Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2021080288

Project Title: East Weaver Creek Dam Removal and Intake Relocation Project

Lead Agency: Weaverville Community Services District

Contact Name: Tim Kasper

Email: tim@weavervillecsd.com Phone Number: (530)623-5051

Project Location: Weaverville, CA Trinity

City *County*

Project Description (Proposed actions, location, and/or consequences).

The project will remove the East Weaver Creek Dam, install a screened intake, and allow fish passage while maintaining water reliability to the community of Weaverville. The East Weaver Creek Dam is rated in poor condition due to repairs or modifications required to maintain the structure operationally. Deficiencies are evident on visual inspection of the dam including: loss of concrete apron segments, concrete spalling, exposed rebar, water flows interstitially through the dam's rock structure, sediment filling upstream, and bed scour below the base of the dam. The East Weaver Creek Dam is a complete barrier to aquatic species including the threatened coho salmon (Oncorhynchus kisutch). It is recognized as the only complete barrier to upstream fish migration for all life stages of all fish species in East Weaver Creek.
The project site is not on any of the lists enumerate under Section 65962.5 of the Government Code including, but not limited to, lists of hazardous waste facilities, land designated as hazardous waste property, and hazardous waste disposal sites.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Draft Initial Study and Negative Declaration (IS/ND) did not identify significant or potentially significant effects associated with the project's actions. The IS/ND declared that the project will have no impacts to many of the concerned categories and less than significant impacts to biological resources and water quality. The project will follow federal and state minimization and avoidance measures as stated in the document.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Provide a list of the responsible or trustee agencies for the project.
