DRAFT

**Quantification Workbook** **Ontario**

**Instructions**

*These tables summarize the forecasted effects of the Title 24 standards, including pending ZNE policies, on community emissions. There is no need to do anything on this tab, although the percent reductions before ZNE implementation can be modified as circumstances demand. Note that standards go into effect on January 1 the year after the year that they are named after.*

| Emission savings | 2030 | 2050 |
|---|---|---|
| Residential electricity | 13,400 | 0 |
| Residential natural gas | 10,230 | 79,910 |
| Nonresidential electricity | 31690 | 0 |
| Nonresidential natural gas | 13,540 | 118,300 |
| **Total** | **68,860** | **198,210** |

*These emission savings are calculated using RPS coefficients. There is no double counting with RPS reductions*

Low-rise single-family estimates are based on 117,069 housing starts each year, and low-rise family estimates are based on 30,067 dwelling units. Energy savings for low-rise residential w calculated using the prototype approach similar to the method used for previous standards u savings for each prototype in each climate were weighted by estimated annual housing start climate to yield an estimate of statewide savings.

ıpact_Analy

## 1.2 Non-residential Newly Constructed Buildings

The first-year savings for newly constructed non-residential buildings are 197 GWh of electricity, 76.6 MW of demand, and 0.27 million therms of gas, representing reductions from the 2016 Standard of 10.7%, 9%, and 1%, respectively. The savings for non-residential buildings were calculated using the

For future updates to Title 24, it is assumed that they are two-thirds as effective as the last adopted or in-process update. 2019 and future standards assume homes install PV.
Residential reductions are adjusted to climate zone.
Note that electricity use is projected to go up in some cases due to electrification.
It is assumed that "zero net energy" for nonresidential buildings begins in 2029 and will have the same proportional decrease in energy use as the implementation of "zero net energy" for residential buildings in 2020.

DRAFT

family estimates are based on 30,067 dwelling units. Energy savings for low-rise residential were calculated using the prototype approach similar to the method used for previous standards updates. The savings for each prototype in each climate were weighted by estimated annual housing starts in each climate to yield an estimate of statewide savings.

## 1.2 Non-residential Newly Constructed Buildings

The first-year savings for newly constructed non-residential buildings are 197 GWh of electricity, 76.6 MW of demand, and 0.27 million therms of gas, representing reductions from the 2016 Standard of 10.7%, 9%, and 1%, respectively. The savings for non-residential buildings were calculated using the

## Quantification Workbook Ontario

**Instructions**

*Enter basic data about the project on this tab. This information will be used to set up tables and charts throughout the workbook.*

| | |
|---|---|
| **Community Name** | Ontario |

*The community for whom the project is for.*

| | |
|---|---|
| **Project Name** | Community Climate Action Plan |

*The name of the project.*

| | |
|---|---|
| **Baseline Year** | 2008 |

*The year against which all changes in GHGs will be measured.*

| | |
|---|---|
| **Interim Year** | 2019 |

*The year of the second inventory, more recent than the baseline year. Usually this will be the most recent year with available data.*

| | |
|---|---|
| **First Forecast Year** | 2030 |

*The first year in the future for which emissions will be calculated.*

| | |
|---|---|
| **Second Forecast Year** | 2050 |

*The second year in the future for which emissions will be calculated.*

| | |
|---|---|
| **Third Forecast Year** | n/a |

*The third year in the future for which emissions will be calculated, if your project has one.*

| | |
|---|---|
| **Fourth Forecast Year** | n/a |

*The fourth year in the future for which emissions will be calculated, if your project has one.*

| | |
|---|---|
| **Global Warming Potentials** | AR5 |

*The set of factors used to calculate methane and nitrous oxide emissions. AR5 should be the default.*

# 1. INTRODUCTION & BACKGROUND

The City of Ontario ("City") is currently undergoing a General Plan Update (GPU) referred to as The Ontario Plan (TOP) which is intended to shape development in the City over the next 30-plus years. A General Plan is the principal long-range policy and planning document for guiding the physical development, conservation, and enhancement of California cities and counties. As part of the California Environmental Quality Act (CEQA) process associated with General Plan Updates, infrastructure such as drainage, sewer, water systems and water quality that support the existing and proposed land uses will be analyzed at a level consistent with the city-wide program-level planning of an EIR. This report summarizes the findings of this effort by comparing the Current General Plan (Current TOP) approved in 2010 to the Proposed GPU or "Proposed TOP" as referenced for the remainder of the report.

The City is adjacent to the cities of Chino and Montclair to the west, the cities of Upland and Rancho Cucamonga to the north, the Cities of Fontana and Jurupa Valley to the east, and the Cities of Chino and Eastvale to the south. In the south and east, the City is bordered by portions of unincorporated Riverside County. Regional access to the City is provided by Interstate 10 (San Bernardino Freeway) that runs east-west through the northern portion of the City as well as by Interstate 15 (Corona Freeway) that runs north-south through the eastern portion of the City. The City is divided into two portions, one in the north called Old Model Colony (OMC) and one to the south called Ontario Ranch (OR).

Under the Proposed TOP, residential dwelling units will increase by up to 25,399 DUs and non-residential square footage will be increase by approximately 1.1 million square feet (sf). The Proposed TOP includes five "Growth Areas" throughout the City as listed below and shown in Figure 1.

- West Holt Corridor
- Historic Downtown & Civic Center
- East Holt Corridor
- Ontario Airport Metro Center
- Ontario Ranch Great Park Corridor

This report analyzes the infrastructure systems that serve the City and the Growth Areas. The analysis includes a review and summary of the baseline conditions of the storm drain system, water and wastewater systems, and existing water quality regulations currently in place, and provides a comparison between the Current and Proposed TOP. Any significant impacts will be identified by analyzing the CEQA thresholds of significance as they relate to storm drain, water, sewer and water quality. The analysis also includes the utilization of GIS tools and data and ongoing communication with City staff.

# 2. ENVIRONMENTAL SETTING

## 2.1 DRAINAGE

### 2.1.1 Watershed Setting and Existing Drainage Facilities

The City is within the Santa Ana River Watershed which is monitored by the Santa Ana Regional Water Quality Board (RWQCB) and covers portions of the Counties of San Bernardino, Orange, and Riverside. The City lies primarily within the Chino Creek sub-watershed, and is further subdivided into the Upper Cucamonga Creek and Lower Cucamonga Creek sub-watersheds.

The City is mostly built-out in the OMC and stormwater runoff connects to a series of storm drain lines throughout the City which include both City and San Bernardino County Public Works (SBCPW) drainage facilities. The City is relatively undeveloped within the OR, where stormwater flows either infiltrate into the soil or drain to SBCPW storm drain lines. Most of the smaller underground lines are under jurisdiction of the City and all the larger underground lines as well as flood control channels and detention basins are maintained by SBCPW.

City of Ontario Existing Storm Drain Facilities

The City and State-owned (Caltrans) storm drain infrastructure feeds to a series of SBCPW regional flood control channels, storm drains, and detention basins. The major regional channel systems that convey the City's stormwater runoff include San Antonio Channel, Cucamonga Channel, and the Day Creek Channel. Areas located in the southwest portion of the City that do not drain to the three major channel systems above, drain to the Prado Flood Control Basin via other regional and/or backbone facilities in the City of Chino, which include the following:

- SBCFCD's Cypress Channel system including Magnolia Storm Drain and Sultana-Cypress Storm Drain, which drains south through the City of Chino to the Prado Flood Control Basin.
- Airport Channel (City of Chino's master planned Euclid Avenue Storm Drain – Line I), which drains along the easterly side of Euclid Avenue, from Merrill Avenue to Prado Flood Control Basin. This system conveys runoff generated in the cities of Ontario and Chino.
- Grove Avenue Storm Drain (City of Chino's master planned storm drain- Line J), which drains south from Merrill Avenue to an existing RCB under the runway in Chino Airport; thence, through the City of Chino to Prado Flood Control Basin. This system conveys runoff generated in the cities of Ontario and Chino.

Additional major drainage features within the City include trunk lines that outlet to the larger flood control channels. Storm drain facilities serving the Growth Areas are summarized below:

*Table 1 Existing Drainage Facilities within Growth Areas*

| Growth Area | Primary Drainage Facilities |
|---|---|
| West Holt Corridor | 33"-60" City Storm Drain Lines<br>SBCPW Storm Drain Line |
| Historic Downtown & Civic Center | 16"-54" City Storm Drain Lines<br>SBCPW Drainage Channels and Storm Drain Lines |
| East Holt Corridor | 18"-96" City Storm Drain Lines<br>SBCPW Drainage Channels and Storm Drain Lines |
| Ontario Airport Metro Center | 24"-114" City Storm Drain Lines<br>Caltrans Storm Drain Lines<br>SBCPW Drainage Channels, Storm Drain Lines, and Detention Basins |
| Ontario Ranch Great Park Corridor | 60" City Storm Drain Lines<br>OCFCD Drainage Channel |

See Figure 2 that shows existing storm drain system throughout the City and the Growth Areas.

# City of Ontario Existing Storm Drain Facilities

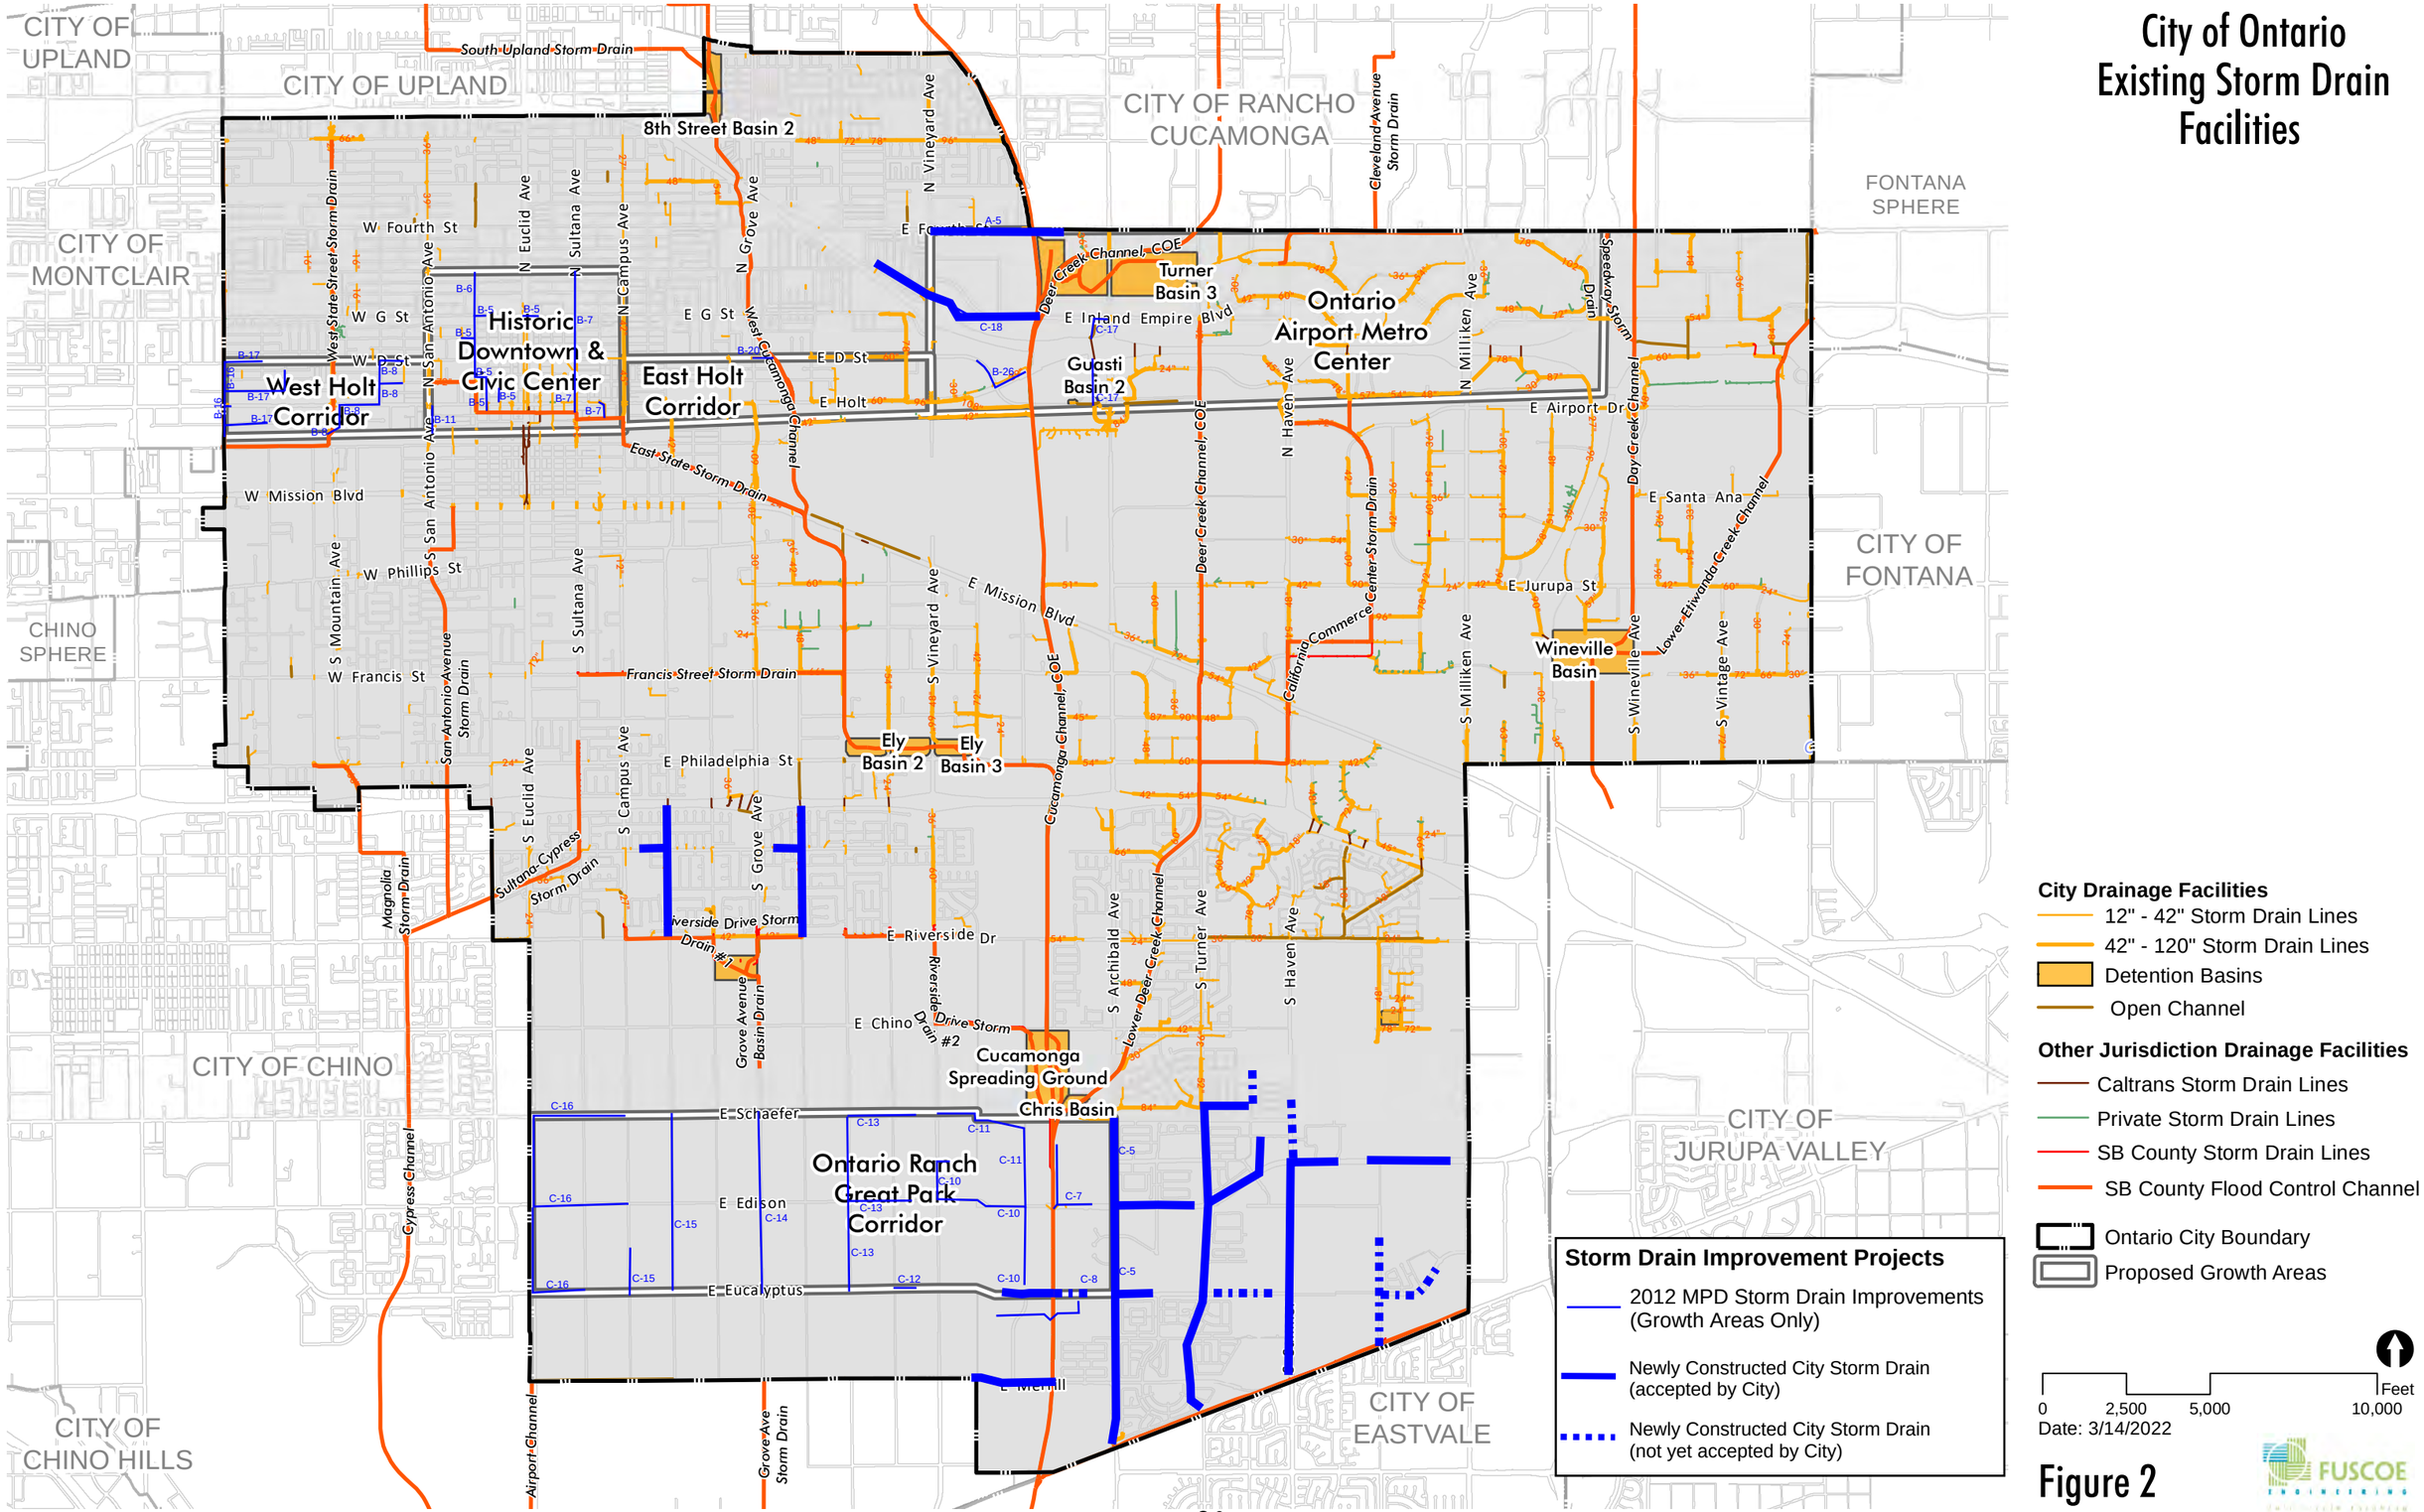

Figure 2

### 2.1.2 Storm Drain Master Plan

#### City of Ontario Master Plan of Drainage

The City of Ontario's Master Plan of Drainage (MPD) was prepared in March 2012 by Hunsaker and Associates Irvine, Inc. The purpose of the MPD is to analyze existing storm drain infrastructure capacity and provide recommendations on any flooding issues for all lines throughout the City.

*City Storm Drain Assessment*

The study presents preliminary sizes, alignments and construction cost estimates for recommended City-owned backbone storm drain facilities needed to upgrade the existing systems to provide adequate flood protection and support future built-out conditions. All existing infrastructure was modeled, with the exception of lines that are private or belong to outside agencies.

*Assessment Parameters and Buildout Assumptions*

Proposed flows were modeled based on a combination of land use information, including the existing General Plan, as-built drawings, previous development and drainage studies, design drawings, and the City's GIS files. When as-builts were not available the study estimated capacities using 80% of the general ground surface slope as the gradient of the mainline Hydraulic Grade Line. For surface flows on City streets, the Street Capacity Curves from "The Ontario Plan" was used for hydraulic modeling of storm drain infrastructure.

In addition, hydrology calculations for the entire City were conducted using Land Use Plan 2010 data for runoff coefficients as well as utilizing AES 2011 software. Flooding results for the 10-, 25-, and 100-year storm conditions were determined using rational method or unit hydrograph method.

*Deficiency Criteria and CIP*

Deficiencies were identified based on flow tributary to the master-planned storm drain. Recommended improvement priority categories were based on level of existing deficiency; impact to the public; proximity to schools, public and emergency facilities; and anticipated patterns of future development.

Project priorities were determined within three categories ("A through C"). Category "A" corresponds to master-planned storm drains to service and/or relieve flooding in areas without current storm drain facilities. Category "B" corresponds to master-planned storm drains that will mitigate impacts of additional development. Category "C" corresponds to master-planned storm drains to service future development. Recommended improvements by Growth Area are shown in Table 2 below. This also shows the status of these projects based on communication with City staff.[1]

[1] Email correspondence with City staff in March 2022.

*Table 2 City of Ontario Proposed Storm Drain Improvements*

| Growth Areas | Improvement Number | Improvement | Status |
|---|---|---|---|
| West Holt Corridor | B-8 | Improve City system along Mountain Ave, Boulder Ave, and I St | Not yet constructed. |
| | B16 | Improve City system along Benson Ave between I St and State St | |
| | B-17 | Improve City system along I St, G St, D St, Stoneridge Ct, and Brooks St | |
| Historic Downtown & Civic Center | B-5 | Improve City system along Vine Ave, Laurel Ave, and G St | |
| | B-6 | Improve City system along Vine Ave between G St and 6th St | |
| | B-7 | Improve City system along Sultana Ave and Melrose Ave | |
| | B-11 | Improve the City system along Oakland Ave, Palm Ave, Francis St, and Fern Ave | |
| East Holt Corridor | B-20 | Improve City system along I St and D St | |
| Ontario Airport Metro Center | A-5 | Add to City system along 4th St and 5th St | |
| | B-26 | Improve City system along Convention Center Way and Holt Blvd | |
| | C-17 | Add to City system along Archibald Ave between Inland Empire Blvd and Airport Dr | |
| | C-18 | Add to City system along Inland Empire Blvd and Plaza Serena | Constructed. |
| Ontario Ranch Great Park Corridor | C-5 | Add to City system along Archibald Ave between County Line Channel and Schaefer Ave | |
| | C-7 | Add to City system along Edison Ave east of Cucamonga Channel and extend north of Edison along the Cucamonga Channel | Not yet constructed. |
| | C-8 | Add to City system along Eucalyptus Ave east of Cucamonga Channel and extend north of Eucalyptus along the Cucamonga Channel | Constructed. |
| | C-10 | Add to City system along Hellman Ave and Edison Ave | |
| | C-11 | Add to City system along Hellman Ave and Schaefer Ave | Not yet constructed. |
| | C-12 | Add to City system along Merrill Ave west of Cucamonga Channel to Eucalyptus Ave | |
| | C-13 | Add to City system along Walker Ave between Cucamonga Creek and Chino Ave | |
| | C-14 | Add to City system along Grove Ave between Merrill Ave and Chino Ave | |
| | C-15 | Add to City system along Merrill Ave and Bon View Ave | |

City of Ontario Capital Improvements Program

As shown above, the City utilizes the MPD to determine improvements to the storm drain system. These improvements are managed by the City's Capital Improvement Program (CIP) process. The City's Engineering Department regularly updates the CIP project list to prepare and budget for upcoming infrastructure improvements across a 5-year planning horizon. The storm drain infrastructure project below (San Antonio Avenue Storm Drain) has been prioritized within the City's current 2021/22 budget book. The list also includes three recent storm drain improvements.

- In Design: San Antonio Avenue Storm Drain – Estimated Project Completion December 2025
- Completed: Bon View Avenue New Storm Drain
- Completed: Parco Avenue New Storm Drain
- Completed: Francis Storm Drain & Ely Basin (new pipe and upsized pipe)

In addition, several proposed storm drain facilities identified in the MPD have since been constructed. These are shown in Figure 2.

### 2.1.3 San Bernardino County 2020-21 CIP

The San Bernardino County Public Works Flood Control Planning Division is mainly responsible for long range advance planning and for coordinating flood control project development and funding with other agencies:[2]

- Long Range Planning involves planning investigations and project studies; project prioritization; preparing annual capital improvement reports, special reports and studies; preparing and updating Master Plans of Drainage; documenting flooding events and damages; developing and processing funding agreements; preparing and tracking grant applications; Aerial photos and Historic information archiving and updating District's maps, exhibits, and displays.
- The Division conducts meetings with City Engineers in the respective Flood Zones. The meetings are designed to familiarize the City Engineers with flood control projects in planning, development and construction phases. District budget studies are also discussed.
- The Federal Projects Section of the Division is responsible for coordinating the development of federally sponsored flood control projects with the U.S. Army Corps of Engineers. Some of the past federally sponsored projects in our County included the construction of the Seven Oaks Dam and the San Timoteo Creek Basins and Channel.
- The Division coordinates Water Spreading Activities with local water agencies that use District facilities to recharge underground aquifers.

The following County projects are within the City's boundary include one completed project (Francis Street storm drain) and the other two currently in design[3]:

[3] Call with San Bernardino County Public Works staff; November 23, 2021.

- In Design: West State Street Storm Drain – Segment 3B
- In Design: Grove Basin Outlet Storm Drain

### 2.1.4 Existing Floodplain Mapping

The National Flood Insurance Act (1968) established the National Flood Insurance Program, which is based on the minimal requirements for flood plain management and is designed to minimize flood damage within Special Flood Hazard Areas. The Federal Emergency Management Agency (FEMA) is the agency that administrates the National Flood Insurance Program. Special Flood Hazard Areas (SFHA) are defined as areas that have a 1 percent chance of flooding within a given year, also referred to as the 100-year flood. Flood Insurance Rate Maps (FIRMs) were developed to identify areas of flood hazards within a community.

According to the Flood Zone determination covering the City, the majority of the City lies within Zone X (unshaded). Zone X (unshaded) is designated as an area determined to be either outside the 500-year flood plain (0.2%), or protected by levee from 100-year flood(1%). Zone X (shaded) are "Areas with a 0.2% Chance of Flooding",areas adjacent to flood control channels and creeks or 'Areas with Levee Protection' (areas immediately east of Cucamonga Channel). The western portion of the Ontario Ranch area is designated as Zone D, Areas of Undetermined Flood Hazard. No flood hazard analysis has yet been conducted for this area.

*Special Flood Hazard Areas Within the City*

FEMA Special Flood Hazard Areas (SFHAs) are high risk areas, requiring mandatory flood insurance purchase for existing developments. Limited residential development or additional coordination with City planning and engineering staff for planned developments are recommended for SFHAs.

Zone A areas have a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Zone A areas within the City are confined to flood control channels, creeks, and detention basins and areas immediately adjacent to them

Zone AH areas feature a 1% annual chance of shallow flooding and 26% chance of shallow flooding over a 30-year mortgage, generally in the form of a 1 to 3 foot pond. There are two small areas designated as Zone AH within the City, making up the southeastern and southwestern corners of the West Holt Corridor and Historic Downtown & Civic Center Growth Areas, respectively, and a small portion of the Ontario Airport Metro Center Growth Area, immediately south of the Toyota Arena.

Portions of the City along Mission Blvd and in the southern portion of the Ontario Airport Metro Center Growth Area are designated as Zone AO. Zone AO corresponds to river or stream flood hazard areas with a 1% or greater chance of shallow flooding, typically in the form of sheet flow.

Finally, a small portion of the City south of Philadelphia Street and west of S Euclid Avenue is designated as Zone AE. Zone AE areas are those with a 1% annual chance of flooding due to being located at base floodplain elevation.

Table 4 below contains an overview of Growth Areas and associated FEMA Flood Zone designations.

*Table 3 Growth Area Flood Zone Designations*

| Focus Area | FEMA Flood Designations and Approximate Areas |
|---|---|
| West Holt Corridor | Zone X (shaded), 0.2% Chance of Annual Flood, 28 acres in eastern Growth Area<br>**Zone AH, 4.7 acres in southeastern corner** |
| Historic Downtown & Civic Center | Zone X (shaded), 0.2% Chance of Annual Flood, 106 acres in western Growth Area<br>**Zone AH, 12.3 acres in southwestern corner of Growth Area** |
| East Holt Corridor | Zone X (shaded), 0.2% Chance of Annual Flood, 288 acres in western Growth Area<br>**Zone A, 1.3 acres in and around W Cucamonga Channel** |
| Ontario Airport Metro Center | Zone X (shaded), 0.2% Chance of Annual Flood, 1,665 acres throughout Growth Area<br>**Zone AH, 5.3 acres south of Toyota Arena**<br>**Zone AO, 7.9 acres at Guasti Rd**<br>**Zone A, 21 Acres in and around Deer Creek Channel and Cucamonga Channel** |
| Ontario Ranch Great Park Corridor | Zone D, 867 acres in western Growth Area<br>Zone X (shaded), 0.2% Chance of Annual Flood, 788 acres in central/eastern Growth Area<br>**Zone A, 25 acres in and around Cucamonga Creek**<br>Zone X, Reduced Flood Risk Due to Levee, 199 acres in eastern Growth Area |
| *Bolded zones represent FEMA Special Flood Hazard Areas* | |

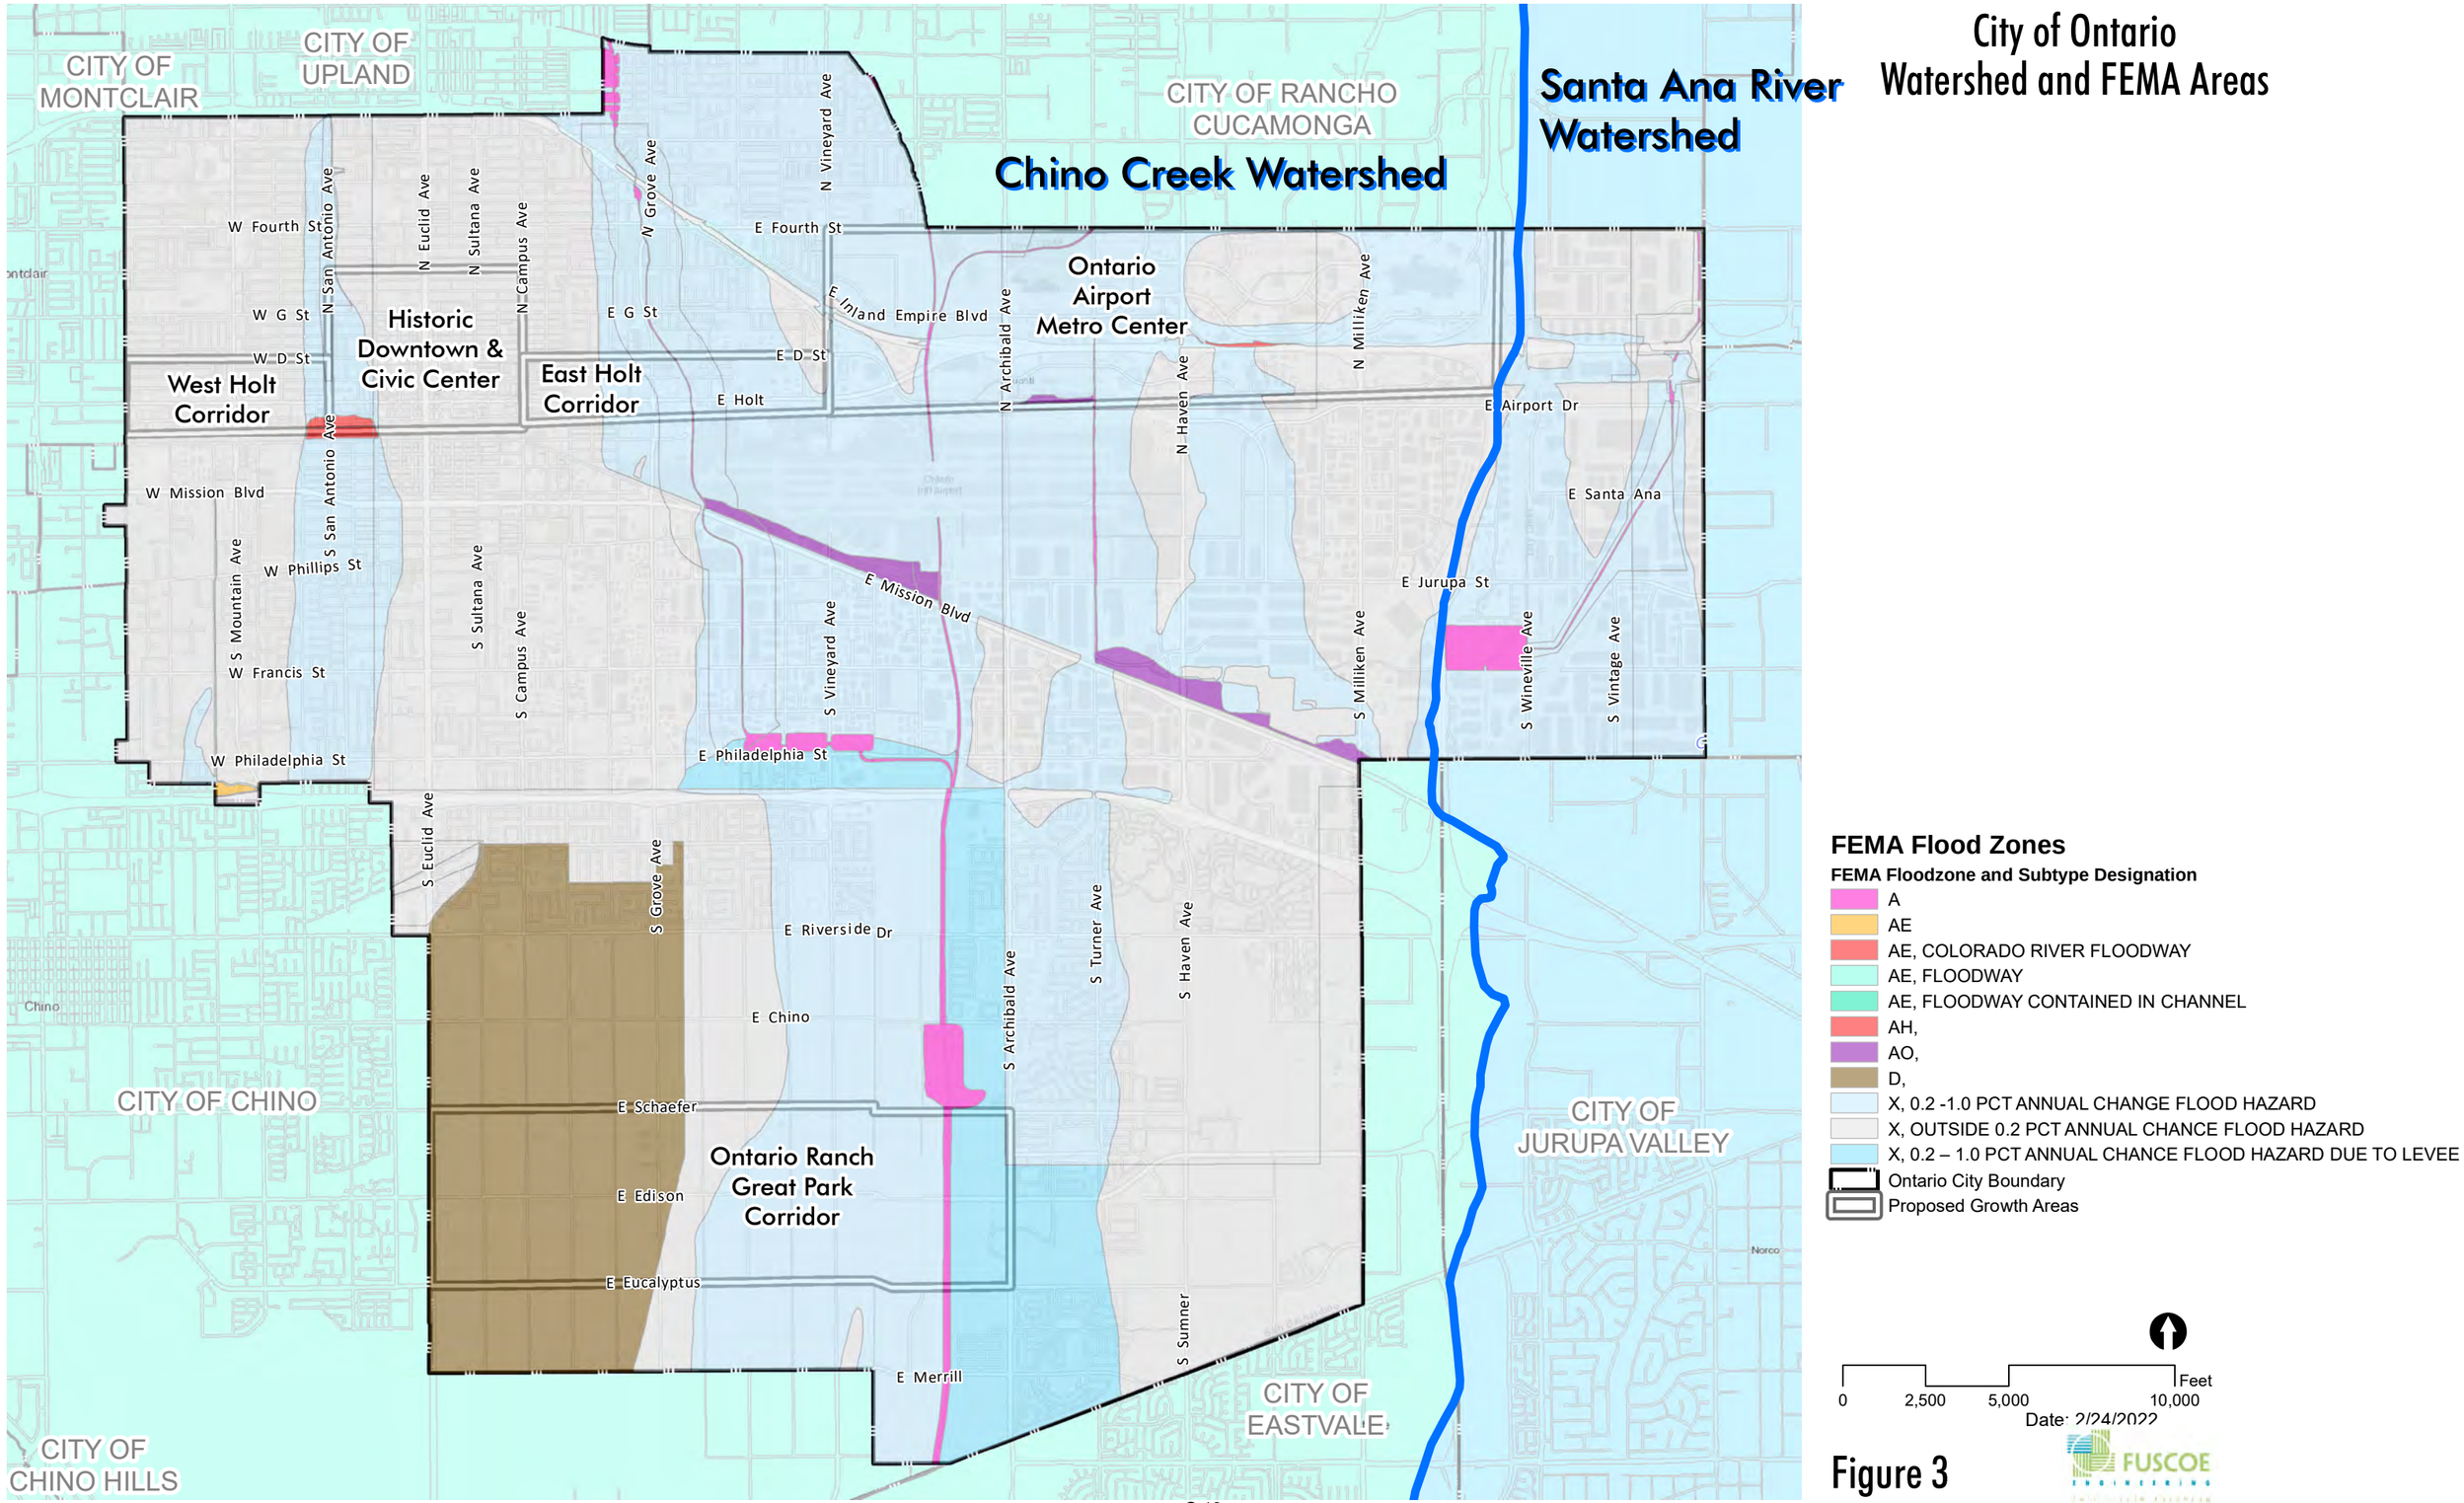

Figure 3

## 2.2 SEWER INFRASTRUCTURE

### 2.2.1 Existing Sewer System and Facilities

The City operates and maintains the City's sewer system, which currently serves the Ontario Model Colony area and will serve the Ontario Ranch area upon buildout. The City's sewer collection system consists of approximately 425 miles of sewer mains. The system operates largely by gravity but also features four primary pump stations and approximately 11,000 feet of associated force mains. Existing sewer load is approximately 10.4 million gallons per day (MGD).

The sewer system ranges in size from 4" to 48" diameter lines. See below for summary of sewer facilities within the Growth Areas.

*Table 4 Existing Sewer Facilities within the Growth Areas*

| Growth Area | Primary Sewer System Facilities |
|---|---|
| West Holt Corridor | 8"-15" City Lines |
| Historic Downtown & Civic Center | 8"-27" City Lines |
| East Holt Corridor | 8"-30" City Lines<br>21"-33" IEUA Lines |
| Ontario Airport Metro Center | 8"-24" City Lines<br>24"-30" IEUA Lines |
| Ontario Ranch Great Park Corridor | Limited Existing Infrastructure |

Inland Empire Utilities Agency Existing Sewer System

IEUA is a regional provider of wholesale, imported water and wastewater services in San Bernardino County. Its service area ranges from Chino Hills in the southwest to Rancho Cucamonga and Fontana in the northeast. IEUA operates four wastewater treatment plants (WWTPs) that provide recycled water to the western part of San Bernardino County. IEUA also maintains a series of regional trunk lines that transport wastewater flows from Ontario to one of IEUA's regional treatment plants, described here. IEUA maintains and is responsible for a series of trunk lines that transport flows from the City to one of IEUA's regional treatment plants. The wastewater treatment plants are described in more detail below.

- **Regional Water Recycling Plant #1 (RP-1).** This WWTP serves the cities of Ontario, Chino, Fontana, Montclair, Rancho Cucamonga, and Upland. It features two separate treatment sections, one for liquids and one for solids, and has a treatment capacity of 44 mgd. The wastewater flows are treated to Drinking Water Title 22 standards; therefore, the recycled water from the plant is suitable for distribution and use for landscape irrigation and industrial processes. The plant is in the City of Ontario at 2662 East Walnut Street.[4]

[4] IEUA Website, accessed 3-22-2022. Found here: https://www.ieua.org/regional-water-recycling-plant-no-1/

- **Regional Water Recycling Plant #5 (RP-5).** This WWTP is in Chino and serves Chino, Chino Hills, and Ontario. The plant has a current capacity of 16.3 mgd, which will increase to 22.5 mgd with its planned expansion project. Wastewater treatment by this facility is either discharged to Chino Creek, delivered to industrial users, or pumped to basins for groundwater recharge.[5]

IEUA also operates a system for non-reclaimable wastewater (NRW) that consists of industrial waste, groundwater treatment, and other high-strength wastewaters and brines. This system enables IEUA to prevent high-strength wastewater from entering the water-recycling facilities so that they can meet their NPDES permit limits and wastewater quality goals. IEUA operates three trunk lines that are part of the NRW system, one of which passes through Ontario. The NRW system conveys wastewater to large-scale treatment facilities in Los Angeles under the jurisdiction of the Sanitation Districts of Los Angeles County, where it is treated and ultimately discharged into the Pacific Ocean.

FUSCOE ENGINEERING

### 2.2.2 Sewer Capacity Assessments

#### City of Ontario 2020 Draft Sewer Master Plan

The City's most recent Sewer Master Plan update occurred in June 2020 and is currently in a provisional draft form. The 2020 Draft Sewer Master Plan Update ("2020 SMP") was an update to a sewer capacity analysis performed in 2012. The 2020 SMP analyzed the age and status of the sewer infrastructure, and the capacity of the City's sewer collection system for existing and future peak flow conditions under both dry and wet weather conditions. In addition, the Ontario Ranch area was reassessed for consistency with available planning documents. The results of the performance evaluation are below.

*City Sewer Capacity Assessment*

The capacity of the City's sewer system was assessed through use of the InfoSewer model, an ArcGIS based computer modeling program. All existing infrastructure was modeled, with the exception of laterals, and lines that are private or belong to outside agencies.

*Assessment Parameters and Buildout Assumptions*

Existing flows were modeled based on available billing data and sewer flow monitoring information, while proposed flows were modeled based on a combination of land use information, including the existing General Plan, specific plans, previous sewer studies, and a City buildout table completed in 2015. Ultimate buildout conditions modeled include a total of 107,221 DUs and corresponding population of 371,979 and citywide commercial square footage of 246,573,632. Modeled flows increased from 10.4 MGD under existing conditions to 29.4 MGD under proposed conditions.

*Deficiency Criteria and CIP*

Hydraulic deficiency (pipes in need of upsizing) was based on the peak dry weather depth over diameter (d/D) ratio. Any segment with a modeled d/D > 0.64 was considered deficient. Under existing condition analysis, a total length of 2,410 feet of deficient sewer pipes were identified, representing 0.12 percent of the total City system. Under proposed buildout conditions, an additional 7,372 feet of sewer was estimated to become deficient. No deficiencies were found under existing or future buildout conditions for all pump stations within the City.

From the modeled deficiencies, capacity improvement projects were prioritized for inclusion in future planning documents and City CIPs. Deficient infrastructure under existing conditions was prioritized over infrastructure with proposed deficiencies, with site-specific flow monitoring recommended for both types of projects. A total of 8 capacity improvement projects were listed for the Ontario Model Colony area, with proposed Ontario Ranch infrastructure projects addressed separately.

*Table 5 Ontario SMP Capacity Improvement Projects*

| Project No. | Location | Description |
|---|---|---|
| 1 | Riverside Dr. east of Lower Creek | City staff to update hydraulic model and rerun site-specific analysis; potential upsizing required for existing 15" pipe pending field verification |
| 2 | Holt Blvd at Grove Ave, East Holt Corridor Growth Area | Replace existing pipes with 12" and 15" diameter pipes |
| 3 | Mountain Ave south of I St | Replace existing pipe with 8" diameter pipes |
| 4 | Hellman Ave and Philadelphia St area north of RP-1 | Upsize existing 18" pipes to 24" diameter pipes |
| 5 | South of I-10 Fwy, west of Archibald Ave, Ontario Airport Metro Corridor Growth Area | Upsize existing 8" pipes to 12" diameter pipes |
| 6 | Old Guasti Rd, from Turner Ave to Archibald Ave, Ontario Airport Metro Corridor Growth Area | Upsize existing 8" pipes to 12" diameter pipes |
| 7 | Airport Dr & Grove Ave | Replace existing pipes with 8" and 21" diameter pipes |
| 8 | 5th Street and Euclid Ave | Replace existing pipe with 8" diameter pipes |
| 15 | Holt Blvd to Grove Ave | Replace existing pipe with 21" diameter pipes |

City of Ontario FY 2020-21 through FY 2024-25 Capital Improvements Program

The OMUC regularly updates its Capital Improvements Program project list to prepare and budget for upcoming infrastructure improvements across a 5-year planning horizon. The sewer infrastructure projects below have been prioritized within the City's current 2020/21 CIP.

- G Street Sanitary Sewer Main– Improvement located within the Ontario Airport Metro Corridor Growth Area
- Vineyard Sewer Project (Project 15 from 2012 SMP) – Improvement located on Holt Blvd and Grove Ave to replace 18" pipe with 21" pipe
- Holt Blvd at Grove Ave Project 2 (2020 SMP) – Improvement project aimed to alleviate the existing capacity deficiency in the 10-inch sewer in Holt Blvd.

City of Ontario 2020 Sewer System Management Plan

The City of Ontario's draft 2020 Sewer System Management Plan ("2020 SSMP") was written to comply with the State Water Resources Control Board's Order No. 2006- 0003- DWQ (as amended by WQ2008- 002-EXEC and WQ2013-0058EXEC), Statewide General Waste Discharge Requirements for Wastewater Collection Agencies (WDR). A SSMP is a document that describes the activities that an agency uses to manage their wastewater collection system effectively. The state describes effective management of a wastewater collection system as

including: 1) Maintaining or improving the condition of the collection system infrastructure in order to provide reliable services into the future; 2) Cost-effectively minimizing infiltration/inflow (UI) and providing adequate sewer capacity to accommodate design flows; and 3) Minimizing the number and impact of sanitary sewer system overflows (SSOs) that occur.

The 2020 SSMP is a draft update to the 2012 SSMP. The 2020 SSMP demonstrates the City's ability to comply with WDR's requirements through collection system use ordinances, service agreements, or other legally binding procedures. It possesses the necessary legal authority to prevent illicit discharges into its wastewater collection system, (examples may include infiltration and inflow (I/I), storm water, chemical dumping, unauthorized debris and cut roots, etc.); require sewers and connections be properly designed and constructed; ensure access for maintenance, inspection, or repairs for portions of the lateral owned or maintained by the Public Agency; limit the discharge of fats, oils, and grease and other debris that may cause blockages, and enforce any violation of its sewer ordinances.

Inland Empire Utilities Agency Sewer System Management Plan

IEUA maintains and regularly updates its Sewer System Management Plan ("SSMP") in order to properly assess infrastructure capacity and condition and plan for necessary capacity increases as a result of modeled flow increases through its planning horizon. The SSMP was most recently updated in April 2019.

A key element of the SSMP is the System Evaluation and Capacity Assurance Plan ("SECAP"), which provides an opportunity to update the Agency's CIP in response to modeled increases in flows. The most recently calibrated capacity assessment was completed as part of a technical Memo for the 2015 Wastewater Facilities Master Plan (TM3 – Regional Trunk Sewer Analysis) and modeled flows through 2035 based on available planning documents and growth projections.

The Technical Memo analyzed capacities for different wastewater pipes in IEUA's conveyance system. Dry weather peak flows were used to determine deficient line segments. For the purpose of the study, any existing line with a d/D ratio of greater than 0.92 would be identified as deficient. For new lines, a d/D ratio greater than 0.75 will qualify the segment as deficient.

While the majority of wastewater infrastructure utilized by IEUA was determined to be sufficient, there were significant capacity limitations noted for the 30" pipeline that conveys flows from the Montclair diversion structure to RP-1. It was determined that the pipeline would need to be upsized to a 36-inch diameter sewer to convey peak buildout flows. Further flow monitoring for the segment was recommended by the study in order to determine the extent of deficiency and the corrections necessary.

The analysis introduced a series of 4 alternatives and 5 sub-alternatives to promote system reliability and effective wastewater treatment for all communities served by RP-1 and RP-5. After a cost-benefit analysis including life cycle assessment, environmental impact analysis, and life cycle budgeting, it was determined that Alternative 2 was the preferred alternative presented. Alternative 2 estimated wastewater influent through a 2060 buildout (estimated increase of 9.6 MGD for RP-1 and 22.5 MGD for RP-5). Elements of Alternative 2 will include:

- Expanding RP-1capacity by 5.0 MGD.
- Expanding RP-5 capacity by 7.5 MGD
- Upgrading the Whispering Lakes Pump Station to a capacity of 4.7 MGD.
- Constructing improvements to mitigate the deficiencies in the Montclair pipeline.

The improvements to the Montclair pipeline will involve resizing the line from 21" and 30" to 36" in diameter throughout, which will address existing and buildout condition capacity issues. Proposed capacity expansions to RP-1 and RP-5 are anticipated to meet all modeled flow increases.

In response, the 2019 SSMP update features 7 major capital projects to meet the projected capacity goals through 2035, primarily related to Alternative 2 identified in the Wastewater Facilities Plan Technical Memo. Of these 7 projects, 6 impact City of Ontario conveyance and treatment. 4 are located within the City and 2 are located outside of the City. Of the 4 located within the City, 2 of the projects related to expanded capacity for RP-1, 1 expands existing conveyance pipelines to RP-1, and the remaining project proposes upgrading an existing pump station's capacity to convey additional flows to RP-1. Both projects outside the City limit are to upgrade the treatment capacity of RP-5. Additional CIP projects include manhole upgrades throughout the IEUA service area and various minor improvements. No IEUA capital projects occur within growth areas.

*Table 6 IEUA Major Capital Projects*

| Project | Purpose |
|---|---|
| Montclair Pipeline Upgrades Project | Upsize four pipeline segments from 21-inch and 30-inch diameter to 36-inch diameter to mitigate deficiencies in the conveyance system, reliably accommodate future growth, and convey peak buildout flow. |
| Whispering Lakes Pump Station Expansion Project | Increased pumping capacity to meet projected future flows<br>Ability to send more flows to RP-1 for treatment |
| RP-1 Solids Treatment Expansion Project | Increased solids treatment capacity to meet existing and projected future flows. |
| RP-1 Liquid Treatment Expansion and Primary Effluent Equalization Elimination Project | Increased liquid treatment capacity to meet projected future flows.<br>Eliminating primary flow equalization and converting ponds for other uses. |
| RP-5 Solids Handling Facilities Project (RP-2 Relocation) | Relocation of RP-2 solids handling operations to RP-5.<br>Increased solids treatment capacity to meet existing and projected future flows.<br>Relocation of RP-2 Lift Station to above the flood elevation.<br>Demolition of RP-2 facilities. |
| RP-5 Liquid Treatment Expansion Project | Increased liquid treatment capacity to meet projected future flows. |

See Section 4.3 for a map of the current improvement projects throughout the City.

## 2.3 WATER DISTRIBUTION SYSTEM AND SUPPLY

### 2.3.1 Existing Water System

The City of Ontario provides water service within a 37.2-square mile service area. The service area includes most of the City of Ontario. However, there are also Cucamonga Valley Water District (CVWD) water lines that serve two areas of the City: 1) east of Vineyard Avenue and north of 4th Street and 2) east of I-15 and north of I-10. Neither of these areas are within the Growth Areas associated with the Proposed TOP. In addition, Inland Empire Utility Agency (IEUA) provides wholesale, recycled water supply to the City for distribution to retail customers. Metropolitan Water District of Southern California (MWD) also has delivery/conveyance lines that run through the City.

The City's distribution system consists of approximately 584 miles of water mains, between 4 and 42 inches in diameter. There are twelve (12) active reservoirs, combined for a total capacity of 75 million gallons (MG). Additionally, the City has six (6) pump booster stations and 17 groundwater wells, with a total production capacity of approximately 56 million gallons per day (MGD). The City provides an average supply of 33.14 MGD of water to its service area. See Figure 5 for a map of the existing water system within the City. Table 7 summarizes the water infrastructure per Growth Area.

*Table 7 Existing Water System within Growth Areas*

| Focus Area | Pressure Zone (Potable/Recycled) | Primary Water Facilities |
|---|---|---|
| West Holt Corridor | 1212/1299 | 4" - 14" City water lines |
| Historic Downtown & Civic Center | 1212/1299 | 4" – 16" City water lines<br>City Well #45<br>8" City recycled water line |
| East Holt Corridor | 1212/1299 | 4" - 12" City water lines<br>City Well #40<br>8"-12" City recycled water lines |
| Ontario Airport Metro Center | 1212/1299 & 1158 | 4" - 36" City water lines<br>36" IEUA recycled water line<br>6"-12" City recycled water lines<br>City Wells #24, 25, 29, 37-39, 47 |
| Ontario Ranch Great Park Corridor | 925/930 | Limited Existing City Infrastructure<br>30" IEUA recycled water line |

The City receives its water from three sources: groundwater sources; imported water from the Water Facilities Authority (WFA), Chino Basin Desalter Authority (CDA), and the San Antonio Water Company (SAWCo); and recycled water from IEUA. Of these sources, the majority of the water supply comes from groundwater (~50% of total supply) and imported state water (~30% of supply). Groundwater supplies are from the Chino Groundwater Basin, which is adjudicated and managed by the Chino Basin Watermaster. The City maintains base water rights to 8,470 AFY and receives additional annual water rights from reallocations of unused agricultural water rights and credit for stormwater recharge and recycled water use. The City

has 3,461 AF in storage pursuant to Overlaying Non-Agricultural rights. The City has expanded its production of groundwater (96,554 AF total storage pursuant to Appropriative rights capacity), which allows it to rely less on imported water supplies.

The remaining 20% of water supplies for the City come from recycled water. Recycled water is received from IEUA's water recycling plants and is then distributed through the City's purple pipe system to 343 meters for non-agricultural landscaping use and 20 meters for agricultural use. IEUA recycled water delivery lines exist within the northeastern, southwestern, and western portions of the City. There are 22 connected distribution points for IEUA water to the City's purple pipe system of which half are within the 1158 Pressure Zone.

City of Ontario 2020 Urban Water Management Plan

The 2020 City of Ontario Urban Water Management Plan (UWMP) was created to identify and plan for water customers and demands within the City. The 2020 UWMP requires analyses of management tools and options to maximize local resources and to minimize the need to import water from other regions. An analysis of total projected water use compared to water supply sources over the next 25 years in five-year increments was conducted. Water quality was also considered in the 2020 UWMP. Water demand and supply information was compared for normal single dry year and multiple dry year scenarios. The 2020 UWMP was developed in part with information from City's 2020 WMP, the City's 2018 Hazard Mitigation Plan, and San Bernardino County's 2017 San Bernardino County Multi-Jurisdictional Hazard Mitigation Plan. Additionally, as part of the 2020 UWMP, the City has included a 2020 Water Shortage Contingency Plan (2020 WSCP) and augmented the dry-year water reliability assessment. The 2020 WSCP serves as the operating manual to prevent catastrophic service disruptions through proactive, rather than reactive, management. The 2020 WSCP allows real-time water supply availability assessment and structured steps designed to respond to actual conditions, to allow for efficient management of any shortage with predictability and accountability.

The 2020 UWMP reported the City's daily per capita water demand as 161 gallons per capita per day (GPCD) in 2020. This water demand is well below the minimum water use reduction target of 196 GPCD as required by the Water Conservation Bill of 2009 (SBx 7-7)[6]. Therefore, the City's plan to maintain the current level per capita water use is in compliance with SBx 7-7.

According to the 2020 UWMP, the City will be increasing local groundwater production, Chino Basin Desalter and imported surface water purchases, and use of recycled water from Inland Empire Utilities Agency (IEUA) to meet all future water supply needs. The supply capacity from additional storage upgrades will add 2,000 – 5,000 AFY for groundwater sources. Increases in demand were calculated using best available Ontario General Plan buildout estimates at the time of plan creation. Overall, the City plans on increasing its total water supply from 39,921 AFY, in 2020 to 73,668 AFY in 2045.

### 2.3.2 Existing Water Capacity Assessment

The City of Ontario's 2020 draft Ontario Water Master Plan (WMP) was prepared by AKM Consulting Engineers to document a multi-year capital improvement program to maintain the City's water utility infrastructure systems in sound operable condition and to meet the level of service expectations of the City over the proposed planning period from 2020 through 2035. The goal of the 2020 WMP was to describe the water distribution system in the City of Ontario, identify system deficiencies, and recommend improvements.

*City Water Capacity Assessment*

The capacity of the City's potable water system was assessed through an initial survey of the City's existing water supply, pumping, and storage facilities in March 2019. Subsequently, Innovyze Infowater, an ArcGIS-based computer modeling program was used to model existing infrastructure, with the exception of laterals, and lines that are private or belong to outside agencies.

*Assessment Parameters and Buildout Assumptions*

Existing flows were modeled using diameter, length, roughness factor, year of installation, pressure zone, and pipe material information for pipelines. Modeling information for junctions included ground elevation, water demand, and diurnal pattern of demand. The system model was then calibrated using available SCADA information and temporary pressure measuring equipment. Additionally, a mass balance analysis was performed for each hydraulic zone.

As described in Table 4-2 in the 2020 WMP, the average day demand is based on the City's average daily production and purchase data between September 2018 and August 2019. As shown in Table 4-5 of the 2020 WMP, the average day demand is 31,153 AFY (19,280 gpm).

Proposed flows were modeled based on a combination of land use information, including the existing 2010 General Plan, specific plans, previous water studies and plans, and a City buildout table completed in 2015. Ultimate buildout conditions modeled include a total of 101,181 DUs and corresponding population of 350,025 and citywide non-residential square footage of 246,573,632. Modeled flows increased from 27.76 MGD under existing conditions to 51.43 MGD under proposed conditions.

As described in the 2020 WMP, the total average day demand and the total water maximum day demand for the future system were estimated to be 57,610 AFY (35,716 gpm) and 88,357 AFY (54,778 gpm), respectively. The process of determining the future system demands for the areas that are going to be developed or redeveloped and distributing the demands in the hydraulic model. The existing demands remained the same unless an area was going to be redeveloped. In summary, the following steps were used to estimate the future demands:

1. Existing meter data was used for existing uses.
2. Used Water Demand Factors included in Table 4-7 in the 2020 WMP to estimate demand for the vacant and future densification areas. In areas of redevelopment the existing demands were updated with the estimated flows for the future development.
3. A "City Buildout Table" approved in April 2015 (in Appendix 4-1 of the 2020 WMP) provided the population and job estimates for all future mixed-use areas as defined by the 2010 General Plan. The unit flow factors provided in Table 4-7 in the 2020 WMP

were used to estimate the total average day water demand for mixed use areas. Any existing water demands were deducted from the total future average water demand estimate. If the existing demands were greater than the calculated future demands, the existing water demand was maintained in the hydraulic model. The difference was then applied to the hydraulic model in the specific mixed-use area.

4. In the OMC, future average water demands were calculated for currently vacant parcels, assuming that they will be developed in the future per the land use designated in the 2010 General Plan. The parcel acreage and the water demand factors provided in Table 4-7 of the 2020 WMP were utilized to estimate the total water demand.
5. All available specific plans and other more current planning information were utilized for OR. The specific plan areas are shown on Figure 4-6 in the 2020 WMP. The City compiled the information and provided table specifying the proposed land uses (Appendix 4-1of the 2020 WMP). The detailed land use information and the water demand factors provided in Table 4-7 in the 2020 WMP were utilized for calculating the future water demands. Demands were applied to the nearest model junction. If less than 50 percent of a specific plan area was constructed at the time of this study, all existing water demand was removed and replaced with the projected future water demand. If a specific plan area was mostly constructed, the difference in existing and future water demand was added to the model in that particular area.
6. On the west side of OR, where no specific plans yet exist, the future water demands were calculated utilizing the 2010 General Plan land uses, parcel acreages, and the water demand factors provided in Table 4-7 in the 2020 WMP. Demands were applied to the nearest model junction.

*Deficiency Criteria and CIP*

Using a hydraulic model analysis combined with useful life evaluation, minimum pipe sizing, and other capacity evaluations, a series of deficient water segments were identified throughout the City's service area. Non-fire flow pipelines with a diameter of less than 8", fire flow pipelines with a diameter of less than 6", and any pipelines constructed before the year 1970 were labeled as deficient for the purpose of analysis.

A total length of 1,083,284 feet of deficient pipeline was identified, ranging in diameter from 2" to 42". The WMP noted that the primary causes of deficiency were either undersized pipelines, or aging, rough pipelines. Table 8 below provides a summary of deficient pipeline lengths identified by analysis in the WMP.

*Table 8 City of Ontario Deficient Pipeline Summary*

| Pipeline Diameter (in) | Length (ft) |
|---|---|
| 4 and less and exceeding useful life | 105,077 |
| 4 and less diameter deficiency | 23,736 |
| 6 and exceeding useful life | 340,904 |
| 6 diameter deficiency | 375,483 |
| 8 exceeding useful life | 65,855 |
| 10 exceeding useful life | 38,295 |

| Pipeline Diameter (in) | Length (ft) |
|---|---|
| 12 exceeding useful life | 50,985 |
| 14 exceeding useful life | 5,472 |
| 16 exceeding useful life | 14,460 |
| 16.5 exceeding useful life | 52 |
| 18 exceeding useful life | 50,159 |
| 19 exceeding useful life | 2,073 |
| 20 exceeding useful life | 2,170 |
| 24 exceeding useful life | 8,275 |
| 42 exceeding useful life | 289 |
| Total | 1,083,284 |

The 2020 WMP recommended implementing a replacement/rehabilitation program for deficient line segments. Capital Improvement Program project categories included Existing System Improvement Projects, Annual Improvement Projects, Condition Projects – Mainline Replacement Program, Condition Projects – Facility Improvement Program, or Future System Development Projects. Additionally, the 2020 WMP identified a series of projects to be included across the City's service area and recommended that 9 new groundwater wells, 2 renovated groundwater wells, 5 new reservoirs, 1 new booster pump station, and 3 new pressure reducing station be incorporated into the District's future water supply planning efforts.

Existing System Improvement Projects have been allocated the largest CIP budget through 2040. Mainline Replacement Program projects are the second largest CIP budget allocation. The remaining budget is for Facility Improvements Program projects and Future System Development projects. Additional detail on these projects and the locations can be found in Section 4.4.

City of Ontario Capital Improvement Program Process

The City's Water Master Plan (WMP) identifies the new infrastructure projects required to support the water use demands for the growth of the City as well as recommends replacement, upsizing, and rehabilitation of existing infrastructure required for service reliability to existing and new water use demands. Select projects to be implemented by the City are included in the Capital Improvement Program (CIP). The City regularly updates its (CIP) project list to prepare for upcoming infrastructure improvements across a 5-year planning horizon. Projects from the WMP are prioritized throughout CIP periods and are selected on an annual basis during Citywide budget planning. The projects selected each year to be added to the budget are driven by the economy and progress of new developments as well as routine maintenance and rehabilitation needed throughout the water system. Once a project is added to the budget list for the City, it is typically implemented within 2-5 years. Projects directly required for new developments are also constructed by developers separate from the City's CIP program. The water infrastructure projects below are currently listed within the City's infrastructure budget and should be constructed in the near future:

New infrastructure projects planned and underway for Ontario Ranch include:

- 24" to 42" Potable Water Transmission Main for the 925' Pressure Zone
- 9 Million Gallon Potable Water Reservoir for the 925' Pressure Zone
- Two New Groundwater Wells Nos. 43 and 53
- Wellhead Treatment Facility for Well No. 50

Replacement infrastructure projects planned and underway for the Old Model Colony developments include:

- Airport Drive 16" Water Main (Developer-constructed) – Improvement located within the Ontario Airport Metro Corridor Growth Area
- G Street 8" Recycled Water and 18" Potable Water Mains (Developer constructed) – Improvement located within the Ontario Airport Metro Corridor Growth Area
- Palmetto Avenue 12" Water Main (Developer constructed) – Improvement located along Palmetto Avenue (not with Growth Area)

Additional water projects including expansion, replacement, and update projects include:

- Ongoing 8" and 12" Potable Water Distribution Main Replacements
- 1348' Zone Reservoir Structural Retrofit
- Emergency Water Interconnections with adjacent water systems
- 30" Potable Water Transmission Main for 1212' Pressure Zone in San Antonio Ave
- Euclid Ave Recycled Water System
- Automated Metering Infrastructure (AMI) Antenna Towers
- Well House Roof Replacements
- Rehabilitate 5 Pressure Reducing Stations
- Haven Recycled Water & Pressure Reducing Station
- Onsite Chlorine Generator Replacements
- Groundwater Well Nos 37 and 39 Wellhead Treatment Facility

## City of Ontario Recycled Water Master Plan

The draft 2020 City of Ontario Recycled Water Master Plan update (RWMP) was created to identify and plan for future recycled water customers and demands. The 2020 RWMP includes an assessment of existing demands, and future demands for both Near-Term and Future buildout horizons. In conjunction with each demand scenario, a hydraulic model analysis was conducted for 24-hour maximum day demands.

No deficiencies were identified in the model under existing conditions. Near-Term and Future Analysis returned recommendations for incorporation of additional pressure reducing valves and an additional pump station, in addition to 9.84 miles and 52.19 miles of proposed pipeline for each respective scenario[7]. Assuming incorporation of recommended projects, no design criteria deficiencies were modeled for Near-Term and Future phases. Recommended projects and distribution lines were incorporated into a recycled water CIP.

[7] Recycled Water Master Plan. City of Ontario Municipal Water Utilities Company. Draft June 2020. Sections and 10.1 and 10.2.

The majority of the recommended improvements are within or adjacent to the Ontario Ranch area and the associated Ontario Ranch Great Park Corridor. However, a number of CIP projects are listed in additional growth areas. It is not anticipated that recycled water conveyance infrastructure will be a constraining factor on growth.

*Table 9 2020 RWMP CIP Projects*

| Growth Area | RWMP CIP Project |
|---|---|
| West Holt Corridor | No projects |
| Historic Downtown & Civic Center | FUT-276 |
| East Holt Corridor | No projects |
| Ontario Airport Metro Center | NT-124, FUT-257, FUT-258 |
| Ontario Ranch Great Park Corridor | New Infrastructure Throughout |
| *NT – Near Term Project*<br>*FUT- Future Project* | |

## 2.4 WATER QUALITY

### 2.4.1 Existing Regulations

See primary water quality regulations summarized below that apply to the City and associated new development and redevelopment associated with this general plan update.

#### Basin Plan for the Santa Ana Region

The State Water Resources Control Board (SWRCB), through its nine Regional Water Quality Control Boards (RWQCBs), developed Regional Water Quality Control Plans (or Basin Plans) that designate beneficial uses and water quality objectives for California's surface waters and groundwater basins, as mandated by both the CWA and the state's Porter-Cologne Water Quality Control Act. Water quality standards are thus established in these Basin Plans and provide the foundation for the regulatory programs implemented by the state. The Santa Ana RWQCB's Basin Plan, which covers the City, specifically (i) designates beneficial uses for surface waters and ground waters, (ii) sets narrative and numerical objectives that must be met in order to protect the beneficial uses and conform to the state's antidegradation policy, and (iii) describes implementation programs to protect all waters in the Region. In other words, the Santa Ana RWQCB Basin Plan provides all relevant information necessary to carry out federal mandates for the antidegradation policy, 303(d) listing of impaired waters, and related Total Maximum Daily Loads (TMDLs), and provides information relative to National Pollutant Discharge Elimination System (NPDES) and Waste Discharge Requirement (WDR) permit limits.

#### Total Maximum Daily Loads (TMDLs)

Once a water body has been listed as impaired on the 303(d) list, a TMDL for the constituent of concern (pollutant) must be developed for that water body. A TMDL is an estimate of the daily load of pollutants that a water body may receive from point sources, non-point sources, and natural background conditions (including an appropriate margin of safety), without exceeding its water quality standard. Those facilities and activities that are discharging into the water body, collectively, must not exceed the TMDL. In general terms, Municipal Separate Storm Sewer System (MS4) and other dischargers within each watershed are collectively responsible for meeting the required reductions and other TMDL requirements by the assigned deadline.

TMDLs have been established for pathogens for the Santa Ana River, Reach 3; Chino Creek, Reach 2, and Chino Creek, Reach 1B; Mill Creek (Prado Area); and the Prado Basin Management Zone. The remaining 303(d) listed impairments shown in Table 10 have not yet been established and are pending approval for TMDL establishments for 2019 to 2021.

*Table 10 List of 303(d) Impairments and TMDLs*

| Water Body/Channel | List of 303(d) Impairments[1] | TMDL |
|---|---|---|
| San Antonio Creek | pH | Pending 2021 TMDL Approval for pH |
| Chino Creek Reach 2 | Indicator Bacteria, pH | Approved TMDL for Indicator Bacteria<br>Pending 2021 TMDL Approval for pH |

| | | |
|---|---|---|
| Chino Creek Reach 1B | COD, Indicator Bacteria, Nutrients | Approved TMDL for Indicator Bacteria<br>Pending 2021 TMDL Approval for COD<br>Pending 2019 TMDL Approval for Nutrients |
| Chino Creek Reach 1A | Indicator Bacteria, Nutrients, | Approved TMDL for Indicator Bacteria<br>Pending 2019 TMDL Approval for Nutrients |
| Cucamonga Creek Reach 1 | Cadmium, Copper, Lead, Zinc | Pending 2021 TMDL Approval for Cadmium, Copper, and Lead<br>Pending 2019 TMDL Approval for Zinc |
| Mill Creek (Prado Area) | Indicator Bacteria, Nutrients, Total Suspended Solids (TSS) | Approved TMDL for Indicator Bacteria<br>Pending 2019 TMDL Approval for Nutrients and TSS |
| Santa Ana River, Reach 3 | Copper, Lead, Indicator Bacteria | Approved TMDL for Indicator Bacteria.<br>Pending 2021 TMDL Approval for Copper and Lead. |
| Prado Basin Management Zone | pH | Approved TMDL for pH |

Source:
2014-2016 California 303(d) List of Water Quality Limited Segments. Retrieved October 2020: http://www.waterboards.ca.gov/water_issues/programs/tmdl/integrated2014_2016.shtml

In addition, the California State Water Resources Control Board (State Board) has adopted the statewide Trash Provisions that requires implementation of Best Management Practices (BMPs) that mitigate or abate trash within Priority Land Use Areas (PLUs). PLUs are defined as, "high density residential, industrial, commercial, mixed urban, and public transportation stations." The purpose of the Trash Provisions is to establish a statewide water quality objective that ensures the quality of surface waters that enter storm drains and eventually lead out to major water ways are free of trash. The City is currently undergoing the process to comply with these new Trash Provisions.

*County of San Bernardino MS4 Permit, Drainage Area Management Plan (DAMP) & Local Implementation Plans (LIP)*

In January 2010, the Santa Ana RWQCB re-issued the San Bernardino County MS4 Storm Water Permit as WDR Order R8-2010-0036 (NPDES Permit No. CAS618036) to the County of San Bernardino, the incorporated cities of San Bernardino County, and the San Bernardino County Flood Control District within the Santa Ana Region. Pursuant to the 2010 MS4 Permit, the co-permittees were required to update and implement a Drainage Area Management Plan

(DAMP) for its jurisdiction, as well as Local Implementation Plans (LIPs), which describe the Co-permittees' urban runoff management programs for their local jurisdictions.

Under the City's LIP, land development policies pertaining to hydromodification and low impact development (LID) are regulated for new developments and significant redevelopment projects. The use of LID Best Management Practices (BMPs) in project planning and design is to preserve a site's predevelopment hydrology by minimizing the loss of natural hydrologic processes such as infiltration, evapotranspiration, and runoff detention. These land development requirements are detailed in the San Bernardino County Technical Guidance Document (TGD), effective September 2013, which cities have incorporated into their discretionary approval processes for new development and redevelopment projects. Within the City's built out system, all runoff ultimately discharges into water storage areas that are used as control/release points. Projects are required to comply with the LID requirements in accordance with the LID hierarchy.

The LID hierarchy requires new developments and re-developments to implement BMPs under the LID hierarchy as described in the TGD. The LID hierarchy requires new projects to first infiltrate, then harvest and reuse, then biofilter stormwater runoff from their project site. In the City of Ontario, infiltration will likely be incorporated for new projects throughout the City as it is comprised of mostly Type A and B soils which typically have high infiltration rates. Groundwater levels throughout the City are below 100 feet below ground surface which is also beneficial for infiltration BMP implementation. In areas where infiltration is determined to be infeasible, either through infiltration testing or groundwater concerns, harvest and reuse BMPs may prove feasible for projects that incorporate ample landscaping and/or have high indoor toilet flushing demands (i.e. hotels). For areas that cannot infiltrate or utilize harvest and reuse systems, projects will be able to biofilter stormwater through biofiltration BMPs such as vegetated swales and bioretention basins.

### 2.4.2 Existing Surface Water Conditions

According to the Santa Ana River Basin Plan (Basin Plan), the channels with existing beneficial uses that serve the City include San Antonio Creek and Chino Creek Reaches 1A, 1B and 2, Cucamonga Creek Reach 1, Day Creek, and Santa Ana River Reach 3.

Notes:
Sources:
-California Regional Water Quality Control Board, Santa Ana Region. 1995 Water Quality Control Plan for the Santa Ana River Basin (Updated 2016). Retrieved October 2020 from https://www.waterboards.ca.gov/santaana/water_issues/programs/basin_plan/docs/2016/Chapter_3_Feb_2016.pdf

General water quality objectives have been prescribed in the Basin Plan for all surface waters within the Santa Ana River Region. In order to maintain the beneficial uses listed in the previous section, inland surface waters must achieve these water quality objectives. Numeric objectives have been established by the Basin Plan for the following surface streams within the City of Ontario, for San Antonio Creek and Day Creek. These water quality objectives are based on the groundwater management zones that exist across the Upper Santa Ana River Subwatershed. See Section 2.4.3 for more details.

In addition to specific numeric water quality objectives, narrative objectives for all surface waters in the Upper Santa Ana River Basin also apply to all surface waters within the City. Narrative objectives have been established for the following constituents[8]:

*Inland Surface Waters*

- Algae
- Ammonia, un-ionized
- Boron
- Chemical Oxygen Demand (COD)
- Chloride
- Chlorine, residual
- Color
- Dissolved Solids, total
- Filtrable Reside, total
- Floatables
- Fluoride
- Hardness (as $CaCO_3$)
- Inorganic Nitrogen, total
- Metals
- Methylene Blue-Activated Substances (MBAS)
- Nitrate
- Nitrogen, total inorganic
- Oil and Grease
- Oxygen, dissolved
- Oxygen, dissolved
- Pathogen Indicator Bacteria
- pH
- Radioactivity
- Sodium
- Sulfate
- Sulfides
- Surfactants (surface-active agents)
- Taste and Odor
- Temperature
- Total Dissolved Solids
- Total Filtrable Residue
- Total Inorganic Nitrogen
- Toxic Substances
- Turbidity

### 2.4.3 Existing Groundwater Conditions

*Regional Groundwater Conditions*

The City lies within the Chino Groundwater Basin ("Chino Basin" or "Basin"). The Chino Basin serves as the primary water source for the City as well as numerous other water suppliers and individual water users. The Chino Basin extends 220 square miles across Los Angeles, San Bernardino, and Riverside counties. The basin contains an estimated 5 million acre-feet of groundwater and has a storage capacity of approximately 1 million acre-feet. The principal surface water body in the Chino Basin is the Santa Ana River, which flows include snowmelt, discharges from recycled water facilities, groundwater, and urban runoff. Tributaries include the San Antonio Creek, Day Creek, and Cucamonga Creek.

The Chino Basin, although considered a single groundwater basin, is divided into five distinct areas, termed "antidegradation" Management Zones (MZs). "Antidegradation" MZ designation is based upon similar hydrologic conditions. The Chino Basin is also divided into three sub-basins based on the Optimum Basin Management Program. These sub-basins, Chino North, East, and South, are considered "maximum benefit" management zones. "Maximum benefit" management zones feature less stringent objectives for Total Dissolved Solids and nitrate and enable the reuse and recharge of recycled water throughout the basin. These "maximum benefit" sub-basins and associated water quality objectives and management apply unless the Regional Board determines that lowering of water quality is not of maximum benefit to the people of the state. In this case, "antidegradation" MZ designation takes priority, as well as their more stringent water quality objectives and use designations.

[8] California Regional Water Quality Control Board, Santa Ana Region. 1995 Water Quality Control Plan for the Santa Ana River Basin (Updated 2016). Retrieved October 2020, from http://www.swrcb.ca.gov/santaana/water_issues/programs/basin_plan/index.shtml

*1978 Chino Basin Judgement*

Pursuant to the terms of the 1978 California Superior Court ruling on *Chino Basin Municipal Water District v. City of Chino, et. al*, the Chino Basin Watermaster (Watermaster) was formed and a 140,000 acre-feet per year (AFY) safe yield and annual production rights for the Chino Basin were created.

The 1978 Chino Basin Judgement (Judgement) created three groundwater pool committees:

- The Overlying Agricultural Pool, including non-producing water districts, non-industrial or commercial water producers, and the State of California.
- The Overlying Non-Agricultural Pool, including commercial and industrial water producers
- The Appropriative Pool, including cities, water districts, and other public and private utilities and water suppliers.

Representatives from each pool serve as an advisory committee to the Chino Basin Watermaster Board, which in turn serves as an arm of the Superior Court in managing the Chino Basin. The Judgement also created a mechanism for unproduced water rights from the Agricultural Pool to be transferred to the Appropriative pool as land is developed and the Basin area transitions from agricultural to urban land uses.

The Judgement has been amended in 2000 and 2007 through agreements that preserve and enhance basin yield and water quality and improve the mechanism for transferring unproduced groundwater rights. A 2015 Safe Yield Reset Agreement reduced safe yield from 140,000 AFY to 135,000 AFY and reallocated the water rights of the basin. In 2020, the Safe Yield was recalculated to 131,000 AFY through June 30, 2030.

*Local Groundwater Conditions*

The City is located in the Chino North "maximum benefit" MZ under the less stringent requirements implemented by the RWQCB. If the RWQCB determines that the lowering of water quality is no longer of maximum benefit, the City is located in the Chino 1 "antidegradation" MZ.

As noted in Section 2.1.1, the City has six basins used for detention and groundwater recharge within its jurisdiction. These basins range in capacity from 200 to 2000 acre-feet and are fed either via gates in the Cucamonga and Day Creeks or passive overflow from adjacent basins. These basins are designed to replenish Chino North, Chino 1, Chino 2, and Chino 3.

*Chino Basin Watermaster 2020 State of the Basin Report*

As part of the reporting process, West Yost prepared a *2020 State of the Basin Report* (SOTBR) for Chino Basin Watermaster. The SOTBR addressed trends in groundwater supply and demand across the basin from 2000 to 2020 and assessed the existing conditions of the Basin.

The SOTBR noted that groundwater levels increased by approximately 10 feet in the western portion of the City and decreased by approximately 10 to 30 feet in the eastern portion of the City from 2000 to 2020. These changes in groundwater levels are a result of effective basin

management and changes in groundwater basin flows over time[9]. The SOTBR made note that a number of trends indicated improved groundwater management and more secure supplies into the future, including groundwater levels, groundwater recharge quantity and sources, and increased use of recycled water and alternative water sources throughout the Basin.

Concentrations of total dissolved solids, nitrate, perchlorate, chromium, arsenic and TCE from 2015 to 2020 monitoring events remained within acceptable ranges for most of the City, and concentrations were often significantly smaller than other basin MZs. However, the southern portion of the City (primarily the Ontario Ranch area) saw concentrations of total dissolved solids, nitrate, and 1,2,3-TCP that exceeded acceptable monitoring level thresholds. Total chromium, hexavalent chromium and PCE levels also exceeded acceptable monitoring level thresholds in the western and northern portions of the City. TCE had exceedances in four regions of the City. Additionally, there are five VOC plumes that fall within the City: General Electric Flatiron, Alger Manufacturing Inc., General Electric Test Cell Plume, Milliken Landfill, and South Archibald. See Attachment C for a map of these plumes.

*Sustainable Groundwater Management Act*

The California Sustainable Groundwater Management Act ("SGMA"), a three-bill package signed into law in 2014, creates a framework for the management of groundwater sources throughout the state. Under SGMA, local agencies form Groundwater Sustainability Agencies ("GSAs") and create Groundwater Sustainability Plans. Timelines and requirements are based upon basin priority. As Chino Basin is an adjudicated groundwater basin and presided over by the Chino Basin Watermaster, traditional SGMA planning and the creation of a Groundwater Sustainability Plan are not required[10]. However, the Chino Basin Watermaster is required to annually submit the following[11]:

- Groundwater elevation data
- Groundwater extraction data for the previous year
- Surface water supply used for or available for groundwater recharge
- Total water use
- Change in groundwater storage

### *Beneficial Uses*

The Basin Plan identifies the Chino Basin groundwater management zone as having four beneficial uses as shown below[12] as outlined in the Water Quality Control Plan for the Santa Ana River Basin:

- MUN – Municipal and Domestic Supply;

[9] Chino Basin Watermaster. 2021. *2020 State of the Basin Report*. Prepared by West Yost. Retrieved here: http://www.cbwm.org/docs/engdocs/State_of_the_Basin_Reports/SOB%202020/2020%20State%20of%20the%20Basin%20Report.pdf

- AGR – Agricultural Supply;
- IND – Industrial Service Supply; and
- PROC – Industrial Process Supply.

*Water Quality Objectives*

Specific water quality numeric objectives have been established for the San Bernardino County groundwater management zones that include the City. In the Chino Basin, four separate management zone designations can apply to the City, each with their own water quality objectives. As noted above, the Chino North "maximum benefit" MZ water quality objectives apply. However, if the RWQCB determines that the lowering of water quality is not of maximum benefit to the people of the State, the Chino 1, Chino 2, and Chino 3 "antidegradation" MZ water quality objectives would apply to the City and surrounding areas[13].

*Table 12 Groundwater Basin Water Quality Objectives*

| Groundwater Management Zone | Total Dissolved Solids Objective (mg/L) | Nitrate (as N) Objective (mg/L) |
|---|---|---|
| Chino North | 420 | 5 |
| Chino 1 | 280 | 5 |
| Chino 2 | 250 | 2.9 |
| Chino 3 | 260 | 3.5 |

Source:
Santa Ana RWQCB. Region 8 Basin Plan Map- Chino Area Groundwater Management Zones. Retrieved October 2020.

In addition to specific numeric water quality objectives, narrative objectives for all groundwater basins in the Upper Santa Ana River Basin also apply to the Chino Basin management zone. Narrative objectives have been established for the following constituents:

- Arsenic
- Boron
- Total Dissolved Solids
- Hardness as $CaCO_3$
- Oil and Grease
- Sodium
- Total Inorganic Nitrogen
- Bacteria, Coliform
- Chloride
- Total Filtrable Residue
- Metals
- pH
- Sulfate
- Toxic Substances
- Barium
- Color
- Fluoride
- Nitrate
- Radioactivity
- Taste and Odor

# 3. THRESHOLDS OF SIGNIFICANCE

California Environmental Quality Act (CEQA) significance criteria are used to evaluate the degree of impact caused by a development project on environmental resources such as hydrology and water quality. According to Appendix G of the CEQA Guidelines, a project would normally have a significant effect on the environment if the project would impact any of the items listed below.

## 3.1 HYDROLOGY & WATER QUALITY THRESHOLDS (CEQA CHECKLIST SECTION X)

Would the Project:

A. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality?
B. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin.
C. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

    (i) Result in a substantial erosion or siltation on- or off-site;
    (ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;
    (iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or
    (iv) Impede or redirect flood flows?

D. In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?
E. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

## 3.2 UTILITIES AND SERVICE SYSTEMS THRESHOLDS (CEQA CHECKLIST SECTION XIX)

Would the Project:

A. Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?
B. Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?
C. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Should the answers to these environmental factors prove to be a potentially significant impact, mitigation measures would be required to reduce those impacts to a less-than-significant threshold.

# 4. ENVIRONMENTAL IMPACTS

The purpose of the proposed conditions evaluation is to determine potential infrastructure impacts associated with the Proposed TOP as compared to the Current TOP associated with drainage, sewer and water systems.

## 4.1 PROPOSED LAND USE CHANGES AND IMPACT ASSESSMENT APPROACH

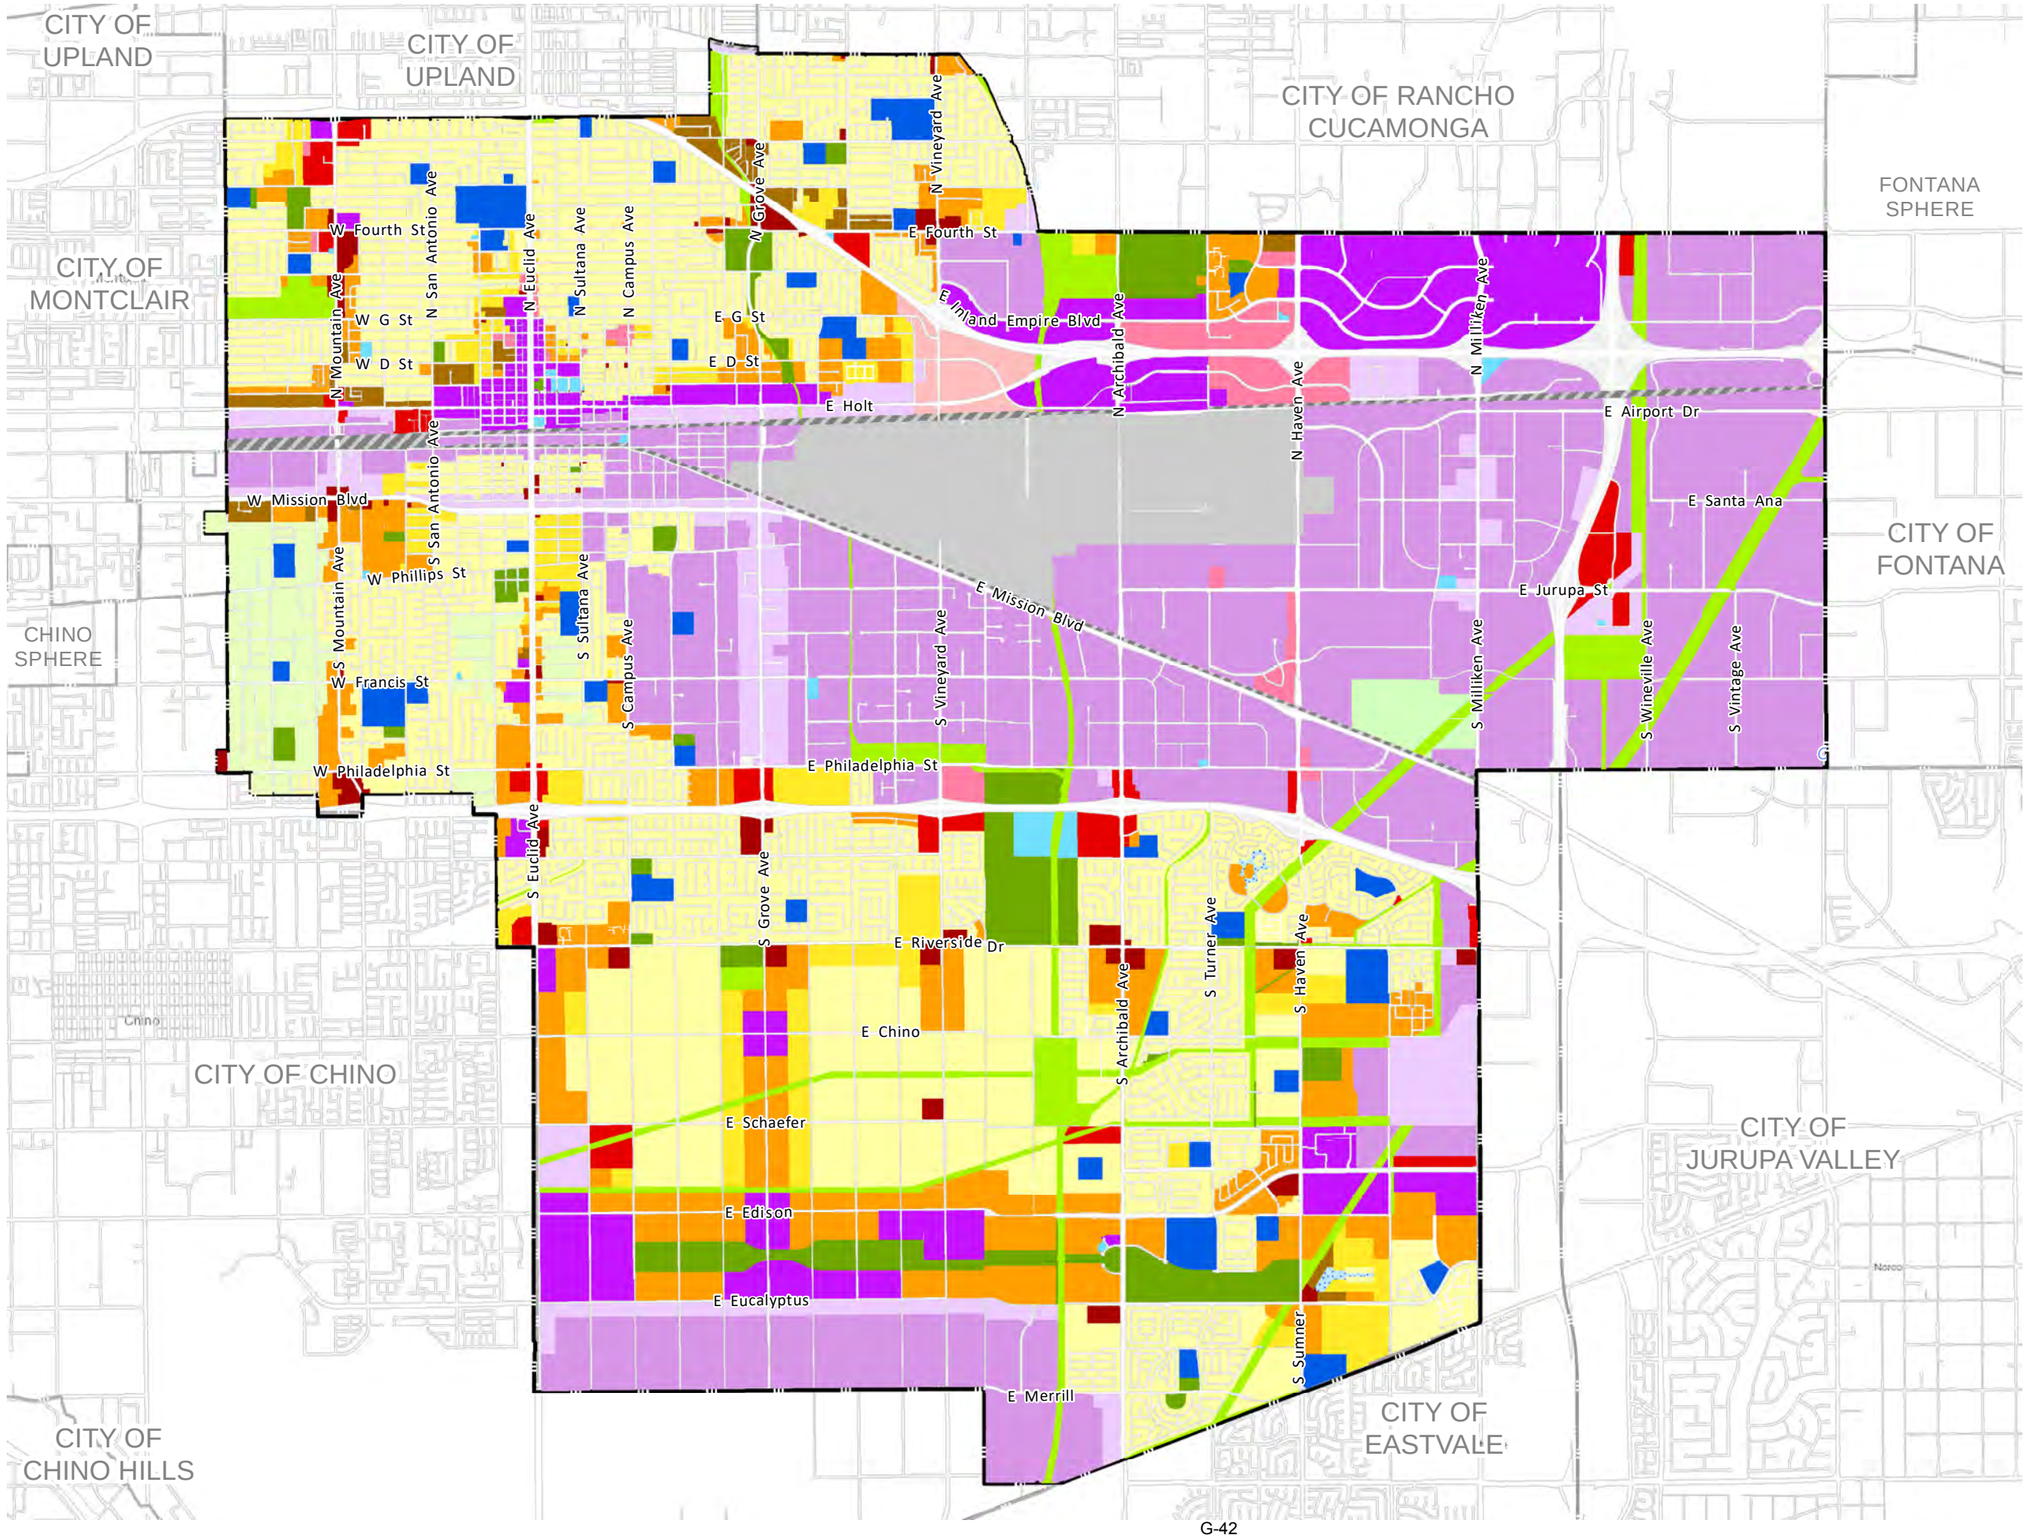
As noted in Section 1, under the Proposed TOP, residential dwelling units will increase by 25,399 DUs and non-residential square footage will be increase by approximately 1.1 million square feet (sf). See summary below for the methodology to assess the infrastructure systems between Current and Proposed TOP:

- Water and Sewer Assessments: Based on the land uses associated with the Proposed TOP, sewer and water flows are anticipated to change as compared to the Current TOP. The Current TOP was utilized in both the SMP and WMP infrastructure planning as well as the 2020 UWMP; therefore, the comparison of Current TOP to Proposed TOP will assist in determining any impacts to existing and proposed sewer and water infrastructure in addition to water supply.

- Drainage Assessment: Identification of drainage impacts from Current to Proposed TOP compares land use designations between the two plans and the impervious values associated with each land use. Where those scenarios result in an increase in impervious conditions and an associated peak flow runoff condition, impacts to the storm drain system will be evaluated.

Additional details are provided below for drainage, sewer and water and the anticipated impacts on infrastructure.

# Proposed Land Use



Date: 2/17/2022

Figure 6

## 4.2 PROPOSED DRAINAGE CONDITION

The purpose of the proposed conditions evaluation is to identify any areas of deficient storm drain systems as well as where peak flow runoff may increase between Current and Proposed TOP.

### 4.2.1 Proposed Hydrology Conditions

As shown by Figure 6, the land uses changes from Current to Proposed TOP may result in an increased imperviousness value for certain parcels. There are no significant changes in land use that would impact imperviousness and peak flow runoff within the northernly Growth Areas (West Holt, Historic Downtown, East Holt, and OAMC).

Most of the changes in land use that may impact peak flow runoff are primarily in the southern part of the City and within the Ontario Ranch Growth Area. However, several of the proposed storm drain lines have not yet been constructed (red-dashed line) and will be designed to convey the ultimate buildout condition. These proposed lines will convey drainage appropriately as new developments come online. For the lines that are already built, the City and County have policies in place to require detention systems to mitigate peak flows if downstream drainage facilities ever become deficient.

In addition, the majority of streams and channels that collect runoff within northernly Growth Areas are concrete lined and not susceptible to scour or erosion (Hydrologic Conditions of Concern Exempt). Therefore, drainage impacts from the Proposed TOP are not anticipated to have any negative impacts of flooding or erosion/siltation.

# Proposed Condition Storm Drain System and Imperviousness Impact Areas

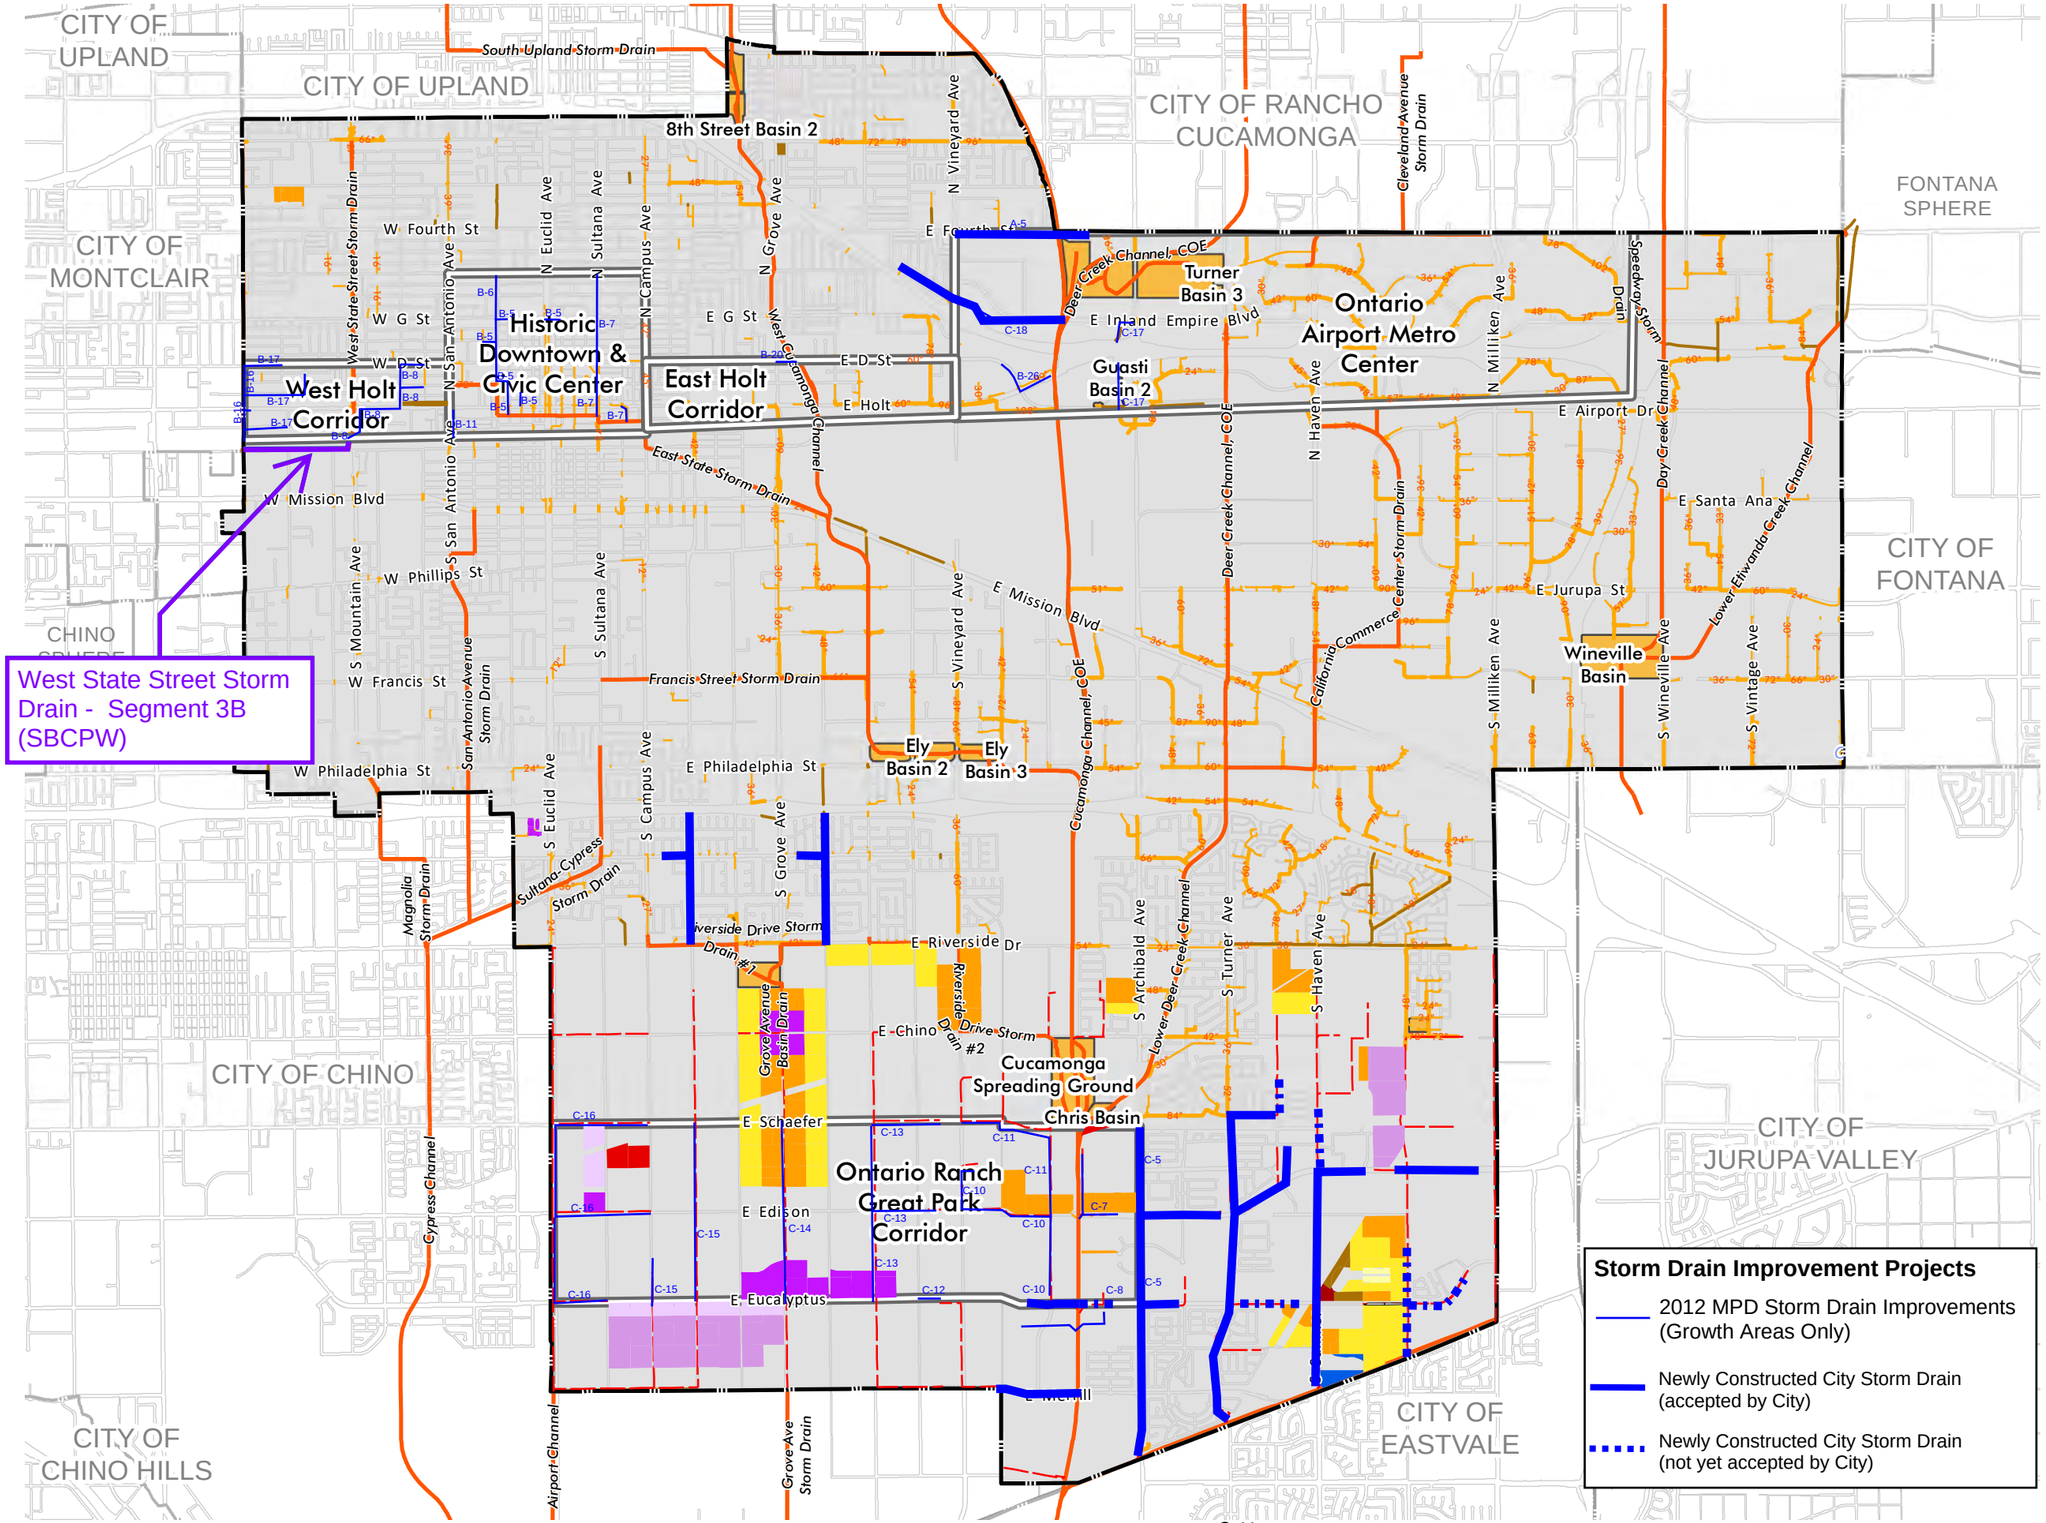


Figure 7

### 4.2.2 Hydrology Impacts

The following impact assessments are based on the significance criteria established in Section 3.1 for hydrology.

*Impact B: Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin.*

Impact Analysis: As noted above, the City's groundwater supplies are from the Chino Groundwater Basin, which is adjudicated and managed by the Chino Basin Watermaster. The City maintains base water rights to 16,337 AFY and receives additional annual water rights from reallocations of unused agricultural water rights and credit for stormwater recharge and recycled water use. As described in the 2020 UWMP, although the Chino Groundwater Basin is a very low-priority basin, the Chino Basin Watermaster has taken proactive actions to sustainably manage the groundwater basin. These actions will enable the City to rely on the Chino Basin as a reliable source of supply.

The Proposed TOP will not impact any groundwater recharge areas throughout the City. New development and redevelopment under the Proposed TOP may allow for increased recharge of groundwater through the implementation of infiltration BMPs associated with the MS4 permit. Therefore, no impacts to groundwater supplies, recharge or sustainable groundwater management are anticipated.

*Impact C: Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:*

*(i) Result in a substantial erosion or siltation on- or off-site;*

*(ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;*

*(iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or*

*(iv) Impede or redirect flood flows?*

Impact Analysis: Drainage patterns from Current TOP to Proposed TOP will largely be maintained, especially for the northerly Growth Areas. In these areas, current runoff is captured and conveyed by existing storm drain infrastructure throughout the City before discharging to County drainage channels and to the Pacific Ocean. As noted above, the City and County have policies in place to require detention systems to mitigate peak flows if downstream drainage facilities ever become deficient. In addition, the majority of streams and channels that collect runoff within northernly Growth Areas are concrete lined and not susceptible to scour or erosion (HCOC Exempt). Erosion or siltation, increased runoff rates, and undersized storm drain lines are not considered to be impacted by the Proposed TOP for the northerly Growth Areas.

The Ontario Ranch Growth Area is one portion of the City, however, that is not exempt from Hydrologic Conditions of Concern.[14] For those areas that are tributary to streams that may be susceptible to scour, hydromodification requirements as part of the regional MS4 permit will ensure these impacts are minimized. In addition, the Proposed TOP modified land use from the Current TOP may increase imperviousness and peak flow runoff. However, many of the storm drain lines that have been designed, or are in design, are sized to accommodate these minor differences in imperviousness between the Current and Proposed TOP. In addition, the City has policies in place to require detention systems associated with new development and redevelopment projects to mitigate against any flooding concerns. Overall impacts to erosion and siltation, peak flow runoff and flooding, and storm drain capacity are anticipated to be less than significant.

## 4.3 SEWER INFRASTRUCTURE

### 4.3.1 Proposed Sewer Flows

As noted above, there will be an overall increase in residential DUs throughout the Growth Areas and remainder of the City. Growth Area non-residential SF will decrease while on a Citywide scale, non-residential SF will increase. This impacts sewer flows within the Growth Areas as well as the City. A breakdown of increases in sewer flows can be found in Table 13, in Attachment A and is shown in Figure 8.

*Table 13 – Proposed Sewer Flows*

| Growth Area | Current TOP Flows | Proposed TOP Flows | Percent Change from Current to Proposed TOP | Change in Sewer Flow (MGD) |
|---|---|---|---|---|
| Historic Downtown & Civic Center | 0.915 | 1.01 | +7% | +0.09 |
| West Holt Corridor | 0.521 | 0.451 | -10% | -0.07 |
| East Holt Corridor | 0.754 | 0.827 | +7% | +0.07 |
| Ontario Airport Metro Center | 4.50 | 5.46 | +18% | +0.96 |
| Ontario Ranch Great Park Corridor | 4.03 | 4.64 | +10% | +0.61 |
| Remainder of City | 23.8 | 24.7 | +2% | +0.90 |
| | | | | |
| | | | *Total Growth Areas* | *+1.66* |
| | | | *Total Citywide* | *+2.55* |

Full implementation of the proposed land use changes associated with the Proposed TOP has the potential to increase sewer flows by 2.55 MGD within the City overall and by 1.66 MGD throughout the Growth Areas. The Growth Areas represent approximately 65% of the proposed increases in water flows throughout the City. These flow estimates are for infrastructure planning purposes only and are considered conservative.

FUSCOE ENGINEERING

### 4.3.2 Proposed Sewer/Wastewater System

As shown above, sewer flows are anticipated to increase from the Current TOP to the Proposed TOP land use throughout the City. Figure 9 identified several sewer pipes that are in need of improvement. The largest increase in sewer flows from Current to Proposed TOP is within the OAMC area which may experience an 18% increase in wastewater flows.

There are four CIP projects planned within two of the Growth Areas. These CIP project locations and extents have changed slightly since the SMP per City planning efforts (see Figure 8).[15] See below for a summary of proposed sewer improvements within Growth Areas that are experiencing an increase in sewer flows from Current to Proposed TOP.

- East Holt – There are two proposed CIP project in the East Holt Growth Area. Project No. 2 at the intersection of Holt Blvd and Grove Ave consists of replacing existing pipe with 12" and 15" pipe. In addition, a new 21" sewer main pipe is proposed to divert flow from Vineyard Ave.

- OAMC – There are two proposed CIP projects in the OAMC Growth Area. Project No. 5 is located south of the I-10 Fwy and west of Archibald Ave and proposes to upsize existing 8" pipes to 12" diameter pipes. Project No. 6 is located along Old Guasti Road between Turner Ave and Archibald Ave and proposes to upsize existing 8" pipes to 12" diameter pipes.

For the Ontario Ranch Growth Area, sewer flows are anticipated to increase 10% from Current TOP to Proposed TOP. It has been confirmed by the City that the sewer infrastructure throughout this Growth Area has been sized to accommodate sewer flows associated with the Proposed TOP. Therefore, there are no impacts from the Proposed TOP on sewer infrastructure within the Great Park Growth Area.

The City has policies in place to require improvements to sewer infrastructure as part of new development and redevelopment in addition to their CIP process. The City has the discretion to require additional sewer capacity studies associated with new and redevelopments and is currently performing site specific studies of certain areas of the sewer system. Based on the results of these studies, the City has policies to require development fees to help support infrastructure improvements required for the sewer system.

With respect to wastewater treatment, IEUA has two facilities that serve the City of Ontario: RP-1 and RP-5 as discussed in Section 2.2. The current combined capacity of these two facilities is 60.3 mgd and would increase to 66.5 mgd once the expansion project at RP-5 is completed. IEUA can route flows to either of the two facilities as needed. In 2020, RP-1 treats an average wastewater flow of 25 mgd, and RP-2 treats an average wastewater flow of 8 mgd. Therefore, these two WWTPs have a current combined treatment rate of 33 mgd.

The excess capacity for the two facilities is 27.3 mgd under current conditions. After the expansion project at RP-5 is complete in 2025, excess capacity would increase to 33.5 mgd.

[15] Call with City staff on November 24, 2021.

There are additional plans to increase the treatment capacity of RP-5 to 30 mgd by 2040; the combined treatment capacity of both WWTPs would be 74 mgd.[16]

The 2021 wastewater flow rate for Ontario is estimated to be 10.39 mgd, and the wastewater flow rate for the TOP 2050 buildout is estimated to be 37.31 mgd. The additional flow with implementation of the Proposed Project would be 26.92 mgd (37.31 – 10.39). Since the excess capacity of the two WWTPs in 2025 is 33.5 mgd, the additional flow rate from the Proposed Project of 26.92 mgd would not exceed the capacity of the wastewater treatment providers.

In addition, IEUA has seen a decrease in the volume of sewage flows of approximately 10 percent since 2013, even as the population has increased.[17] This is a result of a decrease in indoor water consumption with the installation of more efficient plumbing fixtures and compliance with California Green Building Standards Code for new developments. IEUA anticipates a significant increase in the growth of its service area in the next ten years, with 40 percent of the growth resulting from new development in Ontario. The projected increase in population growth rates and corresponding increase in wastewater flows have been accounted for in IEUA's capital improvement projects, with expansions of both RP-1 and RP-5 scheduled for completion by 2035.

### 4.3.3 Sewer/Wastewater Impacts

The following impact assessments are based on the significance criteria established in Section 3.2 for wastewater.

*Impact A.* *Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?*

Impact Analysis: The estimated increase of 2.55 MGD in sewer flows under the Proposed TOP is not anticipated to exceed the projected future capacity of the City of Ontario's wastewater infrastructure or IEUA's regional infrastructure. As noted above, there are two Growth Areas that have CIP projects that will experience an increase in sewer flows under the Proposed TOP. However, the City has processes in place to ensure these improvement projects get implemented prior to or during new development.

The City maintains a regularly updated Sewer Master Plan and CIP and has a process in place to assess local sewer impacts on a project-by-project basis. The City's most recent Sewer Master Plan update occurred in June 2020. The 2020 SMP was a draft update to a sewer capacity analysis performed in 2012. This updated SMP will continue to serve as a sewer infrastructure planning tool to make informed decisions about when CIP projects are warranted. As noted above, the OMUC department regularly updates its CIP project list to prepare and budget for upcoming infrastructure improvements across a 5-year planning horizon as well as ensure the

[16] IEUA Website, accessed 3-22-2022. Found here: https://www.ieua.org/regional-water-recycling-plant-no-5-expansion-project/
[17] IEUA Fiscal Year 2015/16 Ten-Year Capital Improvement Plan

sewer system is functioning effectively. Therefore, at a citywide scale, the City's Sewer Master Plan and CIP process adequately prioritizes necessary projects as developments under The Ontario Plan come online. IEUA similarly regularly updates long-term planning documents which include provisions for improving regional treatment plant and conveyance infrastructure capacity and works closely with the City on improvement projects within the City's boundary.

In addition, there are several new sewer infrastructure projects proposed throughout the Ontario Ranch Growth Area. Construction impacts associated with sewer infrastructure to support development within the Growth Areas and throughout the City would primarily be confined to trenching for utility lines and connections to public infrastructure. A Construction Management Plan, which would ensure safe pedestrian access as well as emergency vehicle access and safe vehicle travel in general, will be implemented to reduce any temporary pedestrian and traffic impacts occurring as a result of construction activities. Moreover, when considering impacts resulting from the installation of any required sewer infrastructure, all impacts are of a relatively short-term duration and would cease to occur once the installation is complete. In addition, see Section 4.5.3 for additional requirements during construction that would prevent against water quality impacts. Therefore, impacts from installation of new sewer infrastructure lines would be less than significant.

*Impact C.* *Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?*

Impact Analysis: As described above, since the excess capacity of the two WWTPs in 2025 is 33.5 mgd, and the additional flow rate from the Proposed TOP is 26.92 mgd (Proposed TOP of 37.31 mgd minus 2021 flows of 10.39 mgd)., it can be concluded that IEUA has adequate capacity within the system to accommodate the Proposed TOP increase in sewer flows. IEAU utilizes a robust CIP process and relies on internal capacity modeling, population projects and land use projections, independent of The Ontario Plan update buildout estimates. As referenced in Section 4.3.2, these lines will be able to handle the increase of 2.55 MGD proposed under the Proposed TOP. Through updating appropriate master plans, long-term capital improvement budgets, and plant capacity assessments, it is anticipated IEUA will be able to receive increases in flows consistent with the buildout proposed under implementation of the TOP. No impacts are anticipated to service provider capacities.

## 4.4 WATER INFRASTRUCTURE & SUPPLY

### 4.4.1 Proposed Water Flows

As noted above, there will be an overall increase in residential DUs throughout the Growth Areas and remainder of City. Growth Area non-residential SF will decrease while on a Citywide scale, non-residential SF will increase. This impacts water demands within the Growth Areas as well as the City. A breakdown of increases in water demands can be found in in Table 14, Attachment B and are shown in Figure 9.

*Table 14 – Proposed Water Flows*

| Growth Area | Current TOP Water Demand | Proposed TOP Water Demand | Percent Change from Current to Proposed TOP | Change in Water Demand (MGD) |
|---|---|---|---|---|
| Historic Downtown & Civic Center | 1.22 | 1.35 | +10% | +0.13 |
| West Holt Corridor | 0.677 | 0.598 | -12% | -0.08 |
| East Holt Corridor | 0.975 | 1.05 | +8% | +0.07 |
| Ontario Airport Metro Center | 5.46 | 6.56 | +20% | +1.10 |
| Ontario Ranch Great Park Corridor | 6.22 | 6.82 | +10% | +0.60 |
| Remainder of City | 37.3 | 38.5 | +3% | +1.21 |
| | | | | |
| | | | *Total Growth Areas* | *+1.82* |
| | | | *Total Citywide* | *+3.03* |

Full implementation of the proposed land use changes associated with the Proposed TOP has the potential to increase water demands by 3 MGD within the City overall and by 1.8 MGD throughout the Growth Areas. The Growth Areas represent approximately 60% of the proposed increases in water demand throughout the City between the two plans.

FUSCOE ENGINEERING

### 4.4.2 Proposed Water System & Supply

#### Water Infrastructure

As shown above, water demands are anticipated to increase from the Current TOP to the Proposed TOP land use throughout the City. The CIP figure from the WMP identified several water lines that are in need of improvement that are shown in Attachment B. The largest increase in water demands from Current to Proposed TOP is within the OAMC area which may an experience a 20% increase in water demands. There are some improvements and CIP projects within this area, as well as the other three northerly Growth Areas.

For the Ontario Ranch Growth Area, water demands are anticipated to increase 10% from Current TOP to Proposed TOP. Some of the proposed water lines throughout this Growth Area have already been constructed or are currently in design/ under construction. These water lines are conservatively sized for fire flow requirements that exceed average daily demand calculated in this analysis. Therefore, it is anticipated these water lines can accommodate a 10% increase in average daily flows as confirmed by OMUC.

The City has policies in place to require improvements to water infrastructure as part of new development and redevelopment in addition to their CIP process described in more detail in Section 2.3.2. The City has the discretion to require additional water hydraulic capacity studies associated with new and redevelopments and it currently requires site specific studies to determine a project's impact throughout the water system. Based on the results of these studies, the City has policies to require development fees to help support infrastructure improvements required for the water system.

#### Water Supply

As noted above, the City's 2020 UWMP estimated demands to increase from 39,921 AFY in 2020 to 73,668 AFY in 2045. The Proposed TOP yields a total water demand of 78,128 AFY which is greater than the 2045 UWMP total water demand. However, this methodology is considered conservative as the unit water demand factors implemented are based on past or historical water uses for the purpose of sizing water pipes to convey average and peak daily water flows, not to accurately estimate actual water use within the City.

The following state laws, changes in the building code, and water service costs are anticipated to substantially lower water demand rates throughout the state:

- SB 606 and AB 1668, which establish indoor water use standards (55 gallons/person/day until 2025 and then drops to 50 gpcd), outdoor water standards, and water loss standards that water suppliers must meet by 2025
- New construction is subject to CalGreen Code requirements, which results in a typical 20% reduction in indoor water use
- SB 407, which requires all buildings in California to meet current plumbing fixture standards within this decade, which will require retrofitting of existing homes and businesses
- Increases in water service costs, which will provide an incentive for additional water-saving practices

If applying these requirements to the Proposed TOP land use and implementing 50 gpd/person for all residential uses (SB 606 and AB 1668) and a 20% reduction in non-residential uses (CalGreen and new building code requirements), actual water demands in 2045 are estimated to fall well below the 2045 UWMP estimate of 73,668 AFY to an approximate 60,000 AFY (see Attachment B for reduced water demand calculations). In addition, in instances where CEQA-threshold project categories are triggered, the City is able to track water supply on a project by project level via Water Supply Assessments (SB 610) to ensure adequate supplies exist to support new development.

### 4.4.3 Water System Impacts

The following impact assessments are based on the significance criteria established in Section 3.2 for water systems.

*Impact A* **Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?**

Impact Analysis:
The City maintains a regularly updated Water Master Plan (WMP) that identifies deficiencies and necessary improvement projects throughout its service area. Improvement projects are regularly incorporated into the City's CIP based on priority. There are several lines identified as needing upsizing for fire flow or replacement due to age. As noted above, the City has the discretion to require additional water hydraulic capacity studies associated with new and redevelopments to confirm if deficiencies exist as new development comes online. Based on the results of these studies, the City has policies to require development fees to help support infrastructure improvements required for the water system.

In addition, there are several new water infrastructure lines proposed throughout the Ontario Ranch Growth Area. Construction impacts associated with water infrastructure to support development within the Growth Areas and throughout the City would primarily be confined to trenching for utility lines and connections to public infrastructure. A Construction Management Plan, which would ensure safe pedestrian access as well as emergency vehicle access and safe vehicle travel in general, will be implemented to reduce any temporary pedestrian and traffic impacts occurring as a result of construction activities. Moreover, when considering impacts resulting from the installation of any required water infrastructure, all impacts are of a relatively short-term duration and would cease to occur once the installation is complete. In addition, see Section 4.5.3 for additional requirements during construction that would prevent against water quality impacts. Therefore, impacts from installation of new water lines would be less than significant.

*Impact B* **Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?**

Impact Analysis:

As noted above, the City's 2020 Draft UWMP highlighted sufficient surface, imported and groundwater supplies through 2045 to meet projected demands in normal, dry and multiple dry years. Although the Proposed TOP is estimated to generate a higher water demand using conservative water demand factors, new state and federal requirements (SB 606 and AB 1668, SB 407) will require enhanced water efficiency and conservation. Applying these components to water demand estimates here bring total water use below projections within the 2045 UWMP. As mentioned, in instances where CEQA-threshold project categories are triggered, the City is also able to track water supply on a project by project level via Water Supply Assessments (SB 610) to ensure adequate supplies exist to support new development. Impacts to water supply from the Current to Proposed TOP are not anticipated to be significant.

## 4.5 WATER QUALITY

### 4.5.1 Construction Activities

Clearing, grading, excavation and construction activities associated with the proposed project may impact water quality due to sheet erosion of exposed soils and subsequent deposition of particulates in local drainages. Grading activities, in particular, lead to exposed areas of loose soil, as well as sediment stockpiles, that are susceptible to uncontrolled sheet flow. Although erosion occurs naturally in the environment, primarily from weathering by water and wind action, improperly managed construction activities can lead to substantially accelerated rates of erosion that are considered detrimental to the environment.

*Construction General Permit*

Prior to the issuance of grading permits, the project applicants shall provide evidence that the development of projects with one acre or greater of soil disturbance shall comply with the most current Construction General Permit (CGP) and associated local National Pollutant Discharge Elimination System (NPDES) regulations to ensure that the potential for soil erosion is minimized on a project-by-project basis. In accordance with the updated CGP (Order No. 2009-0009-DWQ, as amended by 2010-0014-DWQ and 2012-0006-DWQ), the following Permit Registration Documents are required to be submitted to the SWRCB prior to commencement of construction activities:

- Notice of Intent (NOI)
- Risk Assessment (Standard or Site-Specific)
- Particle Size Analysis (if alternative risk assessment is performed)
- Site Map
- SWPPP
- Active Treatment System (ATS) Design Documentation (if ATS is determined necessary)
- Annual Fee & Certification

In accordance with the existing and updated CGP, a construction SWPPP must be prepared and implemented at all construction projects with 1 acre or greater of soil disturbance, and revised as necessary, as administrative or physical conditions change. The SWPPP must be made

available for review upon request, shall describe construction BMPs that address pollutant source reduction, and provide measures/controls necessary to mitigate potential pollutant sources. These include, but are not limited to: erosion controls, sediment controls, tracking controls, non-storm water management, materials & waste management, and good housekeeping practices.[18]

Prior to commencement of construction activities throughout the City, the project-specific SWPPP(s) will be prepared in accordance with the site specific sediment risk analyses based on the grading plans, with erosion and sediment controls proposed for each phase of construction for the individual project. The phases of construction will define the maximum amount of soil disturbed, the appropriately sized sediment basins and other control measures to accommodate all active soil disturbance areas and the appropriate monitoring and sampling plans.

### 4.5.2 Post-Construction Activities

With the proposed land use changes, development resulting from the Proposed TOP may result in long-term impacts to the quality of storm water and urban runoff, subsequently impacting downstream water quality. Developments can potentially create new sources for runoff contamination through changing land uses. As a consequence, developments within individual Growth Areas and the City as a whole may have the potential to increase the post-construction pollutant loadings of certain constituent pollutants associated with the proposed land uses and their associated features, such as landscaping and plaza areas.

To help prevent long-term impacts associated with land use changes and in accordance with the requirements of the City and consistency with San Bernardino MS4 permit (ORDER NO. R8-2010-0036, NPDES NO. CAS618036), new development and significant redevelopment projects must incorporate LID/site design and source control BMPs to address post-construction storm water runoff management.

Since the TOP does not include a specific or detailed development plan, project specific WQMP(s) will not be required at this time. Future project specific WQMPs, preliminary and/or final, will be prepared consistent with the prevailing terms and conditions of the City's requirements and San Bernardino County Public Works templates and forms[19], OC DAMP, and Model WQMP at the time of project application. Moreover, LID and water quality treatment solutions prescribed in project specific WQMPs shall be designed to support or enhance the regional BMPs and efforts implemented by the City as part of their City-wide efforts to improve water quality.

*Consistency with the State-wide Trash TMDL*

As part of the state-wide mandate to reduce trash within receiving waters, the City is required to adhere to the requirements of the amended CA Trash Total Maximum Daily Load (TMDL) from July 2016 onwards. The requirements will include the installation and maintenance of trash screening devices at all public curb inlets, grate inlets and catch basin inlets. The trash screening

[18] California Stormwater Quality Association. (2003, January). *Stormwater Best Management Practices Handbook for New Development and Redevelopment*. Retrieved March 20, 2020, from http://www.cabmphandbooks.com

[19] San Bernardino County Department of Public Works WQMP Templates and Forms. Found here: http://cms.sbcounty.gov/dpw/Land/WQMPTemplatesandForms.aspx

devices must be approved by the local agency and consistent with the minimum standards of the Trash TMDL.

Each of these opportunities should be evaluated to determine feasibility and appropriateness for the proposed development and redevelopment projects within the City.

### 4.5.3 Water Quality Impacts

The impact assessments are based on the significance criteria established in Section 3.2 for water quality.

*Impact A* *Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality?*

Impact Analysis:
The Construction General Permit (statewide regulation) and the San Bernardino MS4 permit (regional permit as required under NPDES) are designed to protect receiving water quality standards. Waste discharge requirements (WDR's) are defined for specific individual developments/entities that are required to comply with additional regulations (e.g. the industrial general permit) prior to occupancy. Through compliance with State and Local regulations covering construction and post-construction activities, storm water runoff impacts to local receiving waters will be effectively mitigated. Construction sites of 1 acre or larger will be required to prepare and implement a Storm Water Pollution Prevention Plan (SWPPP) in accordance with the requirements of the Statewide CGP and subject to the oversight of the Santa Ana Regional Water Quality Control Board. The SWPPP must include BMPs to reduce or eliminate erosion and sedimentation from soil disturbing activities, as well as proper materials and waste management to reduce the potential for pollutants to enter receiving waters. Monitoring and reporting on SMARTS are also required compliance measures within the CGP. In terms of post-construction related impacts, the incorporation of site design, LID features and BMPs as required under the San Bernardino MS4 Permit are designed to remove pollutants of concern up to specific size storm events related to land development and designed to protect water quality. Therefore, impacts to surface water and groundwater quality are considered less than significant.

*Impact D* *In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?*

Impact Analysis: The City has a policy to avoid placing new housing within 100-year flood hazard areas based on FEMA's floodplain maps. All existing housing within Flood Zone A's and AE's require flood insurance. As noted in Impact Analysis C in Section 4.2.2, the City and County regularly maintain and improve storm drain and flood control infrastructure based on priority which can reduce the threat of flooding over time. New developments will comply with all pertinent flood control regulations.

*Impact E* *Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?*

Impact Analysis: As noted above, the City's groundwater supplies are from the Chino Groundwater Basin, which is adjudicated and managed by the Chino Basin Watermaster. As described in the 2020 UWMP, the Chino Basin Watermaster has taken proactive actions to sustainably manage the groundwater basin. These actions will enable the City to rely on the Chino Basin as a reliable source of supply.

The Proposed TOP will not impact groundwater management within the Chino Groundwater Basin from a water supply or quality perspective. New development and redevelopment under the Proposed TOP may allow for increased recharge of groundwater through the implementation of infiltration BMPs associated with the MS4 permit. In addition, through this BMP selection process under MS4 requirements, groundwater quality will also be protected to ensure no high pollutant land uses infiltrate that would negatively impact groundwater quality, beneficial uses or water quality objectives as stated in the Water Quality Control Plan. Therefore, no impacts to sustainable groundwater management are anticipated.

# 5. CONCLUSION

The City of Ontario utilizes a robust master planning and capital improvement system to ensure that deficiencies are identified and addressed in a timely manner. No major infrastructure-related constraints to growth throughout the City or within the Growth Areas have been identified.

# 6. TECHNICAL ATTACHMENTS

NOTES:

1.New Regulations. The following state laws, changes in the building code, and water service costs are anticipated to substantially lower water demand rates throughout the state:

•SB 606 and AB 1668, which establish indoor water use standards (55 gallons/person/day until 2025 and then drops to 50 gpcd), outdoor water standards, and water loss standards that water suppliers must meet by 2025

•New construction is subject to CalGreen Code requirements, which results in a typical 20% reduction in indoor water use

•SB 407, which requires all buildings in California to meet current plumbing fixture standards within this decade, which will require retrofitting of existing homes and businesses

•Increases in water service costs, which will provide an incentive for additional water-saving practices

2. Reduction in Water Demand Factors. To reflect the requirements listed in note 1, the following assumptions are included in this table:

•50 gpd/person was assumed for all residential uses to account for requirements of SB 606 and AB 1668.

•A 20% reduction, compared to the rates published in the Draft WMP, was assumed for all non-residential uses to account for changes in CalGreen and new building code requirements listed in note 1.

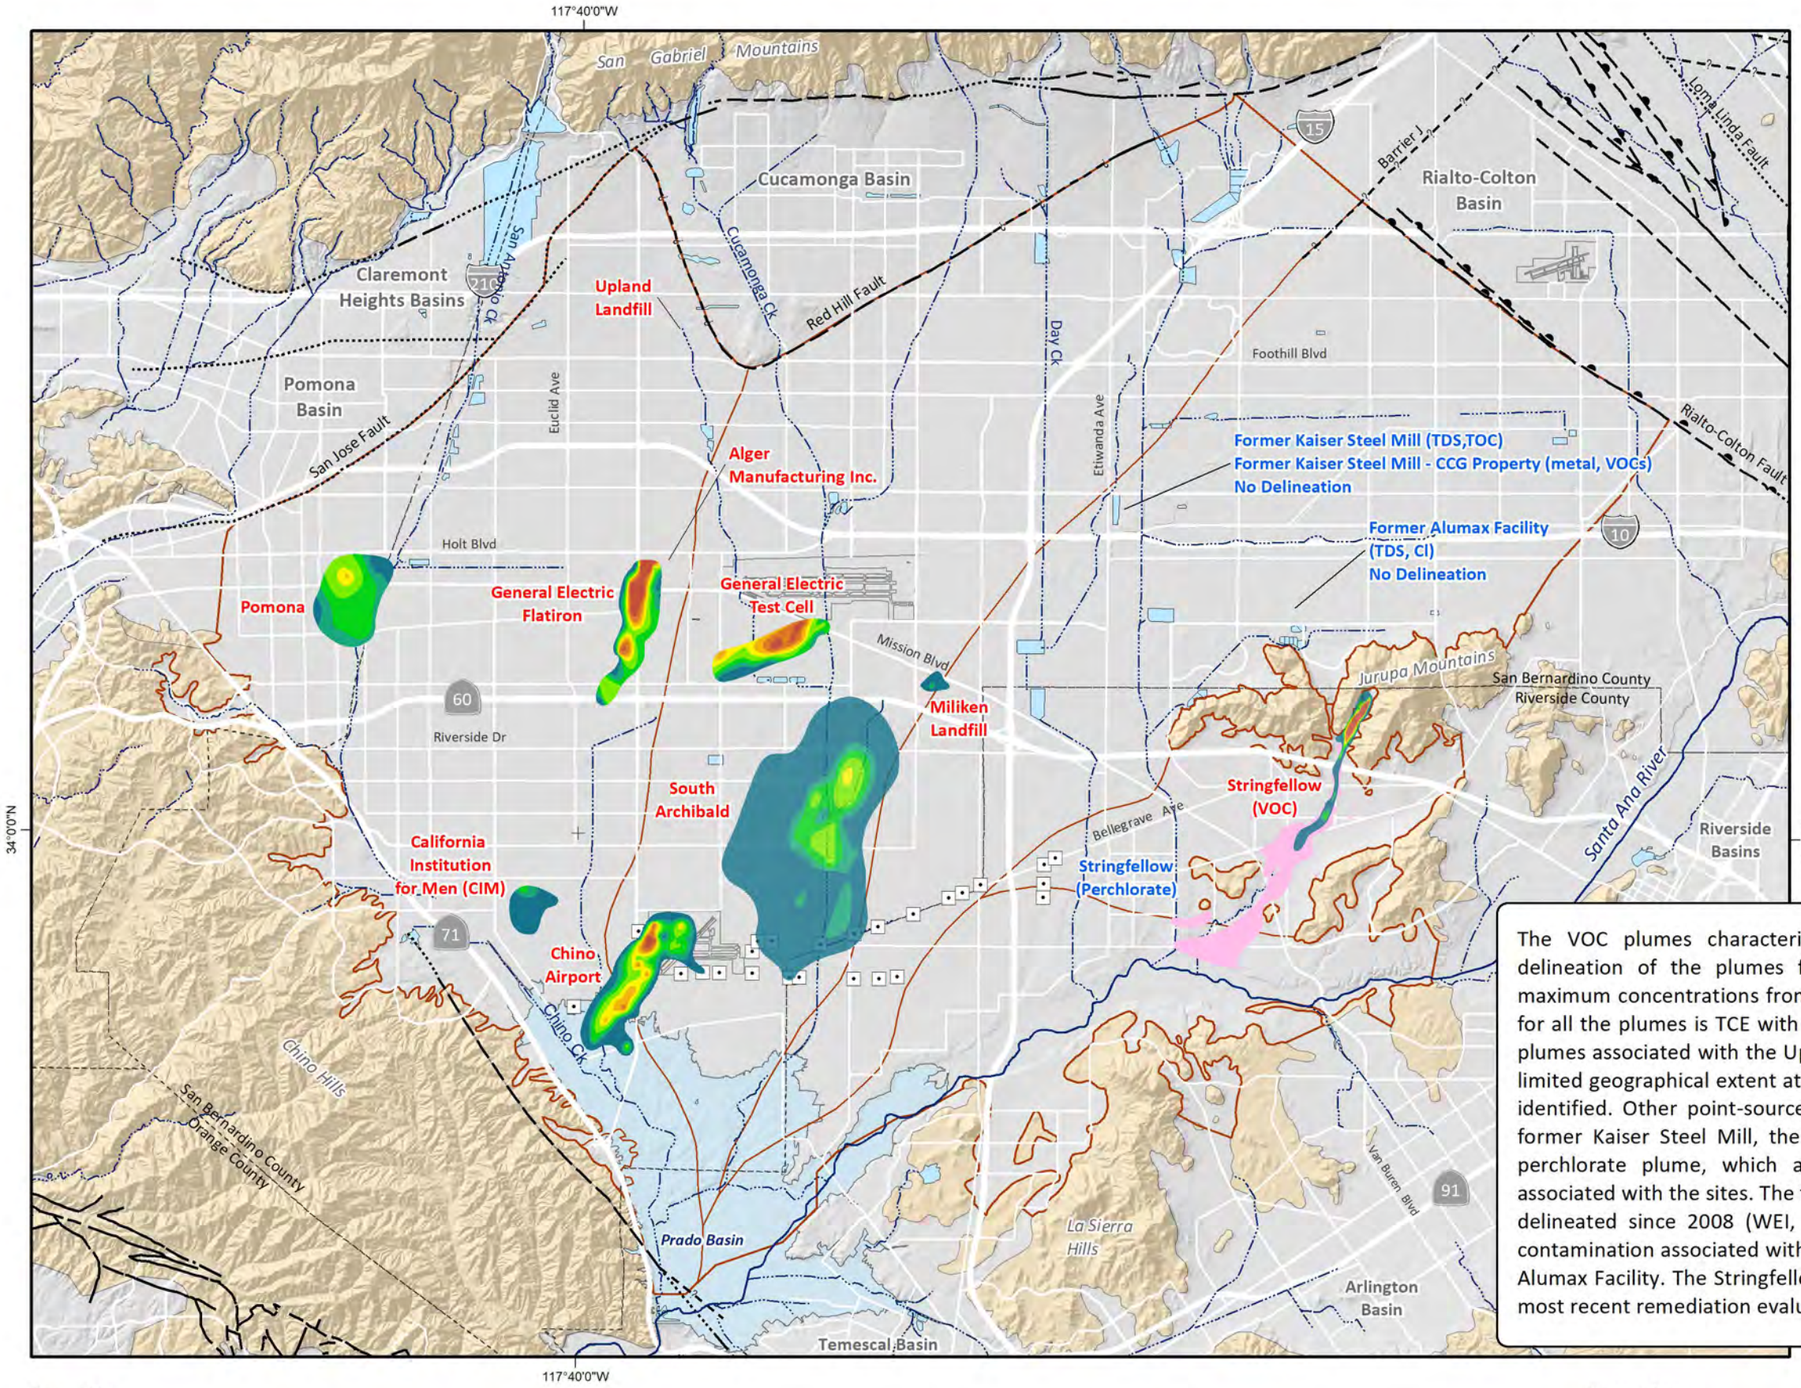
## CHINO BASIN GROUNDWATER PLUME MAP



VOC Concentration (µgl)

- > 0 to ≤ 5
- > 5 to ≤ 10
- > 10 to ≤ 20
- > 20 to ≤ 50
- > 50 to ≤ 100
- > 100 to ≤ 200
- > 200 to ≤ 500
- > 500

* VOC Plumes Labeled in Red by Name

**Other Plumes**

*Labled in Blue by Name and Dominant Contaminant

Other key map features are described in the legend of Exhibit 1-1.

The VOC plumes shown on this map are generalized illustrations of the estimated spatial extent of TCE or PCE, based on the maximum concentration measured at wells from July 2015 to June 2020. The estimated spatial distribution of VOC concentrations were generated by an ordinary kriging method performed using PyKrige, a kriging toolkit for Python. The experimental semivariograms were approximated using a spherical semivariogram whose parameters (range, sill and nugget) and anisotropy (ratio and angle) were chosen through trial and error, taking into account local groundwater flow directions predicted by the Chino Basin groundwater flow model. The plume extents were determined based on measured concentrations and local groundwater flow patterns.

The VOC plumes characterized by color ramp are Watermaster's most recent delineation of the plumes for the primary contaminant based on the five-year maximum concentrations from July 2015 to June 2020. The primary VOC contaminant for all the plumes is TCE with the exception of the CIM plume, which is PCE. The VOC plumes associated with the Upland Landfill and the Alger Manufacturing Facility are of limited geographical extent at the scale of this map, so only their general locations are identified. Other point-source contamination plumes in the Chino Basin include the former Kaiser Steel Mill, the former Alumax Facility, and the Stringfellow NPL Site perchlorate plume, which are labeled by name and the primary contaminants associated with the sites. The former Kaiser Steel Mill TDS and TOC plume has not been delineated since 2008 (WEI, 2008b), and there are no plume delineations for the contamination associated with the former Kaiser Steel Mill CCG Property or the former Alumax Facility. The Stringfellow perchlorate plume shown here was delineated in the most recent remediation evaluation report for the site (Kleinfelder, 2019).

## Sec. 5-29.01. Declaration of findings and policy.

It is hereby found and declared that:

(a) The making and creation of excessive, unnecessary or unusually loud noises within the limits of the City is a condition that has existed for some time, however, the extent and volume of such noises is increasing;

(b) The making, creation or maintenance of such excessive, unnecessary, unnatural or unusually loud noises that are prolonged, unusual and unnatural in their time, place and use affect and are a detriment to public health, comfort, convenience, safety, welfare and prosperity of the residents of the City; and

(c) The necessity in the public interest for the provisions and prohibitions hereinafter contained and enacted, is declared as a matter of legislative determination and public policy, and it is further declared

that the provisions and prohibitions hereinafter contained and enacted are in pursuance of and for the purpose of securing and promoting the public health, comfort, convenience, safety, welfare and prosperity and the peace and quiet of the residents of the City.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.02. Definitions.

As used in this chapter, specific words and phrases are defined as follows:

(a) "Ambient noise level" shall mean the all-encompassing noise level associated with a given environment and is a composite of sounds from all sources, excluding the alleged offensive noise or excessive sound, at the location and approximate time at which a comparison with the alleged offensive noise is to be made.

(b) "Applicable (noise) zone" shall mean the noise zone category based on the actual use of the property, provided that the actual use is a legal use in the City.

(c) "A-weighted sound level" shall mean the sound pressure level in decibels (dBAs) as measured with a sound level meter using the A-weighted filter network (scale) at slow response and at a pressure of twenty (20) micropascals. The A-weighted filter de-emphasizes the very low and a very high frequency component of sound in a manner similar to the response of the human ear, and is a numerical method of rating human judgment of loudness.

(d) "Decibel (dBA)" shall mean a unit for measuring the amplitude of a sound, equal to twenty (20) times the logarithm to the base ten (10) of the ratio of pressure of the sound measured to the reference pressure of twenty (20) micropascals.

(e) "Equivalent sound or noise level (Leq)" shall mean the International Electrotechnical Commission (IEC) 60804 Standard for measurement, or the most recent revision thereof, for the sound level corresponding to a steady state noise level over a given sample period with the same amount of acoustic energy as the actual time varying noise level or the energy average noise level during the sample period. The measurement period for the purposes of this chapter is fifteen (15) minutes.

(f) "Impulsive noise" shall mean a noise of short duration usually less than one (1) second and of high intensity, with an abrupt onset and rapid decay. Such objectionable noises may also be repetitive.

(g) "Intrusive noise" shall mean that noise that intrudes over and above the ambient noise at a given location. The relative intrusiveness of a sound depends upon its amplitude, duration, frequency, time of occurrence and tonal information content, as well as the prevailing ambient noise level.

(h) "Maintenance" shall mean the upkeep, repair or preservation of existing property or structures.

(i) "Noise" shall mean any unwanted sound or sound that is undesirable because it interferes with speech and hearing, or is intense enough to damage hearing or is otherwise annoying.

(j) "Noise level (sound level)" shall mean the weighted sound pressure level obtained by use of a sound level meter having a standard frequency filter for attenuating part of the sound spectrum. For purposes of this chapter, all noise levels (sound levels) shall be A-weighted sound pressure level.

(k) "Noise (sound) level meter" shall mean an instrument, including a microphone, an amplifier, an output meter and frequency weighting networks for the measurement and determination of noise and sound levels. For the purposes of this chapter, the sound level meter must meet the International Electrotechnical Commission (IEC) 60651 and 60804 Standards, or the most recent revisions thereof, for Type 1 sound level meters or an instrument and the associated recording and analyzing equipment that will provide equivalent data.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.03. Designated noise zones.

The properties hereinafter described shall be assigned to the following noise zones:

| | |
|---|---|
| Noise Zone I: | All single-family residential properties; |
| Noise Zone II: | All multi-family residential properties and mobile home parks; |
| Noise Zone III: | All commercial property; |
| Noise Zone IV: | The residential portion of mixed use properties; |
| Noise Zone V: | All manufacturing or industrial properties and all other uses. |

The actual use of the property, and not necessarily its zoning designation, shall be the determining factor in establishing whether a property is in Noise Zone I, II, III, IV or V, provided that the actual use is a legal use within the applicable zone.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.04. Exterior noise standards.

(a) The following exterior noise standards, unless otherwise specifically indicated, shall apply to all properties within a designated noise zone.

| ***Allowable Exterior Noise Level (1)*** | | ***Allowed Equivalent Noise Level, Leq. (2)*** | |
|---|---|---|---|
| ***Noise Zone*** | ***Type of Land Use*** | ***7 a.m. to 10 p.m.*** | ***10 p.m. to 7 a.m.*** |
| I | Single-Family Residential | 65 dBA | 45 dBA |
| II | Multi-Family Residential, Mobile Home Parks | 65 dBA | 50 dBA |
| III | Commercial Property | 65 dBA | 60 dBA |
| IV | Residential Portion of Mixed Use | 70 dBA | 70 dBA |
| V | Manufacturing and Industrial, Other Uses | 70 dBA | 70 dBA |

(1) If the ambient noise level exceeds the resulting standard, the ambient noise level shall be the standard.

(2) Measurements for compliance are made on the affected property pursuant to § 5-29.15.

(b) It is unlawful for any person at any location within the incorporated area of the City to create noise, or to allow the creation of any noise on property owned, leased, occupied or otherwise controlled by such person, which noise causes the noise level, when measured at any location on any other property, to exceed either of the following:

(1) The noise standard for the applicable zone for any fifteen-minute (15) period; and

(2) A maximum instantaneous (single instance) noise level equal to the value of the noise standard plus twenty (20) dBA for any period of time (measured using A-weighted slow response).

(c) In the event the ambient noise level exceeds the noise standard, the maximum allowable noise level under such category shall be increased to reflect the maximum ambient noise level.

(d) The Noise Zone IV standard shall apply to that portion of residential property falling within one hundred (100) feet of a commercial property or use, if the noise originates from that commercial property or use.

(e) If the measurement location is on a boundary between two (2) different noise zones, the lower noise level standard applicable to the noise zone shall apply.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.05. Interior noise standards.

(a) The following interior noise standards, unless otherwise specifically indicated, shall apply to all properties within a designated noise zone.

| **Allowable Interior Noise Level** (1) | | **Allowed Equivalent Noise Level, Leq.** (2) | |
|---|---|---|---|
| ***Noise Zone*** | ***Type of Land Use*** | ***7 a.m. to 10 p.m.*** | ***10 p.m. to 7 a.m.*** |
| I | Single-Family Residential | 45 dBA | 40 dBA |
| II | Multi-Family Residential, Mobile Home Parks | 45 dBA | 40 dBA |
| IV | Residential Portion of Mixed Use | 45 dBA | 40 dBA |

(1) If the ambient noise level exceeds the resulting standard, the ambient noise level shall be the standard.

(2) Measurements for compliance are made on the affected property pursuant to § 5-29.15.

(b) It is unlawful for any person at any location within the incorporated area of the City to create noise, or to allow the creation of any noise on property owned, leased, occupied or otherwise controlled by such person, which noise causes the noise level, when measured at any location on any other property, to exceed either of the following:

(1) The noise standard for the applicable zone for any fifteen-minute (15) period;

(2) A maximum instantaneous (single instance) noise level equal to the value of the noise standard plus twenty (20) dBA for any period of time (measured using A-weighted slow response).

(c) In the event the ambient noise level exceeds the noise standard, the maximum allowable noise level under such category shall be increased to reflect the maximum ambient noise level.

(d) The Noise Zone IV standard shall apply to that portion of residential property falling within one hundred (100) feet of a commercial property or use, if the noise originates from that commercial property or use.

(e) If the measurement location is on a boundary between two (2) different noise zones, the lower noise level standard applicable to the noise zone shall apply.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.06. Exemptions.

The following activities shall be exempted from the provisions of this chapter:

(a) Any activity conducted on public property, or on private property with the consent of the owner, by any public entity or its officers, employees, representatives, agents, subcontractors, permittees, licensees or lessees that the public entity has authorized are exempt from the provisions of this chapter. This includes, without limitation, sporting and recreational activities that are sponsored, co-sponsored, permitted or allowed by the City or any school district within the City's jurisdictional boundaries. This also includes, without limitation, occasional outdoor gatherings, public dances, shows or sporting and entertainment events, provided such events are conducted pursuant to an approval, authorization, contract, lease, permit or sublease by the appropriate public entity, specifically the planning commission or City Council;

(b) Occasional outdoor gatherings, public dances, show, sporting and entertainment events, provided said events are conducted pursuant to a permit or license issued by the appropriate jurisdiction relative to the staging of said events;

(c) Any mechanical device, apparatus or equipment used, related to or connected with emergency machinery, vehicle, work or warning alarm or bell, provided the sounding of any bell or alarm on any building or motor vehicle shall terminate its operation within forty-five (45) minutes in any hour of its being activated;

(d) Noise sources associated with construction, repair, remodeling, demolition or grading of any real property. Such activities shall instead be subject to the provisions of § 5-29.09;

(e) Noise sources associated with construction, repair, remodeling, demolition or grading of public rights-of-way or during authorized seismic surveys;

(f) All mechanical devices, apparatus or equipment associated with agriculture operations provided that:

(1) Operations do not take place between 8:00 p.m. and 7:00 a.m.;

(2) Such operations and equipment are utilized for the protection or salvage of agricultural crops during periods of potential or actual frost damage or other adverse weather conditions; or

(3) Such operations and equipment are associated with agricultural pest control through pesticide application, provided the application is made in accordance with permits issued by or regulations enforced by the California Department of Agriculture;

(g) Noise sources associated with the maintenance of real property. Such activities shall instead be subject to the provisions of § 5-29.08;

(h) Any activity to the extent regulation thereof has been preempted by state or federal law;

(i) Any noise sources associated with people and/or music associated with a party at a residential property. Such noise shall be subject to the provisions of OMC § 5-29.07;

(j) Any noise source emanating from an ice cream truck within the City. Such noise shall be subject to the provisions of OMC § 4-18.04;

(k) Any noise sources associated with barking dogs or other intermittent noises made by animals on any properly within the City. Such noise shall be subject to the provisions of OMC Chapter 1, Title 6;

(l) Noise sources related to uses approved by a permit or development agreement adopted prior to the date of adoption of this chapter and that contains acoustic or noise standard conditions of approval. This exemption shall only be applicable during the effective period of the City-approved permit or development agreement.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.07. Loud and disturbing noise.

(a) It is unlawful for any person or property owner within the City to make, cause or allow to be made any loud, excessive, impulsive or intrusive noise, disturbance or commotion that disturbs the peace or quiet of any area or that causes discomfort or annoyance to any reasonable person of normal sensitivities in the area, after a Police or Code Enforcement Officer has first requested that the person or property owner cease and desist from making such noise. The types of loud, disturbing, excessive, impulsive or intrusive noise may include, but shall not be limited to, yelling, shouting, hooting, whistling, singing, playing a musical instrument, or emitting or transmitting any loud music or noise from any mechanical or electrical sound making or sound-amplifying device.

(b) The factors, standards, and conditions that may be considered in determining whether a violation of the provisions of this section has been committed, included, but not limited to, the following:

(1) The level of the noise;

(2) The level and intensity of the background (ambient) noise, if any;

(3) The proximity of the noise to residential or commercial sleeping areas;

(4) The nature and zoning of the area within which the noise emanates;

(5) The density of inhabitation of the area within which the noise emanates;

(6) The time of day and night the noise occurs;

(7) The duration of the noise;

(8) Whether the noise is constant, recurrent or intermittent;

(9) Whether the noise is produced by a commercial or noncommercial activity; and

(10) Whether the use is lawful under the provisions of Title 5 of this Code and whether the noise is one that could reasonably be expected from the activity or allowed use.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.08. Real property maintenance noise regulations.

(a) No person, while engaged in maintenance of real property, shall operate any tool, equipment or machine in a manner that produces loud noise that disturbs a person of normal sensitivity who works or resides in the vicinity, or a Police or Code Enforcement Officer, except between the hours of 8:00 a.m. and 6:00 p.m.

(b) Trimming or pruning that requires the use of chainsaws or mulching machines shall only be allowed between the hours of 8:00 a.m. and 6:00 p.m. on a weekday and between the hours of 9:00 a.m. and 5:00 p.m. on Saturday or Sunday.

(c) The use of electrical or gasoline powered blowers, such as commonly used by gardeners or other persons for cleaning lawns, yards, driveways, gutters and other property shall only be allowed between the hours of 8:00 a.m. and 6:00 p.m. on a weekday and between the hours of 9:00 a.m. and 5:00 p.m. on Saturday or Sunday.

(d) No landowner, gardener, property maintenance service, contractor, subcontractor or employer shall permit or allow any person or persons working under his or her direction or control to operate any tool, equipment or machine in violation of the provisions of this section.

(e) Exceptions. The provisions of this section shall not apply to the following:

(1) Emergency property maintenance required by the building official;

(2) The maintenance, repair or improvement of any public work or facility by public employees, by any person or persons acting pursuant to a public works contract, or by any person or persons performing such work or pursuant to the direction of, or on behalf of, any public agency; provided, however, this exception shall not apply to the City, or its employees, contractors or agents, unless:

(i) The City Manager or department head determines that the maintenance, repair or improvement is immediately necessary to maintain public service,

(ii) The maintenance, repair or improvement is of a nature that cannot feasibly be conducted during normal business hours, or

(iii) The City Council has approved project specifications, contract provisions, or an environmental document that specifically authorizes maintenance during hours of the day that would otherwise be prohibited pursuant to this section; and

(3) Any maintenance that complies with the noise limits specified in § 5-29.04.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.09. Construction activity noise regulations.

(a) No person, while engaged in construction, remodeling, digging, grading, demolition or any other related building activity, shall operate any tool, equipment or machine in a manner that produces loud noise that disturbs a person of normal sensitivity who works or resides in the vicinity, or a Police or Code Enforcement Officer, on any weekday except between the hours of 7:00 a.m. and 6:00 p.m. or on Saturday or Sunday between the hours of 9:00 a.m. and 6:00 p.m.

(b) No landowner, construction company owner, contractor, subcontractor, or employer shall permit or allow any person or persons working under their direction and control to operate any tool, equipment or machine in violation of the provisions of this section.

(c) Exceptions.

(1) The provisions of this section shall not apply to emergency construction work performed by a private party when authorized by the City Manager or his or her designee;

(2) The maintenance, repair or improvement of any public work or facility by public employees, by any person or persons acting pursuant to a public works contract, or by any person or persons performing such work or pursuant to the direction of, or on behalf of, any public agency; provided, however, this exception shall not apply to the City, or its employees, contractors or agents, unless:

(i) The City Manager or a department head determines that the maintenance, repair or improvement is immediately necessary to maintain public services,

(ii) The maintenance, repair or improvement is of a nature that cannot feasibly be conducted during normal business hours, or

(iii) The City Council has approved project specifications, contract provisions, or an environmental document that specifically authorizes construction during hours of the day that would otherwise be prohibited pursuant to this section; and

(3) Any construction that complies with the noise limits specified in §§ 5-29.04 or 5-29.05.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.10. Other public agency exceptions.

The provisions of this chapter shall not be construed to prohibit any work at different hours by or under the direction of any other public agency or public or private utility companies in cases of necessity or emergency.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.11. Schools, day care centers, churches, libraries, museums, health care institutions; Special provisions.

It is unlawful for any person to create any noise that causes the outdoor noise level at any school, day care center, hospital or similar health care institution, church, library or museum while the same is in use, to exceed the noise standards specified in § 5-29.04 prescribed for the assigned Noise Zone I.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.12. Sound amplifying equipment.

Loudspeakers, sound amplifiers, public address systems or similar devices used to amplify sounds shall be subject to the provisions of § 5-29.13. Such sound amplifying equipment shall not be construed to include electronic devices, including but not limited to, radios, tape players, tape recorders, compact disc players, MP3 players, electric keyboards, music synthesizers, record players or televisions, which are designed and operated for personal use, or used entirely within a building and are not designed or used to convey the human voice, music or any other sound to an audience outside such building, or which are used in vehicles and heard only by occupants of the vehicle in which installed.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.13. Amplified sound.

(a) The City Council enacts the following legislation for the sole purpose of securing and promoting the public health, comfort, safety and welfare for its citizenry. While recognizing that the use of sound amplifying equipment may be entitled to certain protection by the constitutional rights of freedom of speech and assembly, the City Council finds that in order to protect the public safety and the correlative rights of the citizens of this community to privacy and freedom from public nuisance of loud and unnecessary noise, reasonable regulation of the time, place and manner of the use of amplifying equipment is necessary. In no event shall approval or authorization required herein be withheld by reason of the constitutionally protected content of any material proposed to be broadcast through amplifying equipment.

(b) It is unlawful for any person, other than personnel of law enforcement or governmental agencies, to install, use or operate a loudspeaker or sound amplifying device in a fixed or movable position or mounted upon any vehicle within the City for the purpose of giving instructions, directions, talks, addresses or lectures to any persons or assemblages of persons in or upon any street, alley, sidewalk, park, place or public property without a permit to do so from the Police Chief or his or her designee. Notwithstanding any other provision of this chapter, the provisions of this section shall also apply to the use of sound amplifying equipment upon public or private property when used in connection with outdoor or indoor public or private events, whether or not admission is charged or food or beverages are sold, when such activity is to be attended by more than one hundred (100) persons and the noise emanating from the event will be audible at the property plane, or in the case of a street dance or concert on the nearest residential property. Those activities listed in § 5-29.06(a) are exempt from the requirements of this section.

(c) The Police Chief or his or her designee is authorized to approve and issue permits under this section.

(d) An application for a permit required by this section shall be filed with the Police Chief at least sixteen (16) days and no more than one hundred twenty (120) days prior to the date on which the sound amplifying equipment is intended to be used. Applications for events covered by the First Amendment of the United States Constitution are exempt from the time requirements of this section if it is shown that circumstances require a shorter filing period and the event will not constitute an unsafe condition. The application shall contain the following information:

(1) The name, address and telephone number of both the owner and the user of the sound amplifying equipment;

(2) The license number, if a sound truck is to be used;

(3) A general description of the sound amplifying equipment which is to be used;

(4) Whether sound amplifying equipment will be used for commercial or noncommercial purpose;

(5) The dates and times upon and within which, and the streets or property over or upon which, the equipment is proposed to be operated;

(6) The name or names of one (1) or more persons who will be present during the conduct of any activities for which registration is sought and who will have authority to reduce the volume of any sound amplifying equipment during the course of the activities if required pursuant to this chapter and, otherwise, to insure compliance with the provisions of this chapter;

(7) A statement by the applicant that he or she is willing and able to comply with the provisions of this chapter and the conditions of the permit; and

(8) A sketch of the area or facilities within which the activities are to be conducted, with approximate dimensions and illustration of the location and orientation of all sound-amplifying equipment.

(e) The Police Chief shall deny the permit application or revoke any permit if the chief finds any of the following:

(1) The application contains materially false or intentionally misleading information;

(2) The use of sound amplifying equipment at an event or activity proposed will be located in or upon a premises, building or structure that is hazardous to the health or safety of the employees or patrons of the premises, business, activity, or event, or the general public, under the standards established by the Uniform Building or Fire Codes, or other applicable codes, as set forth in OMC Titles 4 and 8;

(3) The use of sound amplifying equipment at an event or activity proposed in or upon a premises, building or structure that lacks adequate on-site parking for participants attending the proposed event or activity under the applicable standards set forth in OMC Title 9;

(4) The conditions of any motor vehicle movement are such that, in his or her opinion, the use of the equipment would constitute an unreasonable interference with traffic safety;

(5) The conditions of pedestrian movement are such that the use of the equipment would constitute a detriment to traffic safety;

(6) The application submitted by the applicant reveals that the applicant would violate the provisions of this section or any other provision of federal, state and/or local law;

(7) The applicant is unwilling or unable to comply with the provisions of this chapter or any conditions imposed upon any permit issued;

(8) There had already been a permitted event at the intended location, or within a two hundred (200) yard radius of the intended location and the prior permitted event was located on residentially zoned property or on a street, alley, public parking lot or neighborhood park within three (3) months prior to the intended event. Community parks are exempt from this subsection (8); or

(9) The applicant or location has had previous violations within the past calendar year, and in the judgment of the Police Chief, issuance would be contrary to the intent of this section.

(f) In determining whether the use of the equipment would constitute an unreasonable interference with or detriment to traffic safety, the Police Chief shall consider, but shall not necessarily be limited to:

(1) The volumes, patterns and speed of vehicular and pedestrian traffic in the proposed area of use;

(2) The relationship of the proposed use of equipment and potential impacts upon traffic patterns;

(3) Availability of sufficient room for the operation of the equipment without significantly interfering with the traffic patterns;

(4) Proximity to schools, playgrounds and similar facilities where use of such equipment might attract children into traffic patterns; or

(5) Proximity to busy intersections or other potentially hazardous conditions where use of such equipment might constitute a hazard by reason of its tendency to distract drivers of vehicles or pedestrians.

(g) Issuance or denial.

(1) If the application is approved, the Police Chief shall return an approved copy of the application to the applicant and shall issue a permit. The permit shall constitute permission for the use of the sound amplifying equipment as requested.

(2) Any application filed shall be either approved or disapproved within five (5) days of the filing thereof.

(3) If the application is disapproved, the Police Chief shall return a disapproved copy forthwith to the applicant with a written statement on the reason for disapproval.

(i) Any person aggrieved by a decision of the Police Chief or his or her designee may file an appeal to the City Manager. A complete and proper appeal shall be filed with the City Clerk within ten (10) calendar days of the action that is the subject of the appeal. If the applicant fails to file an appeal within the ten (10) day filing period provided herein, denial shall take effect immediately upon expiration of such filing period. All appeals shall be in writing and shall contain the following information: (a) name(s) of the person filing the appeal, (b) a brief statement in ordinary and concise language of the relief sought, and (c) the signatures of all parties named as appellants and their mailing addresses. After receiving the appeal, the City Clerk shall immediately forward the matter to the City Manager for handling.

(ii) The City Manager shall, upon receipt of the appeal, set the matter for hearing before the City Manager or a hearing officer. Any hearing officer shall be a licensed attorney or recognized mediator designated by the City Manager. The hearing shall be set for not more than ten (10) calendar days after the receipt of the appeal unless a longer time is requested or consented to by the appellant. Notice of such hearing shall be given in writing and mailed at least five (5) calendar days prior to the date of the hearing, by U.S. mail, with a proof of service attached, addressed to the address listed on the permit application, or the written appeal if different from the permit application. The notice shall state the grounds of the complaint or reason for the denial and shall state the time and place where such hearing will be held.

(iii) The City Manager or hearing officer shall, within ten (10) calendar days following the conclusion of the hearing, make a written finding and decision, which shall be delivered to the City and the appellant by first class mail. Notwithstanding any provision in this Code, the decision of the City Manager or hearing officer shall be the final administrative decision of the City. Any party dissatisfied with the decision of the City Manager or hearing officer may seek review of such decision under the provisions of Code Civil Procedure, §§ 1094.5 and 1094.8, as amended from time to time.

(h) In addition to any other provisions of this Code, the use of sound-amplifying equipment and sound trucks in the City shall be subject to the following regulations:

(1) The only sounds permitted are music and human speech;

(2) Sound shall not be emitted within one hundred (100) yards of hospitals, churches, schools and City Hall;

(3) The volume of sound shall be controlled so that it will not be audible for a distance in excess of one hundred (100) feet from the sound amplifying equipment or sound truck, and so that the volume is not unreasonably loud, raucous, jarring, disturbing or a nuisance to persons within the range of allowed audibility; or

(4) The sound amplifying equipment or sound truck shall not be used between the hours of 8:00 p.m. and 8:00 a.m.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.14. Motor vehicles.

The use of any motor vehicle in such a condition as to create excessive, impulsive or intrusive noises is prohibited. The discharge into the open air of the exhaust of any internal combustion engine, stationary or mounted on wheels, motorboat or motor vehicle, including motor cycle, whether or not discharged through a muffler or other similar device, which discharge creates excessive, unusual, impulsive or intrusive noise is prohibited. Motor vehicles shall comply with the noise regulations of the California Vehicle Code.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.15. Noise level measurement.

(a) The location selected for measuring exterior noise levels in a residential area shall be at any part of a private yard, patio, deck or balcony normally used for human activity and identified by the owner or, if occupied by someone other than the owner, the occupant of the affected property as suspected of exceeding the noise level standard. This location may be the closest point in the private yard or patio, or on the deck or balcony, to the noise source, but should not be located in nonhuman activity areas such as trash container storage areas, planter beds, above or contacting a property line fence, or other areas not normally used as part of the yard, patio, deck or balcony. The location selected for measuring exterior noise levels in a nonresidential area shall be at the closest point to the noise source. The measurement microphone height shall be five (5) feet above finish elevation or, in the case of a deck or balcony, the measurement microphone height shall be five (5) feet above the finished floor level.

(b) The location selected for measuring interior noise levels shall be made within the affected residential unit. The measurements shall be made at a point at least four (4) feet from the wall, ceiling or floor, or within the frame of a window opening, nearest the noise source. The measurements shall be made with windows in an open position.

(c) Any decibel measurement made pursuant to the provisions of this chapter shall be measured in decibels (dBAs) as measured with a sound level meter using the A-weighted sound pressure level.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.16. Prima facie violation.

Any noise exceeding the noise level standard as specified in §§ 5-29.04 and 5-29.05, shall be deemed to be prima facie evidence of a violation of the provisions of this chapter.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.17. Penalty.

(a) Any person who negligently or knowingly violates any provision of this chapter shall be guilty of an infraction and upon conviction shall be punishable by a fine specified in OMC § 1-2.01. Each day a violation occurs shall constitute a separate offense and shall be punishable as such.

(b) Any person who negligently or knowingly violates any provision of this chapter may also be subject to fine(s) specified in the administrative citation schedule of fines set forth in OMC § 1-5.04. The manner of issuing administrative citations shall comply with all the procedures specified in OMC Chapter 5, Title 1.

(c) As an additional remedy, the operation or maintenance of any device, instrument, vehicle or machinery in violation of any provisions of this chapter, which operation or maintenance causes or creates sound levels exceeding the allowable standards as specified in this chapter, shall be deemed and is declared to be a public nuisance and may be subject to abatement by a restraining order or injunction issued by a court of competent jurisdiction.

(d) Any violation of this chapter is declared to be a public nuisance and may be abated in accordance with law. The expense of enforcing this chapter is declared to be public nuisance and may be by resolution of the City Council declared to be a lien and special assessment against the property on which such nuisance is maintained, and any such charge shall also be a personal obligation of the property owner.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.18. Enforcement and administration.

(a) It shall be the responsibility of Police or Code Enforcement Officers to enforce the provisions of this chapter and to perform all other functions required by this chapter. Such duties shall include, but not be limited to investigating potential violations, issuing warning notices and citations, and providing evidence to the City prosecutor for legal action.

(b) For violations of § 5-29.07, Police or Code Enforcement Officers shall obtain a declaration under penalty of perjury from two (2) declarants living in separate households within a sixty (60) day period stating in detail all of the following:

(1) That the declarant is a resident of a residential neighborhood located within two hundred (200) yards of the noise source; and

(2) Within the past month declarant has heard noise for substantially long periods to the extreme annoyance of the declarant.

(3) Declarations from two (2) declarants are required to prove a violation of § 5-29.07, but are not required to prove that a person has violated any other provision of this chapter.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.19. City Manager waiver.

The City Manager is authorized to grant a temporary waiver to the provisions of this chapter for a period of time necessary to correct the violations of this chapter, if such temporary waiver would be in the public interest and there is no feasible and prudent alternative to the activity, or the method of conducting the activity, for which the temporary waiver is sought. This time period may include a commitment to a program that includes placing necessary orders and entering into necessary contracts within thirty (30) days for repair or installation.

(§ 2, Ord. 2888, eff. March 6, 2008)

### Sec. 5-29.20. Noise abatement program.

(a) In circumstances where adopted community-wide noise standards and policies prove impractical in controlling noise generated from a specific source, the City Council may establish a noise abatement program that recognizes the characteristics of the noise source and affected property and that incorporates specialized mitigation measures.

(b) Noise abatement programs shall set forth in detail the approved terms, conditions and requirements for achieving maximum compliance with noise standards and policies. Said terms, conditions and requirements may include, but shall not be limited to, limitations, restrictions, or prohibitions on operating hours, location of operations, and the types of equipment.

(§ 2, Ord. 2888, eff. March 6, 2008)

# NOISE MONITORING LONG-TERM GRAPHS

To limit population exposure to physically and/or psychologically damaging, as well as intrusive noise levels, the State of California, counties and cities have established standards and ordinances to control noise. Following are state and local regulations that are applicable to the proposed project.

## State Regulations

The State of California regulates freeway noise, sets standards for sound transmission, provides occupational noise control criteria, identifies noise standards, and provides guidance for local land use compatibility. State law requires that each county and city adopt a general plan that includes a noise element which is to be prepared according to guidelines adopted by the Governor's Office of Planning and Research. The purpose of the noise element is to "limit the exposure of the community to excessive noise levels."

The California Building Code (CBC), Title 24, Part 2, Volume 1, Chapter 12, Interior Environment, Section 1207.11.2, *Allowable Interior Noise Levels*, requires that interior noise levels attributable to exterior sources shall not exceed 45 dB in any habitable room. The noise metric is evaluated as either the day-night average sound level (Ldn) or the community noise equivalent level (CNEL), consistent with the noise element of the local general plan.

## Local Regulations

### *City of Brea General Plan*

The noise section of the City's General Plan provides goals and policies to protect local citizens from the harmful effects of excessive exposure to noise. The following policies are applicable to the proposed project:

**Policy PS-9.1**. Evaluate the need to require acoustical studies for development proposals that address both direct and indirect, particularly traffic, noise impacts, and require such studies, with appropriate mitigation included, as warranted.

**Policy PS-3.3**. Minimize stationary noise sources and noise emanating from construction activities and special events impact evaluation

Figure PS-6 illustrates the City's noise and land use compatibility guidelines.

## City of Brea Municipal Code

The City of Brea Municipal Code designates the entire territory of The City of Brea as a Noise Zone 1. The following sections of the Code establish those limits and exemptions

### *Exterior Noise Standards*

**Table 3.12-1 Exterior Noise Standards**

| Noise Zone | Maximum Noise Level at Complaint Site of Receiving Property | |
|---|---|---|
| | Noise Level | Time Period |
| 1 | 55 dBA | 7:00 a.m. – 10:00 p.m. |
| 1 | 50 dBA | 10:00 p.m. – 7:00 a.m. |

Note: In the event the alleged offensive noise consists entirely of impact noise, simple tone noise, speech, music, or any combination thereof, each of the above noise levels shall be reduced by 5 dBA.

It shall be unlawful for any person at any location within the city to create any noise on property owned, leased, occupied, or otherwise controlled by such person, when the foregoing causes the noise level, when measured on any other residential property, to exceed:

- The noise standard for a cumulative period of more than 30 minutes in any hour (L50; or
- The noise standard plus 5 dBA for a cumulative period of more than 15 minutes in any hour (L25); or
- The noise standard plus 10 dBA for a cumulative period of more than 5 minutes in any hour (L8); or
- The noise standards plus 15 dBA for a cumulative period of more than 1 minute in any hour (L2); or
- The noise standard plus 20 dBA for any period of time (Lmax).

In the event the ambient noise level exceeds any of the first four noise limit categories above, the cumulative period applicable to said category shall be increased to reflect said ambient noise level. In the event the ambient noise level exceeds the fifth noise limit category, the maximum allowable noise level under said category shall be increased to reflect the maximum ambient noise level.

### *Interior Noise Standards*

**Table 3.12-2 Interior Noise Standards**

| Noise Zone | Maximum Noise Level at Complaint Site of Receiving Property | |
|---|---|---|
| | Noise Level | Time Period |
| 1 | 55 dBA | 7:00 a.m. – 10:00 p.m. |
| 1 | 45 dBA | 10:00 p.m. – 7:00 a.m. |

Note: In the event the alleged offensive noise consists entirely of impact noise, simple tone noise, speech, music, or any combination thereof, each of the above noise levels shall be reduced by 5 dBA.

It shall be unlawful for any person at any location within the city to create any noise, or to allow the creation of any noise on property owned, leased, occupied, or otherwise controlled by such person, when the foregoing causes the noise level, when measured on any other residential property, to exceed:

- The interior noise standard for a cumulative period of more than 5 minutes in any hour; or

- The interior noise standard plus 5 dBA for a cumulative period of more than 1 minute in any hour (L2); or
- The interior noise standard plus 10 dBA for any period of time (Lmax).

In the event the ambient noise level exceeds any of the first two noise limit categories above, the cumulative period applicable to said category shall be increased to reflect said ambient noise level. In the event the ambient noise level exceeds the third noise limit category the maximum allowable noise level under said category shall be increased to reflect the maximum ambient noise level.

### *Special Provisions*

The following activities directly relevant to the project are exempted from the provisions of the City Municipal Code:

- Noise sources associated with construction, repair, remodeling, or grading of any real property, provided said activities do not take place between the hours of 7:00 p.m. and 7:00 a.m. on weekdays, including Saturday, or at any time on Sunday or a federal holiday.
- Noise sources, associated with the maintenance of real property, provided said activities take place between 7:00 a.m. and 7:00 p.m. on any day.

Any activity to the extent regulation thereof has been preempted by state or federal law.

# Appendix I Public Service Responses

# Appendices

*This page intentionally left blank.*

The Ontario Plan 2050 Supplemental Environmental Impact Report: Information for Fire Protection Services

Questionnaire

1) Does Ontario Fire Department (OFD) have a minimum staffing level at either of its fire stations at any given time? Does the OFD currently meet that standard?
The OFD's minimum staffing level goes by apparatus type as opposed to fire station. OFD is bound by an MOU that mandates 4-person Engine Companies (2 of them being paramedics) and 4-person Truck Companies at all times.

2) Are the existing staff and equipment levels at the fire station(s) adequate to meet current demands for fire protection services in OFD service area? Would implementation of the proposed project impact service levels to drop below the projected future level?
They are not adequate to meet projected demands based on city boundaries, response times, and call volume. The recommendation is to build three additional fire stations in Ontario Ranch to meet the projected needs while retaining benchmark response times and level of care.

3) What are the average response times for fire and emergency services? What is the stated policy for each? Are these times considered acceptable? If not, what is the preferred response time?
OFD's benchmark is to be on scene within 9 mins 59 seconds 90% of the time for both Fire and EMS calls. In 2020, OFD met this goal 92% however, recently with the rapid expansion in Ontario Ranch those times have been tested and benchmarks should be retained. (Details and maps are within the Ontario Fire Department – Standards of Cover)

4) Are there any existing deficiencies, such as lack of staffing and/or facilities and equipment?
With the growth and future development in Ontario Ranch, the OFD will require the addition of three new fire stations at community build out. This will ensure adequate EMS and fire protections services to meet the needs of the community and supports the NFPA recommendations detailed within the Standards of Cover document.

5) Are there any existing plans for expansion or relocation of stations that would serve the project? If so, please described the expansion or relocation.
Yes, we have potential sites identified for the three additional fire station locations. Fire Administration is going to be moved to Fire Station 3 for growth due to Ontario Ranch and to be centrally located within the community.

6) Would the proposed project require the OFD to hire more staff?
Yes. Station 11 is the next proposed fire station and that would be staffed with 24 additional firefighters. Additional fire stations would be staffed with 4 firefighters for each engine or truck housed at each station.

7) Would the OFD need to construct new facilities or expand existing facilities to accommodate the proposed project's demand for fire protection services, based on the projected growth through 2050?
Yes, by three additional locations. (Proposed location map attached).

8) Does the OFD recommend standard criteria for assessing the significance of a proposed project's impacts in an EIR or other environmental impact documentation? If so, what are those criteria?
I am not sure if this applies to OFD or could you further clarify your questions. Thank you!

9) Does the OFD have identified Developer Impact Fees for new development? If so, please describe the fees.
Yes, we have used DIF fees for Fire Station 9 and are planning to do the same with the future proposed locations.

10) Please provide recommendations that could reduce the demand for fire protection services created by the proposed project.
A Community Risk Reduction (CRR) Program. One of OFD's ASO's this year is a Staff Study Report to review and consider a CRR program.

11) Please provide any current documents on fire protection services in the city including background reports, number of incidents, policy documents, and facility plans or reports that you think would help with preparing the environmental review analysis for impacts to fire services as a result of the proposed project.
    1. Proposed future Ontario Ranch firs station locations.
    2. Standards of Cover
    3. Calls for service heatmaps

The Ontario Plan 2050 Supplemental Environmental Impact Report: Information for Police Services

Questionnaire

1) Is there a standard ratio of officers per number of population that the Ontario Police Department (OPD) wishes to maintain? Does the Department currently meet that standard?
   The general rule is approximately 225 police officers, per 100,000 people. Currently we are allotted 300 police officers. We do meet this standard, but as Ontario Ranch populates, we will have to continue to hire.
2) Are the existing staff levels and equipment at the station(s) adequate to meet current demands for police services in the project area? Would implementation of the proposed project impact service levels such that they drop below the current level?
   Staffing levels are adequate to meet the current demand, but as the project continues additional staff is needed. They will not be adequate to meet projected demands based on city boundaries, expeditated response, and call volume. The recommendation is to hire additional staff to continue to meet the needs of the community.

3) Does the OPD have an established target response time for responding to calls? If so, is the OPD currently meeting those response times?
   It is the goal of the Ontario Police Department to respond to calls for service in an expeditious manner. Response times may vary on available personnel. Officers are in the field conducting proactive enforcement or responding to calls for service as needed.

4) How many emergency incident calls does the OPD respond to per year? What is the response goal for an emergency incident?
   OPD responds to an average of 200,000 calls for service per year. Depending on the emergency and available officers, we will always try to send the closest officers to each emergency.

5) Are there any existing deficiencies, such as lack of staffing and/or facilities and equipment?
   With the growth and future development in Ontario Ranch, the OPD will require the addition personnel at community build out. This will ensure adequate police services to meet the needs of the community.

6) Are there any existing plans for expansion or relocation of stations that would serve the project? If so, please described the expansion or relocation.
   There are current plans for a substation for the proposed Entertainment District. It has also been recommended to have a substation/multi use facility for OPD to utilize in Ontario Ranch.

7) Would the proposed project require the OPD to hire more staff?
   Yes, as the project is being built out OPD would have to hire additional staff so we can continue to deliver exceptional police services.

8) Would the OPD need to construct new facilities or expand existing facilities in order to accommodate the proposed project's demand for police services, based on the projected growth through 2050?
   There are current plans for a substation for the proposed Entertainment District. It has also been recommended to have a substation/multi use facility for OPD to utilize in Ontario Ranch.

9) Does the OPD recommend standard criteria for assessing the significance of a proposed project's impacts in an EIR or other environmental impact documentation? If so, what are those criteria?
   OPD does have an officer that sits on the city Development Advisory Board. OPD requires standards of conditions of approval as it applies to safety (proper lighting/security cameras).

10) Does the OPD have identified Developer Impact Fees for new development? If so, please describe the fees.
    There are city fees related to safety, but this is handled by the city. None of these fees are paid directly to OPD.

11) Please provide recommendations, if any, that could reduce the demand for police services created by the proposed project.
    Following OPD's approval conditions is intended to deter criminal activity. At the same time police presence is a major deterrent, but that requires additional staffing.

12) Please provide any current documents on police services in the city including background reports, number of incidents, policy documents, and facility plans or reports that you think would help with preparing the environmental review analysis for impacts to police services as a result of the proposed project.
**None at this time.**

City of Ontario, The Ontario Plan 2050 DEIR
School District Questionnaire

1. Please indicate which schools would likely serve the City of Ontario within the Chaffey Joint Union High School District.

   Chaffey High School
   Colony High School
   Ontario High School

2. What is the capacity of each of the schools? What is the existing enrollment?

| School Site: | Capacity: | Enrollment: |
|---|---|---|
| Chaffey High School | 2,862 | 3,363 |
| Colony High School | **3,078** | 2,162 |
| Ontario High School | **3,267** | 2,322 |

3. What is the average enrollment (10-year average) of each school that would serve the project site?

| School Site: | 10-Yr Enrollment Average: |
|---|---|
| Chaffey High School | 3,421.6 |
| Colony High School | 2,159.1 |
| Ontario High School | 2,506.7 |

4. Would these schools be able to accommodate a potential increase in enrollment?

   While all three schools would be able to accommodate potential increases, Colony High School would provide the most availability.

5. What impact would the proposed The Ontario Plan 2050, in combination with all the other projects planned in the area, have on the ability of the Chaffey Joint Union High School District to provide educational services in the area(s)?

   The District anticipates, at a minimum, the need to accommodate additional students. Other direct or indirect impacts are unknown at this time.

6. Has the District adopted a fee program, pursuant to Senate Bill 50, that levies statutory school impact fees per residential or non-residential building square foot that may be levied for school construction? If yes, what is the current School Fee?

   Yes. The breakdown is as follows:

   Level 1 Developer Fees

   Residential = $1.26 / sq.ft. Commercial = $0.20 / sq.ft.

7. What is the student growth rate (elementary, middle, high school) based on the number of residential units?

   Student Yield Factors (Student Growth Rate) for our high schools are as follows:

   Single Family Dwellings = 0.094
   Multi-Family Attached = 0.057
   Apartments = 0.012

8. Please add any comments you may wish to make regarding this matter.

   N/A

City of Ontario, The Ontario Plan 2050 DEIR
School District Questionnaire

1. Please indicate which schools would likely serve the City of Ontario within the Chino Valley Unified School District.

   Levi Dickey Elementary School
   Liberty Elementary School
   Woodcrest Junior High School

2. What is the capacity of each of the schools? What is the existing enrollment?
   Levi Dickey Elementary School – capacity 800, existing enrollment 443
   Liberty Elementary School – capacity 800, existing enrollment 509
   Woodcrest Junior High School – capacity 1100, existing enrollment 341

3. What is the average enrollment (10-year average) of each school that would serve the project site?
   7-year average data provided
   Levi Dickey Elementary School - 591
   Liberty Elementary School - 689
   Woodcrest Junior High School - 461

4. Would these schools be able to accommodate a potential increase in enrollment?
   Yes they would.

5. What impact would the proposed The Ontario Plan 2050, in combination with all the other projects planned in the area, have on the ability of the Chino Valley Unified School District to provide educational services in the area(s)?
   The plan would have some impact in terms of increased enrollment to the three Chino Valley Unified School District (CVUSD) schools serving the area, but it is anticipated that the increased enrollment would be manageable. The majority of the plan is not within CVUSD boundaries.

6. Has the District adopted a fee program, pursuant to Senate Bill 50, that levies statutory school impact fees per residential or non-residential building square foot that may be levied for school construction? If yes, what is the current School Fee?
   Yes, our current school fees are $4.08 per square foot for residential and $0.66 per square foot for commercial.

7. What is the student growth rate (elementary, middle, high school) based on the number of residential units?
   SFD - all grades is 0.5029 students per unit
   MFA - all grades is 0.2006 students per unit
   APT - all grades is 0.2701 students per unit

8. Please add any comments you may wish to make regarding this matter.

# City of Ontario, The Ontario Plan 2050 DEIR
# School District Questionnaire

1. Please indicate which schools would likely serve the City of Ontario within the Mountain View School District.
    - Creek View Elementary School
    - Mountain View Elementary School
    - Park View Elementary School
    - Ranch View Elementary School
    - Grace Yokley Junior High School

2. What is the capacity of each of the schools? What is the existing enrollment?
    - Creek View Elementary School
        - Capacity: 850
        - Current Enrollment: 658
    - Mountain View Elementary School
        - Capacity: 775
        - Current Enrollment: 606
    - Park View Elementary School
        - Capacity: 825
        - Current Enrollment: Opens August 2022 – No Current Enrollment
    - Ranch View Elementary School
        - Capacity: 900
        - Current Enrollment: 838
    - Grace Yokley Junior High School
        - Capacity: 1500
        - Current Enrollment: 615

3. What is the average enrollment (10-year average) of each school that would serve the project site?

   AVERAGE ENROLLMENT BASED ON 6-YEAR AVERAGE (only data that was available):
    - Creek View Elementary School - 593
    - Mountain View Elementary School - 517
    - Park View Elementary School – N/A…Opens August 2022
    - Ranch View Elementary School - 693
    - Grace Yokley Junior High School – 801

4. Would these schools be able to accommodate a potential increase in enrollment?

   YES

5. What impact would the proposed The Ontario Plan 2050, in combination with all the other projects planned in the area, have on the ability of the Mountain View School District to provide educational services in the area(s)?
    - MVSD has plans to build additional schools throughout the Ontario Ranch development over the course of the next 20 years. We anticipate that the projected new campuses will sufficiently handle the increased need for educational services within the community.

6. Has the District adopted a fee program, pursuant to Senate Bill 50, that levies statutory school impact fees per residential or non-residential building square foot that may be levied for school construction? If yes, what is the current School Fee?

   Ontario Ranch Mitigation:
   - Residential - $2.87
   - Commercial - $0.66
   - Senior - $0.66

   Non-Mitigation Area:
   - Residential - $2.82
   - Commercial - $ 0.455 (except self-storage)
   - Senior - $0.45

7. What is the student growth rate (elementary, middle, high school) based on the number of residential units?

   Student Generation Rate for Ontario Ranch/New Model Colony Development:
   - 0.16 students per household

8. Please add any comments you may wish to make regarding this matter.

Re: The Ontario Plan (TOP) 2050
Supplemental Environmental Impact Report (SEIR) Response

Mr. Anaya,

Enclosed is Ontario Montclair School District's response to The Ontario Plan 2050 School District Questionnaire to the Draft Environmental Impact Report

If you have any questions, please contact me at (909) 418-6369.

Thank you.

Brooke Murray

Brooke Murray
Director Facilities Planning and Operations

"Our Community, Our Children, Our Commitment, Our Future"

1. Please indicate which school would likely serve the City of Ontario within the Ontario-Montclair School District?
   **Answer:** See attached spreadsheet "School Name"

2. What is the capacity of each of the schools?
   **Answer:** See attached spreadsheet "School Capacity"
   What is the existing enrollment?
   **Answer:** See attached spreadsheet "Enrollment Gen Ed 21/22

3. What is the average enrollment (10 Year average) of each school that would serve the project site?
   **Answer:** See attached spreadsheet "

4. Would these schools be able to accommodate a potential increase in enrollment?
   **Answer**: See attached spreadsheet "Can this school accommodate increased enrollment"

5. What impact would the proposed The Ontario Plan 2050, in combination with all the other projects planned in the area, have on the ability of the Ontario-Montclair School District to provide education services in the areas?
   **Answer:** The Ontario Plan Housing Element Technical Report proposes multiple residential opportunities to potentially provide high density and affordable housing in the Downtown Housing Opportunity section. Any increase in residential will result in an impact on our school facilities and further assessment will need to be made to ensure the neighboring school facilities can accommodate the increase.

6. Has the District adopted a few programs, pursuant to Senate Bill 50? That levies statutory school impact fees per residential or nonresidential building square foot that may be levied for school construction?
   **Answer:** Yes
   If Yes, what is the current School fee?
   **Answer:** Effective 7/19/2021
   Residential Level 1 $2.82
   Commercial $0.46 sf
   Self-Storage Facilities $0.08
   Parking Structures $0.03 sf
   New Construction Level 1 - Senior Housing $0.46 sf

7. What is the student growth rate (elementary, middle, high school) based on the number of residential units?
   **Answer:** Our student generation rates are based on our School Facilities Needs Analysis dated April 2017. The student generation rates pertain to our district boundaries which includes portions of Montclair, Ontario and Upland.
   Elementary TK-6: Single Family Detached Units .2667 Multi Family Attached Units .0792
   Middle School 7-8: Single Family Detached Units .0500 & Multi Family Attached Units .0180
   Total: Single Family Detached Units .3167 and Multi Family Attached Units .0972

Residential Development we have identified is PDEV 16-023, Diamante Terrance, PEDEV 17-011, San Antonio Estates, PDEV 17-015, Villa Palmetto, PDEV 19-049, PDEV 16-044

8. Please add any comments you wish to make regarding this matter
   **Answer:** See spreadsheet for "Universal Access to Transitional Kindergarten for all 5-year old's"
   This will impact our overall enrollment in the coming years as well impact the number classrooms needed.
   Almost all of our elementary schools do offer TK for students whose birthdays are between September 2st – December 2nd of the school year.

FEHR PEERS

# Draft Memorandum

Date: March 2, 2022

To: Jay Bautista, City of Ontario

From: Paul Herrmann, P.E
Jolene Hayes, AICP

**Subject: The Ontario Plan Transportation Impact Assessment**

*OC20-0741*

Fehr & Peers has completed a Transportation Impact Assessment that analyzes Vehicle Miles Traveled (VMT) in support of the proposed update of The Ontario Plan (TOP) Environmental Impact Report (EIR). The assessment is consistent with Senate Bill 743 (SB 743) and the *City of Ontario Resolution Adopting Vehicle Miles Traveled Thresholds* (June 2020).

## Transportation Impact Analysis

This assessment answers the following four questions from Appendix G. For purposes of this EIR, a project would normally have a significant effect on the environment if the project would:

T-1 Conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities.

T-2 Conflict or be inconsistent with CEQA Guidelines § 15064.3, subdivision (b) regarding policies to reduce vehicle miles travelled (VMT).

T-3 Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment).

T-4 Result in inadequate emergency access.

## T-1 Assessment

The proposed project potentially creates an inconsistency with the adopted RTP/SCS which notes a future roadway widening and bridge on Schaefer Avenue. This inconsistency is considered **potentially significant**.

The proposed project provides extensive consistency related to regional active transportation plans, transit plans, and other mobility infrastructure. However, TOP proposes the following changes to the Circulation

Element, creating a potential inconsistency with the SCAG RTP/SCS:

- RTP ID 4A01203 – Widen Francis Street from Benson Avenue to Campus Avenue from two to four lanes.
    - TOP proposes to retain Francis Street as a two-lane facility
- RTP ID 4A 4A01210 – Widen Holt Boulevard from Benson Avenue to Vineyard Avenue from four to six lanes.
    - TOP proposes to retain Holt Boulevard as a four-lane facility
- RTP ID 4A04194 – Widen Chino Avenue from Euclid Avenue to Milliken Boulevard from two to four lanes.
    - TOP proposes to retain Chino Avenue from Archibald Avenue to Milliken Boulevard as a two-lane facility
- RTP ID 4A04216 – Widen Milliken Avenue (Hamner Avenue) from Riverside Avenue to Edison Avenue from one to four lanes (SB only)
    - TOP proposes to widen Milliken Avenue (Hamner Avenue) from Riverside Avenue to Edison Avenue from one to three lanes (SB only)
- RTP ID 4A04219 – Widen Riverside Drive from Euclid Avenue to Milliken Boulevard from two to four lanes.
    - TOP proposes to wide Riverside Drive to a six-lane facility
- RTP ID 4A04220 – Widen Schaefer Avenue from Euclid Avenue to Haven Avenue from zero to four lanes.
    - TOP proposes to eliminate the bridge connection on Schaefer Avenue between Ontario Avenue and Archibald Avenue
    - TOP proposes to widen Schaefer Avenue from Euclid Avenue to Grove Avenue and from Archibald Avenue to Haven Avenue from zero to four lanes, and widen Schaefer Avenue from Grove Avenue to Archibald Avenue from zero to two lanes
- RTP ID 4A07174 – Widen two-lane bridge on Eighth Street over Cucamonga Creek to four lanes.
    - TOP proposes to retain the bridge as a two-lane facility
- RTP ID 4120147 – Widen Mountain Avenue from Brooks Street to Sixth Street from four to six lanes.
    - TOP proposes to retain Mountain Avenue as a four-lane facility from Fourth Street to Holt Boulevard
- RTP ID 4160019 – Widen Eighth Street from West Cucamonga Channel to Grove Avenue from two to four lanes.
    - TOP proposes to retain Eighth Street as a two-lane facility east of Grove Avenue
- RTP ID 4160025 – Widen Bon View Avenue from Mission Boulevard to Belmont Avenue from two to four lanes.
    - TOP proposes to retain Bon View Avenue as a two-lane facility south of Mission Boulevard

- RTP ID 4160035 – Widen Guasti Road from Holt Boulevard to Archibald Avenue from two to four lanes.
    - TOP proposes to retain Guasti Road as a two-lane facility
- RTP ID 4160050 – Widen Phillips Street from Benson Avenue to Mountain Avenue from two to four lanes.
    - TOP proposes to retain Phillips Street as a two-lane facility
- RTP ID 4160060 – Widen San Antonio Avenue from Park Street to Phillips Street from two to four lanes.
    - TOP proposes to retain San Antonio Avenue as a two-lane facility
- RTP ID 4160066 – Spot widen Turner Avenue from Inland Empire Boulevard to Fourth Street from two to four lanes in southbound direction only.
    - TOP proposes to retain Turner Avenue as a two-lane facility
- RTP ID 4160070 – Widen Walker Avenue from Riverside Drive to Merrill from two to four lanes.
    - TOP proposes to retain Walker Avenue as a two-lane facility
- RTP ID 2002160-20150201 – Widen Grove Avenue between Fourth Street and State Street/Airport Drive from four to six lanes
    - TOP proposes to retain Holt Boulevard as a four-lane facility north of State Street

To determine the impact of these lane reductions and the Shaefer bridge deletion, Fehr & Peers completed VMT forecasting with and without these future projects to determine if removal would increase or decrease VMT. The VMT forecasting results, using the Boundary Method, indicated that VMT in the City of Ontario would decrease by 8,729 VMT per weekday within the City limits. This indicates that removing these projects will result in VMT reduction within the City, making the impact **less-than-significant** and no further mitigation would be required.

## T-2 Assessment

The project may be inconsistent with CEQA Guidelines section 15064.3, subdivision (b) regarding policies to reduce VMT. This impact is considered **potentially significant**.

### Approach & Traffic Modeling Methodology

The San Bernardino Traffic Analysis Model (SBTAM) was utilized to estimate VMT for the analysis scenarios. SBTAM began as the SCAG regional travel demand forecasting model and underwent a subarea model development to add detail and refinement within San Bernardino County. SBTAM was originally developed in 2012 and has continued to undergo updates to the land use and transportation network to reflect the most recent SCAG RTP/SCS program. The SBTAM model used for this effort has an updated base year land use that reflects a 2016 base year and a 2040 future year, consistent with the 2020 SCAG RTP/SCS. Fehr &

Peers updated the base year land uses within the City of Ontario to reflect the land use data inventory conducted in 2019 by PlaceWorks. The future year land use datasets and roadway network in Ontario were updated to be consistent with a 2050 future year that reflects the build out of the Approved TOP (2050) and the Proposed TOP (2050). The roadway networks for each scenario are provided as **Figures 1-3**, and for reference, the roadway names are provided in **Figure 4**. **Figure 5** presents the Adopted TOP (2050) Functional Roadway Classifications and **Figure 6** presents the Proposed TOP (2050) Functional Roadway Classifications. The model roadway networks reflect the full build out of the functional roadway classifications. The land use assumptions for each scenario are summarized in **Table 1**.

**Table 1: Land Use Inputs for Ontario TOP Scenarios**

| Land Use | Existing 2019 | Approved TOP 2050 | Proposed TOP 2050 |
|---|---|---|---|
| **Households** | **50,367** | **104,163** | **124,380** |
| **Population** | **179,597** | **357,957** | **410,492** |
| **Total Employment** | **131,999** | **313,067** | **296,002** |
| Commercial Employment | 26,363 | 28,948 | 37,276 |
| Office Employment | 36,215 | 168,833 | 158,541 |
| Hospitality Employment | 606 | 3,228 | 4,277 |
| Industrial Employment | 63,515 | 108,881 | 92,730 |
| Educational Employment | 4,171 | 3,086 | 3,086 |
| Other Employment | 1,129 | 91 | 93 |

*Source: Fehr & Peers*

As shown in **Table 1**, the Proposed TOP (2050) results in a decrease in employment and an increase in households as compared to the Approved TOP (2050). Specifically, the Proposed TOP (2050) results in increases in commercial and hospitality employment and decreases in office and industrial employment.

## VMT Impact Criteria

*City of Ontario Resolution Adopting Vehicle Miles Traveled Thresholds* (June 2020) outlines the methodology for VMT assessment for land use projects and defines adopted thresholds of significance for impact assessment, which are defined below. This transportation impact assessment compares VMT generated by the Proposed TOP (2050) to VMT generated by the Approved TOP (2050), reviewing total VMT and per capita VMT to provide a comprehensive assessment.

### CEQA VMT Impact Thresholds

The Ontario thresholds of significance for use as part of the environmental review process under CEQA, as defined in the City's VMT Impact Thresholds, are defined for General Plans and Specific Plans. The thresholds

of significance are:

1. Any increase in the Citywide average VMT per Service Population of the Proposed General Plan compared to the General Plan Buildout Conditions would be considered a significant impact.
2. Any increase in the total Citywide daily VMT of the Proposed General Plan calculated using the Boundary Method compared to the General Plan Buildout Conditions would be considered a significant impact.

The VMT per Resident/Employee and Boundary VMT per service population are also presented in this assessment as reference. These methodologies and metrics are detailed below.

## VMT Analysis Methodology

For all methodologies outlined, VMT can be presented as total VMT or as VMT per Service Population, Resident, or Employee. Total VMT represents all VMT generated in the City on a typical weekday. VMT per Service Population, Resident, or Employee is an efficiency metric which represents VMT generated on a typical weekday per person who lives and/or works in the City. VMT per person can be measured as VMT per Resident for residential only projects, VMT per Employee for employment only projects, and VMT per Service Population for projects and land use plans which include both residential and employment uses. Total VMT gives an estimate of the total travel, while VMT per person measures the efficiency of travel.

Total VMT and per person estimates were calculated using the three methodologies outlined below. Please note that there are multiple methods to estimate VMT, and there are limitations in the available VMT assessment tool, SBTAM, which is a typical four-step travel demand forecasting model. The model steps, which convert person trips to vehicle trips, limit the ability to separate trips by trip purpose (e.g., residential-based trips or work-based trips) while also accounting for all modal trips, as noted further below.

### Production/Attraction VMT

The Production/Attraction (PA) method for calculating VMT sums all weekday VMT generated by trips with at least one trip end in the study area by trip purpose. The PA method tracks trips with at least one trip end in the analysis area to/from their ultimate destination unless that destination is outside of the model boundary area. Productions are land use types that generate trips (residences) and attractions are land use types that attract trips (employment). Productions and attractions are converted from person trips to vehicle trips for the purposes of calculating VMT.

The PA method allows project VMT to be evaluated based on trip purpose which is consistent with OPR recommendations in the Technical Advisory. For example, a single-use project such as an office building could be analyzed based only on the commute VMT, or home-based-work (HBW) attraction VMT per

employee; and a residential project could be analyzed based on the home-based (HB) production VMT per resident.

PA matrices do not include external trips that have one trip end outside of the model boundary (IX-XI trips) or truck trips, and therefore do not include those trips in the VMT estimates. This is not consistent with the OPR recommendations that suggest full accounting of VMT should be completed.

Origin/Destination VMT

The Origin/Destination (OD) method for calculating VMT sums all weekday VMT generated by trips with at least one trip end in the study area and tracks those trips to their estimated origins/destinations. The OD method is completed after the final loops of assignment in the travel demand model (after person trips have been converted to total vehicle trips). Origins are all vehicle trips that start in a specific traffic analysis zone, and destinations are all vehicle trips that end in a specific traffic analysis zone.

The OD method accounts for external and truck trips and therefore provides a more complete estimate of all VMT within the study area. This methodology also estimates VMT consistent with VMT estimates in Air Quality, Noise, and Energy sections of an EIR.

Unfortunately, OD trip matrices do not separate trips by trip purpose, and therefore VMT cannot be calculated by home-based-work (HBW) attraction VMT per employee or home-based (HB) production VMT per resident, but only by total VMT. It should also be noted that, although VMT includes trips to/from the City that originate or are destined to locations outside of the model area, those trip lengths are artificially truncated at the model boundary.

Boundary Method VMT

The boundary method is the sum of all weekday VMT on a roadway network within a designated boundary. Boundary method VMT estimates VMT by multiplying the number of trips on each roadway segment by the length of that segment. This approach includes all trips, including those trips that do not begin or end in the designated boundary and is another way to summarize VMT. This is the only VMT method that captures the effect of cut-through and/or displaced traffic. The boundary utilized in the assessment below is the Ontario City Limits Boundary.

## VMT Estimates and Impact Assessment

The VMT estimates performed for each scenario are presented in **Table 2** and compared in **Exhibit 1.**

**Table 2: VMT Summary**

| Land Use | Existing 2019 | Approved TOP 2050 | Proposed TOP 2050 | Significant Impact |
|---|---|---|---|---|
| Population | 179,597 | 357,957 | 410,492 | N/A |
| Employment | 131,999 | 313,067 | 296,002 | N/A |
| Service Population | 311,596 | 671,024 | 706,494 | N/A |
| Total OD VMT | 12,400,139 | 19,968,991 | 20,197,558 | N/A |
| OD VMT/SP[3] | 39.80 | 29.76 | 28.59 | No – Criterion #1 |
| HBP VMT[1] | 2,495,140 | 5,325,347 | 5,474,507 | N/A |
| HBP VMT/Resident | 13.89 | 14.88 | 13.34 | N/A |
| HBWA VMT[2] | 2,605,193 | 5,112,536 | 4,802,799 | N/A |
| HBWA VMT/Employee | 19.74 | 16.33 | 16.23 | N/A |
| City Boundary VMT | 5,501,208 | 8,231,685 | 8,320,682 | Yes – Criterion #2 |
| City Boundary VMT/SP | 17.65 | 12.27 | 11.78 | N/A |

Notes:

1. HBP VMT = Home-based production VMT; VMT generated by trips originating or ending at homes in Ontario.
2. HBWA VMT = Home-based-work attraction VMT; VMT generated by trips originating or ending at employment centers in Ontario.
3. SP = Service Population; the sum of population and employment.
4. Bold values represent VMT estimates that are above the threshold of significance.

*Source: SBTAM, 2022*

**Exhibit 1: VMT Comparison**

Notes:

1. HBP VMT = Home-based production VMT; VMT generated by trips originating or ending at homes in Ontario.
2. HBWA VMT = Home-based-work attraction VMT; VMT generated by trips originating or ending at employment centers in Ontario.
3. SP = Service Population; the sum of population and employment. GP = General Plan.

Notable takeaways from the VMT estimates include:

<u>Proposed TOP (2050) compared to Existing Baseline (2019):</u>

- OD VMT/SP, HBP VMT/Resident, HBWA VMT/Employee and Boundary VMT/SP are lower in the Proposed TOP (2050), indicating a more efficient land use plan in the Proposed TOP (2050).
- Consistent with the increase in population and employment in the City, total Citywide Boundary VMT increases from the Existing Baseline (2019) to the Proposed TOP (2050).

<u>Proposed TOP (2050) compared to Approved TOP (2050):</u>

- The total OD VMT and Home-Based Production (HBP) VMT are higher in the Proposed TOP (2050) than the Approved TOP (2050), while Home-Based-Work Attraction (HBWA) VMT generated is lower. This is consistent with the higher population and lower employment planned in the Proposed TOP (2050).
- VMT Impact Threshold Criterion #1 (per person VMT efficiency metric): OD VMT/SP, HBP VMT/Resident and HBWA VMT/Employee are lower in the Proposed TOP (2050) than the Approved TOP (2050), indicating a more efficient land use plan in the Proposed TOP (2050).

- VMT Impact Threshold Criterion #2 (increase in absolute/total VMT within the City Boundary): Boundary VMT is higher under the Proposed TOP (2050) than the Approved TOP (2050) within the Ontario City boundary. The Boundary VMT/SP is lower under the Proposed TOP (2050) indicating more efficient mix of land uses

Since there would be a net increase in total Citywide Boundary VMT from Approved TOP (2050) to the Proposed TOP (2050), the Proposed TOP (2050) is anticipated to result in a **significant transportation impact related to VMT**.

### Analysis Limitations

This analysis was performed in September 2021 during the COVID-19 pandemic. The COVID-19 response has dramatically changed human activities and associated travel patterns. Performing more activities from home was already a trend due to the internet, but COVID-19 accelerated transitions to working and shopping from home. In addition, other disruptive trends related to demographic changes, new travel choices such as Uber and Lyft, and the potential for autonomous vehicle (AV) travel make predicting future travel demand and outcomes less certain. Given these limitations of modeling and forecasting, the general consistency of the project with the broader SB 743 objectives and the legislative intent of CEQA noted below may warrant greater emphasis in the VMT impact assessment.

> Public Resources Code 21001. ADDITIONAL LEGISLATIVE INTENT
>
> *The Legislature further finds and declares that it is the policy of the state to:*
>
> *(d) Ensure that the long-term protection of the environment, consistent with the provision of a decent home and suitable living environment for every Californian, shall be the guiding criterion in public decisions.*

### Ontario Goals, Policies, and Actions related to VMT Reduction

The following are relevant policies of the Ontario Plan Update, which may contribute to reducing potential transportation impacts as a result of implementation of the proposed project. VMT reducing policies, such as land use planning policies that shorten trips between where people live, work, shop and recreate, and bicycle, pedestrian, and transit policies that increase mobility options and reduce dependency on automobiles.

- LU 1-1 Strategic Growth. We concentrate growth in strategic locations that help create place and identify, maximize available and planned infrastructure, and foster the development of transit.
- LU 1-2 Sustainable Community Strategy. We integrate state, regional and local Sustainable

Community/Smart Growth principles into the development and entitlement process.

- LU 1-4 Mobility. We require development and urban design, where appropriate, that reduces reliance on the automobile and capitalizes on multi-modal transportation opportunities. (Refer to Mobility Element Policy M3-3)
- CD 2-5 Streetscapes. We design new and, when necessary, retrofit existing streets to improve walkability, bicycling, and transit integration, to strengthen connectivity, and enhance community identity through improvements to the public right of way such as sidewalks, street trees, parkways, curbs, street lighting, and street furniture.
- CD 2-6 Connectivity. We promote development of street patterns and pedestrian networks that create and unify neighborhoods, rather than divide them, and create cohesive and continuous corridors, rather than independent "islands" through the following means (Link to Mobility): 1) Local street patterns that provide access between subdivisions, within a neighborhood and discourage through traffic; 2) A local street system that is logical and understandable for the user. A grid system is preferred to avoid circuitous and confusing travel paths between internal neighborhood areas and adjacent arterials; and 3) Neighborhoods, centers, public schools, and parks that are linked by pedestrian greenways/open space networks. These may also be used to establish clear boundaries between distinct neighborhoods and/or centers.
- CD 3-1 Design. We require that pedestrian, vehicular, bicycle, and equestrian circulation on both public and private property be coordinated and designed to maximize safety, comfort, and aesthetics.
- CD 3-2 Connectivity Between Streets, Sidewalks, Walkways, and Plazas. We require landscaping and paving to be used to optimize visual connectivity between streets, sidewalks, walkways, and plazas for pedestrians.
- CD 3-4 Ground Floor Usage of Commercial Buildings. We create lively pedestrian streetscapes by requiring the location of uses, such as shopping, galleries, restaurants, etc., on ground floors adjacent to sidewalks.
- CD 3-7 Transit Stops. We require transit stops be well lit, safe, appealing to, and accessible by pedestrians.
- CE 1-12 Circulation. We continuously plan and improve public transit and non-vehicular circulation for the mobility of all, including those with limited or no access to private automobiles. (Refer to Mobility Public Transit)
- M 1-4 Complete Streets. We work to provide a balanced context sensitive, multimodal transportation network that meets the needs of all users of streets, roads, and highways, including motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods and users of public transportation. We prioritize implementation of complete streets improvements in environmental justice areas to facilitate opportunities for residents to use active

transportation systems.

- M 1-6 Reduce Vehicle Miles Traveled. We will strive to reduce VMT through a combination of land use, transportation projects, and travel demand management strategies in coordination with development projects and public capital improvement projects.
- M 2-1 Active Transportation. We maintain our Active Transportation Master Plan to create a comprehensive system of on-and off-street bikeways and pedestrian facilities that is safe, comfortable, accessible, and connect residential areas, businesses, schools, parks, and other key destination points.
- M 2-2 Bicycle System. We provide off-street multipurpose trails and Class II bikeways as our primary paths of travel and use the Class III for connectivity in constrained circumstances. When truck routes and bicycle facilities share a right of way we prefer Class I or Class IV bicycle facilities. We require new development to include bicycle facilities, such as bicycle parking and secure storage areas.
- M 2-3 Pedestrian Walkways. We require streets to include sidewalks and visible crosswalks to promote safe and comfortable mobility between residential areas, businesses, schools, parks, recreation areas, and other key destination points. (Link to Community Design CD3-1)
- M 2-4 Network Opportunities. We use public rights of way and easements such as, utility easements, levees, drainage corridors, road rights-of-way, medians, and other potential options to maintain and expand our bicycle and pedestrian network.
- M 3-1 Transit Partners. We maintain a proactive working partnership with transit providers to ensure that adequate public transit service is available, cost-efficient, and convenient, particularly for residents in environmental justice areas.
- M 3-2 Alternative Transit Facilities at New Development. We require new development adjacent to an existing or planned transit stop to contribute to the creation of transit facilities, such as bus shelters, transit bays and turnouts, and bicycle facilities, such as secure storage areas.
- M 3-3 Transit-Oriented Development. We may provide additional development-related incentives to those inherent in the Land Use Plan for projects that promote transit use amd reduce vehicle miles traveled.
- M 3-4 Bus Rapid Transit (BRT) Corridors. We work with regional transit agencies to implement BRT service and reduce vehicle miles traveled by targeting destinations and corridors with the highest number of potential riders.
- M 3-5 Light Rail. We support the extension of the Metro Rail Gold Line to Ontario and will work to secure station locations adjacent to the Meredith site and at the proposed multimodal transit center.
- M 3-6 Metrolink Expansion. We advocate expansion of Metrolink service to include the Downtown and the multimodal transit center.
- M 3-7 High-Speed Rail. We encourage the development of high-speed rail systems that would

enhance regional mobility in southern California and serve the City of Ontario.

- M 3-8 Feeder Systems. We work with regional transit agencies to secure convenient feeder service from the Metrolink station and the proposed multimodal transit center to employment centers in Ontario.
- M 3-9 Ontario Airport Metro Center Circulator. We will explore the development of a convenient mobility system, including but not limited to shuttle service, people mover, and shared car system for the Ontario Airport Metro Center.
- M 3-10 Multimodal Transit Center. We intend to ensure the development of a multimodal transit center near ONT airport to serve as a transit hub with amenities for transit riders, pedestrians, and bicyclists transitioning to local buses, BRT, the Gold Line, high-speed rail, the proposed Ontario Airport Metro Center circulator, and other future transit modes. We support locations for the multimodal transportation center that are within the Ontario Airport Metro Center Growth Area.
- M 3-11 Transit and Community Facilities. We require the future development of community-wide serving facilities to be sited in transit-ready areas that can be served and made accessible by public transit. Conversely, we plan (and coordinate with other transit agencies to plan) future transit routes to serve existing community facilities.

While these policies and measures could help reduce VMT in the City, the applicability of these mitigations would be dependent on the significance and context of the impact. Additional analysis would need to be conducted to determine how and where the mitigation measures would need to be implemented to mitigate the impact. As the VMT impact would be citywide, the mitigation measures would be focused on changing or improving the citywide travel patterns, transportation network, or infrastructure. The cost of implementing these measures is unknown and could vary substantially. Given the uncertainty of the effectiveness of implementing these mitigation measures at a citywide level and the cost associated with changing or improving travel patterns, the citywide transportation network, or infrastructure, the VMT impact is considered **significant and unavoidable**.

### VMT Estimates for Greenhouse Gas Assessment

VMT estimates were performed for the project using the Recommendations of the Regional Targets Advisory Committee (RTAC) methodology to utilize in the Greenhouse Gas Assessment. The estimates were performed using the Origin-Destination approach. The RTAC Methodology specifies to apply 100 percent of internal-to-internal trips (ii trips) and 50 percent of internal-to-external or external-to-internal trips (ix & xi trips). These estimates for each scenario and by vehicle type (passenger car, light truck, medium truck and heavy truck) are provided as **Attachment A.** Please note that these estimates differ from **Table 2** as those estimates applied 100 percent of ix & xi trips, consistent with the transportation impact analysis.

## T-3 Assessment

The project would not substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment). This impact is considered **less than significant**.

The City of Ontario has adopted engineering standards to ensure consistency in the geometric design of their mobility facilities. Additionally, all plans undergo an extensive review process at the City to ensure consistency with these adopted standards. Given that all future projects will be subject to these reviews, this impact is considered **less than significant** an no future mitigation is required.

## T-4 Assessment

The project would not result in inadequate emergency access. This impact is considered **less than significant**.

The City of Ontario has adopted standards related to emergency accessibility. Additionally, the fire department reviews all development applications to ensure that adequate emergency accessibility is provided based on local and state guidance. Since all future projects will undergo such reviews and requirements, this impact is considered **less than significant** and no future mitigation is required.

## Conclusion

The Proposed TOP has many advantages related to VMT as compared to the Approved TOP (2050), including in most cases a more efficient land use mix that results in less miles traveled per person (lower OD VMT/SP, HBP VMT/Resident and HBWA VMT/Employee), and therefore, no VMT impact for Threshold Criterion 1. However, due to the projected increase in housing and associated population based upon the Regional Housing Needs Assessment, it generates an increase in the total miles traveled within the City (Boundary VMT), which results in a significant transportation impact related to VMT. Even with the additional goals, policies and actions related to VMT reduction identified as part of the Proposed TOP, which are not reflected in the traffic modeling, the project is not anticipated to reduce the impact of increased total VMT to a less-than-significant level, resulting in a **significant and unavoidable transportation impact related to VMT.**

**Subject: City of Ontario TOP Circulation Element Traffic Analysis**

*OC20-0741*

Fehr & Peers has completed traffic forecasting and analysis in support of The Ontario Plan (TOP) Circulation Element. This memorandum details the traffic modeling approach, traffic volume forecasting, and the Level of Service (LOS) calculations completed for the project.

## Modeling Approach

The San Bernardino Traffic Analysis Model (SBTAM) was utilized to prepare the traffic forecasts for the TOP scenarios. SBTAM began as the SCAG regional travel demand forecasting model but underwent a subarea model development to add detail and refinement within San Bernardino County. SBTAM was originally developed in 2012 but has undergone updates to the land use dataset and transportation network to reflect the most recent SCAG RTP/SCS program. The SBTAM model used for this effort had an updated base year land use that reflected a 2016 base year and a 2040 future year, consistent with the 2020 SCAG RTP/SCS. Fehr & Peers updated the base year land uses to reflect the land use data inventory conducted in 2019 by PlaceWorks. The future year land use datasets and roadway network in Ontario were updated to be consistent with a 2050 future year that reflects the build out of the Adopted TOP (2050) Condition and the Proposed TOP (2050). The model roadway networks for each scenario are provided as **Figures 1-3**, and for reference, the roadway names are provided in **Figure 4**. **Figure 5** presents the Adopted TOP (2050) Functional Roadway Classifications and **Figure 6** presents the Proposed TOP (2050) Functional Roadway Classifications. The model roadway networks reflect the full build out of the functional roadway classifications. The land use assumptions for each scenario are summarized in **Table 1**.

**Table 1: Land Use Inputs for Ontario TOP Scenarios**

| Land Use | Existing 2019 | Adopted TOP 2050 | Proposed TOP 2050 |
|---|---|---|---|
| **Households** | **50,367** | **104,163** | **124,380** |
| **Population** | **179,597** | **357,957** | **410,492** |
| **Total Employment** | **131,999** | **313,067** | **296,002** |
| Commercial Employment | 26,363 | 28,948 | 37,276 |
| Office Employment | 36,215 | 168,833 | 158,541 |
| Hospitality Employment | 606 | 3,228 | 4,277 |
| Industrial Employment | 63,515 | 108,881 | 92,730 |
| Educational Employment | 4,171 | 3,086 | 3,086 |
| Other Employment | 1,129 | 91 | 93 |

*Source: Fehr & Peers*

As shown in **Table 1**, the Proposed TOP results in a decrease in employment and an increase in households as compared to the Adopted TOP. Specifically, the Proposed Plan results in increases in Commercial Employment and Hospitality Employment and decreases in Office Employment and Industrial Employment.

## Traffic Volume Forecasts

Traffic volume forecasts were prepared for 93 roadway segments for the Existing and Proposed TOP 2050 scenarios. The roadway segments cover major arterials throughout the City. Traffic growth between base and future years was reviewed and added to existing (2019) traffic counts to prepare the 2050 roadway segment forecasts. The traffic forecasts are provided as **Attachment A**.

## Traffic Operations Analysis

Capacity assessment was performed based on the Highway Capacity Manual (HCM) 6th Edition methodology. This methodology determines the level-of-service (LOS) based on a Volume-to-Capacity (V/C) ratio, letter grade criteria LOS A through F. As shown in **Table 2**, these grades range from LOS A (minimal delay) to LOS F (congested conditions). LOS E represents at-capacity operations. For the City of Ontario, LOS D is the minimum acceptable standard for roadways.

**Table 2: Level of Service Grades**

| Level of Service | V/C Ratio |
|---|---|
| A | 0.000-0.600 |
| B | 0.601-0.700 |
| C | 0.701-0.800 |
| D | 0.801-0.900 (City Minimum Standard) |
| E | 0.901-1.000 |
| F | Greater than 1.000 |

*Source: Highway Capacity Manual (Transportation Research Board, 2017)*

Roadway capacities in future conditions reflect the full buildout of the TOP Circulation Element. The following study segments are forecast to be near or over capacity (LOS E or F) in 2050 under the Adopted TOP or the Proposed TOP conditions:

- Holt Boulevard east of Grove Avenue:
  - Proposed TOP: LOS F
- Haven Street south of I-10
  - Adopted TOP: LOS E
  - Proposed TOP: LOS E
- Milliken Avenue south of I-10
  - Proposed TOP: LOS E
- Archibald Avenue south of Chino Road
  - Proposed TOP: LOS E
- Mountain Avenue south of Holt Boulevard
  - Adopted TOP: LOS F
  - Proposed TOP: LOS F
- Grove Avenue south of Holt Boulevard
  - Proposed TOP: LOS E
- Grove Avenue south of Airport Drive
  - Proposed TOP: LOS E
- Mission Boulevard east of Grove Avenue
  - Adopted TOP: LOS F
  - Proposed TOP: LOS F

These roadways are forecast to operate below the adopted LOS standard, and these roadways are already built out within their right-of-way extents. It is not feasible, or in the City's best interest, to widen these roads given the adjacent land uses and capital improvement costs. The City should develop policies that promote reduction in traffic congestion such as Intelligent Transportation Systems (ITS) and Travel Demand Management (TDM) measures. Many effects of congestion can be reduced at the intersection level, as

opposed to widening streets. Major intersections along the roads noted above are classified as Enhanced Intersections, which allow flexibility from the standard intersection configuration to increase capacity, improve operation, and respond to local conditions. Enhancements may include additional lanes, reduced median width, increased right-of-way width, removal of on-street bike lanes, or reduction of parkway width. Detailed engineering studies are necessary to identify the most effective types of improvements.

Since the above roadway segments aren't anticipated to meet the adopted LOS standard, the City should develop policies to exempt them from the adopted LOS standard. We recommend the City keep a running list of the exempt roadways and intersections in the City's Traffic Study Guidelines that can be updated periodically, as needed, by the City's Traffic Engineer.

## Recommendations

Based on the traffic forecasts and analysis above, Fehr & Peers recommends changes to the proposed TOP 2050 Circulation Element map, including lane reductions, changes to functional classifications and/or road diets as shown in **Figure 6**.

Many roadway segments are forecast to have excess capacity and operate at LOS A or B under future conditions at the full buildout of the Adopted TOP 2050 Circulation Element. Many of these roadways are classified as wider street cross sections than are currently built. The implementation of those full cross sections will be difficult to accomplish without significant redevelopment, and many of the segments abut established residential areas. These roadways are candidates for lane reductions and/or change in roadway classification in the Circulation Element that reflect the built environment.

Other roadways have already been widened to the full extent and are candidates for road diets[1]. A well-designed, two-lane road should be able to accommodate approximately 20,000 vehicles per day, allowing for the remaining right-of-way to be repurposed for protected turn lanes, pedestrian facilities, bicycle facilities, or transit lane improvements.

Some roadways, such as Holt Boulevard east of Grove Avenue, are planned Bus Rapid Transit (BRT) routes that will dedicate right-of-way (ROW) for transit only lanes. These are forecast to operate below the City's standard with the recommended lane reduction (from proposed six lanes to maintain existing four lanes) in order to promote multi-modal benefits of improving public transit.

[1] A Road Diet is generally described as "removing travel lanes from a roadway and utilizing the space for other uses and travel modes." Refer to Federal Highway Administration's web site for more information at: https://safety.fhwa.dot.gov/road_diets/guidance/info_guide/ch1.cfm#n4

Greetings,

A records check of the Tribal Historic preservation office's cultural registry revealed that this project is not located within the Tribe's Traditional Use Area. Therefore, we defer to the other tribes in the area. This letter shall conclude our consultation efforts.

Thank you,

**Arysa Gonzalez Romero, M.S., RPA.**

Hello Thomas Grahn,

Thank you for your letter dated July 2,2021 regarding the general plan.Our tribal government concurs with the updated plan.However if you anticipate construction or any ground disturbance activities in the near future our tribal government would like to engage consultation with you the lead agency.Thank you for your time and consideration.

Sincerely,

Savannah Salas

*The region where Gabrieleño culture thrived for more than eight centuries encompassed most of Los Angeles County, more than half of Orange County and portions of Riverside and San Bernardino counties. It was the labor of the Gabrieleño who built the missions, ranchos and the pueblos of Los Angeles. They were trained in the trades, and they did the construction and maintenance, as well as the farming and managing of herds of livestock. "The Gabrieleño are the ones who did all this work, and they really are the foundation of the early economy of the Los Angeles area " . "That's a contribution that Los Angeles has not recognized--the fact that in its early decades, without the Gabrieleño, the community simply would not have survived."*

**To:** Thomas Grahn <TGrahn@ontarioca.gov>
**Subject:** RE: NOP/SEIR for the Ontario Plan 2050

Hello Thomas,
Thank you for contacting the San Manuel Band of Mission Indians (SMBMI) regarding the above referenced project. SMBMI appreciates the opportunity to review the project documentation, which was received by our Cultural Resources Management Department on July 28th. The project is located within Serrano ancestral territory, and the area for the project is of interest, but Tribe sees no conflicts with the zoning changes at this time. However, when specific projects are planned and implemented, SMBMI might have comments and/or request formal consultation with the Lead Agency pursuant to CEQA (as amended, 2015) and CA PRC 21080.3.1.
This communication concludes SMBMI's input on this project, at this time, and no additional consultation under SB18 is required. If you should have any further questions with regard to this matter, please do not hesitate to contact me at your convenience, as I will be your Point of Contact (POC) for SMBMI with respect to this project.
Respectfully,
Ryan Nordness

**Subject:** RE: General Plan Update, Ontario, San Bernardino County, California

Jamie
Thank you for your response. The TOP 2050 Update is a technical update to the City's General Plan to address state mandates, primarily housing requirements of the Regional Housing Needs Assessment (RHNA). The Update does not include any plans for museums, cultural centers, or interpretative sites; however, the City recently completed a Parks Masterplan Update, which may address your concerns. I'm including the director of the City's Community Life & Culture Department in the reply. The CLC oversees the Ontario Museum of History & Art, and she may be able to address your concerns.

Please contact me should you have any further questions.

Hello Thomas Grahn,
Thank you for contacting the San Manuel Band of Mission Indians (SMBMI) regarding the above referenced project. SMBMI appreciates the opportunity to review the project documentation, which

was received by our Cultural Resources Management Department on July 7th, 2021. This effort may impact projects located within Serrano ancestral territory, and therefore, is of interest to the Tribe. At this time, SMBMI is requesting additional information concerning whether the General Plan updates will include any plans for museums, cultural centers, or interpretive sites. If you should have any further questions with regard to this matter, please do not hesitate to contact me at your convenience.

Respectfully,

Jamie Nord
