Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2017042041

Project Title: San Anselmo Flood Risk Reduction (SAFRR) Project

Lead Agency: Marin County Flood Control and Water Conservation District

Contact Name: Hugh Davis, Civil Engineer

Email: envplanning@marincounty.org Phone Number: (415) 473-4232

Project Location: Unincorporated Area (*City*) Marin County (*County*)

Project Description (Proposed actions, location, and/or consequences).

At a site near Woodacre on San Geronimo Creek, the Marin County Flood Control and Water Conservation District proposes compensatory mitigation planting, which is required to offset impacts caused by implementation of the project. The project, as approved in 2018, involves taking various flood risk reduction actions in unincorporated Marin County just west of Fairfax and San Anselmo to increase creek capacity, remove obstructions, and attenuate flows within portions of the San Anselmo Creek and Fairfax Creek sub-watersheds in Ross Valley, located in central-eastern Marin County.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

AIR QUALITY: The size and geographic location of the proposed action (which is required pursuant to the FEIR and other permits for the SAFRR project) were not known at the time of FEIR certification; potentially significant impacts of the proposed action related to air quality would be less than significant with implementation of previously adopted Mitigation Measures 4.3-1 and 4.3-4. No changes to the existing Mitigation Measures, and no additional mitigation measures, are required.

BIOLOGICAL RESOURCES: Potentially significant impacts of the proposed action related to biological resources would be less than significant with implementation of previously adopted Mitigation Measures 4.5-2, 4.5-3b, and 4.5-4. No changes to the existing Mitigation Measures, and no additional mitigation measures, are required.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A

Provide a list of the responsible or trustee agencies for the project.

California Fish & Wildlife, Region 3
California Regional Water Quality Control Board, Region 2
