Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Forebay Park Improvement

Lead Agency: El Dorado County

Contact Name: Vickie Sanders

Email: vickie.sanders@edcgov.us Phone Number: 530-621-7538

Project Location: Pollock Pines, El Dorado County
City *County*

Project Description (Proposed actions, location, and/or consequences).

The County of El Dorado proposes to construct additional recreational facilities, relocation of existing restroom facilities, and improvement of the existing parking lot for the already extant Forebay Park in El Dorado County, California. The proposed project would include additional construction and improvements within an approximately 9.4-acre area of the existing 16.9-acre park. The additional recreation facilities would include a disc golf course, a playground, workout area with outdoor exercise equipment, shared basketball and pickleball courts, picnic areas, and fenced dog park and supporting features such as a new restroom, improved parking (including ADA-accessibility), and landscaping. The proposed fenced dog park would replace the current use of the existing ball field as an informal dog park; the ball field would only be used for baseball (no dogs allowed) after proposed improvements. Existing trees would be integrated into the site design, particularly in the dog park and disc golf course areas, to the greatest extent possible. No expansion is proposed for the existing ball field, community center, horseshoe courts, batting cages, and associated outbuildings.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

This project has the potential to affect California red-legged frog, western pond turtle, northern goshawk, bald eagle, and nesting migratory birds and raptors. Mitigation Measures (MM) BIO-1 requires pre-construction surveys and avoidance measures if species are present. MM BIO-2 requires worker environmental awareness training by a qualified biologist to make workers aware of the biological resources that may be affected by the project. Protected native oaks will be removed for the project. MM BIO-3 requires obtaining a removal permit and payment of associated fees, and protection of trees to be preserved in place. Potential impacts to cultural resources include inadvertent discovery of historic, archaeological resources, and human remains. MM CUL-1 requires worker awareness training; MM CUL-2 and -3 address inadvertent discoveries. The project site is located in a Very High Fire Hazard Severity zone. MM HAZ-1 requires keeping all areas in which work shall be completed using spark-producing equipment clear of dried vegetation or other materials that could serve as fire fuel in order to maintain a fire break.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

The project does not have any significant areas of controversy.

Provide a list of the responsible or trustee agencies for the project.
