.App.4th 1184, 1198, and cases relied on therein.) However, we interpret this language to refer to situations where the question of the scope of the analysis really is factual—that is, where it involves whether further analysis is feasible, as discussed above. This interpretation is supported by the fact that the *Bakersfield* court expressly rejected an argument that a claimed "omission of information from the EIR should be treated as inquiries whether there is substantial evidence supporting the decision approving the project. " *Bakersfield, supra,* 124 Cal.App.4th at p. 1208. And the *Bakersfield* court ultimately decided that the lead agency must analyze the connection between the identified air pollution impacts and resulting health impacts, even though the EIR already included some discussion of air-pollution-related respiratory illnesses. *Bakersfield, supra,* 124 Cal.App.4th at p. 1220. Therefore, the court must not have interpreted this question as one of the "scope of the analysis" to be judged by the substantial evidence standard.

### B. Friant Ranch's Rationale for Rejecting the Independent Judgment Standard of Review is Unsupported by Case Law.

In its brief, Friant Ranch makes a distinction between cases where a required CEQA topic is not discussed at all (to be reviewed by independent judgment as a failure to proceed in the manner required by law) and cases where a topic is discussed, but the commenter claims the information provided is insufficient (to be judged by the substantial evidence test). (Opening Brief, pp. 13-17.) The Court of Appeal recognized these two types of cases, but concluded that both raised questions of law. (*Sierra Club v. County of Fresno* (2014) 226 Cal.App.4th 704 (superseded by grant of review) 172 Cal.Rptr.3d 271, 290.) We believe the distinction drawn by Friant Ranch is unduly narrow, and inconsistent with cases which have concluded that CEQA documents are insufficient. In many instances, CEQA's requirements are stated broadly, and the courts must interpret the law to determine what level of analysis satisfies CEQA's mandate for providing meaningful information, even though the EIR discusses the issue to some extent.

For example, the CEQA Guidelines require discussion of the existing environmental baseline. In *County of Amador v. El Dorado County Water Agency* (1999) 76 Cal.App.4th 931, 954-955, the lead agency had discussed the environmental baseline by describing historic month-end water levels in the affected lakes. However, the court held that this was not an adequate baseline discussion because it failed to discuss the timing and amounts of past actual water releases, to allow comparison with the proposed project. The court evidently applied the independent judgment test to its decision, even though the agency discussed the issue to some extent.

Likewise, in *Vineyard Area Citizens* (2007) 40 Cal.4th 412, this Court addressed the question of whether an EIR's analysis of water supply impacts complied with CEQA. The parties agreed that the EIR was required to analyze the effects of providing water to the development project, "and that in order to do so the EIR had, in some manner, to identify the planned sources of that water." (*Vineyard Area Citizens, supra,* at p. 428.) However, the parties disagreed as to the level of detail required for this analysis and "what level of uncertainty regarding the availability of water supplies can be tolerated in an EIR . . . ." (*Id.*) In other words, the EIR had analyzed water supply impacts for the project, but the petitioner claimed that the analysis was insufficient.

This Court noted that neither CEQA's statutory language or the CEQA Guidelines specifically addressed the question of how precisely an EIR must discuss water supply impacts. (*Id.*) However, it explained that CEQA "states that '[w]hile foreseeing the unforeseeable is not possible, an agency must use its best efforts to find out and disclose all that it reasonably can.'" (*Id.*, [Guidelines § 15144].) The Court used this general principle, along with prior precedent, to elucidate four "principles for analytical adequacy" that are necessary in order to satisfy "CEQA's informational purposes." (*Vineyard Area Citizens, supra,* at p. 430.) The Court did not defer to the agency's determination that the EIR's analysis of water supply impacts was sufficient. Rather, this Court used its independent judgment to determine for itself the level of analysis required to satisfy CEQA's fundamental purposes. (*Vineyard Area Citizens, supra*, at p. 441: an EIR does not serve its purposes where it neglects to explain likely sources of water and "... leaves long term water supply considerations to later stages of the project.")

Similarly, the CEQA Guidelines require an analysis of noise impacts of the project. (Appendix G, "Environmental Checklist Form."[17]) In *Gray v. County of Madera* (2008) 167 Cal.App.4th 1099, 1123, the court held that the lead agency's noise impact analysis was inadequate even though it had addressed the issue and concluded that the increase would not be noticeable. If the court had been using the substantial evidence standard, it likely would have upheld this discussion.

Therefore, we do not agree that the issue can be resolved on the basis suggested by Friant Ranch, which would apply the substantial evidence standard to *every* challenge to an analysis that addresses a required CEQA topic. This interpretation would subvert the courts' proper role in interpreting CEQA and determining what the law requires.

Nor do we agree that the Court of Appeal in this case violated CEQA's prohibition on courts interpreting its provisions "in a manner which imposes procedural or substantive requirements beyond those explicitly stated in this division or in the state guidelines." (Pub. Resources Code § 21083.1.) CEQA requires an EIR to describe *all* significant impacts of the project on the environment. (Pub. Resources Code § 21100(b)(2); *Vineyard Area Citizens, supra,* at p. 428.) Human beings are part of the environment, so CEQA requires EIRs to discuss a project's significant impacts on human health. However, except in certain particular circumstances,[18] neither the CEQA statute nor Guidelines specify the precise level of analysis that agencies must undertake to satisfy the law's requirements. (see, e.g., CEQA Guidelines § 15126.2(a) [EIRs must describe "health and safety problems caused by {a project's} physical changes"].) Accordingly, courts must interpret CEQA as a whole to

---

[17] Association of Environmental Professionals, 2015 CEQA Statute and Guidelines (2015) p.287.

[18] E.g., Pub. Resources Code § 21151.8(C)(3)(B)(iii) (requiring specific type of health risk analysis for siting schools).

determine whether a particular EIR is sufficient as an informational document. A court determining whether an EIR's discussion of human health impacts is legally sufficient does not constitute imposing a new substantive requirement.[19] Under Friant Ranch's theory, the above-referenced cases holding a CEQA analysis inadequate would have violated the law. This is not a reasonable interpretation.

## IV. COURTS MUST SCRUPULOUSLY ENFORCE THE REQUIREMENTS THAT LEAD AGENCIES CONSULT WITH AND OBTAIN COMMENTS FROM AIR DISTRICTS

Courts must "scrupulously enforce" CEQA's legislatively mandated requirements. (*Vineyard Area Citizens, supra*, 40 Cal.4th 412, 435.) Case law has firmly established that lead agencies must consult with the relevant air pollution control district before conducting an initial study, and must provide the districts with notice of the intention to adopt a negative declaration (or EIR). (*Schenck v. County of Sonoma* (2011) 198 Cal.App.4th 949, 958.) As *Schenck* held, neither publishing the notice nor providing it to the State Clearinghouse was a sufficient substitute for sending notice directly to the air district. (*Id.*) Rather, courts "must be satisfied that [administrative] agencies have fully complied with the procedural requirements of CEQA, since only in this way can the important public purposes of CEQA be protected from subversion." *Schenck,* 198 Cal.App.4th at p. 959 (citations omitted).[20]

---

[19] We submit that Public Resources Code Section 21083.1 was intended to prevent courts from, for example, holding that an agency must analyze economic impacts of a project where there are no resulting environmental impacts (see CEQA Guidelines § 15131) , or imposing new procedural requirements, such as imposing additional public notice requirements not set forth in CEQA or the Guidelines.

[20] Lead agencies must consult air districts, as public agencies with jurisdiction by law over resources affected by the project, *before* releasing an EIR. (Pub. Resources Code §§ 21104(a); 21153.) Moreover, air

Lead agencies should be aware, therefore, that failure to properly seek and consider input from the relevant air district constitutes legal error which may jeopardize their project approvals. For example, the court in *Fall River Wild Trout Foundation v. County of Shasta,* (1999) 70 Cal.App.4th 482, 492 held that the failure to give notice to a trustee agency (Department of Fish and Game) was prejudicial error requiring reversal. The court explained that the lack of notice prevented the Department from providing any response to the CEQA document. (*Id.* at p. 492.) It therefore prevented relevant information from being presented to the lead agency, which was prejudicial error because it precluded informed decision-making. (*Id.*)[21]

---

districts should be considered "state agencies" for purposes of the requirement to consult with "trustee agencies" as set forth in Public Resources Code § 20180.3(a). This Court has long ago held that the districts are not mere "local agencies" whose regulations are superseded by those of a state agency regarding matters of statewide concern, but rather have concurrent jurisdiction over such issues. (*Orange County Air Pollution Control District v. Public Util. Com.* (1971) 4 Cal.3d 945, 951, 954.) Since air pollution is a matter of statewide concern, *Id* at 952, air districts should be entitled to trustee agency status in order to ensure that this vital concern is adequately protected during the CEQA process.

[21] In *Schenck,* the court concluded that failure to give notice to the air district was not prejudicial, but this was partly because the trial court had already corrected the error before the case arrived at the Court of Appeal. The trial court issued a writ of mandate requiring the lead agency to give notice to the air district. The air district responded by concurring with the lead agency that air impacts were not significant. (*Schenck,* 198 Cal.App.4th 949, 960.) We disagree with the *Schenck* court that the failure to give notice to the air district would not have been prejudicial (even in the absence of the trial court writ) merely because the lead agency purported to follow the air district's published CEQA guidelines for significance. (*Id.*, 198 Cal.App.4th at p. 960.) In the first place, absent notice to the air district, it is uncertain whether the lead agency properly followed those guidelines. Moreover, it is not realistic to expect that an air district's published guidelines would necessarily fully address all possible air-quality related issues that can arise with a CEQA project, or that those

Similarly, lead agencies must obtain additional information requested by expert agencies, including those with jurisdiction by law, if that information is necessary to determine a project's impacts. (*Sierra Club v. State Bd. Of Forestry* (1994) 7 Cal.4th 1215, 1236-37.) Approving a project without obtaining that information constitutes a failure to proceed in the manner prescribed by CEQA. (*Id.* at p. 1236.)

Moreover, a lead agency can save significant time and money by consulting with the air district early in the process. For example, the lead agency can learn what the air district recommends as an appropriate analysis on the facts of its case, including what kinds of health impacts analysis may be available, and what models are appropriate for use. This saves the lead agency from the need to do its analysis all over again and possibly needing to recirculate the document after errors are corrected, if new significant impacts are identified. (CEQA Guidelines § 15088.5(a).) At the same time, the air district's expert input can help the lead agency properly determine whether another commenter's request for additional analysis or studies is reasonable or feasible. Finally, the air district can provide input on what mitigation measures would be feasible and effective.

Therefore, we suggest that this Court provide guidance to lead agencies reminding them of the importance of consulting with the relevant air districts regarding these issues. Otherwise, their feasibility decisions may be vulnerable to air district evidence that establishes that there is no substantial evidence to support the lead agency decision not to provide specific analysis. (*See Berkeley Keep Jets Over the Bay, supra,* 91 Cal.App.4th 1344, 1369-1371.)

---

guidelines would necessarily be continually modified to reflect new developments. Therefore we believe that, had the trial court not already ordered the lead agency to obtain the air district's views, the failure to give notice would have been prejudicial, as in *Fall River, supra,* 70 Cal.App.4th 482, 492.

## CONCLUSION

The SCAQMD respectfully requests this Court *not* to establish a hard-and-fast rule concerning whether CEQA requires a lead agency to correlate identified air quality impacts of a project with resulting health outcomes. Moreover, the question of whether an EIR is "sufficient as an informational document" is a mixed question of fact and law containing two levels of inquiry. Whether a particular proposed analysis is feasible is predominantly a question of fact to be judged by the substantial evidence standard of review. Where the requested analysis is feasible, but the lead agency relies on legal or policy reasons not to provide it, the question of whether the EIR is nevertheless sufficient as an informational document is predominantly a question of law to be judged by the independent judgment standard of review.

Respectfully submitted,

DATED: April 3, 2015

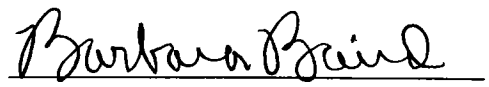
DATED: April 3, 2015 Respectfully submitted,



Barbara Baird

## PROOF OF SERVICE

I am employed in the County of Los Angeles, California. I am over the age of 18 years and not a party to the within action. My business address is 21865 Copley Drive, Diamond Bar, California 91765.

On April 3, 2015 I served true copies of the following document(s) described as **APPLICATION OF THE SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT FOR LEAVE TO FILE BRIEF OF *AMICUS CURIAE* IN SUPPORT OF NEITHER PARTY AND *[PROPOSED]* BRIEF OF *AMICUS CURIAE*** by placing a true copy of the foregoing document(s) in a sealed envelope addressed as set forth on the attached service list as follows:

**BY MAIL:** I enclosed the document(s) in a sealed envelope or package addressed to the persons at the addresses listed in the Service List and placed the envelope for collection and mailing following our ordinary business practices. I am readily familiar with this District's practice for collection and processing of correspondence for mailing. Under that practice, the correspondence would be deposited with the United States Postal Service, with postage thereon fully prepaid at Diamond Bar, California, in the ordinary course of business. I am aware that on motion of the party served, service is presumed invalid if postal cancellation date or postage meter date is more than one day after date of deposit for mailing in affidavit.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed on April 3, 2015 at Diamond Bar, California.

Patricia Anderson

## APPLICATION

Pursuant to California Rules of Court 8.520(f)(1), proposed Amicus Curiae San Joaquin Valley Unified Air Pollution Control District hereby requests permission from the Chief Justice to file an amicus brief in support of Defendant and Respondent, County of Fresno, and Defendant and Real Parties in Interest Friant Ranch, L.P. Pursuant to Rule 8.520(f)(5) of the California Rules of Court, the proposed amicus curiae brief is combined with this Application. The brief addresses the following issue certified by this Court for review:

> Is an EIR adequate when it identifies the health impacts of air pollution and quantifies a project's expected emissions, or does CEQA further require the EIR to *correlate* a project's air quality emissions to specific health impacts?

As of the date of this filing, the deadline for the final reply brief on the merits was March 5, 2015. Accordingly, under Rule 8.520(f)(2), this application and brief are timely.

### 1. Background and Interest of San Joaquin Valley Unified Air Pollution Control District

The San Joaquin Valley Unified Air Pollution Control District ("Air District") regulates air quality in the eight counties comprising the San Joaquin Valley ("Central Valley"): Kern, Tulare, Madera, Fresno, Merced, San Joaquin, Stanislaus, and Kings, and is primarily responsible for attaining air quality standards within its jurisdiction. After billions of dollars of investment by Central Valley businesses, pioneering air quality regulations, and consistent efforts by residents, the Central Valley air basin has made historic improvements in air quality.

The Central Valley's geographical, topographical and meteorological features create exceptionally challenging air quality

conditions. For example, it receives air pollution transported from the San Francisco Bay Area and northern Central Valley communities, and the southern portion of the Central Valley includes three mountain ranges (Sierra, Tehachapi, and Coastal) that, under some meteorological conditions, effectively trap air pollution. Central Valley air pollution is only a fraction of what the Bay Area and Los Angeles produce, but these natural conditions result in air quality conditions that are only marginally better than Los Angeles, even though about ten times more pollution is emitted in the Los Angeles region. Bay Area air quality is much better than the Central Valley's, even though the Bay Area produces about six times more pollution. The Central Valley also receives air pollution transported from the Bay Area and northern counties in the Central Valley, including Sacramento, and transboundary anthropogenic ozone from as far away as China.

Notwithstanding these challenges, the Central Valley has reduced emissions at the same or better rate than other areas in California and has achieved unparalleled milestones in protecting public health and the environment:

- In the last decade, the Central Valley became the first air basin classified by the federal government under the Clean Air Act as a "serious nonattainment" area to come into attainment of health-based National Ambient Air Quality Standard ("NAAQS") for coarse particulate matter (PM10), an achievement made even more notable given the Valley's extensive agricultural sector. Unhealthy levels of particulate matter can cause and exacerbate a range of chronic and acute illnesses.
- In 2013, the Central Valley became the first air basin in the country to improve from a federal designation of "extreme" nonattainment to

actually attain (and quality for an attainment designation) of the 1-hour ozone NAAQS; ozone creates "smog" and, like PM10, causes adverse health impacts.

- The Central Valley also is in full attainment of federal standards for lead, nitrogen dioxide, sulfur dioxide, and carbon monoxide.
- The Central Valley continues to make progress toward compliance with its last two attainment standards, with the number of exceedences for the 8-hour ozone NAAQS reduced by 74% (for the 1997 standard) and 38% (for the 2008 standard) since 1991, and for the small particulate matter (PM2.5) NAAQS reduced by 85% (for the 1997 standard) and 61% (for the 2006 standard).

Sustained improvement in Central Valley air quality requires a rigorous and comprehensive regulatory framework that includes prohibitions (e.g., on wood-burning fireplaces in new residences), mandates (e.g., requiring the installation of best available pollution reduction technologies on new and modified equipment and industrial operations), innovations (e.g., fees assessed against residential development to fund pollution reduction actions to "offset" vehicular emissions associated with new residences), incentive programs (e.g., funding replacements of older, more polluting heavy duty trucks and school buses)[1], ongoing planning for continued air quality improvements, and enforcement of Air District permits and regulations.

The Air District is also an expert air quality agency for the eight counties and cities in the San Joaquin Valley. In that capacity, the Air District has developed air quality emission guidelines for use by the Central

---

[1] San Joaquin's incentive program has been so successful that through 2012, it has awarded over $ 432 million in incentive funds and has achieved 93,349 tons of lifetime emissions reductions. *See* SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT, 2012 PM2.5 PLAN, 6-6 (2012) *available at* http://www.valleyair.org/Workshops/postings/2012/12-20-12PM25/FinalVersion/06%20Chapter%206%20Incentives.pdf.

Valley counties and cities that implement the California Environment Quality Act (CEQA).[2] In its guidance, the Air District has distinguished between toxic air contaminants and criteria air pollutants.[3] Recognizing this distinction, the Air District's CEQA Guidance has adopted distinct thresholds of significance for *criteria* pollutants (i.e., ozone, PM2.5 and their respective precursor pollutants) based upon scientific and factual data which demonstrates the level that can be accommodated on a cumulative basis in the San Joaquin Valley without affecting the attainment of the applicable NAAQS.[4] For *toxic air* pollutants, the District has adopted different thresholds of significance which scientific and factual data demonstrates has the potential to expose sensitive receptors (i.e., children, the elderly) to levels which may result in localized health impacts.[5]

The Air District's CEQA Guidance was followed by the County of Fresno in its environment review of the Friant Ranch project, for which the Air District also served as a commenting agency. The Court of Appeal's holding, however, requiring correlation between the project's criteria

---

[2] *See, e.g.*, SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT, PLANNING DIVISION, GUIDE FOR ASSESSING AND MITIGATING AIR QUALITY IMPACTS (2015), *available at* http://www.valleyair.org/transportation/GAMAQI_3-19-15.pdf ("CEQA Guidance").

[3] Toxic air contaminants, also known as hazardous air pollutants, are those pollutants that are known or suspected to cause cancer or other serious health effects, such as birth defects. There are currently 189 toxic air contaminants regulated by the United States Environmental Protection Agency ("EPA") and the states pursuant to the Clean Air Act. 42 U.S.C. § 7412. Common TACs include benzene, perchloroethylene and asbestos. *Id.* at 7412(b).

In contrast, there are only six (6) criteria air pollutants: ozone, particulate matter, carbon monoxide, nitrogen oxides, sulfur dioxide and lead. Although criteria air pollutants can also be harmful to human health, they are distinguishable from toxic air contaminants and are regulated separately. For instance, while criteria pollutants are regulated by numerous sections throughout Title I of the Clean Air Act, the regulation of toxic air contaminants occurs solely under section 112 of the Act. Compare 42 U.S.C. §§ 7407 – 7411 & 7501 – 7515 with 42 U.S.C. § 7411.

[4] See, e.g., CEQA Guidance at http://www.valleyair.org/transportation/GAMAQI_3-19-15.pdf, pp. 64-66, 80.

[5] See, e.g., CEQA Guidance at http://www.valleyair.org/transportation/GAMAQI_3-19-15.pdf, pp. 66, 99-101.

pollutants and local health impacts, departs from the Air District's Guidance and approved methodology for assessing criteria pollutants. A close reading of the administrative record that gave rise to this issue demonstrates that the Court's holding is based on a misunderstanding of the distinction between toxic air contaminants (for which a local health risk assessment is feasible and routinely performed) and criteria air pollutants (for which a local health risk assessment is not feasible and would result in speculative results).[6] The Air District has a direct interest in ensuring the lawfulness and consistent application of its CEQA Guidance, and will explain how the Court of Appeal departed from the Air District's long-standing CEQA Guidance in addressing criteria pollutants and toxic air contaminants in this amicus brief.

### 2. How the Proposed Amicus Curiae Brief Will Assist the Court

As counsel for the proposed amicus curiae, we have reviewed the briefs filed in this action. In addition to serving as a "commentary agency" for CEQA purposes over the Friant Ranch project, the Air District has a strong interest in assuring that CEQA is used for its intended purpose, and believes that this Court would benefit from additional briefing explaining the distinction between criteria pollutants and toxic air contaminants and the different methodologies employed by local air pollution control agencies such as the Air District to analyze these two categories of air pollutants under CEQA. The Air District will also explain how the Court of Appeal's opinion is based upon a fundamental misunderstanding of these two different approaches by requiring the County of Fresno to correlate the project's *criteria* pollution emissions with *local* health impacts. In doing

---

[6] CEQA does not require speculation. *See, e.g.*, *Laurel Heights Improvement Ass'n v. Regents of Univ. of Cal.*, 6 Cal. 4th 1112, 1137 (1993) (upholding EIR that failed to evaluate cumulative toxic air emission increases given absence of any acceptable means for doing so).

so, the Air District will provide helpful analysis to support its position that at least insofar as criteria pollutants are concerned, CEQA does not require an EIR to correlate a project's air quality emissions to specific health impacts, because such an analysis is not reasonably feasible.

**Rule 8.520 Disclosure**

Pursuant to Cal. R. 8.520(f)(4), neither the Plaintiffs nor the Defendant or Real Party In Interest or their respective counsel authored this brief in whole or in part. Neither the Plaintiffs nor the Defendant or Real Party in Interest or their respective counsel made any monetary contribution towards or in support of the preparation of this brief.

**CONCLUSION**

On behalf of the San Joaquin Valley Unified Air Pollution Control District, we respectfully request that this Court accept the filing of the attached brief.

## I. INTRODUCTION.

The San Joaquin Valley Unified Air Pollution Control District ("Air District") respectfully submits that the Court of Appeal erred when it held that the air quality analysis contained in the Environmental Impact Report ("EIR") for the Friant Ranch development project was inadequate under the California Environmental Quality Act ("CEQA") because it did not include an analysis of the correlation between the project's criteria air pollutants and the potential adverse human health impacts. A close reading of the portion of the administrative record that gave rise to this issue demonstrates that the Court's holding is based on a misunderstanding of the distinction between toxic air contaminants and criteria air pollutants.

Toxic air contaminants, also known as hazardous air pollutants, are those pollutants that are known or suspected to cause cancer or other serious health effects, such as birth defects. There are currently 189 toxic air contaminants (hereinafter referred to as "TACs") regulated by the United States Environmental Protection Agency ("EPA") and the states pursuant to the Clean Air Act. 42 U.S.C. § 7412. Common TACs include benzene, perchloroethylene and asbestos. *Id.* at 7412(b).

In contrast, there are only six (6) criteria air pollutants: ozone, particulate matter, carbon monoxide, nitrogen oxides, sulfur dioxide and lead. Although criteria air pollutants can also be harmful to human health,

they are distinguishable from TACs and are regulated separately. For instance, while criteria pollutants are regulated by numerous sections throughout Title I of the Clean Air Act, the regulation of TACs occurs solely under section 112 of the Act. *Compare* 42 U.S.C. §§ 7407 – 7411 & 7501 – 7515 *with* 42 U.S.C. § 7411.

The most relevant difference between criteria pollutants and TACs for purposes of this case is the manner in which human health impacts are accounted for. While it is common practice to analyze the correlation between an individual facility's TAC emissions and the expected localized human health impacts, such is not the case for criteria pollutants. Instead, the human health impacts associated with criteria air pollutants are analyzed and taken into consideration when EPA sets the national ambient air quality standard ("NAAQS") for each criteria pollutant. 42 U.S.C. § 7409(b)(1). The health impact of a particular criteria pollutant is analyzed on a regional and not a facility level based on how close the area is to complying with (attaining) the NAAQS. Accordingly, while the type of individual facility / health impact analysis that the Court of Appeal has required is a customary practice for TACs, it is not feasible to conduct a similar analysis for criteria air pollutants because currently available computer modeling tools are not equipped for this task.

It is clear from a reading of both the administrative record and the Court of Appeal's decision that the Court did not have the expertise to fully

appreciate the difference between TACs and criteria air pollutants. As a result, the Court has ordered the County of Fresno to conduct an analysis that is not practicable and not likely yield valid information. The Air District respectfully requests that this portion of the Court of Appeal's decision be reversed.

## II. THE COURT OF APPEAL ERRED IN FINDING THE FRIANT RANCH EIR INADEQUATE FOR FAILING TO ANALYZE THE SPECIFIC HUMAN HEALTH IMPACTS ASSOCIATED CRITERIA AIR POLLUTANTS.

Although the Air District does not take lightly the amount of air emissions at issue in this case, it submits that the Court of Appeal got it wrong when it required Fresno County to revise the Friant Ranch EIR to include an analysis correlating the criteria air pollutant emissions associated with the project with specific, localized health-impacts. The type of analysis the Court of Appeal has required will not yield reliable information because currently available modeling tools are not well suited for this task. Further, in reviewing this issue de novo, the Court of Appeal failed to appreciate that it lacked the scientific expertise to appreciate the significant differences between a health risk assessment commonly performed for toxic air contaminants and a similar type of analysis it felt should have been conducted for criteria air pollutants.

///

///

### A. Currently Available Modeling Tools are not Equipped to Provide a Meaningful Analysis of the Correlation between an Individual Development Project's Air Emissions and Specific Human Health Impacts.

In order to appreciate the problematic nature of the Court of Appeals' decision requiring a health risk type analysis for criteria air pollutants, it is important to understand how the relevant criteria pollutants (ozone and particulate matter) are formed, dispersed and regulated.

Ground level ozone (smog) is not directly emitted into the air, but is formed when precursor pollutants such as oxides of nitrogen (NOx) and volatile organic compounds (VOCs) are emitted into the atmosphere and undergo complex chemical reactions in the process of sunlight.[1] Once formed, ozone can be transported long distances by wind.[2] Because of the complexity of ozone formation, a specific tonnage amount of NOx or VOCs emitted in a particular area does not equate to a particular concentration of ozone in that area. In fact, even rural areas that have relatively low tonnages of emissions of NOx or VOCs can have high levels of ozone concentration simply due to wind transport.[3] Conversely, the San Francisco Bay Area has six times more NOx and VOC emissions per square mile than the San Joaquin Valley, but experiences lower

---

[1] *See* United States Environmental Protection Agency, *Ground-level Ozone: Basic Information*, available at: http://www.epa.gov/airquality/ozonepollution/basic.html (visited March 10, 2015).
[2] *Id.*
[3] *Id.*

concentrations of ozone (and better air quality) simply because sea breezes disperse the emissions.[4]

Particulate matter ("PM") can be divided into two categories: directly emitted PM and secondary PM.[5] While directly emitted PM can have a localized impact, the tonnage emitted does not always equate to the local PM concentration because it can be transported long distances by wind.[6] Secondary PM, like ozone, is formed via complex chemical reactions in the atmosphere between precursor chemicals such as sulfur dioxides (SOx) and NOx.[7] Because of the complexity of secondary PM formation, the tonnage of PM-forming precursor emissions in an area does not necessarily result in an equivalent concentration of secondary PM in that area.

The disconnect between the *tonnage* of precursor pollutants (NOx, SOx and VOCs) and the *concentration* of ozone or PM formed is important because it is not necessarily the tonnage of precursor pollutants that causes human health effects, but the concentration of resulting ozone or PM. Indeed, the national ambient air quality standards ("NAAQS"), which are statutorily required to be set by the United States Environmental Protection

[6] *Id.*
[7] *Id.*

Agency ("EPA") at levels that are "requisite to protect the public health," 42 U.S.C. § 7409(b)(1), are established as concentrations of ozone or particulate matter and not as tonnages of their precursor pollutants.[8]

Attainment of a particular NAAQS occurs when the concentration of the relevant pollutant remains below a set threshold on a consistent basis throughout a particular region. For example, the San Joaquin Valley attained the 1-hour ozone NAAQS when ozone concentrations remained at or below 0.124 parts per million Valley-wide on 3 or fewer days over a 3-year period.[9] Because the NAAQS are focused on achieving a particular concentration of pollution region-wide, the Air District's tools and plans for attaining the NAAQS are regional in nature.

For instance, the computer models used to simulate and predict an attainment date for the ozone or particulate matter NAAQS in the San Joaquin Valley are based on regional inputs, such as regional inventories of precursor pollutants (NOx, SOx and VOCs) and the atmospheric chemistry and meteorology of the Valley.[10] At a very basic level, the models simulate future ozone or PM levels based on predicted changes in precursor

---

[8] See, e.g., United States Environmental Protection Agency, *Table of National Ambient Air Quality Standards*, available at: http://www.epa.gov/air/criteria.html#3 (visited March 10, 2015).
[9] *San Joaquin Valley Unified Air Pollution Control District 2013 Plan for the Revoked 1-Hour Ozone Standard*, Ch. 2 p. 2-16, available at: http://www.valleyair.org/Air_Quality_Plans/OzoneOneHourPlan2013/02Chapter2ScienceTrendsModeling.pdf (visited March 10, 2015).

(visited March 19, 2015).

emissions Valley wide.[11] Because the NAAQS are set levels necessary to protect human health, the closer a region is to attaining a particular NAAQS, the lower the human health impact is from that pollutant.

The goal of these modeling exercises is not to determine whether the emissions generated by a particular factory or development project will affect the date that the Valley attains the NAAQS. Rather, the Air District's modeling and planning strategy is regional in nature and based on the extent to which *all* of the emission-generating sources in the Valley (current and future) must be controlled in order to reach attainment.[12]

Accordingly, the Air District has based its thresholds of significance for CEQA purposes on the levels that scientific and factual data demonstrate that the Valley can accommodate without affecting the attainment date for the NAAQS.[13] The Air District has tied its CEQA significance thresholds to the level at which stationary pollution sources permitted by the Air District must "offset" their emissions.[14] This "offset"

---

[11] *Id.*

[12] Although the Air District does have a dispersion modeling tool used during its air permitting process that is used to predict whether a particular project's directly emitted PM will either cause an exceedance of the PM NAAQS or contribute to an existing exceedance, this model bases the prediction on a worst case scenario of emissions and meteorology and has no provision for predicting any associated human health impacts. Further, this analysis is only performed for stationary sources (factories, oil refineries, etc.) that are required to obtain a New Source Review permit from the Air District and not for development projects such as Friant Ranch over which the Air District has no preconstruction permitting authority. *See* San Joaquin Valley Unified Air Pollution Control District Rule 2201 §§ 2.0; 3.3.9; 4.14.1, available at: http://www.valleyair.org/rules/currntrules/Rule22010411.pdf (visited March 19, 2015).

[13] *San Joaquin Valley Unified Air Pollution Control District Guide to Assessing and Mitigating Air Quality Impacts*, (March 19, 2015) p. 22, available at: http://www.valleyair.org/transportation/CEQA%20Rules/GAMAQI%20Jan%202002%20Rev.pdf (visited March 30, 2015).

[14] *Id.* at pp. 22, 25.

level allows for growth while keeping the cumulative effects of all new sources at a level that will not impede attainment of the NAAQS.[15] In the Valley, these thresholds are 15 tons per year of PM, and 10 tons of NOx or VOC per year. *Sierra Club, supra*, 172 Cal.Rptr.3d at 303; AR 4554. Thus, the CEQA air quality analysis for criteria pollutants is not really a localized, project-level impact analysis but one of regional, "cumulative impacts."

Accordingly, the significance thresholds applied in the Friant Ranch EIR (15 tons per year of PM and 10 tons of NOx or VOCs) are not intended to be indicative of any localized human health impact that the project may have. While the health effects of air pollution are of primary concern to the Air District (indeed, the NAAQS are established to protect human health), the Air District is simply not equipped to analyze whether and to what extent the criteria pollutant emissions of an individual CEQA project directly impact human health in a particular area. This is true even for projects with relatively high levels of emissions of criteria pollutant precursor emissions.

For instance, according to the EIR, the Friant Ranch project is estimated to emit 109.52 tons per year of ROG (VOC), 102.19 tons per year of NOx, and 117.38 tons per year of PM. Although these levels well

---

[15] [15] *San Joaquin Valley Unified Air Pollution Control District Environmental Review Guidelines* (Aug. 2000) p. 4-11, available at: http://www.valleyair.org/transportation/CEQA%20Rules/ERG%20Adopted%20_August%202000_.pdf (visited March 12, 2015).

exceed the Air District's CEQA significance thresholds, this does not mean that one can easily determine the concentration of ozone or PM that will be created at or near the Friant Ranch site on a particular day or month of the year, or what specific health impacts will occur. Meteorology, the presence of sunlight, and other complex chemical factors all combine to determine the ultimate concentration and location of ozone or PM. This is especially true for a project like Friant Ranch where most of the criteria pollutant emissions derive not from a single "point source," but from area wide sources (consumer products, paint, etc.) or mobile sources (cars and trucks) driving to, from and around the site.

In addition, it would be extremely difficult to model the impact on NAAQS attainment that the emissions from the Friant Ranch project may have. As discussed above, the currently available modeling tools are equipped to model the impact of *all* emission sources in the Valley on attainment. According to the most recent EPA-approved emission inventory, the NOx inventory for the Valley is for the year 2014 is 458.2 tons per day, or 167,243 tons per year and the VOC (or ROG) inventory is 361.7 tons per day, or 132,020.5 tons per year.[16] Running the photochemical grid model used for predicting ozone attainment with the

[16] *San Joaquin Valley Unified Air Pollution Control District 2007 Ozone Plan*, Appendix B pp. B-6, B-9,
available at:
http://www.valleyair.org/Air_Quality_Plans/docs/AQ_Ozone_2007_Adopted/19%20Appendix%20B%20April%202007.pdf (visited March 12, 2015).

emissions solely from the Friant Ranch project (which equate to less than one-tenth of one percent of the total NOx and VOC in the Valley) is not likely to yield valid information given the relative scale involved.

Finally, even once a model is developed to accurately ascertain local increases in concentrations of photochemical pollutants like ozone and some particulates, it remains impossible, using today's models, to correlate that increase in concentration to a specific health impact. The reason is the same: such models are designed to determine regional, population-wide health impacts, and simply are not accurate when applied at the local level.

For these reasons, it is not the norm for CEQA practitioners, including the Air District, to conduct an analysis of the localized health impacts associated with a project's criteria air pollutant emissions as part of the EIR process. When the accepted scientific method precludes a certain type of analysis, "the court cannot impose a legal standard to the contrary." *Kings County Farm Bureau v. City of Hanford* (1990) 221 Cal.App.3d 692, 717 n. 8. However, that is exactly what the Court of Appeal has done in this case. Its decision upends the way CEQA air quality analysis of criteria pollutants occurs and should be reversed.

### B. The Court of Appeal Improperly Extrapolated a Request for a Health Risk Assessment for Toxic Air Contaminants into a Requirement that the EIR contain an Analysis of Localized Health Impacts Associated with Criteria Air Pollutants.

The Court of Appeal's error in requiring the new health impact analysis for criteria air pollutants clearly stems from a misunderstanding of terms of art commonly used in the air pollution field. More specifically, the Court of Appeal (and Appellants Sierra Club et al.) appear to have confused the health risk analysis ("HRA") performed to determine the health impacts associated with a project's toxic air contaminants ("TACs"), with an analysis correlating a project's criteria air pollutants (ozone, PM and the like) with specific localized health impacts.

The first type of analysis, the HRA, is commonly performed during the Air District's stationary source permitting process for projects that emit TACs and is, thus, incorporated into the CEQA review process. An HRA is a comprehensive analysis to evaluate and predict the dispersion of TACs emitted by a project and the potential for exposure of human populations. It also assesses and quantifies both the individual and population-wide health risks associated with those levels of exposure. There is no similar analysis conducted for criteria air pollutants. Thus, the second type of analysis (required by the Court of Appeal), is not currently part of the Air District's process because, as outlined above, the health risks associated

with exposure to criteria pollutants are evaluated on a regional level based on the region's attainment of the NAAQS.

The root of this confusion between the types of analyses conducted for TACs versus criteria air pollutants appears to stem from a comment that was presented to Fresno County by the City of Fresno during the administrative process.

In its comments on the draft EIR, the City of Fresno (the only party to raise this issue) stated:

> [t]he EIR must disclose the human health related effects of the Project's air pollution impacts. (CEQA Guidelines section 15126.2(a).) The EIR fails completely in this area. The EIR should be revised to disclose and determine the significance of TAC impacts, and of human health risks due to exposure to Project-related air emissions.

(AR 4602.)

In determining that the issue regarding the correlation between the Friant Ranch project's criteria air pollutants and adverse health impacts was adequately exhausted at the administrative level, the Court of Appeal improperly read the first two sentences of the City of Fresno's comment in isolation rather than in the context of the entire comment. *See Sierra Club v. County of Fresno* (2014) 172 Cal.Rptr.3d 271, 306. Although the comment first speaks generally in terms of "human health related effects" and "air pollution," it requests only that the EIR be revised to disclose "the significance of TACs" and the "human health risks due to exposure."

The language of this request in the third sentence of the comment is significant because, to an air pollution practitioner, the language would only have indicated only that a HRA for TACs was requested, and not a separate analysis of the health impacts associated with the project's criteria air pollutants. Fresno County clearly read the comment as a request to perform an HRA for TACs and limited its response accordingly. (AR 4602.)[17] The Air District submits that it would have read the City's comment in the same manner as the County because the City's use of the terms "human health risks" and "TACs" signal that an HRA for TACs is being requested. Indeed, the Air District was also concerned that an HRA be conducted, but understood that it was not possible to conduct such an analysis until the project entered the phase where detailed site specific information, such as the types of emission sources and the proximity of the sources to sensitive receptors became available. (AR 4553.)[18] The City of Fresno was apparently satisfied with the County's discussion of human health risks, as it did not raise the issue again when it commented on the final EIR. (AR 8944 – 8960.)

---

[17] Appellants do not challenge the manner in which the County addressed TACs in the EIR. (Appellants' Answer Brief p. 28 fn. 7.)

[18] Appellants rely on the testimony of Air District employee, Dan Barber, as support for their position that the County should have conducted an analysis correlating the project's criteria air pollutant emissions with localized health impacts. (Appellants Answer Brief pp. 10-11; 28.) However, Mr. Barber's testimony simply reinforces the Air District's concern that a risk assessment (HRA) be conducted once the actual details of the project become available. (AR 8863.) As to criteria air pollutants, Mr. Barber's comments are aimed at the Air District's concern about the amount of emissions and the fact that the emissions will make it "more difficult for Fresno County and the Valley to reach attainment which means that the health of Valley residents maybe [sic] adversely impacted." Mr. Barber says nothing about conducting a separate analysis of the localized health impacts the project's emissions may have.

The Court of Appeal's holding, which incorrectly extrapolates a request for an HRA for TACs into a new analysis of the localized health impacts of the project's criteria air pollutants, highlights two additional errors in the Court's decision.

First, the Court of Appeal's holding illustrates why the Court should have applied the deferential substantial evidence standard of review to the issue of whether the EIR's air quality analysis was sufficient. The regulation of air pollution is a technical and complex field and the Court of Appeal lacked the expertise to fully appreciate the difference between TACs and criteria air pollutants and tools available for analyzing each type of pollutant.

Second, it illustrates that the Court likely got it wrong when it held that the issue regarding the criteria pollutant / localized health impact analysis was properly exhausted during the administrative process. In order to preserve an issue for the court, '[t]he "exact issue" must have been presented to the administrative agency....' [Citation.] *Citizens for Responsible Equitable Environmental Development v. City of San Diego*, (2011) 196 Cal.App.4th 515, 527 129 Cal.Rptr.3d 512, 521; *Sierra Club v. City of Orange* (2008) 163 Cal.App.4th 523, 535, 78 Cal.Rptr.3d 1, 13. "'[T]he objections must be sufficiently specific so that the agency has the

opportunity to evaluate and respond to them.' [Citation.]" *Sierra Club v. City of Orange*,163 Cal.App.4th at 536.[19]

As discussed above, the City's comment, while specific enough to request a commonly performed HRA for TACs, provided the County with no notice that it should perform a new type of analysis correlating criteria pollutant tonnages to specific human health effects. Although the parties have not directly addressed the issue of failure to exhaust administrative remedies in their briefs, the Air District submits that the Court should consider how it affects the issues briefed by the parties since "[e]xhaustion of administrative remedies is a jurisdictional prerequisite to maintenance of a CEQA action." *Bakersfield Citizens for Local Control v. City of Bakersfield* (2004) 124 Cal.App.4th 1184, 1199, 22 Cal.Rptr.3d 203.

## III. CONCLUSION

For all of the foregoing reasons, the Air District respectfully requests that the portion of the Court of Appeal's decision requiring an analysis correlating the localized human health impacts associated with an individual project's criteria air pollutant emissions be reversed.

---

[19] *Sierra Club v. City of Orange*, is illustrative here. In that case, the plaintiffs challenged an EIR approved for a large planned community on the basis that the EIR improperly broke up the various environmental impacts by separate project components or "piecemealed" the analysis in violation of CEQA. In evaluating the defense that the plaintiffs had failed to adequately raise the issue at the administrative level, the Court held that comments such as *"the use of a single document for both a project-level and a program-level EIR [is] 'confusing',"* and *"[t]he lead agency should identify any potential adverse air quality impacts that could occur from all phases of the project and all air pollutant sources related to the project,"* were too vague to fairly raise the argument of piecemealing before the agency. *Sierra Club v. City of Orange*, 163 Cal.App.4th at 537.

correlating the localized human health impacts associated with an individual project's criteria air pollutant emissions be reversed.

Respectfully submitted,

Dated: April 2, 2015

## PROOF OF SERVICE

I am over the age of 18 years and not a p[arty to the above-captioned action; that my business address is San Joaquin Valley Unified Air Pollution Control District located at 1990 E. Gettysburg Avenue, Fresno, California 93726.

On April 2, 2015, I served the document described below:

**APPLICATION FOR LEAVE TO FILE AMICUS CURIAE BRIEF OF SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT IN SUPPORT OF DEFENDANT AND RESPONDENT, COUNTY OF FRESNO**

On all parties to this action at the following addresses and in the following manner:

**PLEASE SEE ATTACHED SERVICE LIST**

(XX) **(BY MAIL)** I caused a true copy of each document(s) to be laced in a sealed envelope with first-class postage affixed and placed the envelope for collection. Mail is collected daily at my office and placed in a United State Postal Service collection box for pick-up and delivery that same day.

( ) **(BY ELECTRONIC MAIL)** I caused a true and correct scanned image (.PDF file) copy to be transmitted via electronic mail transfer system in place at the San Joaquin Valley Unified Air Pollution Control District ("District"), originating from the undersigned at 1990 E. Gettysburg Avenue, Fresno, CA, to the address(es) indicated below.

( ) **(BY OVERNIGHT MAIL)** I caused a true and correct copy to be delivered via Federal Express to the following person(s) or their representative at the address(es) listed below.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that I executed this document on April 2, 2015, at Fresno, California.

Esthela Soto

Re: Record Search Results for The Ontario Plan 2050

The South Central Coastal Information Center received your records search request for the project area referenced above, located on the Ontario and Guasti, CA USGS 7.5' quadrangles. The following summary reflects the results of the records search for the project area. The search includes a review of all recorded archaeological and built-environment resources as well as a review of cultural resource reports on file. In addition, the California Points of Historical Interest (SPHI), the California Historical Landmarks (SHL), the California Register of Historical Resources (CAL REG), the National Register of Historic Places (NRHP), and the California State Built Environment Resources Directory (BERD) listings were reviewed for the above referenced project site. Due to the sensitive nature of cultural resources, archaeological site locations are not released.

**RECORDS SEARCH RESULTS SUMMARY**

| | |
|---|---|
| **Archaeological Resources* (*see Recommendations section)** | Within project area: 17 |
| **Built-Environment Resources** | Within project area: 735 |
| **Reports and Studies** | Within project area: 165 |
| **OHP Built Environment Resources Directory (BERD) 2019** | Within project area: 1351 |
| **California Points of Historical Interest (SPHI) 2019** | Within project area: 1 |
| **California Historical Landmarks (SHL) 2019** | Within project area: 0 |
| **California Register of Historical Resources (CAL REG) 2019** | Within project area: 26 |
| **National Register of Historic Places (NRHP) 2019** | Within project area: 19 |
| **Archaeological Determinations of Eligibility (ADOE): 2012** | Within project area: 0<br>Within project radius: 0 |

**HISTORIC MAP REVIEW -** Cucamonga, CA (1897, 1900, 1903), Ontario, CA (1954), and Corona, CA (1942) 15' USGS historic maps indicate that in 1897 there were several roads and buildings within the project area. Also of note was the Southern Pacific R.R., South Cucamonga Sta. (Zucker), Southern Pacific R.R. (Chino Branch), Chino Valley Narrow Gauge R.R. and the Atchison Topeka and Santa Fe R.R. (Southern California Division). Historic place name of Santa Ana del Chino, Ontario. Two intermittent streams and several washes. Dense grid of streets and buildings next to the historic place name of Ontario. There were no visible changes in 1900 or 1903. In 1942 and 1954, there appeared to have been a significant increase in visible development within the project area. This included the expansion and addition of the Union Pacific rail line, Southern Pacific rail line, and several transmission lines. Major road names and highways included Riverside Drive, Chino Ave, Walnut Ave, Schaeffer Ave, Philadelphia Ave, W Desau St, Valley Blvd, Mission Blvd, Euclid Ave, San Bernardino Ave, Turner Ave, Milleken Ave, Rochester Ave, Wineville Road, Archibald Ave, San Antonio Ave, E Ely St, W Ely St, Edison Ave, Merrill Avenue, Eucalyptus Ave, Grove Avenue, Adams Avenue, and then San Bernardino (Under Construction) Freeway. Also of note were several wells, buildings, intermittent creeks, one reservoir, an Old RR Grade, a California Air National Guard Base, the Ontario International Airport, De Anza Park, John Galvin Park and Belleview Cemetery. Also located within the project area were Chaffey HS and Jr College, several additional unnamed schools, several churches, a Radio Tower, a City Hall near the historic place name of Ontario, Cucamonga Creek and the historic place names of Ballou Spur, Champagne, Guasti, Del Chino, and Ontario.

**RECOMMENDATIONS**

**When we report that no archaeological resources are recorded in your project area or within a specified radius around the project area; that does not necessarily mean that nothing is there. It may simply mean that the area has not been studied and/or that no information regarding the archaeological sensitivity of the property has been filed at this office. The reported records search result does not preclude the possibility that surface or buried artifacts might be found during a survey of the property or ground-disturbing activities.*

The results summary was intended to provide you with numerical counts of recorded resources and reports. Since there is no specific planned project, no specific recommendations can be made at this time. However, based on the results of the research, there is potential archaeological sensitivity and potential built-environment sensitivity throughout the project area.

For your convenience, you may find a professional consultant**at www.chrisinfo.org. Any resulting reports by the qualified consultant should be submitted to the South Central Coastal Information Center as soon as possible.

**The SCCIC does not endorse any particular consultant and makes no claims about the qualifications of any person listed. Each consultant on this list self-reports that they meet current professional standards.

If you have any questions regarding the results presented herein, please contact the office at 657.278.5395 Monday through Thursday 9:00 am to 3:30 pm. Should you require any additional information for the above referenced project, reference the SCCIC number listed above when making inquiries. Requests made after initial invoicing will result in the preparation of a separate invoice.

Thank you for using the California Historical Resources Information System,

Stacy St. James Digitally signed by Stacy St. James Date: 2022.01.06 17:46:15 -08'00'

Source: EMFAC2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: San Bernardino (SC)
Calendar Year: 2021
Season: Annual
Vehicle Classification: EMFAC202x Categories
Units: miles/day for CVMT and EVMT, trips/day for Trips, kWh/day for Energy Consumption, tons/day for Emissions, 1000 gallons/day for Fuel Consumption

| Region | Calendar Year | Vehicle Category | Model Year | Speed | Fuel | Population | Total VMT | CVMT | EVMT | Trips | Fuel Consumption | Energy Consumption |

Quantification Workbook | Ontario

**Instructions**
Enter information about existing accomplishments and the reduction measures on this tab.

### Existing Accomplishments

*For existing accomplishments, specify whether it applies to the community at large, or only government operations. Provide the name of the accomplishment (for example, solar panels on City Hall or an existing recycled water program).*

| Number | Community or Government? | Description |
|---|---|---|
| 1 | Community | New solar PV capacity |
| 2 | Community | All-electric and Zero Net Energy buildings |
| 3 | Community | EV chargers |

### Reduction Strategies and Actions

*For future reduction measures, specify the following information:*

*Measure codes make it easier to refer to individual measures. Rather than using 1, 2, 3, etc., use designations that refer to individual subjects. For example, land use measures can be code LU-1, LU-2..., renewable energy measures can be coded RE-1, RE-2..., etc.*

*The topic of the measure is the general issue that it involves. Ideally, each measure should have a unique topic. Example topics include bus rapid transit, zero net energy buildings, and organic recycling.*

*The language of the measure is the actual policy, similar to what would be included in a General Plan. For example, language to improve walkability could be "Improve the safety and convenience of the pedestrian network to support walking as a viable transportation alternative."*

*The implementation actions are the specific actions the local government should take to put the policy into place. Each measure should have at least two implementation actions.*

| Completed | Quantifiable | Number | Sector | Topic | Strategy | Actions | Number | |
|---|---|---|---|---|---|---|---|---|
| | 1 | 1 | Energy | Building electrification | Promote and incentivize the phase-out of gas appliances in new and existing homes and businesses throughout the community to advance GHG reductions, increase energy efficiency, and protect public safety and environmental health. | • Support education and outreach to raise awareness and increase participation in electric appliance rebate programs offered by SCE, SoCalREN, and other providers, with a focus on contractors and residents of older properties (constructed in or before 1975).<br>• Identify and remove any existing code, permitting, or other City requirements that provide barriers to all-electric conversions of existing homes and businesses | 5 | |
| | 1 | 2 | Energy | Onsite solar energy for existing residential developm | Continue to support and facilitate installation of rooftop solar photovoltaic and onsite solar energy systems in existing residential development. | • Conduct outreach to raise awareness about the benefits of solar energy for homes and increase installations of residential solar PV systems in Ontario.<br>• Establish a solar permitting webpage on the City's website that summarizes requirements for installing solar PV systems to ensure the information is easily accessible to the general public.<br>• Update City permit tracking as appropriate to track size and number of renewable energy installations. | 4 | |
| | 1 | 3 | Energy | Onsite solar energy systems for non-residential devel | Ensure new large non-residential development, including City facilities, includes onsite renewable energy to support the site's energy needs by requiring solar photovoltaic panels or other appropriate onsite renewable energy generation systems for the following types of projects<br>• New commercial and office buildings, or existing commercial and office building expansions greater or equal to 45,000 square feet in size.<br>• New industrial or existing industrial buildings expansions greater or equal to 100,000 square feet in size | • Provide incentives and rebates for solar PV systems for industrial uses to encourage increased local use of renewable energy.<br>• Conduct outreach to raise awareness about the benefits of solar energy for businesses, including industrial facilities, and increase installations of nonresidential solar PV systems in Ontario.<br>• Assess the feasibility of placing solar on City-owned properties. | 3 | |
| | 1 | 4 | Energy | Green roofs | Promote and incentivize residents and business owners to install green roofs to conserve energy and reduce surface water runoff. | • Provide incentives for installation of green roofs in new and existing buildings.<br>• Conduct outreach to raise awareness about and increase participation in green roof rebate program. | 3 | |
| | 1 | 5 | Energy | Urban cooling | Maintain and expand the City's existing tree canopy, with a goal of planting 500 trees annually through 2050, and promote the use of pervious concrete and cool pavement for pavement projects. | • Maintain and expand an urban forestry program to manage citywide tree planting, track citywide tree inventory and canopy cover, and monitor tree health to maintain and expand the City's existing tree canopy.<br>• Identify priority areas for tree planting, focusing on environmental justice communities, to mitigate the heat island effect in underserved neighborhoods.<br>• Ensure that new and retrofitted large hardscaped areas, such as parking lots, incorporate trees and other green infrastructure appropriate for current and future climate conditions.<br>• Explore grant funding opportunities for urban forestry, pervious concrete, and cool pavement. | 5 | |
| | 1 | 6 | Energy | Energy efficiency retrofits for low-income households | Promote and incentivize voluntary energy efficiency retrofits of homes to reduce natural gas and electricity usage, with the goal of retrofitting 9,000 low-income homes by 2050. Partner with community services agencies to fund energy efficiency projects, including heating, ventilation, air conditioning, indoor lighting, water heating equipment, insulation, and weatherization for low-income residents. | • Assist San Bernardino County staff and other partners with their targeted outreach campaigns, including hosting workshops and promoting programs through City communication channels to increase awareness of the benefits of weatherization among low-income households.<br>• Expand and better integrate funding and support for existing programs that support weatherization and increase energy efficiency in low-income households, including through partnerships with SoCalREN and San Bernardino County.<br>• Engage with tenants and owners of multi-family homes and promote the SoCalREN multi-family program. | 3 | |
| | 1 | 7 | Energy | Energy efficiency retrofits | Promote and incentivize voluntary energy efficiency retrofits to reduce in natural gas and electricity usage. Partner with regional agencies to expand access to existing energy efficiency and conservation opportunities, incentives, and technical assistance for residents and businesses. | • Assist partners with their outreach campaigns, hosting workshops, promoting programs through City communication channels, promoting programs through interactions with homeowners and contractors, and sharing permitting data to inform targeted outreach.<br>• Establish a webpage on the City's website that summarizes permitting requirements, available rebates, and other information about energy efficiency retrofits to ensure that information is easily available to the public.<br>• Support SoCal and San Bernardino County efforts to conduct outreach and education with local contractors to ensure they are updated on local code requirements and energy-efficient appliances and devices.<br>• Encourage owners of existing commercial, industrial, and residential buildings 10,000 square feet or larger to prepare an annual energy and water benchmarking report and submit it to the City, to help community awareness of building performance and identify opportunities for energy- and water-efficiency retrofits.<br>• If Ontario is not on track to meet GHG reduction targets by 2025, develop and implement additional energy efficiency standards for existing buildings.<br>• Research, consider, and implement an incentive program to encourage community members to reduce energy consumption. | 5 | |
| | 1 | 8 | Transportation | Smart Growth and Infill | Encourage revitalization of neighborhoods through higher-density, mixed-use, infill development and creative reuse of under-utilized sites within the urban core. | • Identify opportunities to increase residential density in and around the urban core.<br>• Examine the development review process and other zoning approval processes to reduce or eliminate regulations that increase costs for higher density development.<br>• Regularly identify underutilized parcels in existing infill areas to support increased housing and business opportunities consistent with the adopted Housing Element | 3 | |
| | 1 | 9 | Transportation | Transit-Oriented Development | Encourage development of compact, mixed-use, and transit-oriented development to improve the regional jobs-housing balance, especially on corridors served by high-ridership transit and Bus Rapid Transit (BRT) such as Holt Avenue. | • Require that development within the TOD corridor maintains and improves the mobility of people and vehicles along and across the corridor through safety considerations such as separated sidewalks and bike lanes or traffic-calming measures.<br>• Require development within the TOD corridor to protect and improve as needed transportation infrastructure, equitably considering the safety, comfort, and effectiveness of all transportation modes.<br>• Establish and maintain land use patterns in the TOD corridor that will attract and serve riders of public transit, such as higher-density mixed-use buildings near existing high-frequency transit stops.<br>• Revise land use and development standards in the TOD corridor as needed to remove any barriers to appropriate higher-density development. | 4 | |
| | 1 | 10 | Transportation | Increase Transportation Ridership | Ensure a reliable and responsive transit system with dedicated and secure funding and resources to support increased ridership. | • Collaborate with LA Metro, Metrolink, and Omnitrans to implement "Smart Bus" technology, Global Positioning Systems (GPS), and electronic displays at all transit stops to provide customers with "real-time" arrival and departure time information.<br>• Support efforts to establish dedicated bus lanes.<br>• Collaborate with regional transit operators on programs to increase use of the City's public transportation system. To the extent feasible, support shorter transit passenger travel time through reduced headways and increased speed. Support efforts by regional transit operators to reduce the average fleet travel time by 5 minutes.<br>• In collaboration with transit agencies, support new transit routes, increased transit frequency and operating hours, and other improvements to transit quality.<br>• Support citywide outreach campaigns by transit agencies to promote the use of public transit, including Fare-Free days to encourage mode shifts .<br>• Coordinate with large regional employers to establish a shuttle service that connects transit centers to employment centers during commuting hours<br>• Encourage employers to provide ridership programs, public transit passes, and offer telecommuting to employees. | 7 | |
| | 1 | 11 | Transportation | Traffic signal synchronization and roadway management | Implement traffic and roadway management strategies to improve mobility and efficiency and reduce associated emissions. | • Work with the Traffic Management Center to develop an annual signal synchronization program for identified priority corridors to understand changing traffic conditions, including peak hour conditions and traffic congestion patterns, update signal timing to match the specific needs of study corridors, and report on progress in travel time, average speed, and delay to measure effectiveness of the signal synchronization project.<br>• Work with the Traffic Management Center to ensure that signal timing is updated on a regular basis to comply with latest State requirements and accommodate pedestrian and bicycle crossing time for roadways with crosswalks and/or bicycle facilities | 2 | Implementation actions based on City of Escondido Traffic Singal Synchronization Program. https://www.escondido.org/signal-synchronization-program.aspx |
| | 1 | 12 | Transportation | Community vehicle electrification | Promote and incentivize the adoption of electric vehicles (EVs) citywide, including light-duty and heavy-duty vehicles, for municipal, commercial, and residential uses. | • Develop and implement a plan to transition the City's municipal fleet to low- and zero -emission vehicles, to the greatest extent feasible .<br>• Collaborate with Omnitrans to encourage investment in electric buses.<br>• Encourage the use of electric vehicles by increasing access to availability of public EV charging stations.<br>• Work with SCAQMD to participate in CARB's Proposition 1B - Goods Movement Emission Reduction Program to incentivize investment in cleaner trucks and electrification infrastructure to reduce air pollution emissions from freight activity beyond enforceable requirements.<br>• Incentivize the purchase of electric vehicles by providing EV rebates for Ontario residents and/or facilitating awareness rebates available from public agencies.<br>• Provide information about EV rebate programs and other incentives through multiple communication channels to raise awareness about and increase purchases of EVs among residents and business owners, including creating a dedicated webpage on the City website with information about purchasing EVs and installing EV chargers | 6 | |
| | 1 | 13 | Transportation | Active transportation networks | Work with transit agencies, school districts, and employers to facilitate an interconnected transportation system that allows a shift in travel from private passenger vehicles to alternative modes, including public transit, ride sharing, car-sharing, bicycling, and walking. | • Encourage local school districts to develop school transit plans to substantially reduce automobile trips to, and congestion surrounding, schools.<br>• Increase pedestrian and bicycle facilities through implementation of the Active Transportation Master Plan, expanding the active transportation network to include 186.7 miles of bicycle facilities and pedestrian safety improvements to promote higher bicycle ridership and walking rates.<br>• Seek funding for active transportation infrastructure improvements.<br>• Implement scooter share pilot program in Ontario Ranch in 2023. | 5 | |
| | 1 | 14 | Transportation | Vehicle idling | Limit idling of heavy duty trucks. Support the South Coast Air Quality Management District (SCAMQD) and ARB anti-idling requirements and provide signage in key areas where idling that is not consistent with SCAMQD or ARB requirements might occur. | • Evaluate the feasibility of an idling ordinance that reduces the legally allowed idling time for heavy duty trucks (greater than 26,000 gross vehicle weight) to 3 minutes. California law currently limits idling time to 5 minutes. Ordinance must include a violation fee and enforcement mechanisms.<br>• Create a public awareness campaign to raise awareness about and increase compliance with idling ordinance.<br>• Install signage regarding new idling limit of 3 minutes in areas designated for industrial uses. | 4 | |
| | 1 | 15 | Transportation | Parking policy and event parking | Adopt a comprehensive parking policy that encourages carpooling and the use of alternative transportation, including providing parking spaces for car-share vehicles at convenient locations accessible by public transportation. | • Establish a market pricing scheme for on-street parking in Downtown Ontario.<br>• Designate at least 5% of downtown parking spaces as loading and unloading areas for taxis, TNCs, buses, and shuttles.<br>• Designate a portion of parking revenues that can support City-led GHG reduction projects.<br>• Consider establishing policies and programs to reduce onsite parking demand and promote ride-sharing during events at the Ontario Convention Center and other event venues. | 4 | |
| | 1 | 16 | Offroad | Electrification of construction and landscaping equipme | Promote and incentivize the transition to electric construction and landscaping equipment. | • Support state and regional efforts to replace diesel-powered construction and landscaping equipment with electric equipment.<br>• Conduct targeted outreach to local construction and landscaping companies to raise awareness about and increase participation in available electric equipment rebate programs | 3 | |
| | 1 | 17 | Offroad | Idling ordinance for construction equipment | Limit idling of heavy-duty off-road construction equipment to reduce air pollution and GHG emissions from construction activity. | • Evaluate the feasibility of an equipment idling ordinance that reduces the legally allowed idling time for heavy duty construction equipment to 3 minutes. Ordinance must include a violation fee and enforcement mechanisms.<br>• Conduct targeted outreach to local construction companies to raise awareness about and increase compliance with the equipment idling ordinance. | 2 | |
| | 1 | 18 | Waste | Methane capture at landfills | Support efforts to reduce methane emissions from regional landfills. | • Encourage efforts to coordinate with regional landfills to install methane capture technology and associated monitoring systems with a goal of increasing the methane capture rate to the highest extent feasible.<br>• Encourage the use of captured methane for generation of electricity to offset fossil fuel energy use and reduce GHG emissions. | 2 | |
| | 1 | 19 | Waste | Waste diversion | Exceed waste diversion goals recommended by AB 939 and CALGREEN by adopting a citywide diversion target of at least 75 percent of waste. | • Establish a source-reduction program that promotes options to rethink, refuse, reduce, reuse, regenerate, recycle, and recover materials by working with regional partners.<br>• Establish sharing, exchange, and reuse program(s), including fix-it clinics, swap events, second-hand markets, and shop local campaigns by working with community and regional partners.<br>• Promote awareness of life-cycle emissions of products through public outreach campaigns.<br>• Explore options to develop and adopt an ordinance to prohibit specific types of single-use or disposable plastics, particularly for use by restaurants, caterers, and other commercial kitchens.<br>• Engage with businesses using food packaging to determine barriers to switching to biodegradable or compostable food packaging and work to remove those barriers.<br>• Provide educational outreach programs to multi-family residents, multi-family property owners, single-family homeowners, and business owners to support composting programs.<br>• Increase the share of Ontario residents and business owners that have green compost carts or bins by working with waste haulers.<br>• Provide counter-top compost bins to residents of Ontario by working with regional partners and community based organizations.<br>• Work with food service facilities to understand barriers to composting and work to mitigate these concerns.<br>• Encourage local restaurants to partner with food rescue organizations to divert food that would otherwise be thrown away to non-profit organizations for distribution to those in need.<br>• Explore options to develop and adopt an ordinance requiring residences, businesses, and City facilities to practice Responsible Appliance Disposal for all decommissioned units including refrigerators/freezers, window air conditioning | 11 | |
| | 1 | 20 | Waste | Construction and Demolition Waste Recovery Ordinance | Increase the amount of waste recycled during construction and demolition of buildings. | • In compliance with AB 939 and CALGREEN, implement an ordinance requiring building projects to recycle or reuse at least 50% of unused or leftover building materials.<br>• Incentivize the recycling of construction debris by working with regional partners.<br>• Research and consider providing financial incentives to encourage the recycling of construction debris.<br>• Determine how certain construction materials may be donated and reused to help those in need by working with local community based organizations and construction companies | 4 | |
| | 1 | 21 | Water | Indoor water efficiency | Encourage water-efficient retrofits of new and existing buildings by working with water providers and regional agencies. | • Explore establishing a reach code for water efficiency standards applicable to new residential and commercial development.<br>• Explore a target for reduced indoor and outdoor water use in existing buildings.<br>• Partner with Ontario Municipal Utilities Company to encourage water conservation at municipal facilities and in the community.<br>• Publicize available incentives and low-cost solutions to water-efficiency retrofits in existing buildings.<br>• Provide incentives for water-efficient appliances, plumbing fixtures, and irrigation systems to encourage improved water efficiency | 6 | |
| | 1 | 22 | Water | Water efficient landscapes and water recycling | Promote drought-tolerant and firewise landscaping. Encourage increased use of reclaimed water for landscape irrigation, agricultural, and industrial use. | • Develop a native, drought-tolerant, and fire-resistant landscaping list and require new development or redevelopment to use this list in landscaping plans.<br>• Enforce, and update as appropriate, the Water-Efficient Landscaping Ordinance to reduce outdoor water use.<br>• Encourage water-efficient landscaping practices through incentives and rebates for residential landscapes.<br>• Reduce municipal outdoor water use through a water monitoring and management system for all City's irrigation operations. | 5 | |
| | 1 | 23 | Water | Water system and wastewater operations efficiency | Maximize efficiency at drinking water treatment, pumping, and distribution facilities, including development of off-peak demand schedules for heavy commercial and industrial users. | • Work with the Inland Empire Utilities Agency (IEUA), the local wastewater treatment provider, to upgrade and replace wastewater treatment and pumping equipment with more energy efficient equipment as feasible.<br>• Assess and upgrade City-owned water pumping and treatment equipment, as needed, to increase energy efficiency and save energy costs. | 2 | |
| | 1 | 24 | Agriculture | Methane capture for dairy operations | Encourage and incentivize local dairy operations to reduce methane emissions through methane capture technology. | • To comply with SB 1383, work with local dairies to encourage installation of methane digesters to capture methane emissions from decomposing manure. | 1 | |
| | 1 | 25 | Wastewater | Methane capture for wastewater treatment | Work with Inland Empire Utilities Agency (IEUA), the local wastewater treatment provider, to increase methane capture rate | • Work with IEUA to explore the possibility of generating electricity from captured methane to power various facilities and reduce operating costs | 1 | |
| | | 26 | Leadership | Climate change awareness and education | Promote climate change awareness and GHG reduction community-wide, through a variety of mechanisms, including through support of climate change education in schools or community colleges. | • Promote educational resources to students and parents each year and encourage community educators to incorporate clean energy and climate change discussions into their curriculum, by partnering with CSU San Bernardino and school districts.<br>• Use City newsletters to spotlight community members, including K-12 teachers and students, who are working on climate change or sustainability and who are making a difference in our community.<br>• Increase energy educational resources in the Ontario School District and Ontario-Montclair School District by working with the San Bernardino County Office of Education.<br>• Work with non-profits and community-based organizations to develop a list of green volunteer opportunities and skills trainings for high school students, such as community gardening, tree planting, bicycle advocacy, food recovery, and composting.<br>• Promote and support opportunities for Ontario community members to test appliances and equipment that support increased energy and water conservation and transitions to all-electric appliances | 4 | |
| | | 27 | Carbon sequestration | Carbon sequestration | Establish a City-wide carbon sequestration project and sequestration goal of 5,000 MT $CO_2$ per year. | • Organize citywide tree planting volunteer days, prioritizing public schools and neighborhoods in environmental justice areas, as an extension of the City's urban forestry program.<br>• Conduct public workshops to educate community members about the ecological, social, and economic benefits of trees and provide basic training in tree planting and maintenance.<br>• Seek grants in partnership with community-based organizations to fund the carbon sequestration project.<br>• Publicize the carbon sequestration project to raise awareness about the project and recruit volunteers.<br>• Explore opportunities to establish a carbon offset program for development projects, ensuring that offset activities occur in California, and that they occur locally or regionally to the greatest extent possible. GHG reductions from carbon offsets shall be real, permanent, quantifiable, verifiable, and enforceable | 4 | |
| | | 28 | Economic development | Green jobs | Support green job trainings and opportunities to create sustainable, living wage, quality employment opportunities. | • Partner with community colleges, local non-profits, and community groups to provide green jobs training for residents.<br>• Provide information about green jobs, especially to people currently or recently working in polluting or extractive industries.<br>• Collaborate with community-based organizations and regional partners to amend the City's economic development strategy and attract businesses to Ontario that contribute to a sustainable economy | 3 | |
| | 24 | | | | | | 111 | |

Quantification Workbook Ontario

| 1 | Energy | Building electrification |
|---|---|---|

**Measure Language**

Promote and incentivize the phase-out of gas appliances in new and existing homes and businesses throughout the community to advance GHG reductions, increase energy efficiency, and protect public safety and environmental health.

**Implementation Actions**

• Support education and outreach to raise awareness and increase participation in electric appliance rebate programs offered by SCE, SoCalREN, and other providers, with a focus on contractors and residents of older properties (constructed in or before 1975).
• Identify and remove any existing code, permitting, or other City requirements that provide barriers to all-electric conversions of existing homes and businesses and assess opportunities to provide incentives, such as permit streamlining or fee reductions, as feasible.
• Update the City's permit tracking system as appropriate to track energy efficiency improvements.
• Review City supported weatherization and energy efficiency programs and requirements, if applicable, to ensure they support all-electric, high efficiency appliances.
• Support education opportunities for contractors about the opportunities and benefits of converting homes to high efficiency, all-electric appliances.
• Audit existing City facilities on a regular basis to assess energy use and efficiency, identify energy efficiency improvements that optimize energy performance of buildings and operations, and prioritize energy efficiency improvements.

| GHG Reductions | 2030 | 2050 | | | |
|---|---|---|---|---|---|
| Residential kWh | -10,620 | 0 | | | |
| Residential therms | 16,050 | 58,830 | | | |
| Nonresidential kWh | -9,520 | 0 | | | |
| Nonresidential therms | 14,400 | 43,810 | | | |
| **Total** | **10,310** | **102,640** | | | |

| Activity Reductions | 2030 | 2050 | | | |
|---|---|---|---|---|---|
| Residential kWh | -89,208,980 | -326,995,840 | | | |
| Residential therms | 3,044,360 | 11,159,130 | | | |
| Nonresidential kWh | -80,012,870 | -243,510,780 | | | |
| Nonresidential natural gas | 2,730,540 | 8,310,100 | | | |

| Assumptions | 2030 | 2050 |
|---|---|---|
| Penetration rate for electrification of existing homes | 10% | 25% |
| Penetration rate for electrification of existing non-residential buildings | 5% | 12% |
| Penetration rate for electrification of new homes | 30% | 60% |
| Penetration rate for electrification of new non-residential buildings | 25% | 45% |

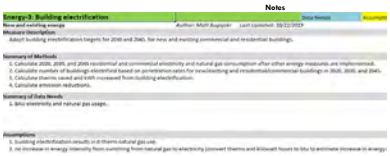
Quantification Calculations

**Notes**



Energy-3: Building electrification | Data Needed | Assumption
New and existing energy | Author: Matt Bugosh | Last Updated: 10/21/2019
Measure Description
Adopt building electrification targets for 2030 and 2045, for new and existing commercial and residential buildings.
Summary of Methods
1. Calculate 2020, 2030, and 2045 residential and commercial electricity and natural gas consumption after other energy measures are implemented.
2. Calculate number of buildings electrified based on penetration rates for new/existing and residential/commercial buildings in 2020, 2030, and 2045.
3. Calculate therms saved and kWh increased from building electrification.
4. Calculate emission reductions.
Summary of Data Needs
1. Baku electricity and natural gas usage.
Assumptions
1. building electrification results in 0 therms natural gas use.
2. no increase in energy intensity from switching from natural gas to electricity (convert therms and kilowatt hours to btu to estimate increase in energy

New residential buildings were estimated by subtracting the number of homes in Year 2- number of homes in Year 1 (i.e. new homes in 2030= 2030 # of homes minus 2019 # of homes)

New non-residential buildings were estimated using the area (square footage) of total nonresidential area, by subtracting square footage in Year 2- square footage in Year 1 (i.e. new non-residential area in 2030 = 2030 square footage - 2019 square footage)

| New Residential | 2030 | 2050 |
|---|---|---|
| Target penetration rate for electrification of new homes | 30% | 60% |
| Number of new homes (built between 2019-2030, 2019-2050) | 18,404 | 76,105 |
| Target number of all electric homes | 5,521 | 45,663 |
| Electricity use for new homes (kWh) | 30,964,750 | 155,003,460 |
| Average natural gas use for new homes (therms) | 244.48 | 151.61 |
| Energy savings from avoided natural gas use (therms) | 1,349,826 | 6,922,782 |
| Energy savings from avoided natural gas use (BTU) | 134,950,339,159 | 692,112,745,510 |
| Change in residential electricity use (to replace avoided natural gas (kWh)) | -39,553,944 | -202,858,246 |
| Change in GHG emissions from increased electricity use (MTCO2e) | -4,707 | 0 |

| Existing Residential | | |
|---|---|---|
| Target penetration rate for electrification of existing homes | 10% | 25% |
| Number of existing homes | 48,275 | 48,275 |
| Target number of existing all-electric homes | 4,828 | 12,069 |
| Average natural gas use for existing homes (therms) | 351.02 | 351.02 |
| Energy savings from avoided natural gas use (therms) | 1,694,538 | 4,236,345 |
| Energy savings from avoided natural gas use (BTU) | 169,413,300,542 | 423,533,251,355 |
| Change in electricity use (to replace avoided natural gas (kWh)) | -49,655,038 | -124,137,596 |
| Change in GHG emissions from increased electricity use (MTCO2e) | -5,909 | 0 |

| New Nonresidential | | |
|---|---|---|
| Target penetration rate for electrification of new nonresidential buildings | 25% | 45% |
| Increase in non-residential building square footage (built between 2019-2030, 2019-2050) | 32,666,125 | 110,980,953 |
| Target for all-electric non-residential building area | 8,166,531 | 49,941,429 |
| Electricity use for new nonresidential buildings | 171,690,190 | 183,453,950 |
| Average natural gas use for new nonresidential buildings (therms/square foot) | 0.1741 | 0.1035 |
| Energy savings from avoided natural gas use (therms) | 1,422,128 | 5,169,920 |
| Energy savings from avoided natural gas use (BTU) | 142,178,761,153 | 516,868,388,924 |
| Change in nonresidential electricity use (to replace avoided natural gas (kWh)) | -41,672,595 | -151,494,125 |
| Change in GHG emissions from increased electricity use (MTCO2e) | -4,959 | 0 |

| Existing Nonresidential | | |
|---|---|---|
| Target penetration rate for electrification of existing nonresidential buildings | 5% | 12% |
| Existing nonresidential building area (square footage) | 183,176,951 | 183,176,951 |
| Target for all-electric nonresidential building area | 9,158,848 | 21,981,234 |
| Average natural gas use for existing nonresidential buildings (therms/square foot) | 0.1429 | 0.1429 |
| Energy savings from avoided natural gas use (therms) | 1,308,408 | 3,140,179 |
| Energy savings from avoided natural gas use (BTU) | 130,809,529,049 | 313,942,869,717 |
| Change in electricity use (to replace avoided natural gas (kWh)) | -38,340,273 | -92,016,655 |
| Change in GHG emissions from increased electricity use (MTCO2e) | -4,562 | 0 |

**Additional Notes**

| Exsiting Buildings | 2030 | 2050 |
|---|---|---|
| Penetration rate for electrification of existing homes | 0.1 | 0.25 |
| Penetration rate for electrification of existing non-resider | 0.05 | 0.12 |
| **New Construction** | 2030 | 2050 |
| Penetration rate for electrification of new homes | 0.3 | 0.6 |
| Penetration rate for electrification of new non-residential | 0.25 | 0.45 |

DRAFT

**Quantification Workbook** **Ontario**

| 2 | Energy | Onsite solar energy for existing residential development |
|---|---|---|

**Measure Longcode**

Continue to support and facilitate installation of rooftop solar photovoltaic and onsite solar energy systems in existing residential development.

**Implementation Actions**

* Conduct outreach to raise awareness about the benefits of solar energy for homes and increase installations of residential solar PV systems in Ontario.
* Establish a solar permitting webpage on the City's website that summarizes requirements for installing solar PV systems to ensure the information is easily accessible to the general public.
* Update City permit tracking as appropriate to track size and number of renewable energy installations.

**GHG Reductions**

| | 2020 | 2030 | | | |
|---|---|---|---|---|---|

Quantification Workbook Ontario

| 3 | Energy | Onsite solar energy systems for non-residential development. |
|---|---|---|

**Measure Language**

Ensure new large non-residential development, including City facilities, includes onsite renewable energy to support the site's energy needs by requiring solar photovoltaic panels or other appropriate onsite renewable energy generation systems for the following types of projects:
• New commercial and office buildings, or existing commercial and office building expansions greater or equal to 45,000 square feet in size.
• New industrial or existing industrial buildings expansions greater or equal to 100,000 square feet in size.

**Implementation Actions**

• Provide incentives and rebates for solar PV systems for industrial uses to encourage increased local use of renewable energy.
• Conduct outreach to raise awareness about the benefits of solar energy for businesses, including industrial facilities, and increase installations of nonresidential solar PV systems in Ontario.
• Assess the feasibility of placing solar on City-owned properties.

| GHG Reductions | 2030 | 2050 |
|---|---|---|
| Nonresidential kWh | 26,480 | 0 |
| Total | 26,480 | 0 |

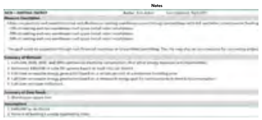
| Assumptions | 2030 | 2050 |
|---|---|---|
| Target percentage of new industrial roof space with electric needs met by on-site solar | 90% | 90% |
| Target percentage of existing industrial roof space with electric needs met by on-site solar | 10% | 20% |
| Target percentage of new non-industrial nonresidential development with electricity needs met by on-site solar | 15% | 30% |
| Target percentage of existing non-industrial nonresidential development with electricity needs met by on-site solar | 5% | 15% |

| Activity Reductions | 2030 | 2050 |
|---|---|---|
| Nonresidential kWh | 222,496,360 | 363,016,820 |

| Performance Targets and Metrics | 2030 | 2050 |
|---|---|---|
| kW of solar panels on new industrial space | 66,660 | 71,500 |
| kW of solar panels on existing industrial space | 52,290 | 104,580 |
| kW of solar panels on new non-industrial nonresidential space | 4,520 | 9,560 |
| kW of solar panels on existing non-industrial nonresidential space | 11,550 | 34,640 |

**Quantification Calculations**

**Notes**



| New Industrial Space | 2030 | 2050 |
|---|---|---|
| New industrial square footage | 23,222,731 | 79,197,941 |
| New industrial electricity use | 122,056,568 | 130,915,934 |
| Electricity use of participating new industrial space (kWh) | 109,850,911 | 117,824,340 |
| Average kWh generated per kW of solar panels | 1,648 | 1,648 |
| kW of solar panels needed to meet needs of participating new industrial space | 66,658 | 71,496 |

| Existing Industrial Space | 2030 | 2050 |
|---|---|---|
| Existing industrial square footage | 104,398,845 | 104,398,845 |
| Existing industrial electricity use | 861,701,381 | 861,701,381 |
| Electricity use of participating existing industrial space (kWh) | 86,170,138 | 172,340,276 |
| Average kWh generated per kW of solar panels | 1,648 | 1,648 |
| kW of solar panels needed to meet needs of participating existing industrial space | 52,288 | 104,577 |

| New Non-Industrial Space | 2030 | 2050 |
|---|---|---|
| New non-industrial square footage | 9,443,394 | 31,783,012 |
| New non-industrial electricity use | 49,633,622 | 52,538,016 |
| Electricity use of participating new non-industrial space (kWh) | 7,445,043 | 15,761,405 |
| Average kWh generated per kW of solar panels | 1,648 | 1,648 |
| kW of solar panels needed to meet needs of participating new non-industrial space | 4,518 | 9,564 |

| Existing Non-Industrial Space | 2030 | 2050 |
|---|---|---|
| Existing non-industrial square footage | 46,111,981 | 46,111,981 |
| Existing non-industrial electricity use | 380,605,339 | 380,605,339 |
| Electricity use of participating existing non-industrial space (kWh) | 19,030,267 | 57,090,801 |
| Average kWh generated per kW of solar panels | 1,648 | 1,648 |
| kW of solar panels needed to meet needs of participating existing non-industrial space | 11,548 | 34,643 |

Quantification Workbook Ontario

| 4 | Energy | Green roofs |
|---|---|---|

**Policy Intent**

Promote and incentivize residents and business owners to install green roofs to conserve energy and reduce surface water runoff.

**Implementation Actions**

* Provide incentives for installation of green roofs in new and existing buildings.
* Conduct outreach to raise awareness about and increase participation in green roof rebate program.

DRAFT

Quantification Workbook | Ontario

| 5 | Energy | Urban cooling |
|---|---|---|

**Measure Language**

Maintain and expand the City's existing tree canopy, with a goal of planting 500 trees annually through 2050, and promote the use of pervious concrete and cool pavement for pavement projects.

**Implementation Actions**

- Maintain and expand an urban forestry program to manage citywide tree planting, track citywide tree inventory and canopy cover, and monitor tree health to maintain and expand the City's existing tree canopy.
- Identify priority areas for tree planting, focusing on environmental justice communities, to mitigate the heat island effect in underserved neighborhoods.
- Ensure that new and retrofitted large hardscaped areas, such as parking lots, incorporate trees and other green infrastructure appropriate for current and future climate conditions.
- Explore grant funding opportunities for urban forestry, pervious concrete, and cool pavement.

**GHG Reductions**

| | 2030 | 2050 | | | |

| Number of trees planted | 4,000 | 10,000 |
| | | |
| | | |
| | | |

**Quantification Calculations**

**Notes**

**Assumptions:**

All trees planted within 0-19 feet and of buildings that were built post-1980 with heat and A/C.
25% of trees were planted N of buildings, 25% were planted E, and 25% W
Four species were planted at the same rate (125 trees of each) for a total of 500 trees per year
Four species: Oak, Northern red (Quercus rubra), Sycamore, American (Platanus occidentalis),
Tree, Chinese flame (Koelreuteria bipinnata), Tree, Tulip (Liriodendron tulipifera)
Trees are in excellent condition and planted in full sun.
10% mortality rate during project period (2022-2050)
Carbon sequestration rate is constant over time
(28.6% of carbon sequestered between 2022-2030, 71.4% of carbon sequestered between 2031-2050)

| | 2030 | 2050 |
|---|---|---|
| Percent of project period for C sequestration | 28.57% | 71.43% |
| | | |
| Project starting year | 2022 | 2022 |
| | | |
| Total carbon sequestration from planting 500 trees per year (lbs CO2) | 8,991,418 | 22,478,546 |
| Total carbon sequestration from planting 500 trees per year (MTCO2) | 4,078 | 10,196 |
| | | |
| Electricity saved from tree canopy (kWh) | 4,397,948 | 10,994,869 |
| GHG reduction from reduced electricity use (MTCO2e) | 523 | 0 |
| | | |
| Fuel use saved from tree canopy (therms) | 191,823 | 479,559 |
| GHG reduction from reduced fuel use (MTCO2e) | 1,011 | 2,528 |

Quantification Workbook Ontario

| 6 | Energy | Energy efficiency retrofits for low-income households |
|---|---|---|

**Measure Language**

Promote and incentivize voluntary energy efficiency retrofits of homes to reduce natural gas and electricity usage, with the goal of retrofitting 9,000 low-income homes by 2050. Partner with community services agencies to fund energy efficiency projects, including heating, ventilation, air conditioning, indoor lighting, water heating equipment, insulation, and weatherization for low-income residents.

**Implementation Actions**

• Assist San Bernardino County staff and other partners with their targeted outreach campaigns, including hosting workshops and promoting programs through City communication channels to increase awareness of the benefits of weatherization among low-income households.
• Expand and better integrate funding and support for existing programs that support weatherization and increase energy efficiency in low-income households, including through partnerships with SoCalREN and San Bernardino County.
• Engage with tenants and owners of multi-family homes and promote the SoCalREN multi-family program.

**GHG Reductions**

| | 2030 | 2050 | | | |
|---|---|---|---|---|---|
| Residential kWh | 220 | 0 | | | |
| Residential therms | 720 | 1,440 | | | |
| | | | | | |
| **Total** | **940** | **1,440** | | | |

**Activity Reductions**

| | 2030 | 2050 | | | |
|---|---|---|---|---|---|
| Residential kWh | 1,885,000 | 3,770,000 | | | |
| Residential therms | 136,340 | 272,680 | | | |
| | | | | | |
| | | | | | |

| Assumptions | 2030 | 2050 |
|---|---|---|
| Penetration rate for low-income residential energy efficiency retrofits | 30% | 60% |
| Anticipated savings in electricity energy efficiency from retrofit activities | 20% | 20% |
| Anticipated savings in natural gas energy efficiency from retrofit activities | 32% | 32% |
| Percent of existing households in Ontario that are low-income (2019) | 27% | 27% |
| | | |

| Performance Targets and Metrics | 2030 | 2050 |
|---|---|---|
| Number of retrofitted low-income homes | 4,630 | 9,270 |
| | | |
| | | |
| | | |
| | | |

Quantification Calculations

**Notes**

**Assumption**
It is assumed that the low-income households are evenly distributed across different housing types (i.e. single family, townhomes, low-rise apartments, mid-rise apartments, and mobile home parks).

**2030 Energy Savings from Weatherization**

| | | |
|---|---|---|
| Percent Savings of Energy Used for Heating (kWh) | 20% | US DOE (from CAPPA-Weatherization) |
| Percent Savings of Energy Used for Heating (therms) | 32% | US DOE (from CAPPA-Weatherization) |

*SBCTA Revised Workbook*

| | |
|---|---|
| Percent of electricity use for HVAC | 31.02% |
| Percent of natural gas use for HVAC | 26.19% |

*Residential Appliance Saturation Study*

| | 2030 | 2050 |
|---|---|---|
| Electricity's share of existing residential energy GHG emissions | 0.42 | 0.27 |
| Natural gas's share of existing residential energy GHG emissions | 0.58 | 0.73 |
| | | |
| Percent of existing households in Ontario that are low-income (2019) | 32% | 32% |
| | | |
| Penetration rate for low-income residential energy efficiency retrofits | 0.3 | 0.6 |
| Target for exceeding 2019 Title 24 Standards (as a percent improvement) | 0.2 | 0.2 |

**HVAC electricity Use in 2019 in low-income households by housing type (kWh)**

| | |
|---|---|
| Single family housing | 22,527,230 |
| Apartments low rise | 2,052,658 |
| Apartments high rise | 4,027,914 |
| Condo/Townhouse | 1,688,640 |
| Mobile home park | 1,120,191 |

**HVAC electricity savings in low-income households with retrofits by housing type (kWh)**

| | |
|---|---|
| Single family housing | 1,351,634 |
| Apartments low rise | 123,159 |
| Apartments high rise | 241,675 |
| Condo/Townhouse | 101,318 |
| Mobile home park | 67,211 |

**HVAC natural gas use in 2019 in low-income households by housing type (therms)**

| | |
|---|---|
| Single family housing | 1,040,977 |
| Apartments low rise | 80,333 |
| Apartments high rise | 164,591 |
| Condo/Townhouse | 83,248 |
| Mobile home park | 51,035 |

**HVAC natural gas savings in low-income households with retrofits by housing type (therms)**

| | |
|---|---|
| Single family housing | 99,934 |
| Apartments low rise | 7,712 |
| Apartments high rise | 15,801 |
| Condo/Townhouse | 7,992 |
| Mobile home park | 4,899 |

Ontario's Electricity Demand Forecast Zone 10

DRAFT

Quantification Workbook | Energy

| 7 | Energy | Energy efficiency retrofits |
|---|---|---|

**Measure Description**

Promote and incentivize voluntary energy efficiency retrofits to reduce in natural gas and electricity usage. Partner with regional agencies to expand access to existing energy efficiency and conservation opportunities, incentives, and technical assistance for residents and businesses.

**Implementation Actions**

- Joint partners with their outreach campaigns, heating workshops, promoting programs through City communication channels, promoting programs through interactions with homeowners and contractors, and sharing permitting data to inform targeted outreach.
- Establish a webpage on the City's website that summarizes permitting requirements, available rebates, and other information about energy efficiency and conservation opportunities for residents and businesses.
- Support SolCal and San Bernardino County efforts to conduct outreach and education with local contractors to ensure they are updated on local code requirements and energy efficient appliances and devices.
- Conduct outreach to residential, institutional, industrial, and commercial buildings (10,000 square feet or larger to prepare an annual energy and water benchmarking reporting system) in the City, to help increasing awareness of building performance and identify opportunities for energy and water efficiency retrofits.
- If Ontario is not on track to meet GHG reduction targets by 2030, develop and implement additional energy efficiency standards for existing buildings.
- Financial, variable, and implement an incentive program to encourage community members to reduce energy consumption.

| Value Assumptions | | | | | |
|---|---|---|---|---|---|
| | 2020 | 2030 | | | |
| Residential kWh | 1,110 | 0 | | | |
| Residential Gas | 0.000 | 0.000 | | | |
| Commercial kWh | 0.000 | 0 | | | |
| Commercial Gas | 0.000 | 0.000 | | | |
| Total | 1,110 | 1,000 | | | |

| Assumptions | 2020 | 2030 |
|---|---|---|
| Participation rate for residential energy efficiency retrofits | 0% | 80% |
| Performance savings from residential energy efficiency retrofits | 30% | 30% |
| Participation rate for commercial energy efficiency retrofits | 0% | 80% |
| Performance savings from commercial energy efficiency retrofits | 30% | 30% |
| Participation rate for residential HVAC | 0% | 80% |
| Participation rate for commercial HVAC | 0% | 80% |
| Participation rate for residential LED light | 0% | 80% |

| Actions Performance | | | | | |
|---|---|---|---|---|---|
| | 2020 | 2030 | | | |
| Residential kWh | 0.000 MWh | 10.8 MWh | | | |
| Residential Gas | 0.000 MMBtu | 0.000 MMBtu | | | |
| Commercial kWh | 0.000 MWh | 1,750,000 MWh | | | |
| Commercial Gas | 0.000 MMBtu | 0.000 MMBtu | | | |

| Performance Targets and Metrics | 2020 | 2030 |
|---|---|---|
| Number of qualified homes receiving energy efficiency improvements | 0 | 1,000 |
| Square footage of retrofitted commercial space | 0.000 sqft | 30,000,000 |
| Metric 3 | | |
| Metric 4 | | |
| Metric 5 | | |

**Quantification Methodology**

**Notes**

**Outdoor lighting quantification assumptions and methodology:**

**Assumptions:**

| | |
|---|---|
| 1. Residential outdoor lighting is 0.6% of total electricity | |
| 2. Commercial outdoor lighting is 0.6% of total electricity | |
| 3. Commercial outdoor lighting is 0.6% of total electricity | |
| 4. 0.6% of total electricity is used on Ontario Municipal lighting | |
| 5. 0.6% of total of traffic lights is Ontario (0% LED) | |

Source: San Bernardino Regional GHG Reduction Tool

Calculation approach:
Step 1: Calculate total residential, commercial electricity used for LED lights by the sector's total electricity use (kWh). Call this amount RAG Electricity.
Multiply RAG Electricity by itself, minus the product of energy savings per LED bulb times the product of the difference between the HPS' and RAG' parameter rates.

**Step 1**
"A electricity use for outdoor lights * Total electricity use (kWh) = RAG Electricity

**Step 2**
"RAG Electricity (RAG Electricity * (% electricity savings per LED bulb)*
(HPS' 2020 parameter rate - RAG' 2020 parameter rate))

| ONTARIO RESIDENTIAL BUILDINGS | 2020 | 2030 |
|---|---|---|
| Electricity share of existing residential energy uses (GHG emissions) | 29% | 29% |
| Electricity share of existing residential energy uses (GHG emissions) | 29% | 29% |
| Percent efficiency that are service lamps | 80% | 80% |
| Participation rate for residential energy efficiency retrofits | 0% | 80% |
| **Electricity Use in 2010 by function type excluding affordable units and Native GHG** | | |

**Measure Summary**

Encourage revitalization of neighborhoods through higher density, mixed-use, infill development and creative reuse of under-utilized sites within the urban core.

**Implementation Actions**

- Identify opportunities to increase residential density in and around the urban core.
- Streamline development review process and other zoning approval processes to reduce or eliminate regulations that increase costs for higher density development.
- Regularly identify underutilized parcels in existing infill areas to support increased housing and business opportunities consistent with the adopted Housing Element.

**Quantification Calculations**

**Notes**

No measurable GHG reduction can be achieved through increase in residential density because the existing residential density is lower than the minimum required to achieve a measurable decrease in VMT (according to 2021 CAPCOA guidelines)

**Assumption**

| | |
|---|---|
| Minimum density required to achieve GHG reduction (du/acre) | 9.1 |
| Source: 2021 CAPCOA guidelines | |
| | 21.779 |

Existing residential density 5.32

No measurable GHG reduction can be achieved through increase in job density because the existing job density is lower than the minimum required to achieve a measurable decrease in VMT (according to 2021 CAPCOA guidelines)

**Assumption**

| | |
|---|---|
| Floor Area Ratio | 1 |
| Minimum job density required to achieve GHG reduction (du/acre) | 145 |
| Number of square feet per acre | 43560 |
| Source: 2021 CAPCOA guidelines | |
| Existing job density | 0.00 |

**Not quantified. GHG reductions from increased housing and jobs densities under TOP 2050 are already factored into the projected change in VMT.**

**Residential**

| | | | |
|---|---|---|---|
| Percent reduction in VMT | | 5% | 10% |
| Elasticity of VMT with respect to residential density | | -0.22 | |
| Minimum residential density required to achieve GHG reduction (du/acre) | | 9.1 | |
| | | 21.779 | |
| Average floor Area Ratio | 1 | 1 | |
| Employment | 160,006 | 296,053 | |
| Non-residential building area per employee (square feet) | 1,080 | 882 | |
| Number of square feet per acre | 43,560 | 43,560 | |
| Job density (employees/acre) | 40 | 49 | |

**Additional Notes**

| | | |
|---|---|---|
| Target reduction in VMT | 5% | 10% |
| Elasticity of VMT with respect to residential density | -0.22 | |
| Minimum residential density required to achieve GHG reduction (du/acre) | 9.1 | |
| Minimum job density required to achieve GHG reduction (jobs/nonresidential acre) | 145 | |

GHG Reduction Formula

$$A = \frac{B - C}{D} \times E$$

GHG Calculation Variables

| ID | Variable | Value | Unit | Source |
|---|---|---|---|---|
| Output | | | | |
| A | Percent reduction in GHG emissions from project VMT in study area | 0.022 | % | calculated |
| Use Inputs | | | | |
| B | Residential density of project development | 11 | du/acre | use input |
| Constants, Assumptions, and available Defaults | | | | |
| C | Residential density of typical development | 9.1 | du/acre | Exhibit B-1 of 2021 |
| D | Elasticity of VMT with respect to residential density | -0.22 | unitless | Source: FHWA |

The user achieves VMT by increasing the residential density of the project study area. In this example, the project's residential density would be 11 du per acre (B), which would reduce GHG emissions from project VMT by 14.2 percent.

$$A = \frac{B - C}{D} \times E = \frac{11 - 9.1}{-0.22} \times -14.2\%$$

| 11 Minimum job density | 145 jobs/acre (Table 1-B) |
|---|---|

GHG Reduction Formula

$$A = \frac{B - C}{D} \times E$$

GHG Calculation Variables

| ID | Variable | Value | Unit | Source |
|---|---|---|---|---|
| Output | | | | |
| A | Percent reduction in GHG emissions from project VMT in study area | 0.022 | % | calculated |
| User Inputs | | | | |
| B | Job density of project development | 11 | jobs per acre | 21,780 |
| Constants, Assumptions, and available Defaults | | | | |
| C | Job density of typical development | 9 | jobs per acre | 21,780 |
| D | Elasticity of VMT with respect to job density | -0.22 | unitless | Source: EPA |

Further explanation of our variables:

- C: The jobs density is based on the calculator (break-it) a development built at floor-area ratio of 1.0 and 500 square feet (ft) of building space per employee.

$$\frac{43{,}560\ \text{ft}^2/\text{acre}}{500\ \text{ft}^2/\text{employee}} \times \frac{1\ \text{employee}}{\text{acre}} = \frac{87{,}120\ \text{employees}}{\text{acre}}$$

If indicators are being calculated from a specific baseline derived from a travel demand forecasting model, the job density of the relevant transportation analysis zone should be used for this equation instead of the default survey (assumed) density.

DRAFT

**Quantification Workbook** **Ontario**

| 9 | Transportation | Transit-Oriented Development |
|---|---|---|

**Measure Summary**

Encourage development of compact, mixed-use, and transit-oriented development to improve the regional jobs-housing balance, especially on corridors served by high-ridership transit and Bus Rapid Transit (BRT) such as Holt Avenue.

**Implementation Actions**

- Require that development within the TOD corridor maintain and improve the mobility of people and vehicles along and across the corridor through safety considerations such as separated sidewalks and bike lanes or traffic-calming measures.
- Require development within the TOD corridor to protect and improve as needed transportation infrastructure, equitably considering the safety, comfort, and effectiveness of all transportation modes.
- Establish and maintain land use patterns in the TOD corridor that will attract and serve riders of public transit, such as higher-density mixed-use buildings near existing high-frequency transit stops.
- Revise land use and development standards in the TOD corridor as needed to remove any barriers to appropriate higher-density development.

**Quantification Calculations**

**Notes**

Assumption that transit mode share does not change over time, based on SCAG analysis of transit ridership https://scasca.org/sites/main/files/file-attachments/fr_scag_transit_ridership.pdf

TOD developments were estimated to identifiv the mixed-use and high density housing in the TOP ballotal forecast that are located near (within 0.5 miles) of a BRT stop (West Valley Corridor) or the Ontario Metrolink station.

Based on the zoning map (see link below), it was estimated that about 20% of the areas zoned as high density were in TOD areas, about 66% of areas zoned as Downtown Mixed Use were in TOD areas, and 100% of areas zoned as E Holt Mixed Use were in TOD areas (see map below). https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/Zoning_20200331.pdf

The number of residents in the TOD project area was estimated by multiplying the number of new projected housing units in 2030 and 2050 by the average household size. This population was divided by the City's total population size to calculate the share of the City's population land fo extension. citywide VMT that will be affected by the increase in transit use. By multiplying the percent change in GHG emissions from TODs by the TOD residents' share of citywide VMT, the result is the GHG emissions reduction associated with the TOD project.

Ratio of transit mode share for TOD area to that of surrounding city 4.9

Source: CAPCOA guidebook, 2021

**Example GHG Reduction Quantification**

The user reduces VMT by locating their project in a TOD location. Project site residents, employees, and visitors would have easy access to high quality public transit, thereby encouraging transit use and reducing single occupied vehicle travel. In this example, the project is within the San Francisco-Oakland Hayward CBSA with an existing transit mode share of 4.69 percent. Applying a 4.9 ratio of transit mode share for TOD areas with the median compared to existing transit mode share in the surrounding city yields 23 percent, which exceeds the 27 percent cap ($b = 0.27$). Therefore, 27 percent is used to deliver ($b = 0$). The existing library mode share is 84.96 percent ($c$). This can result reduce GHG emissions from project daily drive VMT (as compared to the same project in a non-TOD location) by 21 percent.

$$x = \frac{(1 - b)}{(a \times b) + c} = 21\%$$

Quantification Workbook Ontario

| 13 | Transportation | Active transportation networks |
|---|---|---|

**Measure Language**

Work with transit agencies, school districts, and employers to facilitate an interconnected transportation system that allows a shift in travel from private passenger vehicles to alternative modes, including public transit, ride sharing, car-sharing, bicycling, and walking.

**Implementation Actions**

- Encourage local school districts to develop school transit plans to substantially reduce automobile trips to, and congestion surrounding, schools.
- Increase pedestrian and bicycle facilities through implementation of the Active Transportation Master Plan, expanding the active transportation network to include 186.7 miles of bicycle facilities and pedestrian safety improvements to promote higher bicycle ridership and walking rates.
- Seek funding for active transportation infrastructure improvements.
- Implement scooter share pilot program in Ontario Ranch in 2023.

**GHG Reductions**

| | 2030 | 2050 |

| Total | 1,800 | 3,840 |

| Assumptions | 2030 | 2050 |
|---|---|---|
| Percentage of bicycle network completed by 2030 and 2050 | 25% | 75% |
| Share of community wide VMT on proposed bikeways | 9% | 27% |
| Percent of annual bike facility use in days per year | 91% | 91% |

**Activity Reductions**

| | 2030 | 2050 |
|---|---|---|
| Light Duty VMT | 6,475,430 | 15,187,870 |

| Performance Targets and Metrics | 2030 | 2050 |
|---|---|---|
| Miles of newly-installed bike lanes | 42 | 127 |
| Miles of newly-installed pedestrian improvements | 4 | 12 |
| Annual Scootershare miles traveled | 3,941,420 | 5,250,830 |

**Quantification Calculations**

**Notes**

The light duty VMT emissions factor is used for the GHG reduction calculations because it is assumed that passenger VMT activity is most likely to be offset by active transportation improvements

The pedestrian infrastrucutre improvements are estimated not by miles of sidewalks added (as is suggested by the CAPCOA methodology), but rather by the share of the citywide proposed Active Transportation Network that is not part of the proposed Bicycle Network. This share is intended to represent mileage of pedestrian enhancements in the absense of discrete mileage of pedestrian bicycle improvements (which include crosswalks, bulb outs, and traffing calming measures in addition to the sidewalk improvements that CAPCOA's method focuses on).

The timeline of installation of bicycle and pedestrian infrastrucutre improvements is estimated to be 25% completed by 2030 and 75% by 2050 (in the absense of actual implementation timelines).

Quantification Workbook Ontario

| 14 | Transportation | Vehicle idling |
|---|---|---|

**Measure Language**

Limit idling of heavy duty trucks. Support the South Coast Air Quality Management District (SCAMQD) and ARB anti-idling requirements and provide signage in key areas where idling that is not consistent with SCAMQD or ARB requirements might occur.

**Implementation Actions**

- Evaluate the feasibility of an idling ordinance that reduces the legally allowed idling time for heavy duty trucks (greater than 26,000 gross vehicle weight) to 3 minutes. California law currently limits idling time to 5 minutes. Ordinance must include a violation fee and enforcement mechanisms.
- Create a public awareness campaign to raise awareness about and increase compliance with idling ordinance.
- Install signage regarding new idling limit of 3 minutes in areas designated for industrial uses.

Quantification Workbook Ontario

| 15 | Transportation | Parking policy and event parking |
|---|---|---|

**Measure Language**

Adopt a comprehensive parking policy that encourages carpooling and the use of alternative transportation, including providing parking spaces for car-share vehicles at convenient locations accessible by public transportation.

**Implementation Actions**

- Establish a market pricing scheme for on-street parking in Downtown Ontario.
- Designate at least 5% of downtown parking spaces as loading and unloading areas for taxis, TNCs, buses, and shuttles.
- Designate a portion of parking revenues that can support City-led GHG reduction projects.
- Consider establishing policies and programs to reduce onsite parking demand and promote ride-sharing during events at the Ontario Convention Center and other event venues.

Quantification Calculations

**Notes**

Assumption
VMT reduced by parking fee measure is assumed to be passenger vehicles only (light-duty VMT)

Daily VMT in downtown areas (market priced areas) is assumed to be 15 percent lower than citywide daily VMT based on SB 743 guidelines for reduced VMT thresholds to achieve statewide climate targets.

Initial parking price was estimated to be $0.50 per hour (even though there is no market priced parking in Ontario). A number greater than zero was required to calculate percent change.

Proposed parking price was taken from the metered public parking prices in the City of Riverside for 2030. Parking prices are assumed to double by 2050.

| | 2030 | 2050 |
|---|---|---|
| Daily VMT in priced area (downtown) without measure | 1,028,898 | 1,370,717 |
| Daily VMT in community without measure | 6,839,315 | 9,138,115 |
| Ratio of Daily VMT in priced area to Daily VMT in community without measure | 15% | 15% |
| Initial parking price | $0.55 | $0.55 |
| Proposed parking price | $0.75 | $1.25 |
| Percent increase in parking price after measure | 36% | 150% |
| Default percentage of trips parking on the street | 75% | 75% |
| Elasticity of parking demand with respect to price | -0.4 | -0.4 |
| Ratio of VMT to vehicle trips | 1.000 | 1.000 |
| Percent reduction in VMT from market pricing of on-street parking | 2% | 7% |

"Fifteen percent reductions in VMT" is achievable at the project level in a variety of place types.[14]

Moreover, a fifteen percent reduction is consistent with SB 743's direction to OPR to select a threshold that will help the State achieve its climate goals. As described above, section 15064 states that the

[14] California Air Resources Board (May 2014) *First Update to the Climate Change Scoping Plan*, p. 48 (emphasis added).
[15] CAPCOA (2010) *Quantifying Greenhouse Gas Mitigation Measures*, p. 55, available at http://www.caleemod.com/wp-content/uploads/2010/11/CAPCOA-Quantification-Report-8-18-Final.pdf

SB 743 Technical Advisory
December 2018

criteria for determining significance must "promote the reduction in greenhouse gas emissions." In its document *California Air Resources Board 2017 Scoping Plan Identified VMT Reductions and Relationship to State Climate Goals*[1], CARB assesses VMT reduction per capita consistent with its evidence-based modeling scenario that would achieve State climate goals of 40 percent GHG emissions reduction from 1990 levels by 2030 and 80 percent GHG emissions reduction levels from 1990 by 2050. According to California Department of Finance population forecasts, CARB finds per capita light-duty vehicle travel would need to be approximately 16.8 percent lower than existing, and overall per capita vehicle travel would need to be approximately 14.8 percent lower than existing levels under that scenario. Below these levels, a project could be considered low VMT and would, on that metric, be consistent with 2017 Scoping Plan Update assumptions that achieve climate state climate goals.

CARB finds per capita vehicle travel would need to be kept below what State's policies and plans would achieve.

CARB's assessment is based on data in the 2017 Scoping Plan Update and 2016 Mobile Source Strategy. In these documents, CARB previously examined the relationship between VMT and the state's GHG emissions reduction targets. The Scoping Plan finds:

> "While the State can do more to accelerate and incentivize those local decisions, local actions that reduce VMT are also necessary to meet transportation sector specific goals and achieve the 2030 target under SB 32. Through developing the Scoping Plan, CARB staff is more convinced than ever that, in addition to achieving GHG reductions from cleaner fuels and vehicles, California must also reduce VMT. Stringent SB 375 GHG reduction targets will enable the State to make significant progress toward needed reductions, but alone will not provide the VMT growth reductions needed. there is a gap between what SB 375 can provide and what is needed to meet the State's 2030 and 2050 goals."[16]

| H | Ratio of VMT to vehicle trips | 1.0 | unitless | assumption |

Further explanation of key variables:

- (B and C) – Total daily VMT in both the priced area and the plan/community area should represent the expected total VMT generated by all land uses in that area, including office, residential, retail, schools, and other uses. The most appropriate source for this data is from a land-based demand forecasting model. An alternate method uses VMT per worker or VMT per resident as calculated for SB 743 compliance and screening purposes. The data should be adjusted to:
  - These variables for VMT by area are used to ensure that the percent GHG reduction from the priced area is at the same geographic scale as the vehicle travel in the plan/community. If the area priced is a business district and the analysis is limited to the business district, then the VMT would be equal (B=C).
- (D) = The proposed parking price can be presented in cost per minute, hour, or day, provided that the same units are used for variable (E).
- (E) = Remove this is used to calculate the percent change in parking price. If parking is free under existing conditions, (E) should be set to 0.00 ($), resulting in a percentage change of 100 percent. Alternatively, a small value can be used (e.g. $0.25) instead or set to equal the average metered parking price in nearby areas or districts.
- (F) = On-street parking represents only a portion of the total available parking supply. An estimate will typically range from 5 percent (in locations with ample parking garages available) to 75 percent (in locations where most parcels have little to no onsite parking for visitors). The user should provide a project-specific value within this range, by surveying the total on-street vs. off-street parking spaces within ½ mile of the study area.

Quantification Calculations

**Notes**

Assumptions:
According to the SB Regional GHG Reduction Tool, the methodology for quantifying a construction equipment idling ordinance assumes the following:
1) Current idling period for construction equipment is 5 minutes
2) Diesel fuel savings from reduced idling period is calculated by dividing the fuel consumed in gallons by the percent of total fuel used when idling (with ordinance)
3) Strategy assumes 100% compliance, which is unrealistic without enforcement, so an alternative scenario with 50% compliance was used instead
4) The GHG emissions reductions only apply to diesel-powered construction equipment
5) Heavy-duty emissions factor is estimated using EMFAC data on diesel-powered heavy duty vehicles for South Coast subarea in forecast years (2030 and 2050) (weighted average)

Quantification Workbook Ontario

| 18 | Waste | Methane capture at landfills |
|---|---|---|

**Measure Lanyaxxa**

Support efforts to reduce methane emissions from regional landfills.

**Implementation Actions**

* Encourage efforts to coordinate with regional landfills to install methane capture technology and associated monitoring systems with a goal of increasing the methane capture rate to the highest extent feasible.
* Encourage the use of captured methane for generation of electricity to offset fossil fuel energy use and reduce GHG emissions.

| GHG Reductions | 2030 | 2050 | Scenario 3 | Scenario 4 | Scenario 5 |

DRAFT

**Quantification Workbook** **Ontario**

| 19 | Waste | Waste diversion |
|---|---|---|

**Measure Language**

Exceed waste diversion goals recommended by AB 939 and CALGREEN by adopting a citywide diversion target of at least 75 percent of waste.

**Implementation Actions**

• Establish a source-reduction program that promotes options to rethink, refuse, reduce, reuse, regenerate, recycle, and recover materials by working with regional partners.
• Establish sharing, exchange, and reuse program(s), including fix-it clinics, swap events, second-hand markets, and shop local campaigns by working with community and regional partners.
• Promote awareness of life-cycle emissions of products through public outreach campaigns.
• Explore options to develop and adopt an ordinance to prohibit specific types of single-use or disposable plastics, particularly for use by restaurants, caterers, and other commercial kitchens.
• Engage with businesses using food packaging to determine barriers to switching to biodegradable or compostable food packaging and work to remove those barriers.
• Provide educational outreach programs to multi-family residents, multi-family property owners, single-family homeowners, and business owners to support composting programs.
• Increase the share of Ontario residents and business owners that have green compost carts or bins by working with waste haulers.
• Provide counter-top compost bins to residents of Ontario by working with regional partners and community based organizations.
• Work with food service facilities to understand barriers to composting and work to mitigate these concerns.
• Encourage local restaurants to partner with food rescue organizations to divert food that would otherwise be thrown away to non-profit organizations for distribution to those in need.
• Explore options to develop and adopt an ordinance requiring residences, businesses, and City facilities to practice Responsible Appliance Disposal for all decommissioned units, including refrigerators/freezers, window air-conditioning units, and dehumidifiers.

Waste-2: Waste Diversion
Author: Megha Kedia/Bal Last Updated: 10/18/19
Measure Description
Exceed the waste diversion goals recommended by Assembly Bill 939 and CALGREEN by adopting City-wide waste diversion goals of at least 75 percent of waste (CAPCOA 2010)
Summary of Methods
1. Determine current diversion rate and tons of waste landfilled for each city (assume rate from CALRecycle)
2. Determine new tons of waste diverted in 2020, 2030, 2045, and new tons landfilled
4. Calculate avoided methane emissions
Summary of Data Needs
Assumptions
1. The 2020 BAU diversion rate = the 2016 diversion rate (CALRecycle)
2. The new diversion rate is 100% in 2045 for all cities (0 ppd), Diversion goal can be altered in Cell C52
3. The cities increase their disposal (tons) linearly from the 2016 rate to 100%

Source: SB Regional GHG Reduction Tool

Assumption:
Waste diversion rate in 2016 is consistent through 2050 under BAU conditions

| | 2030 | 2050 |
|---|---|---|
| Waste diversion rate (BAU) | 50% | 50% |
| Total undiverted solid waste without measure (BAU) (tons) | 178,005.0 | 313,055.0 |
| Total undiverted solid waste with measure (tons) | 239793.4 | 477959.5 |
| Increase in solid waste diversion with measure (tons) | 61,788 | 164,905 |
| GHG emissions reduction from waste diversion measure (MTCO2e) | 14489.50 | 38668.19 |

Quantification Workbook Ontario

| 20 | Waste | tion and Demolition Waste Recovery O |
|---|---|---|

**Measure Language**

Increase the amount of waste recycled during construction and demolition of buildings.

**Implementation Actions**

• In compliance with AB 939 and CALGREEN, implement an ordinance requiring building projects to recycle or reuse at least 50% of unused or leftover building materials.
• Incentivize the recycling of construction debris by working with regional partners.
• Research and consider providing financial incentives to encourage the recycling of construction debris.
• Determine how certain construction materials may be donated and reused to help those in need by working with local community based organizations and construction companies.

DRAFT

Quantification Workbook | Ontario

| 21 | Water | Indoor water efficiency |
|---|---|---|

**Measure Language**

Encourage water-efficient retrofits of new and existing buildings by working with water providers and regional agencies.

**Implementation Actions**

- Explore establishing a reach code for water efficiency standards applicable to new residential and commercial development.
- Explore a target for reduced indoor and outdoor water use in existing buildings.
- Partner with Ontario Municipal Utilities Company to encourage water conservation at municipal facilities and in the community.
- Publicize available incentives and low-cost solutions to water-efficiency retrofits in existing buildings.
- Provide incentives for water-efficient appliances, plumbing fixtures, and irrigation systems to encourage improved water efficiency.

DRAFT

**Quantification Workbook** | **Ontario**

| 22 | Water | Water efficient landscapes and water recycling |
|---|---|---|

**Measure Statement**

Promote drought-tolerant and Xeriscape landscaping. Encourage increased use of reclaimed water for landscape irrigation, agricultural, and industrial use.

**Implementation Actions**

* Develop a native, drought-tolerant, and fire-resistant landscaping list and require new development or redevelopment to use this list in landscaping plans.
* Update the Ontario Code as appropriate, the Water-Efficient Landscaping Ordinance to reduce outdoor water use.
* Encourage water efficient landscaping practices through incentives and rebates for residential landscapes.
* Reduce municipal outdoor water use through a water monitoring and management system for all City's irrigation operations.

**Value Equivalents**

| | 2020 | 2030 | | | |

|---|---|---|
| Recycled water use (million gallons) | 4.200 | 6.140 |
| | | |
| | | |
| | | |

**Quantification Calculations**

**Notes**

**Assumptions**

1. Penetration rate is 50% of existing homes and businesses
2. BAU forecasted indoor water consumption data come from the GHG inventory workbook (based on an assumption that growth in water consumption is proportional to the increase in the service population)
3. NEW forecasted electricity use for indoor/outdoor is estimated based on the percent increase in water consumed
4. BAU recycled water is based on 2019 data from the Ontario UWMP
5. Recycled water forecasted demand is sourced from the Ontario UWMP (through 2035, with interpolation of 2050 use)
6. NEW forecasted electricity use for processing recycled water is estimated based on the water intensity in 2019 (kWh/MG)
7. Net electricity savings from recycled water use are estimated by subtracting BAU electricity use for indoor water from NEW electricity use for indoor water and multiplying the energy savings (kWh) by the electricity emission factor

| | 2020 | 2030 |
|---|---|---|
| Amount of water consumed from reclaimed sources (MG) | 2,887.0 | 2,420.0 |
| | | |
| Positive amount of indoor water used for recycling (2019-2021) | 23.8 | 23.8 |
| NEW amount of recycled water used (MG) | 2,887.0 | 2,420.0 |
| | | |
| BAU forecasted indoor water electricity use without measure (kWh) | 30,264,130 | 121,149,380 |
| NEW forecasted indoor water electricity use that accounts for reduced outside water (kWh) | 5,621,231 | 192,613,950 |
| Positive electricity used for processing of recycled water (kWh/MG) | 3,233,713 | 3,233,713 |
| NEW forecasted electricity used for processing of recycled water (kWh) | 4,063,208 | 8,622,538 |

Quantification Calculations

**Notes**

1. Manure management emissions is 225.88 kg CH4 per head (ARB, Ag Calcs), which is equivalent to 6.32 MT CO2e per head.
2. This measure is only applicable to jurisdictions with number of cattle more than 1,000 (2008 AB 32 Scoping Plan Appendix 2, Page I-64).
3. Percent of cows at large dairies subject to methane capture is 73% (2008 AB 32 Scoping Plan Appendix 2, Page I-64). Per SB 1383, this percentage may change after 2024.
4. New methane capture rate of installed systems is 86% (2008 AB 32 Scoping Plan, Appendix 2, Page I-64).

**Methane Capture at Large Dairies**

Author: Last Updated:

**Measure Description**

This measure promotes installation of methane digesters at large dairies to capture methane emissions from decomposing manure. This is a

**Summary of Methods**

1. Based on number of cattle at dairies in 2016, calculate number of cattle at dairies for the year 2030 and 2045 using the growth factor

**Summary of Data Needs**

Quantification Workbook Ontario

| 26 | Leadership | Climate change awareness and education |
|---|---|---|

**Measure Language**

Promote climate change awareness and GHG reduction community-wide, through a variety of mechanisms, including through support of climate change education in schools or community colleges.

**Implementation Actions**

• Promote educational resources to students and parents each year and encourage community educators to incorporate clean energy and climate change discussions into their curriculum, by partnering with CSU San Bernardino and school districts.
• Use City newsletters to spotlight community members, including K-12 teachers and students, who are working on climate change or sustainability and who are making a difference in our community.
• Increase energy educational resources in the Ontario School District and Ontario-Montclair School District by working with the San Bernardino County Office of Education.
• Work with non-profits and community-based organizations to develop a list of green volunteer opportunities and skills trainings for high school students, such as community gardening, tree planting, bicycle advocacy, food recovery, and composting.
• Promote and support opportunities for Ontario community members to test appliances and equipment that support increased energy and water conservation and transitions to all-electric appliances.

Quantification Workbook Ontario

| 27 | Carbon sequestration | Carbon sequestration |
|---|---|---|

**Measure Language**

Establish a City-wide carbon sequestration project and sequestration goal of 5,000 MT CO2 per year.

**Implementation Actions**

• Organize citywide tree planting volunteer days, prioritizing public schools and neighborhoods in environmental justice areas, as an extension of the City's urban forestry program.
• Conduct public workshops to educate community members about the ecological, social, and economic benefits of trees and provide basic training in tree planting and maintenance.
• Seek grants in partnership with community-based organizations to fund the carbon sequestration project.
• Publicize the carbon sequestration project to raise awareness about the project and recruit volunteers.
• Explore opportunities to establish a carbon offset program for development projects, ensuring that offset activities occur in California, and that they occur locally or regionally to the greatest extent possible. GHG reductions from carbon offsets shall be real, permanent, quantifiable, verifiable, and enforceable.

| | 4 | Green roofs | Promote and incentivize residents and business owners to install green roofs to conserve energy and reduce surface water runoff. | • Provide incentives for installation of green roofs in new and existing buildings. • Conduct outreach to raise awareness about and increase participation in green roof rebate program. | Target area of residential green roofs installed in Ontario (square feet) | 25000 | 50000 | Total installed square footage of green roofs in Ontario | 75,000 | 150,000 | 0 | 0 | 0.0000 | 0.0000 |
| | | | | | Target area of commercial green roofs installed in Ontario (square feet) | 50000 | 100000 | | | | | | | |
| | 5 | Urban cooling | Maintain and expand the City's existing tree canopy, with a goal of planting 500 trees annually through 2050, and promote the use of pervious concrete and cool pavement for pavement projects. | • Maintain and expand an urban forestry program to manage citywide tree planting, track citywide tree inventory and canopy cover, and monitor tree health to maintain and expand the City's existing tree canopy. • Identify priority areas for tree planting, focusing on environmental justice communities, to mitigate the heat island effect in underserved neighborhoods. • Ensure that new and retrofitted large hardscaped areas, such as parking lots, incorporate trees and other green infrastructure appropriate for current and future climate conditions. • Explore grant funding opportunities for urban forestry, pervious concrete, and cool pavement. | Total number of trees planted with urban forestry program | 4,000 | 10,000 | Number of trees planted | 4,000 | 10,000 | 5,610 | 12,730 | 0.0140 | 0.0180 |
| | 6 | Energy efficiency retrofits for low-income households | Promote and incentivize voluntary energy efficiency retrofits of homes to reduce natural gas and electricity usage, with the goal of retrofitting 9,000 low-income homes by 2050. Partner with community services agencies to fund energy efficiency projects, including heating, ventilation, air conditioning, indoor lighting, water heating equipment, insulation, and weatherization for low-income residents. | • Assist San Bernardino County staff and other partners with their targeted outreach campaigns, including hosting workshops and promoting programs through City communication channels to increase awareness of the benefits of weatherization among low-income households. • Expand and better integrate funding and support for existing programs that support weatherization and increase energy efficiency in low-income households, including through partnerships with SoCalREN and San Bernardino County. • Engage with tenants and owners of multi-family homes and promote the SoCalREN multi-family program. | Penetration rate for low-income residential energy efficiency retrofits | 30% | 60% | Number of retrofitted low-income homes | 4,630 | 9,270 | 940 | 1,440 | 0.0023 | 0.0020 |
| | | | | | Anticipated savings in electricity energy efficiency from retrofit activities | 20% | 20% | | | | | | | |
| | | | | | Anticipated savings in natural gas energy efficiency from retrofit activities | 32% | 32% | | | | | | | |
| | | | | | Percent of existing households in Ontario | 27% | 27% | | | | | | | |
| | 7 | Energy efficiency retrofits | Promote and incentivize voluntary energy efficiency retrofits to reduce in natural gas and electricity usage. Partner with regional agencies to expand access to existing energy efficiency and conservation opportunities, incentives, and technical assistance for residents and businesses. | • Assist partners with their outreach campaigns, hosting workshops, promoting programs through City communication channels, promoting programs through interactions with homeowners and contractors, and sharing permitting data to inform targeted outreach. • Establish a webpage on the City's website that summarizes permitting requirements, available rebates, and other information about energy efficiency retrofits to ensure that information is easily available to the public. • Support SoCal and San Bernardino County efforts to conduct outreach and education with local contractors to ensure they are updated on local code requirements and energy-efficient appliances and devices. • Encourage owners of existing commercial, industrial, and residential buildings 10,000 square feet or larger to prepare an annual energy and water benchmarking report and submit it to the City, to help community awareness of building performance and identify opportunities for energy- and water-efficiency retrofits. • If Ontario is not on track to meet GHG reduction targets by 2025, develop and implement additional energy efficiency standards for existing buildings. • Research, consider, and implement an incentive program to encourage community members to reduce energy consumption. | Penetration rate for residential energy efficiency retrofits | 15% | 30% | Number of retrofitted homes (excluding low income households) | 4,920 | 9,850 | 11,570 | 15,600 | 0.0288 | 0.0221 |
| | | | | | Anticipated savings from residential energy efficiency retrofits | 25% | 25% | Square footage of retrofitted nonresidential space | 7,525,540 | 30,102,170 | | | | |
| | | | | | Penetration rate for nonresidential energy | 5% | 20% | | | | | | | |
| | | | | | Anticipated savings from nonresidential energy efficiency retrofits | 40% | 40% | | | | | | | |
| | | | | | Target penetration rate for residential LED | 75% | 95% | | | | | | | |
| | | | | | Target penetration rate for nonresidential | 60% | 80% | | | | | | | |
| | | | | | Percent electricity savings per LED light | 75% | 75% | | | | | | | |
| Transportation | 8 | Smart Growth and Infill | Encourage revitalization of neighborhoods through higher-density, mixed-use, infill development and creative reuse of under-utilized sites within the urban core. | • Identify opportunities to increase residential density in and around the urban core. • Examine the development review process and other zoning approval processes to reduce or eliminate regulations that increase costs for higher density development. • Regularly identify underutilized parcels in existing infill areas to support increased housing and business opportunities consistent with the adopted Housing Element. | Not quantifiable. There are no assumptions | | | Not quantifiable. There are no performance standards | | | Not quantifiable. There are no GHG reductions | | | |
| | 9 | Transit-Oriented Development | Encourage development of compact, mixed-use, and transit oriented development to improve the regional jobs-housing balance, especially on corridors served by high-ridership transit and Bus Rapid Transit (BRT) such as Holt Avenue. | • Require that development within the TOD corridor maintains and improves the mobility of people and vehicles along and across the corridor through safety considerations such as separated sidewalks and bike lanes or traffic-calming measures. • Require development within the TOD corridor to protect and improve as needed transportation infrastructure, equitably considering the safety, comfort, and effectiveness of all transportation modes. • Establish and maintain land use patterns in the TOD corridor that will attract and serve riders of public transit, such as higher-density mixed-use buildings near existing high-frequency transit stops. • Revise land use and development standards in the TOD corridor as needed to remove any barriers to appropriate higher-density development. | New TOD households' share of new citywide VMT | 3% | 5% | New housing units in TOD areas | 410 | 3,200 | 330 | 1,440 | 0.0008 | 0.0020 |
| | 10 | Increase Transportation Ridership | Ensure a reliable and responsive transit system with dedicated and secure funding and resources to support increased ridership. | • Collaborate with LA Metro, Metrolink, and Omnitrans to implement "Smart Bus" technology, Global Positioning Systems (GPS), and electronic displays at all transit stops to provide customers with "real-time" arrival and departure time information. • Support efforts to establish dedicated bus lanes. • Collaborate with regional transit operators on programs to increase use of the City's public transportation system. To the extent feasible, support shorter transit passenger travel time through reduced headways and increased speed. Support efforts by regional transit operators to reduce the average fleet travel time by 5 minutes. • In collaboration with transit agencies, support new transit routes, increased transit frequency and operating hours, and other improvements to transit quality. • Support citywide outreach campaigns by transit agencies to promote the use of public transit, including Fare-Free days to encourage mode shifts . • Coordinate with large regional employers to establish a shuttle service that connects transit centers to employment centers during commuting hours • Encourage employers to provide ridership programs, public transit passes, and offer telecommuting to employees. | Target participation rate in Commute Trip Reduction Program | 4% | 4% | Number of employees participating in commute trip reduction | 6,780 | 11,840 | 27,980 | 31,450 | 0.0697 | 0.0445 |
| | | | | | Percent of employees eligible for Commute Trip Reduction Program or | 80% | 80% | Annual West Valley Connector ridership | 25,927,840 | 25,927,840 | | | | |
| | | | | | Target participation rate in ridesharing program in suburban areas | 4% | 4% | | | | | | | |
| | 11 | Traffic signal synchronization and roadway management | Implement traffic and roadway management strategies to improve mobility and efficiency and reduce associated emissions. | • Work with the Traffic Management Center to develop an annual signal synchronization program for identified priority corridors to understand changing traffic conditions, including peak hour conditions and traffic congestion patterns, update signal timing to match the specific needs of study corridors, and report on progress in travel time, average speed, and delay to measure effectiveness of the signal synchronization project. • Work with the Traffic Management Center to ensure that signal timing is updated on a regular basis to comply with latest State requirements and accommodate pedestrian and bicycle crossing time for roadways with crosswalks and/or bicycle facilities. | Not quantifiable. There are no assumptions | | | Not quantifiable. There are no performance standards | | | Not quantifiable. There are no GHG reductions | | | |
| | 12 | Community vehicle electrification | Promote and incentivize the adoption of electric vehicles (EVs) citywide, including light-duty and heavy-duty vehicles, for municipal, commercial, and residential uses. | • Develop and implement a plan to transition the City's municipal fleet to low-and zero -emission vehicles, to the greatest extent feasible . • Collaborate with Omnitrans to encourage investment in electric buses. • Encourage the use of electric vehicles by increasing access to availability of public EV charging stations. • Work with SCAQMD to participate in CARB's Proposition 1B - Goods Movement Emission Reduction Program to incentivize investment in cleaner trucks and electrification infrastructure to reduce air pollution emissions from freight activity beyond enforceable requirements. • Incentivize the purchase of electric vehicles by providing EV rebates for Ontario residents and/or facilitating awareness rebates available from public agencies. • Provide information about EV rebate programs and other incentives through multiple communication channels to raise awareness about and increase purchases of EVs among residents and business owners, including creating a dedicated webpage on the City website with information about purchasing EVs and installing EV chargers. | Penetration rate for electrification of municipal fleet | 0.2 | 0.4 | EVs in municipal fleet | 130 | 260 | 62,880 | 465,140 | 0.1565 | 0.6584 |
| | | | | | Estimated percentage of municipal vehicle fleet that is light-duty vehicles | 0.8 | 0.8 | Light-duty EVs registered in Ontario | 24,510 | 173,400 | | | | |
| | | | | | Estimated percentage of municipal vehicle fleet that is heavy-duty vehicles | 0.2 | 0.2 | Heavy-duty EVs registered in Ontario | 1,490 | 14,450 | | | | |
| | | | | | Target for eVMT share of community wide | 0.15 | 0.6 | | | | | | | |
| | | | | | Target for eVMT share of community wide | 0.1 | 0.5 | | | | | | | |
| | 13 | Active transportation networks | Work with transit agencies, school districts, and employers to facilitate an interconnected transportation system that allows a shift in travel from private passenger vehicles to alternative modes, including public transit, ride sharing, car-sharing, bicycling, and walking. | • Encourage local school districts to develop school transit plans to substantially reduce automobile trips to, and congestion surrounding, schools. • Increase pedestrian and bicycle facilities through implementation of the Active Transportation Master Plan, expanding the active transportation network to include 186.7 miles of bicycle facilities and pedestrian safety improvements to promote higher bicycle ridership and walking rates. • Seek funding for active transportation infrastructure improvements. • Implement scooter share pilot program in Ontario Ranch in 2023. | Percentage of bicycle network completed by 2030 and 2050 | 25% | 75% | Miles of newly-installed bike lanes | 42 | 127 | 1,800 | 3,840 | 0.0045 | 0.0054 |
| | | | | | Share of community wide VMT on proposed bikeways | 9% | 27% | Miles of newly-installed pedestrian | 4 | 12 | | | | |
| | | | | | Percent of annual bike facility use in days per year | 91% | 91% | Annual Scootershare miles traveled | 3,941,420 | 5,250,830 | | | | |
| | 14 | Vehicle idling | Limit idling of heavy duty trucks. Support the South Coast Air Quality Management District (SCAMQD) and ARB anti-idling requirements and provide signage in key areas where idling that is not consistent with SCAMQD or ARB requirements might occur. | • Evaluate the feasibility of an idling ordinance that reduces the legally allowed idling time for heavy duty trucks (greater than 26,000 gross vehicle weight) to 3 minutes. California law currently limits idling time to 5 minutes. Ordinance must include a violation fee and enforcement mechanisms. • Create a public awareness campaign to raise awareness about and increase compliance with idling ordinance. • Install signage regarding new idling limit of 3 minutes in areas designated for industrial uses. | Compliance rate with idling ordinance | 0.5 | 0.5 | There are no performance metrics associated with this strategy | | | 1,950 | 1,780 | 0.0049 | 0.0025 |
| | | | | | Reduction in idling time with ordinance | 40% | 40% | | | | | | | |
| | | | | | Percent of total fuel used when idling | 6% | 6% | | | | | | | |
| | | | | | Reduction in idling time with ordinance | 40% | 40% | | | | | | | |
| | 15 | Parking policy and event parking | Adopt a comprehensive parking policy that encourages carpooling and the use of alternative transportation, including providing parking spaces for car-share vehicles at convenient locations accessible by public transportation. | • Establish a market pricing scheme for on-street parking in Downtown Ontario. • Designate at least 5% of downtown parking spaces as loading and unloading areas for taxis, TNCs, buses, and shuttles. • Designate a portion of parking revenues that can support City-led GHG reduction projects. • Consider establishing policies and programs to reduce onsite parking demand and promote ride-sharing during events at the Ontario Convention Center and other event venues. | Current parking price | 50% | 50% | Future parking price | $0.75 | $1.25 | 2,230 | 8,110 | 0.0056 | 0.0115 |
| | | | | | Default percentage of trips parking on the | 75% | 75% | | | | | | | |
| Offroad | 16 | Electrification of construction and landscaping equipment | Promote and incentivize the transition to electric construction and landscaping equipment. | • Support state and regional efforts to replace diesel-powered construction and landscaping equipment with electric equipment. • Conduct targeted outreach to local construction and landscaping companies to raise awareness about and increase participation in available electric equipment rebate programs. | Penetration rate of electrification of conventional construction equipment | 20% | 50% | Pieces of electrified construction equipment | 320 | 1,360 | 4,810 | 26,020 | 0.0120 | 0.0368 |
| | | | | | Penetration rate of electrification of conventional landscaping equipment | 20% | 50% | Pieces of electrified landscaping | 1,070 | 4,120 | | | | |
| | 17 | Idling ordinance for construction equipment | Limit idling of heavy-duty off-road construction equipment to reduce air pollution and GHG emissions from construction activity. | • Evaluate the feasibility of an equipment idling ordinance that reduces the legally allowed idling time for heavy duty construction equipment to 3 minutes. Ordinance must include a violation fee and enforcement mechanisms. • Conduct targeted outreach to local construction companies to raise awareness about and increase compliance with the equipment idling ordinance. | Reduction in idling time with ordinance | 40% | 40% | There are no performance metrics associated with this strategy | | | 40 | 100 | 0.0001 | 0.0001 |
| | | | | | Compliance rate with idling ordinance | 50% | 50% | | | | | | | |
| Waste | 18 | Methane capture at landfills | Support efforts to reduce methane emissions from regional landfills. | • Encourage efforts to coordinate with regional landfills to install methane capture technology and associated monitoring systems with a goal of increasing the methane capture rate to the highest extent feasible. • Encourage the use of captured methane for generation of electricity to offset fossil fuel energy use and reduce GHG emissions. | Current methane capture rate | 75% | 75% | Target methane capture rate | 80% | 85% | 22,410 | 57,370 | 0.0558 | 0.0812 |
| | 19 | Waste diversion | Exceed waste diversion goals recommended by AB 939 and CALGREEN by adopting a citywide diversion target of at least 75 percent of waste. | • Establish a source-reduction program that promotes options to rethink, refuse, reduce, reuse, regenerate, recycle, and recover materials by working with regional partners. • Establish sharing, exchange, and reuse program(s), including fix-it clinics, swap events, second-hand markets, and shop local campaigns by working with community and regional partners. • Promote awareness of life-cycle emissions of products through public outreach campaigns. • Explore options to develop and adopt an ordinance to prohibit specific types of single-use or disposable plastics, particularly for use by restaurants, caterers, and other commercial kitchens. • Engage with businesses using food packaging to determine barriers to switching to biodegradable or compostable food packaging and work to remove those barriers. • Provide educational outreach programs to multi-family residents, multi-family property owners, single-family homeowners, and business owners to support composting programs. • Increase the share of Ontario residents and business owners that have green compost carts or bins by working with waste haulers. • Provide counter-top compost bins to residents of Ontario by working with regional partners and community based organizations. • Work with food service facilities to understand barriers to composting and work to mitigate these concerns. • Encourage local restaurants to partner with food rescue organizations to divert food that would otherwise be thrown away | Waste diversion target (AB 939) | 75% | 85% | Estimated tons of solid waste diverted | 267,010 | 532,190 | 14,490 | 38,670 | 0.0361 | 0.0547 |
| | 20 | Construction and Demolition Waste Recovery Ordinance | Increase the amount of waste recycled during construction and demolition of buildings. | • In compliance with AB 939 and CALGREEN, implement an ordinance requiring building projects to recycle or reuse at least 50% of unused or leftover building materials. • Incentivize the recycling of construction debris by working with regional partners. • Research and consider providing financial incentives to encourage the recycling of construction debris. • Determine how certain construction materials may be donated and reused to help those in need by working with local community based organizations and construction companies. | Not quantifiable. There are no assumptions | | | Not quantifiable. There are no performance standards | | | Not quantifiable. There are no GHG reductions | | | |
| Water | 21 | Indoor water efficiency | Encourage water-efficient retrofits of new and existing buildings by working with water providers and regional agencies. | • Explore establishing a reach code for water efficiency standards applicable to new residential and commercial development. • Explore a target for reduced indoor and outdoor water use in existing buildings. • Partner with Ontario Municipal Utilities Company to encourage water conservation at municipal facilities and in the community. • Publicize available incentives and low-cost solutions to water-efficiency retrofits in existing buildings. • Provide incentives for water-efficient appliances, plumbing fixtures, and irrigation systems to encourage improved water efficiency. | Average reduction in indoor water use in new buildings | 20% | 40% | Total community water use (million gallons, excluding recycled water) | 10,770 | 18,630 | 4,580 | 2,540 | 0.0114 | 0.0036 |
| | | | | | Average reduction in outdoor water use in new buildings | 40% | 60% | Total community wastewater generation (million gallons) | 3,880 | 6,450 | | | | |
| | | | | | Average reduction in water use in existing | 25% | 50% | | | | | | | |
| | 22 | Water efficient landscapes and water recycling | Promote drought-tolerant and firewise landscaping. Encourage increased use of reclaimed water for landscape irrigation, agricultural, and industrial use. | • Develop a native, drought-tolerant, and fire-resistant landscaping list and require new development or redevelopment to use this list in landscaping plans. • Enforce, and update as appropriate, the Water-Efficient Landscaping Ordinance to reduce outdoor water use. • Encourage water-efficient landscaping practices through incentives and rebates for residential landscapes. • Reduce municipal outdoor water use through a water monitoring and management system for all City's irrigation | Percent increase in recycled water use | 72% | 145% | Recycled water use (million gallons) | 4,390 | 6,240 | 3,400 | 0 | 0.0085 | 0.0000 |
| | 23 | Water system and wastewater operations efficiency | Maximize efficiency at drinking water treatment, pumping, and distribution facilities, including development of off-peak demand schedules for heavy commercial and industrial users. | • Work with the Inland Empire Utilities Agency (IEUA), the local wastewater treatment provider, to upgrade and replace wastewater treatment and pumping equipment with more energy efficient equipment as feasible. • Assess and upgrade City-owned water pumping and treatment equipment, as needed, to increase energy efficiency and save energy costs. | Efficiency improvement in water treatment and distribution system | 10% | 25% | Electricity use of water treatment and distribution system (kWh) | 56,533,450 | 66,745,850 | 150 | 0 | 0.0004 | 0.0000 |
| Wastewater | 25 | Methane capture for wastewater treatment | Work with Inland Empire Utilities Agency (IEUA), the local wastewater treatment provider, to increase methane capture rate. | • Work with IEUA to explore the possibility of generating electricity from captured methane to power various facilities and reduce operating costs. | Dairies using manure management systems with methane capture | 50% | 100% | Heads of livestock on dairies with manure capture | 3,520 | 0 | 3,160 | 0 | 0.0079 | 0.0000 |
| | | | | | Methane capture rate of installed systems | 86% | 86% | | | | | | | |
| | 24 | Methane capture for dairy operations | Encourage and incentivize local dairy operations to reduce methane emissions through methane capture technology. | • To comply with SB 1383, work with local dairies to encourage installation of methane digesters to capture methane emissions from decomposing manure. | IEUA wastewater methane capture rate | 70% | 85% | Methane capture rate at IEUA facilities | 70% | 85% | 960 | 2,280 | 0.0024 | 0.0032 |
| Leadership | 26 | Climate change awareness and education | Promote climate change awareness and GHG reduction community-wide, through a variety of mechanisms, including through support of climate change education in schools or community colleges. | • Promote educational resources to students and parents each year and encourage community educators to incorporate clean energy and climate change discussions into their curriculum, by partnering with CSU San Bernardino and school districts. • Use City newsletters to spotlight community members, including K-12 teachers and students, who are working on climate change or sustainability and who are making a difference in our community. • Increase energy educational resources in the Ontario School District and Ontario-Montclair School District by working with the San Bernardino County Office of Education. • Work with non-profits and community-based organizations to develop a list of green volunteer opportunities and skills trainings for high school students, such as community gardening, tree planting, bicycle advocacy, food recovery, and composting. • Promote and support opportunities for Ontario community members to test appliances and equipment that support increased energy and water conservation and transitions to all-electric appliances. | Not quantifiable. There are no assumptions | | | Not quantifiable. There are no performance standards | | | Not quantifiable. There are no GHG reductions | | | |
| | 27 | Carbon sequestration | Establish a City-wide carbon sequestration project and sequestration goal of 5,000 MT $CO_2$ per year. | • Organize citywide tree planting volunteer days, prioritizing public schools and neighborhoods in environmental justice areas, as an extension of the City's urban forestry program. • Conduct public workshops to educate community members about the ecological, social, and economic benefits of trees and provide basic training in tree planting and maintenance. • Seek grants in partnership with community-based organizations to fund the carbon sequestration project. • Publicize the carbon sequestration project to raise awareness about the project and recruit volunteers. • Explore opportunities to establish a carbon offset program for development projects, ensuring that offset activities occur in California, and that they occur locally or regionally to the greatest extent possible. GHG reductions from carbon offsets shall be real, permanent, quantifiable, verifiable, and enforceable. | Not quantifiable. There are no assumptions | | | Not quantifiable. There are no performance standards | | | Not quantifiable. There are no GHG reductions | | | |

Vista Verde Apartments (all-electric multifamily development)
Number of units 101

The City of Ontario's $35 million Transformative Climate Communities grant is focused on its historic downtown core and builds upon six years of planning and engagement work to revitalize this neighborhood. Vista Verde provides 101 high-quality affordable apartment homes for families who earn between 30 and 60 percent of the area median income in Ontario, CA. This transit-oriented community is funded in part by California's Transformative Climate Communities program and is an integral part of the City's plan to demonstrate a sustainable community. Vista Verde is one of the first all-electric, zero net energy communities, designed and constructed using cost-efficient technologies and innovative approaches to prepare for a world of bike- and pedestrian-friendly communities that encourage healthier lifestyles and reduce pollution. This sustainable development has a low carbon footprint, improving the quality of life for the community as a whole.

PROJECT SPECIFICATIONS

TOTAL UNITS (101 UNITS)
- 69 2-Bedroom
- 33 3-Bedroom
- 1 Manager's Unit

ROLE
- Owner
- General Contractor
- Developer

FINANCING SOURCES
- Affordable Housing and Sustainable Communities Loan

ONSITE AMENITIES
- Community Center/Computer Center
- Laundry Facilities

| Average one-way vehicle trip length | 11.7 | 11.7 |
| | | |
| Percent reduction in VMT from displaced vehicle trips | -3.11155E-05 | -3.11155E-05 |
| VMT offset by bike facility use | 74079.85 | 98684.99 |

T-18-A. Construct or Improve Bike Facility — TRANSPORTATION | 130

### GHG Reduction Formula

$$A = -B \times \frac{\frac{F}{T} \times (C + D) \times E \times G}{H}$$

### GHG Calculation Variables

| ID | Variable | Value | Unit | Source |
|---|---|---|---|---|
| Output | | | | |
| A | Percent reduction in GHG emissions from displaced vehicles on roadway parallel to bicycle facility | 0–0.8 | % | calculated |
| User Inputs | | | | |
| B | Percent of plan/community VMT on parallel roadway | 0–100 | % | user input |
| C | Active transportation adjustment factor | Table T-18.1 | unitless | CARB 2020 |
| D | Credits for key destinations near project | Table T-18.2 | unitless | CARB 2020 |
| E | Growth factor adjustment for facility type | Table T-18.3 | unitless | CARB 2020 |
| Constants, Assumptions, and Available Defaults | | | | |
| F | Annual days of use of new facility | Table T-18.4 | days per year | NOAA 2017 |
| G | Existing regional average one-way bicycle trip length | Table T-9.1 | miles per trip | FHWA 2017 |
| H | Existing regional average one-way vehicle trip length | Table T-9.1 | miles per trip | FHWA 2017 |
| I | Days per year | 365 | days per year | standard |

Further explanation of key variables:

- (B) – The percent of total plan/community VMT within the roadway parallel to the bike facility should represent the expected total VMT generated by all land use in that area, including office, residences, retail, schools, and other uses. The most appropriate source for this data is from a local travel demand forecasting model. An alternate method uses VMT per worker or VMT per resident as calculated for SB 743 compliance and screening purposes multiplied by the population in the area.
- (C, D, and E) – The active transportation adjustment factor, key destination credit, and growth factor adjustment should be looked up by the user in Tables T-18.1 through T-18.3 in Appendix C. The active transport adjustment factor is based on the existing annual average daily traffic (AADT) of the facility, length of the proposed bike facility, and the city population. The key destination credit is based on the number of key destinations within 0.5-mile of the facility. The growth factor is based on the type of proposed bicycle facility.
- (F) – The annual days of use for the new facility should be looked up by users in Table T-18.4 based on the county their project is located in. The days of use is based on the number of days per year where there is no rainfall (i.e., <=0.1 inches) (NOAA 2017).

Active Transportation Adjustment factor 0.0038

Table T-18.2. Key Destination Credits[1,2]

| Number of Key Destinations[3] | Credit within ½ Mile of Facility | Credit Within ¼ Mile of Facility |
|---|---|---|
| 0 to 2 | 0.0000 | 0.000 |
| 3 | 0.0005 | 0.001 |
| 4 to 6 | 0.0010 | 0.002 |
| ≥ 7 | 0.0015 | 0.003 |

Source: California Air Resources Board. 2020. Quantification Methodology for the California Natural Resource Agency's Urban Greening Grant Program. March. Available: https://ww2.arb.ca.gov/sites/default/files/classic/cc/capandtrade/auctionproceeds/crna_ug_finalqm.pdf. Accessed: January 2021.

≥ = greater than or equal to

[1] The largest value from either credit column that matches the project activities should be used. For example, if there are 3 activity centers within ½ mile of the facility and 7 activity centers within ¼ mile of the facility, the correct value to use is 0.0015.

[2] These metrics should be evaluated for the project location site and surrounding area which can extend a distance not to exceed a ½ mile. If a shopping center has multiple activity centers, each of those activity centers would count individually. For example, if a bank, grocery store, and post office are all located in a shopping center, they would be input as three activity centers for the purposes of this quantification methodology.

[3] Key destination examples: banks, post offices, grocery stores, medical centers, pharmacies, office parks, places of worship, public libraries, schools, universities, colleges, and light rail stations (park & ride).

Key destination credit 0.001

Table T-18.4. Bike Facility Default Days of Use per Year by County

| County | Days | County | Days | County | Days | County | Days |
|---|---|---|---|---|---|---|---|
| Alameda | 302 | Kern | 333 | Placer | 291 | San Joaquin | 314 |
| Alpine | 291 | Kings | 328 | Plumas | 292 | San Luis Obispo | 321 |
| Amador | 302 | Lake | 298 | Riverside | 337 | San Mateo | 295 |

Bike Facility Default Days of Use 333

Table T-18.3. Growth Factor Adjustment

| Facility Type | Growth Factor Adjustment |
|---|---|
| New Class I bike path[1] or Class IV bikeway[2] | 1.54 |
| New Class II bike lane[3] | 1.0 |
| Conversion from Class II to IV | 0.54 |

Source: California Air Resources Board. 2020. Quantification Methodology for the Strategic Growth Council's Affordable Housing and Sustainable Communities Program. September. Available: https://ww2.arb.ca.gov/sites/default/files/classic/cc/capandtrade/auctionproceeds/sgc_ahsc_qm_022521.pdf. Accessed: March 2021.

[1] Class I bike paths are physically separated from motor vehicle traffic.

[2] Class IV bikeways are protected on-street bikeways, also called cycle tracks.

[3] Class II bike lanes are striped bicycle lanes that provide exclusive use to bicycles on a roadway.

Growth factor adjustment 1

Table T-9.1. Average One-Way Bicycle and Vehicle Trip Length by California Core-Based Statistical Area

**Additional Notes**

2. Has Ontario converted any streetlights to LED bulbs? If so, how many? Every streetlight in the City has been converted to LED. Approximately 12,500 lights total

| | | | |
|---|---|---|---|
| Number of streetlights | 12,500 | Percent retrofitted since 2019 | 0.65 |
| Average power rating of existing streetlight (W) | 150 | | |
| Average power rating of proposed streetlight (W) | 80 | | |
| Hours of operation per day | 12 | | |
| Number of days of operation per year | 365 | | |

E-6. Require Higher Efficacy Public Street and Area Lighting ENERGY | 227

## GHG Reduction Formula

$$A = \frac{B_1 \times C_1 - B_2 \times C_2}{B_1 \times C_1}$$

## GHG Calculation Variables

| ID | Variable | Value | Unit | Source |
|---|---|---|---|---|
| Output | | | | |
| A | Percent reduction in GHG emissions from outdoor street and area lighting | [ ] | % | calculated |
| User Inputs | | | | |
| $B_1$ | Number of existing lighting heads to be replaced | [ ] | lighting heads | user input |
| $B_2$ | Number of proposed new lighting heads | [ ] | lighting heads | user input |
| $C_1$ | Average power rating of existing lamp type | [ ] | watts | user input |
| $C_2$ | Average power rating of proposed lamp type | [ ] | watts | user input |
| Constants, Assumptions, and Available Defaults | | | | |
| | None | | | |

Further explanation of key variables:

- ($B_1$ and $B_2$) – The number of existing and proposed lighting heads are required in the GHG reduction formula in case the new type of lamp results in less heads needing to be installed.
- ($C_1$ and $C_2$) – Lumens are the measure of the amount of light perceived by the human eye. Luminous efficacy is the amount of visible light emitted for a given amount of power. This measure assumes that the replacement lighting would provide the same number of lumens per area as the existing lighting and that only the power rating would change. See Table E-6.1 in Appendix C for a range of typical power ratings and efficacies of various outdoor lamp types (CLTC 2015). These values are for reference only for providing the user a list of existing and replacement lighting options. The user should input project-specific values in the GHG reduction formula, if available.

E-6. Require Higher Efficacy Public Street and Area Lighting ENERGY | 228

$$A = \frac{100 \text{ heads} \times 120 \text{ watts} - 100 \text{ heads} \times 80 \text{ watts}}{100 \text{ heads} \times 120 \text{ watts}} = -33.3\%$$

## Quantified Co-Benefits

*Energy and Fuel Savings*

The percent reduction in electricity achieved by the measure is the same as the percent reduction in GHG emissions (A).

**Notes**

Assumptions:
All trees planted within 0-19 feet and of buildings that were built post-1980 with heat and A/C.
25% of trees were planted N of buildings, 25% were planted S, 25% planted E, and 25% W
Four species were planted at the same rate (250 trees of each) for a total of 1,000 trees
Four species: Oak, Northern red (Quercus rubra), Sycamore, American (Platanus occidentalis),
Tree, Chinese flame (Koelreuteria bipinnata), Tree, Tulip (Liriodendron tulipifera)
Trees are in excellent condition and planted in full sun.
10% mortality rate during project period (2020-3050)
Carbon sequestration rate is constant over time
(33% of carbon sequestered between 2020-2030, 66% of carbon sequestered between 2030-2050)

| | 2030 | 2050 |

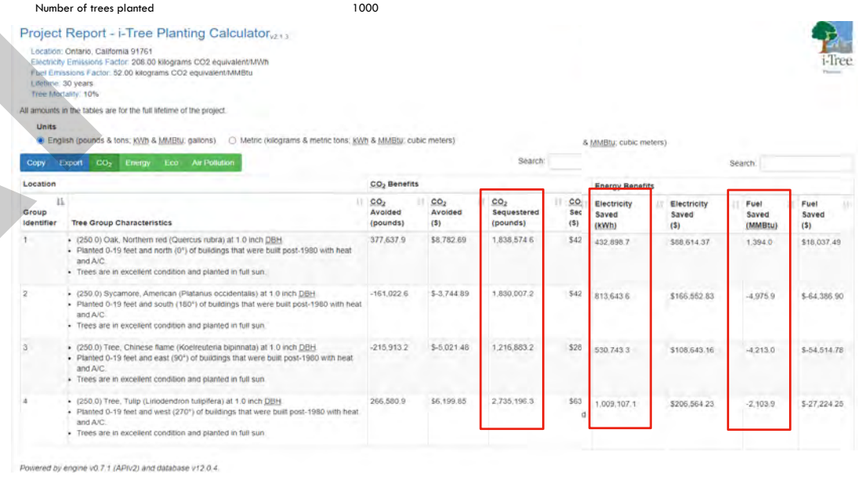
| Percent of project period for C sequestration | 0.333333333 | 0.666666667 |
| | | |
| Project starting year | 2020 | 2020 |
| | | |
| Number of trees planted since 2019 | 1,000 | 1,000 |
| Total carbon sequestration from planting 1,000 trees (lbs) | 2,540,220 | 5,080,441 |
| Total carbon sequestration from planting 1,000 trees (MTCO2) | 1,152 | 2,304 |
| | | |
| Electricity saved from tree canopy (kWh) | 928,798 | 1,857,595 |
| GHG reduction from reduced electricity use (MTCO2e) | 111 | 0 |
| | | |
| Fuel use saved from tree canopy (therms) | 42,299 | 84,599 |
| GHG reduction from reduced fuel use (MTCO2e) | 223 | 446 |

**Additional Notes**

2022 Status update: Since 2019, 1,000 trees have been planted (*Liriodendron tulipifera*, *Hapelrocanthus impetiginosus*, Platanus X hispanica, *Quercus muehlenbergii*, *Koelreuteria bipinnata*)

Number of trees planted 1000



Project Report - i-Tree Planting Calculator v2.1.3

Location: Ontario, California 91761
Electricity Emissions Factor: 208.00 kilograms CO2 equivalent/MWh
Fuel Emissions Factor: 52.00 kilograms CO2 equivalent/MMBtu
Lifetime: 30 years
Tree Mortality: 10%

All amounts in the tables are for the full lifetime of the project.

Units
English (pounds & tons; kWh & MMBtu; gallons) Metric (kilograms & metric tons; kWh & MMBtu; cubic meters)

| | | |

Quantification Calculations

**Notes**

GHG missions savings for each exisiting activity involving electricity are calculated by subtracting the emissions produced with the new electricity emission factor from the emissions produced with the existing emission factor.

| | 2030 | 2050 |
|---|---|---|
| Emission factor with RPS (MTCO2e/kWh) | 0.000149 | 0.000000 |
| Emission factor with SCE-revised projections (MTCO2e/kWh) | 0.000119 | 0.000000 |

| | | |
|---|---|---|
| Residential electricity emissions with RPS | 51,797 | 0 |
| Nonresidential electricity emissions with RPS | 212,571 | 0 |
| Indirect water electricity emissions with RPS | 11,970 | 0 |
| Indirect wastewater electricity emissions with RPS | 1,496 | 0 |

| | | |
|---|---|---|
| Residential electricity emissions with revised emissions factor | 41,332 | 0 |
| Nonresidential electricity emissions with revised emissions factor | 169,620 | 0 |
| Indirect water electricity emissions with revised emissions factor | 9,551 | 0 |
| Indirect wastewater electricity emissions with revised emissions factor | 1194 | 0 |

| | | |
|---|---|---|
| Net decrease in residential electricity emissions | 10,466 | 0 |
| Net decrease in nonresidential electricity emissions | 42,951 | 0 |
| Net decrease in indirect water electricity emissions | 2,419 | 0 |
| Net decrease in indirect wastewater electricity emissions | 302 | 0 |

DRAFT

**Emission Rates**

Source: EMFAC2021 (v1.0.1) Emission Rates
Region Type: Sub-Area
Region: San Bernardino (SC)
Calendar Year: 2019
Season: Annual
Vehicle Classification: EMFAC202x Categories
Units: miles/day for CVMT and EVMT, trips/day for Trips, kWh/day for Energy Consumption, g/mile for RUNEX, PMBW and PMTW, g/trip for STREX, HOTSOAK and RUNLOSS, g/vehicle/day for IDLEX and DIURN

| Trips | Region | Calendar Year | Vehicle Categor | Model Year | Speed | Fuel | Population | Total VMT | CVMT | EVMT | Trips | Energy Consumptior | NOx_RUNEX | NOx_IDLEX | NOx_STREX | PM2.5_RUNEX | PM2.5_IDLEX | PM2.5_STREX | PM2.5_PMTW | PM2.5_PMBW | PM10_RUNEX | PM10_IDLEX | PM10_STREX | PM10_PMTW | PM10_PMBW | CO2_RUNEX | CO2_IDLEX | CO2_STREX | CH4_RUNEX | CH4_IDLEX | CH4_STREX | N2O_RUNEX | N2O_IDLEX | N2O_STREX | ROG_RUNEX | ROG_IDLEX |

Quantification Workbook Ontario

**Emission Rates**

Source: EMFAC2021 (v1.0.1) Emission Rates
Region Type: Sub-Area
Region: San Bernardino (SC)
Calendar Year: 2030
Season: Annual
Vehicle Classification: EMFAC202x Categories
Units: miles/day for CVMT and EVMT, trips/day for Trips, kWh/day for Energy Consumption, g/mile for RUNEX, PMBW and PMTW, g/trip for STREX, HOTSOAK and RUNLOSS, g/vehicle/day for IDLEX and DIURN

| Trips | Region | Calendar Year | Vehicle Category | Model Year | Speed | Fuel | Population | Total VMT | CVMT | EVMT | Energy Consumptio | NOx_RUNEX | NOx_IDLEX | NOx_STREX | PM2.5_RUNE | PM2.5_IDLEX | PM2.5_STREX |

Quantification Workbook Ontario

**Emission Rates**

Source: EMFAC2021 (v1.0.1) Emission Rates
Region Type: Sub-Area
Region: San Bernardino (SC)
Calendar Year: 2030
Season: Annual
Vehicle Classification: EMFAC202x Categories
Units: miles/day for CVMT and EVMT, trips/day for Trips, kWh/day for Energy Consumption, g/mile for RUNEX, PMBW and PMTW, g/trip for STREX, HOTSOAK and RUNLOSS, g/vehicle/day for IDLEX and DIUR

DRAFT

Quantification Workbook Ontario

Emissions

Source: EMFAC2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: San Bernardino (SC)
Calendar Year: 2030
Season: Annual
Vehicle Classification: EMFAC202x Categories
Units: miles/day for CVMT and EVMT, trips/day for Trips, kWh/day for Energy Consumption, tons/day for Emissions, 1000 gallons/day for Fuel Consumption

| Trips | Region | Calendar Year | Vehicle Category | Model Year | Speed | Fuel | Population | Total VMT | CVMT | EVMT | Energy Consumptio |

DRAFT

Quantification Workbook Ontario

**Emissions**

Source: EMFAC2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: San Bernardino (SC)
Calendar Year: 2050
Season: Annual
Vehicle Classification: EMFAC202x Categories
Units: miles/day for CVMT and EVMT, trips/day for Trips, kWh/day for Energy Consumption, tons/day for Emissions, 1000 gallons/day for Fuel Consumption

| Trips | Region | Calendar Year | Vehicle Category | Model Year | Speed | Fuel | Population | Total VMT | CVMT | EVMT | Trips | Energy Consumption | NOx_RUNEX | NOx_IDLEX | NOx_STREX | NOx_TOTEX | PM2.5_RUNEX | PM2.5_IDLEX | PM2.5_STREX | PM2.5_TOTEX | PM2.5_PMTW | PM2.5_PMBW | PM2.5_TOTAL | PM10_RUNEX | PM10_IDLEX | PM10_STREX | PM10_TOTEX | PM10_PMTW | PM10_PMBV | PM10_TOTAL | CO2_RUNEX | CO2_IDLEX | CO2_STREX | CO2_TOTEX | CH4_RUNEX |

Quantification Workbook Ontario

**Emission Rates**

Source: EMFAC2021 (v1.0.1) Emission Rates
Region Type: Sub-Area
Region: San Bernardino (SC)
Calendar Year: 2050
Season: Annual
Vehicle Classification: EMFAC202x Categories
Units: miles/day for CVMT and EVMT, trips/day for Trips, kWh/day for Energy Consumption, g/mile for RUNEX, PMBW and PMTW, g/trip for STREX, HOTSOAK and RUNLOSS, g/vehicle/day for IDLEX and DIURN

| Trips | Region | Calendar Year | Vehicle Category | Model Year | Speed | Fuel | Population | Total VMT | CVMT | EVMT | Trips | Energy Consumption | NOx_RUNEX | NOx_IDLEX | NOx_STREX | PM2.5_RUNEX | PM2.5_IDLEX | PM2.5_STREX | PM2.5_PMTW | PM2.5_PMBW | PM10_RUNEX | PM10_IDLEX | PM10_STREX | PM10_PMTW | PM10_PMBW | CO2_RUNEX | CO2_IDLEX | CO2_STREX | CH4_RUNEX | CH4_IDLEX | CH4_STREX |

DRAFT

**Quantification Workbook** **Ontario**

**Emission Rates**

Source: EMFAC2021 (v1.0.1) Emission Rates
Region Type: Sub-Area
Region: San Bernardino (SC)
Calendar Year: 2050
Season: Annual
Vehicle Classification: EMFAC202x Categories
Units: miles/day for CVMT and EVMT, trips/day for Trips, kWh/day for Energy Consumption, g/mile for RUNEX, PMBW and PMTW, g/trip for STREX, HOTSOAK and RUNLOSS, g/vehicle/day for IDLEX and DIURN

| Trips | Region | Calendar Year | Vehicle Category | Model Year | Speed | Fuel | Population | Total VMT | CVMT | EVMT | Trips | Energy Consumption | NOx_RUNEX | NOx_IDLEX | NOx_STREX | PM2.5_RUNEX | PM2.5_IDLEX | PM2.5_STREX | PM2.5_PMTW | PM2.5_PMBW | PM10_RUNEX | PM10_IDLEX | PM10_STREX | PM10_PMTW | PM10_PMBW |

Quantification Workbook Ontario

**Emissions**

Source: EMFAC2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: San Bernardino (SC)
Calendar Year: 2050
Season: Annual
Vehicle Classification: EMFAC202x Categories
Units: miles/day for CVMT and EVMT, trips/day for Trips, kWh/day for Energy Consumption, tons/day for Emissions, 1000 gallons/day for Fuel Consumption

| Trips | Region | Calendar Year | Vehicle Category | Model Year | Speed | Fuel | Population | Total VMT | CVMT | EVMT | Trips | Energy Consumption | NOx_RUNEX | NOx_IDLEX | NOx_STREX | NOx_TOTEX | PM2.5_RUNEX | PM2.5_IDLEX | PM2.5_STREX |
