Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Woodcrest-Rinehart Acres Drainage Plan Project

Lead Agency: Riverside County Flood Control and Water Conservation District

Contact Name: Jason Swenson

Email: JDSwenso@rivco.org Phone Number: 9519558082

Project Location: Unincorporated/Riverside
City *County*

Project Description (Proposed actions, location, and/or consequences).

The Riverside County Flood Control and Water Conservation District (District), is proposing to construct, operate, and maintain approximately 8,000 lineal feet (LF) of a reinforced concrete pipe storm drain system, including catch basins and an outlet structure. The storm drains will be located along portions of Granite Avenue, Obsidian Drive, Boulder Avenue, Mariposa Avenue, Dallas Avenue, and Wood Road and will convey flows to the proposed outlet. The proposed outlet structure will discharge flows into an existing blueline stream at the southeast intersection of Wood Road and Dallas Avenue. Additionally, the Project includes approximately 10,000 LF of street improvements necessary to collect and deliver runoff to the proposed storm drains. The purpose of the Project is to provide flood protection to the Woodcrest and adjacent communities. Project components will be located along portions of Mariposa Avenue, Granite Avenue, Boulder Avenue, Dallas Avenue, Obsidian Drive, and Wood Road. The proposed outlet location is within a portion of Assessor's Parcel Number (APN) 266-211-004.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Project's potentially significant effects include those to Biological Resources, Cultural Resources, and Tribal Cultural Resources. Mitigation Measures are proposed to reduce all the effects to less than significant levels. Biological resources mitigation includes conducting a preconstruction Burrowing Owl survey 30 days prior to ground disturbance and nesting bird survey when site disturbing activities are conducted during nesting season (February - August). Cultural resources mitigation includes that a qualified professional archaeologist examine inadvertent discoveries of cultural resources and/or human remains. Tribal Cultural resources mitigation includes the preparation of a Tribal/Cultural Resources Management Plan (TCRMP) prior to ground disturbing activities and archaeological monitoring/reconnaissance of the site, as needed by a qualified archaeologist.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A

Provide a list of the responsible or trustee agencies for the project.

Responsible agencies include the California Department of Fish and Wildlife, Region 6, the Army Corps of Engineers, the Santa Ana Regional Water Quality Control Board, Riverside County Transportation Department, City of Riverside, and Western Municipal Water District.
