Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2019029121

Project Title: Jenny Lind Elementary School Wastewater Regionalization Project

Lead Agency: Calaveras Unified School District

Contact Name: Mark Campbell

Email: Mcampbell@calaveras.k12.ca.us Phone Number: (209) 754-2301

Project Location: Jenny Lind (*City*) Calaveras (*County*)

Project Description (Proposed actions, location, and/or consequences).

The District is in the process of obtaining a State Water Resources Control Board (SWRCB) Clean Water State Revolving Fund (CWSRF) Grant to replace the wastewater system at the Jenny Lind ES (JLES). The project will require work on the JLES site as well as off-site. Off-site improvements include installation of a pipeline from JLES to the existing CCWD gravity sewer located at the west end of Vista Del Lago Dr West. The project will also include replacement of +/- 870 linear foot of pipeline that bisects the La Contenta Plaza back parking area, traverses several residential lots and terminates on the La Contenta Golf Club property.

The April 2019 IS/MND evaluated the potential effects of regionalization of the Jenny Lind Elementary School wastewater treatment system. This Subsequent IS/MND adds environmental evaluation of an alternative location of the Intermediate Lift Station and revised construction methods to avoid stream crossings.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Source of nighttime light or glare: All outdoor lighting will be hooded or screened to direct light source downward and away from adjacent properties.
Special status species: CTS - Seasonal avoidance, environmental awareness training of all construction staff, identification and protection of environmentally sensitive areas, avoidance of entrapment. WPT - preconstruction surveys will be conducted, and any found WPT will be relocated prior to construction, environmental awareness training of all construction staff. MBTA-protected birds - Measures to prevent nest establishment, seasonal avoidance and/or preconstruction surveys, identification and protection of environmentally sensitive areas. Water features - Identification and protection of environmentally sensitive areas, implementation of BMPs to protect water quality, seasonal avoidance, proper treatment and use of construction materials and equipment.
Cultural resources: Undiscovered cultural resources and/or human remains - In the event of discovery of cultural resources, construction will stop until the find is evaluated by a professional archaeologist. In the event of discovery of human remains, construction will stop until County Coroner has made necessary findings as to origin and disposition, and notified the NAHC as required.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
