Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: San Ramon General Plan 2040 and Climate Action Plan Update

Lead Agency: City of San Ramon

Contact Name: Cindy M. Yee, AICP, Senior Planner

Email: Planning@sanramon.ca.gov Phone Number: _____

Project Location: San Ramon (*City*) Contra Costa (*County*)

Project Decription (Proposed actions, location, and/or consequences).

The General Plan Amendment would entail two plans: 1) the General Plan 2040 and 2) the CAP Update. The General Plan 2040 would serve as a long-term framework for future growth, establish the City's eight-year housing plan from 2023 to 2031, reflect issues identified from community input and changes in State law, and update all elements of the General Plan including the Housing, Economic Development, Growth Management,
Land Use, Traffic and Circulation, Parks and Recreation, Public Facilities and Utilities, Open Space and Conservation, Safety, Noise, and Air Quality and Greenhouse Gas Elements. The update to the General Plan would include, but is not limited to, addition of Environmental Justice policies, revisions to policies, narratives, data, and figures to reflect the new buildout period. The CAP Update would quantify existing greenhouse gas (GHG) emissions and projected emissions associated with estimated community growth, set reduction goals and timelines for community emissions, develop and quantify reduction measures and actions to achieve the emissions reduction goals, and establish a framework for monitoring emissions levels.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The EIR will evaluate the potential physical environmental impacts that could result from future actions for implementing the policies proposed under the General Plan and Climate Action Plan Update at a programmatic level.

The topical areas that will be addressed in the EIR are: Aesthetics, Air Quality, Agricultural and Forestry Resources, Biological Resources, Cultural Resources, Energy, Geology and Soils, Greenhouse Gas Emissions, Hazards and Hazardous Materials, Hydrology and Water Quality, Noise, Land Use and Planning, Mineral Resources, Population and Housing, Public Services and Recreation, Transportation, Tribal Cultural Resources, Utilities and Service Systems, and Wildfire.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None known at this time.

Provide a list of the responsible or trustee agencies for the project.

There are no responsible or trustee agencies for the project at this time.
