Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Highlands High School Sports Complex

Lead Agency: Twin Rivers Unified School District

Contact Name: Kristen Coates

Email: kristen.coates@twinriversusd.org Phone Number: 916-566-1600

Project Location: North Highlands (*City*) Sacramento (*County*)

Project Description (Proposed actions, location, and/or consequences).

Development of an artificial turf sports field, primarily for soccer use but also some football practice and community use, with bleachers for approximately 500 spectators on an approximate 8.5- acre site on the overall 60-acre campus.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Impacts and mitigations summarized below:

1) Impacts to nesting birds. Mitigation: A pre-construction survey for nesting birds shall be conducted by a qualified biologist within two weeks of construction activities.
2) Impacts to cultural resources. Mitigation: If archaeological remains are encountered during project activities, project ground disturbances at the find and immediate vicinity shall be halted immediately until a qualified archaeologist can evaluate the finds; If human remains are uncovered during ground disturbing activities all such activities in the vicinity of the find shall be halted immediately and the District or the District's designated representative shall be notified.
3) Geologic impacts. Mitigation. The project's site clearing, site preparation, subgrade preparation and stabilization, fill, drainage, and any foundation systems shall be designed and constructed per the Geotechnical Engineering Report .
4) Impacts to Hydrology. Prepare a Stormwater Pollution Prevention Plan; maintain in perpetuity the post- construction BMPs listed in the Low Impact Design plans.
5) Noise Impacts. Construction equipment and work hours limitations; PA system design criteria; limitations on attendance at, and hours of, large events at the facility.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None

Provide a list of the responsible or trustee agencies for the project.
