

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2017032025

Project Title: CSA 17 Wastewater Collection and Treatment Improvement Project

Lead Agency: Shasta County

Contact Name: William Miller, Assistant Engineer

Email: wmiller@shastacounty.gov

Phone Number: 530.245.6818

Project Location: Cottonwood  
*City*

Shasta  
*County*

Project Description (Proposed actions, location, and/or consequences).

Shasta County adopted a MND for the project on April 18, 2017. The MND addressed sewer system improvements in the unincorporated community of Cottonwood, including improvements to the existing wastewater treatment plant (WWTP), Black Lane Lift Station, Quail Lane Lift Station, and Cottonwood (Main) Lift Station; repair of manholes; installation of parallel or replacement collection lines; and spot repairs of the collection lines.

Following adoption of the MND, the County determined that revisions to the project were required, and an Addendum (Addendum No. 1) was adopted by the County on August 2, 2022. Addendum No. 1 addressed improvements to the Crowley Creek Lift Station, replacing additional sewer mains, and repairing additional manholes. The proposed Addendum (Addendum No. 2) addresses replacement of an additional ~140 feet of sewer main.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

As documented in the Initial Study/Mitigated Negative Declaration (IS/MND), project implementation could result in temporarily increased air emissions, possible impacts on special-status wildlife species and riparian habitat, disturbance of nesting migratory birds (if present), the introduction and spread of noxious weeds during construction, impacts on cultural resources and tribal cultural resources (if present), and temporarily increased noise and vibration levels. The IS/MND concluded that all potential impacts can be reduced to levels that are less than significant through implementation of the mitigation measures included in the Mitigation Monitoring and Reporting Program for the project.

As documented in Addendum No. 2, the proposed modifications would not change the conclusions in the adopted MND. No new potentially significant impacts would occur, and the modified project would not increase the severity of previously identified potentially significant impacts.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

The Lead Agency is not aware of any issues that would be considered controversial, either to the public or to any regulatory agency.

Provide a list of the responsible or trustee agencies for the project.

State Water Resources Control Board, Central Valley Regional Water Quality Control Board, and California Department of Fish and Wildlife.
