

C-3b Supplemental Project LADOT Freeway Safety Analysis

MEMORANDUM

TO: Mike Harden, ESA

FROM: Jonathan Chambers, P.E.

DATE: July 22, 2020

RE: LADOT Freeway Safety Analysis for the
6220 Yucca Street Mixed-Use Project
Hollywood, California

Ref: J1372

In May 2020, subsequent to the release of *Draft Environmental Impact Report: 6220 W. Yucca Project* (ESA, April 2020) (Draft EIR), the Los Angeles Department of Transportation (LADOT) released *Interim Guidance for Freeway Safety Analysis* (LADOT, May 1, 2020) (City Freeway Guidance) identifying City requirements for a CEQA safety analysis for California Department of Transportation (Caltrans) facilities.

Based on the traffic analysis conducted for the proposed 6220 W. Yucca Project (Project), it would not generate 25 or more peak hour trips at any freeway off-ramp. Therefore, according to the City Freeway Guidance, no analysis is required.
