re: Paleontological resources for the IDS Warehouse Project

Dear Arabesque:

I have conducted a thorough search of our paleontology collection records for the locality and specimen data for proposed development at the IDS Warehouse project area as outlined on the portion of the San Dimas USGS topographic quadrangle map that you sent to me via e-mail on April 11, 2023. We do not have any fossil localities that lie directly within the proposed project area, but we do have fossil localities nearby from the same sedimentary deposits that occur in the proposed project area, either at the surface or at depth.

The following table shows the closest known localities in the collection of the Natural History Museum of Los Angeles County (NHMLA).

Locality Number	Location	Formation	Taxa	Depth
LACM VP 6166, 6167, 6172, 6173, 7471	Puddingstone Reservoir, San Jose Hills	Puente Formation	Sturgeonfish ( <i>Prionurus</i> ), Mako shark ( <i>Isurus planus</i> ), Extinct bony fish ( <i>Etringus</i> ), Mola (Molidae), other Fish (Osteichthyes)	Surface
LACM VP 6170	Near the intersection of Valley Blvd and Fullerton Rd.	Puente Formation (white diatomites)	Fish (Osteichthyes)	Unknown
LACM VP 1728	W of intersection of English Rd & Peyton Dr, Chino	Unknown (light brown shale with interbeds of very coarse brown sand; Pleistocene)	Horse ( <i>Equus</i> ), camel ( <i>Camelops</i> )	15-20 feet bgs
LACM VP 7508	Near intersection of Vellano Club Dr. and Palmero Dr., Oakcrest Development; N of Serrano Canyon, Chino Hills	Unknown formation (Pleistocene)	Ground sloth ( <i>Nothrotheriops</i> ); elephant family (Proboscidea); horse ( <i>Equus</i> )	Unknown

LACM VP 7268-7271	Sundance Condominiums, South of Los Serranos Golf Course	Unknown (Pleistocene)	Horse ( <i>Equus</i> )	Unknown
----------------------	--	--------------------------	------------------------	---------

*VP, Vertebrate Paleontology; IP, Invertebrate Paleontology; bgs, below ground surface*

This records search covers only the records of the NHMLA. It is not intended as a paleontological assessment of the project area for the purposes of CEQA or NEPA. Potentially fossil-bearing units are present in the project area, either at the surface or in the subsurface. As such, NHMLA recommends that a full paleontological assessment of the project area be conducted by a paleontologist meeting Bureau of Land Management or Society of Vertebrate Paleontology standards.

Sincerely,

Alyssa Bell, Ph.D.  
Natural History Museum of Los Angeles County
