Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Walker Street Digital Billboard Project

Lead Agency: City of La Palma

Contact Name: Jeff Adams, Planning Consultant

Email: CDconsultant@cityoflapalma.org Phone Number: 714-690-3336

Project Location: La Palma (*City*) Orange (*County*)

Project Description (Proposed actions, location, and/or consequences).

The City of La Palma received an application for construction of a double-sided digital billboard on land adjacent to and abutting State Route 91 (SR-91) right-of-way within city boundaries. The proposed billboard will be located on a parcel on the north side of SR-91, which is currently occupied by a 25,000-square foot commercial/light industrial building. No changes are proposed to the existing parcel other than construction of the pole sign and digital display. The project also proposes the replacement of twenty (20) existing Eucalyptus trees with eight (8) Peppermint willows and twelve (12) crape myrtles within the California Department of Transportation (Caltrans) freeway right-of-way along the north side of the freeway. Utility connections (electrical) for the billboard will also be provided as part of the proposed project. Construction will include drilling of a hole for the sign-pole, pouring of anchors, erection of the sign-pole, and installation of the digital LED display atop the sign-pole. No other structures or buildings besides the sign-pole and billboard facings are proposed. Construction of the sign will not require demolition, paving, or grading activities.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Aesthetics impacts related to excessive light and glare would be reduced to less than significant with incorporation of mitigation measures.

Biological Resources impacts related to nesting birds would be reduced to less than significant with incorporation of mitigation measures.

Cultural Resources impacts related to archaeological resources would be reduced to less than significant with incorporation of mitigation measures.

Geology and Soils impacts related to paleontological resources would be reduced to less than significant with incorporation of mitigation measures.

Transportation impacts related to hazards would be reduced to less than significant with incorporation of mitigation measures.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
