Present Land Use/Zoning/General Plan Designation:

Existing Composting Facility; Agriculture Large Scale / A-40Ac

Project Description: (please use a separate page if necessary)

The applicant has applied for a modification of its Use Permit and an Architectural Site Approval for its existing composting facility at 980 State Route 25. The proposed modification would allow an upgrade of the facility's existing municipal solid waste (MSW) composting process from the current windrow method to an aerated static pile process and associated modifications to existing operations and site conditions to accommodate the new processing technology. The purpose of the proposed project is to enable faster and more efficient composting of MSW.

The proposed technology and operations modifications would enable Z-Best to increase its current permitted composting capacity from a total of 1,500 tons per day (tpd) with up to 15 days per year at 2,500 tpd, to 2,750 tpd with up to 20 days per year at 3,500 tpd.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or Initial Study) and the project is consistent with state mandates and the State of California's Department of Resources Recycling and Recovery (CalRecycle) goals to increase waste diversion from landfills. The proposed increase in intake volume would be from 1,500 to 2,750 tpd from increased MSW. No modification of existing green waste processes or increase in green waste intake volume is proposed as part of the proposed project.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
If you have already sent your document to the agency please denote that with an "S".
