Project Description (Proposed actions, location, and/or consequences).

The proposed project includes the demolition of two existing buildings and construction of a three-story dormitory for homeless people. The proposed dormitory would include 14,577 square feet of floor area which would provide sleeping rooms accommodating one to four beds, a classroom or common area, common rest-shower rooms, commercial and resident laundry, computer center, counseling offices, janitorial-supply room and either a classroom or recreation room on each floor. Utility services would be extended to the site from existing City water, sewer, storm drain and public utility lines in S. San Joaquin Street. An elevator would provide ADA access throughout the building. The building would be capable of accommodating up to 178 homeless persons under pandemic or other overflow conditions.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.
