# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2022030717

Project Title: Hood Septic to Sewer Conversion

Lead Agency: Sacramento Area Sewer District

Contact Name: Julie Newton

Email: newtonj@saccounty.net Phone Number: (916) 876-8502

Project Location: Sacramento *City* Sacramento *County*

Project Description (Proposed actions, location, and/or consequences).

If the project were to receive grant funding, SASD would extend of public sewer service to up to 141 parcels (52 are vacant, 76 are residential, and 13 are non-residential) in the community of Hood. SASD would conduct additional outreach to the 141 residences in the neighborhood. If the property owners were interested in connecting to the public sewer, they would sign an agreement requiring them to abandon their existing septic system in accordance with the County Environmental Management Department (EMD)'s guidelines. Abandonment would require the existing septic tank to be pumped, the tank bottom to be punctured, and the tank to be filled with sand, gravel, concrete, or other approved material to the surface elevation. The residence would then be connected to the public sewer and the residence would become a customer of SASD & Regional Sanitation. Scope of work for connection of private residences to the public sewer is limited to the septic tank and below-grade pipe installation and does not involve any work to homes or above-ground structures

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Resource areas to be analyzed in the EIR: Aesthetics, Air Quality, Biological Resources, GHG emissions, Cultural Resources, Tribal Cultural Resources, Geology and Soils, Hazards and Hazardous Materials, Hydrology and Water Quality, Land Use, Population and Housing, Noise, Public Utilities, Wildfire

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No known areas of controversy

Provide a list of the responsible or trustee agencies for the project.
