**Subject:** Marriott Townplace Suites - CEQA project SCH 2003042127

Hello,

The California Geological Survey (CGS) has received a Notice of Preparation (NOP) of a draft Supplemental Environmental Impact Report (SEIR) for the Marriott Townplace Suites Project. Based on the information provided in this NOP, CGS notes the SEIR will address “existing geologic and soil conditions and discuss the possible geological impacts associated with seismic activity and the existing on-site soil conditions.” However, the hazard of liquefaction is not specifically discussed.

The project area is located in an Earthquake Zone of Required Investigation for liquefaction, and the SEIR should address this potential hazard with respect to the project. Relevant digital maps (PDF and Shapefiles) and reports can be downloaded from the CGS Information Warehouse, here:

<http://maps.conservation.ca.gov/cgs/informationwarehouse/>.

Please let us know if you have any questions or concerns.

Erik
