Phase I Environmental Site Assessment Update
Block H Development
West Julian, Terrain and Bassett Street Parcels
San Jose, California

SECTION 1: INTRODUCTION

This report presents the results of the Phase I Environmental Site Assessment (ESA) Update performed at an approximately 1.5 acre property bordered by Old West Julian Street, Terrain Street, Bassett Street and Highway 87 in San Jose, California (Site) as shown on Figures 1 and 2. The Site is referred to as Lot 9 or Block “H.” This report is an update to our prior Phase I ESA report dated February 23, 2015 and was prepared for Westbank Projects PP (US) Corp (Westbank) in accordance with our December 18, 2020 Agreement (Agreement).

1.1 PURPOSE

The scope of work presented in the Agreement was prepared in general accordance with ASTM E 1527-13 titled, “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, “Standards and Practices for All Appropriate Inquiries; Final Rule” (AAI Rule). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the property.

As defined by ASTM E 1527-13, the term Recognized Environmental Condition means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not Recognized Environmental Conditions.

Cornerstone Earth Group, Inc. (Cornerstone) understands that development of the Site with an 18-story residential tower is planned. An associated parking structure will extend one story below grade. We performed this Phase I ESA Update to support Westbank in evaluation of Recognized Environmental Conditions at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

1.2 SCOPE OF WORK

As presented in our Agreement, the scope of work performed for this Phase I ESA Update included the following:

- A reconnaissance of the Site to note readily observable indications of significant hazardous materials releases to structures, soil or groundwater.
- Drive-by observation of adjoining properties to note readily apparent hazardous materials activities that have or could significantly impact the Site.
- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents at nearby facilities.
- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.
- Review of readily available past reports to help evaluate past and current Site uses.
- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Phase I ESA Update are presented in Section 10.

1.3 ASSUMPTIONS

In preparing this Phase I ESA Update, Cornerstone assumed that all information received from interviewed parties is true and accurate. In addition, we assumed that all records obtained by other parties, such as regulatory agency databases, maps, related documents and environmental reports prepared by others are accurate and complete. We also assumed that the boundaries of the Site, based on information provided by Westbank, are as shown on Figure 2. We have not independently verified the accuracy or completeness of any data received.

1.4 ENVIRONMENTAL PROFESSIONAL

This Phase I ESA Update was performed by Stason I. Foster, P.E. and Kurt M. Soenen, P.E., Environmental Professionals who meet the qualification requirements described in ASTM E 1527-13 and 40 CFR 312 § 312.10 based on professional licensing, education, training and experience to assess a property of the nature, history and setting of the Site.

SECTION 2: SITE DESCRIPTION

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1 and 2. Tables 1 through 3 summarize general characteristics of the Site and adjoining properties. The Site is described in more detail in Section 7, based on our on-Site observations.

2.1 LOCATION AND OWNERSHIP

Table 1 describes the physical location, and ownership of the property, based on information provided by Westbank. The addresses listed in Table 1 include historical addresses obtained from Sanborn fire insurance maps, historical city directories and other documents reviewed during this study.

Table 1. Location and Ownership

Assessor's Parcel No. (APN)	259-24-020, 040, and 041
Reported Addresses	201 to 217 West Julian Street, San Jose 235 West Julian Street, San Jose (see note below) 301 to 359 Terraine Street, San Jose 200 to 226 Bassett Street, San Jose
Owner	NSP Block H Development LLC
Approximate Lot Size	1.5 acres
Approximate Bldg. Size	None

Note that the 235 West Julian Street address is shown on historical Sanborn fire insurance maps as having been located off-Site to the west, in the general vicinity of the present day Highway 87. This address was referenced as being on-Site in prior reports by Secor (2005) and was subsequently used by the City of San Jose Redevelopment Agency (RDA) in 2007 when applying to the Regional Water Quality Control Board (Water Board) for agency oversight for a previously planned development on a portion of the Site. The 235 West Julian Street address does not otherwise appear to have historically been affiliated with the Site.

2.2 CURRENT/PROPOSED USE OF THE PROPERTY

The current and proposed uses of the property are summarized in Table 2.

Table 2. Current and Proposed Uses

Current Use	Undeveloped land
Proposed Use	18 story residential tower with parking structure

2.3 SITE SETTING AND ADJOINING PROPERTY USE

Land use in the general Site vicinity appears to be a mix of residential developments and commercial properties. Based on our Site vicinity reconnaissance, adjoining Site uses are summarized below in Table 3.

Table 3. Adjoining Property Uses

Northeast	Multi-family residential development (across Terrain Street)
Northwest	Multi-family residential development (across Bassett Street)
Southeast	Asphalt paved parking lot (across Old West Julian Street)
Southwest	Highway 87 and Caltrans right-of-way

SECTION 3: USER PROVIDED INFORMATION

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is Westbank . The “All Appropriate Inquiries” Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3) knowledge that the purchase price of the Site is lower than the fair market value due to contamination. A search of title records for environmental liens and activity and use limitations also is required.

3.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances, such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory restrictions on a property’s use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (*i.e.*, engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

ASTM E 1527-13 categorizes the requirement to conduct a search for Environmental Liens and AULs as a User responsibility. A search of land title records for environmental liens and AULs was not within the scope of the current Phase I ESA.

3.2 SPECIALIZED KNOWLEDGE AND/OR COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based on information provided by or discussions with Westbank , we understand that Westbank does not have specialized knowledge or experience, commonly known or reasonably ascertainable information regarding the Site, or other information that is material to Recognized Environmental Conditions except for the information contained in available prior reports described in Section 4.2.

SECTION 4: RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Cornerstone conducted a review of federal, state and local regulatory agency databases provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general

accordance with the requirements of ASTM E 1527-13. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix A.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with the Site. The customary practice is to review information from standard sources that is reasonably available within reasonable time and cost constraints.

4.1.1 On-Site Database Listings

The Site was identified in the following regulatory agency databases:

Lorentz & Sons was identified at 201 West Julian Street on the Superfund Enterprise Management System Archive (SEMS-ARCHIVE¹) database, which tracks sites that have no further interest under the Federal Superfund Program based on available information. Sanborn fire insurance maps (as discussed in Section 6.1) indicate that, in 1915, 201 West Julian Street was occupied by A. Lorentz Cooperage and contained a cooper shop, barrel furnace and barrel storage facilities; wood shavings were noted to have been used as a fuel source.

The address of 235 West Julian Street was identified as being an open case on the Water Board's Cleanup Program Site (CPS) database. The CPS case is further discussed below in Section 4.2.3.

NSP Block H Development, LLC was listed at 201 West Julian Street on the HAZNET and RCRA NonGen/NLR databases. The HAZNET database contains data extracted from the copies of hazardous waste manifests received each year by the DTSC. Listed wastes disposed in 2019 were categorized as "other inorganic solid waste." The RCRA NonGen/NLR database lists facilities that generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste. NLR means that the business is no longer registered. No violations were reported.

Bean Spray Pump Company (circa 1922) was identified on a EDR's database of businesses that were associated with gasoline engines. As discussed below in Section 4.2.1, a variety of pesticide spraying equipment along with water well pumps and single cylinder engines appear to have historically been manufactured on-Site by Bean Spray Pump Company.

4.1.2 Nearby Spill Incidents

Reported nearby spill incidents are summarized in Table 4. Based on the information presented in the agency database report and a cursory review of readily available documents obtained from the state Geotracker database (<http://geotracker.waterboards.ca.gov>), the potential for these spill incidents to have to significantly impacted soil, soil vapor or groundwater beneath the Site appears low.

¹ Formerly known as the CERCLIS no further remedial action planned (NFRAP) database.

Table 4. Nearby Spill Incidents

Facility Name and Address	Approximate Distance and Direction from Site	Database Listings/Comments
Brandenburg Properties 330 Terrain Street	Adjacent to the northeast (across Terrain Street)	Listed as a closed LUST case.
North San Pedro Square Residences, W. Julian, Terraine, Bassett, and N. San Pedro Streets	Adjacent to the northeast (across Terrain Street)	Listed as an open case on the Water Board's CPS database.
North San Pedro Apartments, 201 Bassett Street	Adjacent to the northwest (across Bassett Street)	Listed as an open case on the Water Board's CPS database.
Brandenburg Properties 185 W. Julian Street	150 feet northeast	Listed as a closed LUST case.
Brandenburg-Butters 153 W. Julian Street	200 feet northeast	Listed as a closed case on the Water Board's CPS database.
Brandenburg Properties 345 N. San Pedro Street	250 feet northeast	Listed as a closed LUST case.
Brandenburg Properties 160 W. Julian Street	275 feet east	Listed as a closed LUST case.
FMC Corporation 333 W. Julian Street	350 feet southwest	Listed as a closed case on the Water Board's CPS database.

4.2 REVIEW OF PRIOR REPORTS

4.2.1 Historical Site Usage

Based on the information obtained during the prior Phase I ESA (Cornerstone, 2015), the Site was developed during the late 1800s with a fruit packing depot and a cooper shop. In approximately 1908, Bean Spray Pump Company constructed a manufacturing facility on-Site. A variety of pesticide spraying equipment along with water well pumps and single cylinder engines appear to have been manufactured on-Site by Bean Spray Pump Company, which changed its name to John Bean Manufacturing Company in 1928 and to Food Machinery Corporation in 1929. In 1943, Food Machinery Corporation acquired the Niagara Sprayer & Chemical Company, an independent manufacturer of insecticides and fungicides including sulphur, copper and lead-arsenate compounds, as well as organochlorine pesticides such as DDT. In 1948, Food Machinery Corporation changed its name to Food Machinery and Chemical Corporation (it was later changed to FMC Corporation).

An auto body shop with paint spraying and tire warehouses replaced the former cooper shop by approximately 1950, and was later replaced by a furniture store and a junk yard.

From at least 1949 to 1955, three structures located on the northern corner of the Site were occupied by FMC's Niagara Chemical Division (these structures are labeled "agricultural insecticides" on the 1950 Sanborn map). By 1969, these structures were used for miscellaneous storage and a drayage warehouse. During the 1970s, the northwestern portion

of the Site was occupied by Fibreboard Corporation and its subsidiary Independent Paper Stock Company.

On-Site equipment manufacturing by Bean Spray Pump Company appears to have been discontinued by 1950 and the main factory buildings were then occupied by a US Government canned goods warehouse (1950), an IBM research and development laboratory (mid-1950s), Metro Metal Products Foundry and Industrial Tube & Steel Company (late 1950s to 1970s), and T&G Lithographic Company and various printing/advertising businesses (1960s to 1980s), among others.

The former on-Site structures on the southern portion of the Site appear to have been demolished between 1982 and 1993. Those on the northern portion of the Site appear to have been demolished during the mid-1990s. The Site has since remained mainly as undeveloped land; during the mid-2000s, the southwestern portion of the Site appears to have been used as a temporary parking lot or storage area.

4.2.2 Chemical Storage and Use

Advertisements within periodicals from 1912 indicate that Bean Spray Pump Company sold “Bean Spray Arsenate of Lead” at the Site; lead-arsenate was a commonly used pesticide at that time. This finding is consistent with the 1915 Sanborn map that shows on-Site buildings labeled as “spray mixing” and “spray storage.”

FMC’s Niagara Chemical Division also occupied three structures on the northern portion of the Site. These structures are labeled “agricultural insecticides” on the 1950 Sanborn map. Although Niagara Chemical was a manufacturer of insecticides and fungicides, it is not known if manufacturing was conducted on-Site, or if the buildings were used only for sales/storage. Hazardous materials such as fuels, lubricants, solvents, metals and others likely were used during past manufacturing activities by Bean Spray Pump Company, and by tenants such as the foundry, auto body shop and printing/lithographic businesses, among others. Details regarding hazardous materials use by these occupants were not available within the researched data sources.

Railroad track spurs also historically extended onto the Site. The former railroad tracks and wooden ties appear to have been removed. Assorted chemicals historically were commonly used for dust suppression and weed control along rail lines.

4.2.3 Soil, Soil Vapor, and Groundwater Quality

4.2.3.1 Prior Studies (pre-2015)

Several prior studies have been completed at the Site that included the collection of soil, soil vapor and ground water samples. These studies are summarized in greater detail in the prior Phase I ESA (Cornerstone, 2015). In soil, elevated concentrations of various metals and petroleum hydrocarbons (mainly total petroleum hydrocarbons [TPH] as diesel and TPH as motor oil) were sporadically detected across the Site. Some of the detected metal and TPH

concentrations in soil exceed current ESLs². Polychlorinated biphenyls (PCBs) also were detected in shallow soil (2-foot depth) at one location at a concentration exceeding residential ESLs.

Analyses of groundwater samples from borings by Secor in 2005 revealed predominantly TPH as diesel, which was detected at up to 12,000,000 µg/L³. Secor (2005b) stated that *“the observed ground water collected from SB-7, SB-8, SB-10, and SB-11 had a noticeable petroleum odor and slight sheen at the surface of the sample. In addition, groundwater samples collected from SB-8 contained drops of apparent free product collecting at the surface of the sample containers.”* The ESL for TPH as diesel in ground water is 100 µg/L. Volatile organic compounds (VOCs) and benzene, toluene, ethylbenzene and xylenes (BTEX compounds) were not detected in the groundwater samples except for benzene (at 1.7 µg/L) and toluene (at 1.3 µg/L) in one boring. The Water Board’s ESLs for benzene and toluene are 0.42 and 40 µg/L, respectively. During subsequent groundwater sampling by TRC Lowney in 2006, TPH as diesel and TPH as motor oil were detected at 1,910 and 3,520 µg/L, respectively.

TRC Lowney (2006) also collected soil vapor samples to evaluate potential vapor intrusion concerns from impacted soil and groundwater. Three soil vapor borings were advanced to an approximate depth of 5 feet, the assumed approximate depth of a previously planned parking garage. Detected benzene concentrations (up to 9.2 µg/m³) exceeded its current residential ESL of 3.2 µg/m³.

4.2.3.2 Recent Studies (post-2015)

EnviroAssets, Inc. completed a January 28, 2020 report titled *Site Characterization Report and Path to Closure Recommendation*, which included the collection of additional soil, soil vapor and groundwater samples.

EnviroAssets concluded that *“Site soils contain impacts from historical Site usage that are below direct exposure ESLs for residential and commercial exposure scenarios with exception of limited shallow areas impacted with diesel range hydrocarbons and the groundwater smear zone in portions of the Site where degraded hydrocarbons persist. The concentration of Nickel in Site soils exceeds construction worker ESLs. Concentrations of volatile organic compounds in soil vapor that exceed vapor intrusion ESLs are limited in area and will be significantly reduced by Site redevelopment soil removal and redevelopment design elements that incorporate only low-occupancy areas including storage areas, mechanical rooms, and an open parking garage in the subsurface level.”*

EnviroAssets recommended the following:

- Preparation of a Site Management Plan with elements for soil and groundwater that address construction worker contact with impacted soils and groundwater including degraded hydrocarbons and Nickel in soil, proper handling and disposal of impacted soil

² Environmental Screening Levels (ESLs) established by the San Francisco Bay, Regional Water Quality Control Board (January, 2019) are used to screen sites for potential human health concerns where releases of hazardous chemicals have occurred. ESLs are risk-based concentrations derived from standardized equations combining exposure information assumptions with toxicity data. Under most circumstances, the presence of a chemical at concentrations below the corresponding screening level can be assumed not to pose a significant health risk.

³ Exact locations of borings advanced by Secor are difficult to estimate as their report included an unscaled schematic map with limited Site detail.

and groundwater, and procedures to be undertaken in the event that previously undiscovered contamination is discovered.

- Preparation of a Vapor Intrusion Mitigation System Feasibility Study and Design Plan that addresses vapor intrusion concerns and supports a selected mitigation approach.
- Preparation of a Site Asbestos Dust Mitigation Plan (ADMP) consistent with Air Board Airborne Toxic Control Measure (specifically Section 93105 - Construction, Grading, Quarrying, and Surface Mining Operations).
- The establishment of a Site Deed Restriction that requires a Site Management Plan and the recommendations of a Vapor Intrusion Mitigation System Feasibility Study and Design Plan, limits groundwater use, and prevents future redevelopment as single family residential.

The *Site Characterization Report* by EnviroAssets (2020) was approved by the Water Board in a March 10, 2020 letter. The Water Board provided the following comments:

- The source of tetrachloroethene (PCE) in soil vapor is unknown and its extent has not been assessed off-property to the west. The PCE concentration of 4,123 $\mu\text{g}/\text{m}^3$ detected in the center of the property near the western property boundary is 275 times the residential ESL of 15 $\mu\text{g}/\text{m}^3$ indicating a potential vapor intrusion concern to the future redevelopment.
- Prior to the start of redevelopment, a vapor intrusion mitigation system (VIMS) design report and an operation, maintenance, and monitoring plan should be submitted for Water Board concurrence. These documents need to include the following elements:
 - Soil vapor monitoring external of the building to assess the ongoing soil vapor threat to future building occupants, which can also provide a possible path to eventual closure.
 - Pre-occupancy indoor air monitoring in the building to assess VIMS effectiveness at start up.

In December 2020, Cornerstone excavated 11 test pits at the Site to facilitate the collection of soil samples to better evaluate fill thickness across the Site and obtain additional data to better estimate potential disposal costs for the excess soil that will require off-haul during the planned Site development. One of the test pits (TP-8) was located in an area that was reportedly excavated by the property owner in 2019 for construction of a temporary soil storage basin⁴.

Analyses of soil samples detected concentrations of PCBs, arsenic and lead above residential environmental screening criteria. Total DDT (*i.e.*, the sum of DDD, DDE and DDT) was detected above its TTL⁵ in one fill sample. Soluble lead concentrations exceeding its STL⁶

⁴ Based on information provided by Westbank, the storage basin reportedly was used to temporarily store soil generated from one of the property owner's other construction projects. The soil reportedly had excessive moisture and was placed in the basin to allow for drying. Photographs provided by Westbank indicate the basin may have been excavated to an approximate depth of 3 feet.

⁵ The TTL is the concentration at which a solid waste is considered a hazardous waste, for waste disposal classification purposes, per Title 22 of the California Code of Regulations.

were detected in several fill samples. Fill thicknesses across the Site generally ranged up to approximately 2 to 3 feet except in a few localized areas where greater fill thicknesses were observed. The detected elevated contaminant concentrations were predominantly limited to the undocumented fill.

A redwood structure was encountered at the bottom of the test pit excavated at location TP-8. What appeared to be a redwood cover for the structure was approximately 6 feet below existing grades. The approximate dimensions of the structure were not determined and its purpose is not known⁷. This structure was identified in the general vicinity of where the greatest PCE concentrations were identified in soil vapor and where the greatest TPH concentrations were identified in groundwater during the recent study by EnviroAssets.

4.3 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

4.3.1 City and County Agency File Review

Cornerstone requested available files pertaining to the Site at the following public agencies: the San Jose Building Department (BD), San Jose Fire Department (FD), and the Santa Clara County Department of Environmental Health (DEH).

The information reviewed during our prior Phase I ESA (Cornerstone, 2015) is summarized in Table 5. No additional recent documents were identified within Building or Fire Department files and a representative of the DEH indicated that they have no files pertaining to the Site.

Table 5. File Review Information

Agency Name	Date	Occupant	Remarks
202 Bassett Street			
BD	1949	FMC/Niagara Chemical	Building permit for office alterations. The owner is listed as Food Machinery and Chemical Corporation, Niagara Chemical Division.
BD	1970	Independent Paper Stock Co.	Electrical permit noting that the building was used as a paper plant.
BD	1970	Fibreboard Corporation	Building and plumbing permits. Waste paper handling was noted.
FD	1989	Independent Paper Stock Co.	Inspection report requiring sprinkler system upgrades for a newspaper yard and a structure with a corrugated metal roof.
FD	1989	Independent Paper Stock Co.	Incident report pertaining to a scrap newspaper fire.
220 Bassett Street			
BD	1979	Independent Paper Stock Co.	Electrical permit; use noted as "bailer of paper."

⁶ The STLC is the soluble constituent concentration at which a solid waste is considered hazardous per Title 22 California Code of Regulations, and is pertinent when evaluating waste disposal options.

⁷ Based on our review of historical Sanborn Maps (Cornerstone, 2015), in 1915 the area of the encountered redwood structure appeared to be near a building occupied by the Bean Spray Pump Co. that was used as a "pump and engine warehouse". The warehouse building was demolished by 1956 and the area remained as undeveloped land and/or storage yard area.

331 Terraine Street			
BD	1959	Metro Metal Products	Building permit for interior alterations to a foundry and shop offices.
BD	1971	Industrial Tube and Steel	Permit for natural gas.
333 Terraine Street			
BD	2006	NA	Electrical permit for a temporary power pole.
335 Terraine Street			
BD	1940	FMC	Building permit for an industrial building.
201 West Julian Street			
BD	1986	NA	Permit to demolish all improvements.
217 West Julian Street			
BD	1930	FMC	Building and electrical permit.
BD	1933	FMC	Permit to alter and build a sales room and private garage.
BD	1937	FMC	Building permit for alterations.
BD	1951	FMC	Building permit to alter interior of a 1 story industrial building.
BD	1954	NA	Permit to alter front of an industrial building for an office and display room.
BD	1955	IBM Corporation	Building permits to alter a 1-story industrial building. Warehouse and office uses are noted.
BD	1956	IBM Corporation	Building permit to alter a 2-story industrial building to be occupied for office and research purposes.
FD	1972	Ad Arts Building	Building inspection report noting tenants/uses as Kenneth Printing, Save-A-Buck Furniture and Appliances, Advertising Signs, D&R Press and picture frame workshop. Paint, thinner, duplicating fluid and solvent were noted to be present.
FD	1975	Sun Advertising	Inspection report. No violations indicative of hazardous materials spills were reported.
FD	1973 to 1984	Max H. Creech/ D&R Press	Inspection reports noting that the business had a flammable liquids permit and moved to Campbell in 1984. The FD inspector noted in 1981 that "housekeeping and trash very messy and unsafe" and "oil rags not in metal receptacle."

In addition to the documents listed in Table 5, Building Department files contained an Environmental Impact Report (EIR) and numerous related documents pertaining to the previously planned Brandenburg Mixed Use Project/North San Pedro Housing Sites, which included the Site and other properties in the general vicinity.

SECTION 5: PHYSICAL SETTING

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

5.1 RECENT USGS TOPOGRAPHIC MAP

A 1980 USGS 7.5 minute topographic map was reviewed to evaluate the physical setting of the Site. The Site's elevation is approximately 80 feet above mean sea level; topography in the vicinity of the Site slopes downward gently to the northwest, towards the San Francisco Bay.

5.2 HYDROGEOLOGY

Based on our experience and prior on-Site studies described in Section 4.2, the shallow groundwater beneath the Site is likely present at depths of approximately 15 to 20 feet. Groundwater likely flows toward the north or northwest.

SECTION 6: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and surrounding area in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the property. The ASTM standard requires the identification of all obvious uses of the property from the present back to the property's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources.

6.1 HISTORICAL SUMMARY OF SITE

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 6.

- **Historical Aerial Photographs:** We reviewed aerial photographs dated between 1939 and 2012 obtained from EDR of Shelton, Connecticut; copies of aerial photographs reviewed are presented in Appendix B.
- **Historical Topographic Maps:** We reviewed USGS 15-minute and 7.5-minute historical topographic maps dated 1899, 1953, 1961, 1968, 1973 and 1980; copies of historical topographic maps reviewed are presented in Appendix B.
- **Historical Fire Insurance Maps:** We reviewed Sanborn fire insurance maps dated 1884, 1891, 1915, 1950 and 1969 obtained from EDR; copies of Sanborn maps are presented in Appendix B.

Table 6. Summary of Historical Source Information for Site

Date	Source	Comments
1884	Sanborn map	No on-Site structures are depicted.
1899 to 1980	Topographic maps	The Site is shown within the urban developed area of San Jose. Specific Site details are not depicted.
1891	Sanborn map	The Site is shown to be occupied by a cooper shop (A. Lorentz Cooper), Ropers Fruit Packing Depot and a dwelling.
1915	Sanborn map	<p>The Site is shown to be occupied by A. Lorentz Cooperage and Bean Spray Pump Company. Railroad track spurs are shown to bisect the Site.</p> <p>Bean Spray Pump Company facilities are shown to have included a pump & engine warehouse, “spray mixing” and “spray storage” structures, machine shops, an engine repairing area, a tool room, a building labeled “iron cutting & sheet metal works” and an office area.</p> <p>At the cooper shop, a barrel furnace and barrel storage areas are depicted; notes indicate that wood shavings were used as a fuel source.</p>
1939, 1948, 1950, 1956, 1968, 1974 and 1982	Aerial photograph	<p>The Site is shown to be occupied by several commercial/industrial buildings. The structures and Site uses appear consistent with those depicted on the 1915 to 1969 Sanborn maps. Railroad track spurs are shown to bisect the Site.</p> <p>On the 1974 and 1982 photographs, two additional structures on the northwestern portion of the Site (fronting Bassett Street) and exterior storage of waste paper is apparent (consistent with occupancy by Independent Paper Stock Company, as noted in BD files).</p>
1950	Sanborn map	The Site is shown to be occupied by a U.S. Government canned goods warehouse, and an auto body shop with paint spraying and tire warehouses. Three structures are shown on the northern corner of the Site that are labeled “agricultural insecticides.” Railroad track spurs are shown to bisect the Site.
1969	Sanborn map	The Site is shown to be occupied by a foundry, a lithographing business, a furniture store and a junk yard. The structures on the northern corner of the Site (formerly labeled “agricultural insecticides”) are shown to be used for miscellaneous storage and a drayage warehouse. Railroad track spurs are shown to bisect the Site.
1993 to 2012	Aerial photograph	The former on-Site structures on the southern portion of the Site appear to have been demolished between 1982 and 1993. Those on the northern portion of the Site appear to have been demolished during the mid-1990s. The Site appears to have since remained mainly as undeveloped land; during the mid-2000s, the southwestern portion of the Site appears to have been used as a temporary parking lot or storage area.

6.1.1 City Directory Review

To obtain additional information regarding past tenants, business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. A summary of the city directory listings for commercial occupants is presented in Table 7; the acquired city directory report is presented in Appendix C.

Table 7. City Directory Listings

Date	Occupants
206 Bassett Street	
1950 and 1955	Food Machinery & Chemical Corporation, Niagara Chemical Division
1957	Refrigeration Maintenance, Inc.
1960	Robert Le Roy Upholstery
1966	Sur T Drayage, Inc.
1975	Independent Paper Stock Company
331 Terraine Street	
1960	Metro Metal Products Foundry
1963	Metro Metal Products Foundry and Cal Tech Systems, Inc.
1966	Consolidated Terminals
1970 and 1975	Industrial Tube & Steel Company
341 Terraine Street	
1957	North American Van Lines and Mershon Moving Company
1966 and 1970	Marcus Products Company car polishing products
201 West Julian Street	
1930 to 1945	Lorentz & Sons Coopers
1950	Murrays Auto Painters
1960 to 1975	Save A Buck Furniture
217 West Julian Street	
1930	John Bean Manufacturing Company Spraying Machinery and Food Machinery Corporation Spraying Machinery
1935	John Bean Manufacturing Company and Farmers Service Company
1940	John Bean Division of Food Machinery Corporation
1945	Bean Cutler Division of Food Machinery Corporation
1950	Reserved Corps and USA Organized
1955	International Business Machines Corporation (IBM) research and development laboratory
1963 to 1975	Noted to be occupied by multiple occupants including Dugdale & Erich, Inc., Inland Sales Company, and T&G Lithographic Company Inc. Typographic Service, Ad Mail Letter Shop, San Jose Printing Equipment Company, Sun Advertising, Typographic Arts, Picture Frame Workshop, Kenneth Printing, Campagna Signs, and National Divers Manufacturing, among others.
1980	Advantic and Sun Advertising Company
1985	Randazzo's Enterprises, Inc.

6.2 HISTORICAL SUMMARY OF SITE VICINITY

Based on our review of the information described in Section 6.1, the general Site vicinity was developed by the late 1800s with a variety of commercial businesses including various fruit packing facilities, freight and warehouse businesses, a winery, a lumber yard and box manufacturing facilities, among others. A public school also was present to the southeast of the

Site, across West Julian Street. An increase in commercial development is apparent during the early 1900s and mainly commercial use of the general vicinity appears to have continued through subsequent decades. Several commercial properties were vacated during the 1980s to facilitate construction of Highway 87 adjacent to the southwest of the Site.

SECTION 7: SITE RECONNAISSANCE

We performed a Site reconnaissance to evaluate current Site conditions and to attempt to identify Site Recognized Environmental Conditions. The results of the reconnaissance are discussed below. Additional Site observations are summarized in Table 8 in Section 7.2. Photographs of the Site are presented in Section 7.2.1.

7.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Stason I. Foster, P.E. visited the Site on January 13, 2021. The Site reconnaissance was conducted by walking representative areas of the Site and the Site periphery. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials or other objects. Physical obstructions that limited our ability to view the ground surface at the Site included tall grass and brush in some areas.

7.2 OBSERVATIONS

At the time of our visit, the Site was undeveloped land covered in some areas by tall grass and brush. Concrete pavements were observed to cover a portion of APN 259-24-020. Several vehicles were parked on the southern portion of the Site. No hazardous materials were observed on-Site.

Table 8. Summary of Readily Observable Site Features

General Observation	Comments
Aboveground Storage Tanks	Not Observed
Agricultural Wells	Not Observed
Air Emission Control Systems	Not Observed
Boilers	Not Observed
Burning Areas	Not Observed
Chemical Mixing Areas	Not Observed
Chemical Storage Areas	Not Observed
Clean Rooms	Not Observed
Drainage Ditches	Not Observed
Elevators	Not Observed
Emergency Generators	Not Observed
Equipment Maintenance Areas	Not Observed
Fill Placement	Not Observed
Groundwater Monitoring Wells	Not Observed
High Power Transmission Lines	Not Observed
Hoods and Ducting	Not Observed
Hydraulic Lifts	Not Observed
Incinerator	Not Observed
Petroleum Pipelines	Not Observed

Petroleum Wells	Not Observed
Ponds or Streams	Not Observed
Railroad Lines	Not Observed
Row Crops or Orchards	Not Observed
Stockpiles of Soil or Debris	Not Observed
Sumps or Clarifiers	Not Observed
Transformers	Not Observed
Underground Storage Tanks	Not Observed
Vehicle Maintenance Areas	Not Observed
Vehicle Wash Areas	Not Observed
Wastewater Neutralization Systems	Not Observed

The comment "Not Observed" does not warrant that these features are not present on-Site; it only indicates that these features were not readily observed during the Site visit.

7.2.1 Site Photographs

Photograph 1. View of the Site looking north towards Bassett Street.

Photograph 2. Northern portion of the Site, looking west towards Highway 87.

Photograph 3. Central portion of the Site looking east towards Terrain Street.

Photograph 4. View of the Site looking south.

SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS

8.1 ENVIRONMENTAL QUESTIONNAIRE / OWNER INTERVIEW

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided an environmental questionnaire to Westbank and asked that it be forwarded to the Site owner for completion. The completed questionnaire was not returned to us as of the date of this report.

8.2 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS

Contact information for previous Site owners and occupants was not provided to us. Therefore, interviews with previous Site owners and occupants could not be performed.

SECTION 9: FINDINGS, OPINIONS AND CONCLUSIONS (WITH RECOMMENDATIONS)

Cornerstone performed this Phase I ESA in general accordance with ASTM E1527-13 to support Westbank in evaluation of Recognized Environmental Conditions. Our findings, opinions and conclusions are summarized below.

9.1 HISTORICAL SITE USAGE

Based on the information obtained during this study, the Site was developed during the late 1800s with a fruit packing depot and a cooper shop. In approximately 1908, Bean Spray Pump Company constructed a manufacturing facility on-Site. A variety of pesticide spraying equipment along with water well pumps and single cylinder engines appear to have been manufactured on-Site by Bean Spray Pump Company, which changed its name to John Bean Manufacturing Company in 1928 and to Food Machinery Corporation in 1929. In 1943, Food Machinery Corporation acquired the Niagara Sprayer & Chemical Company, an independent manufacturer of insecticides and fungicides including sulphur, copper and lead-arsenate compounds, as well as organochlorine pesticides such as DDT. In 1948, Food Machinery Corporation changed its name to Food Machinery and Chemical Corporation (it was later changed to FMC Corporation).

An auto body shop with paint spraying and tire warehouses replaced the former cooper shop by approximately 1950, and was later replaced by a furniture store and a junk yard.

From at least 1949 to 1955, three structures located on the northern corner of the Site were occupied by FMC's Niagara Chemical Division (these structures are labeled "agricultural insecticides" on the 1950 Sanborn map). By 1969, these structures were used for miscellaneous storage and a drayage warehouse. During the 1970s, the northwestern portion of the Site was occupied by Fibreboard Corporation and its subsidiary Independent Paper Stock Company.

On-Site equipment manufacturing by Bean Spray Pump Company appears to have been discontinued by 1950 and the main factory buildings were then occupied by a US Government canned goods warehouse (1950), an IBM research and development laboratory (mid-1950s), Metro Metal Products Foundry and Industrial Tube & Steel Company (late 1950s to 1970s), and

T&G Lithographic Company and various printing/advertising businesses (1960s to 1980s), among others.

The former on-Site structures on the southern portion of the Site appear to have been demolished between 1982 and 1993. Those on the northern portion of the Site appear to have been demolished during the mid-1990s. The Site has since remained mainly as undeveloped land; during the mid-2000s, the southwestern portion of the Site appears to have been used as a temporary parking lot or storage area.

9.2 CHEMICAL STORAGE AND USE

No hazardous materials were observed on-Site at the time of our visit.

Bean Spray Pump Company historically sold “Bean Spray Arsenate of Lead” at the Site; lead-arsenate was a commonly used pesticide at that time. This finding is consistent with the 1915 Sanborn map that shows on-Site buildings labeled as “spray mixing” and “spray storage.”

FMC’s Niagara Chemical Division also occupied three structures on the northern portion of the Site. These structures are labeled “agricultural insecticides” on the 1950 Sanborn map. Although Niagara Chemical was a manufacturer of insecticides and fungicides, it is not known if manufacturing was conducted on-Site, or if the buildings were used only for sales/storage. Hazardous materials such as fuels, lubricants, solvents, metals and others likely were used during past manufacturing activities by Bean Spray Pump Company, and by tenants such as the foundry, auto body shop and printing/lithographic businesses, among others. Details regarding hazardous materials use by these occupants were not available within the data sources researched during this study.

Railroad track spurs also historically extended onto the Site. The former railroad tracks and wooden ties appear to have been removed. Assorted chemicals historically were commonly used for dust suppression and weed control along rail lines.

9.3 SOIL, SOIL VAPOR, AND GROUNDWATER QUALITY

Several prior studies have been completed at the Site that included the collection of soil, soil vapor and groundwater samples. In soil, elevated concentrations of various metals, petroleum hydrocarbons (mainly TPH as diesel and TPH as motor oil), asbestos and PCBs were sporadically detected across the Site. Some of the detected concentrations in soil exceed current residential screening levels. In some samples, soluble lead was detected at concentrations exceeding its STLC and total DDT was detected exceeding its TTLC.

Analyses of groundwater samples from borings by Secor in 2005 revealed predominantly TPH as diesel, which was detected at up to 12,000,000 µg/L. Secor (2005b) stated that “*the observed ground water collected from SB-7, SB-8, SB-10, and SB-11 had a noticeable petroleum odor and slight sheen at the surface of the sample. In addition, groundwater samples collected from SB-8 contained drops of apparent free product collecting at the surface of the sample containers.*” The Water Board’s ESL for TPH as diesel in groundwater is 100 µg/L. VOCs and BTEX compounds were not detected in the groundwater samples except for benzene (at 1.7 µg/L) and toluene (at 1.3 µg/L) in one boring. The Water Board’s ESLs for benzene and toluene are 1.0 and 40 µg/L, respectively. During subsequent groundwater sampling by TRC Lowney in 2006, TPH as diesel and TPH as motor oil were detected at 1,910 and 3,520 µg/L,

respectively. TPH as diesel and TPH as motor oil were detected in groundwater in 2019 by EnviroAssets at up to 120,000 µg/L and 86,000 µg/L, respectively.

During soil vapor Sampling in 2019 by EnviroAssets, several VOCs were detected at concentrations exceeding residential ESLs, including carbon tetrachloride, chloroform, PCE, trichloroethene (TCE), benzene and ethylbenzene. PCE appears to be the predominant chemical of concern in soil vapor. PCE was detected in soil vapor at up to 4,123 µg/m³; its residential ESL is 15 µg/m³.

A redwood structure was encountered at the bottom of test pit TP-8 during soil sampling in December 2020 by Cornerstone. What appeared to be a redwood cover for the structure was approximately 6 feet below existing grades. The approximate dimensions of the structure were not determined and its purpose is not known. This structure was identified in the general vicinity of where the greatest PCE concentrations were identified in soil vapor and where the greatest TPH concentrations were identified in groundwater during the recent study by EnviroAssets. We recommend the Site Management Plan described in Section 9.4 be expanded to include protocols to remove the structure including post-removal soil sampling and any necessary permits for its removal that may be required by the DEH and/or Fire Department.

9.4 REGULATORY STATUS

The Site is an open CPS case under Water Board oversight. In a March 10, 2020 letter, the Water Board approved the 2020 *Site Characterization Report* by EnviroAssets, which recommended 1) preparation of a Site Management Plan, 2) preparation of a Vapor Intrusion Mitigation System Feasibility Study and Design Plan, 3) preparation of a Site Asbestos Dust Mitigation Plan (ADMP), and 4) the establishment of a Deed Restriction for the Site that, among other requirements, would prohibit certain future uses of the Site.

Prior to the start of redevelopment, the Water Board required that a vapor intrusion mitigation system design report and an operation, maintenance, and monitoring plan be submitted for Water Board concurrence. To facilitate the planned development, we recommend continued coordination with the Water Board.

9.5 LANDOWNER LIABILITY PROTECTIONS

The Small Business Liability Relief and Brownfields Revitalization Act, ("Brownfields Amendments") enacted in 2002, amended the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), to provide important liability limitations for landowners that qualify as *bona fide prospective purchasers*, *contiguous property owners*, or *innocent landowners* (often referred to as "landowner liability protections" or "LLPs"). The ASTM E 1527-13 practice is intended to permit a *user* to satisfy one of the requirements to qualify for LLPs. To establish and preserve certain liability protections, other requirements also must be met, including taking "Reasonable Steps" to stop any continuing release, prevent any threatened future release, and prevent or limit any human, environmental or natural resource exposure to any previous release, among others.

Westbank should consider negotiating a Prospective Purchaser Agreement (PPA) with the Water Board prior to acquiring the Site. A PPA is a tool used by regulatory agencies that encourages the redevelopment of contaminated property that remains underutilized due to potential liability issues. A PPA is a contract between the agency and the prospective purchaser of a contaminated property that allows the prospective purchaser to acquire the property, after

meeting certain conditions, and reduces liability. The California Land Reuse and Revitalization Act (CLRRRA) is another option that provides liability protections to a prospective purchaser interested in developing a brownfields property.

Due to known Recognized Environmental Conditions at the Site, we recommend consulting with an environmental attorney regarding liabilities associated with acquiring the Site. Appropriate measures also should be employed to establish and preserve available liability protections. Consideration also should be given to acquiring environmental insurance to help protect against the liabilities associated with the known and potentially unknown presence of hazardous materials that may adversely impact the Site.

9.6 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY

Based on the information obtained during this study, no hazardous material spill incidents have been reported in the Site vicinity that would be likely to significantly impact the Site. However, as is typical to many commercial areas, several facilities in the vicinity were reported as hazardous materials users. If leaks or spills occur at these facilities, contamination could impact the Site, depending upon the location of the property, the magnitude of the release, and the effectiveness of cleanup efforts.

9.7 DATA GAPS

ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by ASTM Standard Designation E 1527-13 despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data gaps were identified:

- Contact information for the former occupants and owners of the Site was not provided to us. Thus, former occupants and owners were not interviewed during this study. Additionally, the environmental questionnaire was not completed by the property owner. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. However, these individuals may have knowledge of the Site that is not otherwise readily available or apparent. Thus, the absence of these interviews and the questionnaire that was not completed by the property owner may diminish our ability to identify Recognized Environmental Conditions.

9.8 DATA FAILURES

As described by ASTM Standard Designation E 1527-13, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met. Data failures are not uncommon when attempting to identify the use of a Site at five year intervals back to the first use or to 1940 (whichever is earlier). ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data failures were identified:

- Due to the long developed history of the Site, detailed information concerning past Site operations by some occupants was not readily available from the information sources reviewed during this study. The lack of this data can diminish our ability to identify Recognized Environmental Conditions.

9.9 RECOGNIZED ENVIRONMENTAL CONDITIONS

Cornerstone has performed this Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-13. This assessment identified the following Recognized Environmental Conditions.

- As an apparent result of prior industrial activities at the Site, impacted soil, soil vapor and groundwater have been identified at the Site. At some locations, the detected contaminant concentrations exceed current residential screening levels and/or hazardous waste thresholds.

SECTION 10: LIMITATIONS

Cornerstone performed this Phase I ESA to support Westbank in evaluation of Recognized Environmental Conditions associated with the Site. Westbank understands that no Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. Westbank understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, soil, groundwater, soil vapor and/or air samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E 1527-13, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

Westbank may have provided Cornerstone environmental documents prepared by others. Westbank understands that Cornerstone reviewed and relied on the information presented in these reports and cannot be responsible for their accuracy.

This report, an instrument of professional service, was prepared for the sole use of Westbank and may not be reproduced or distributed without written authorization from Cornerstone. It is

valid for 180 days. An electronic transmission of this report may also have been issued. While Cornerstone has taken precautions to produce a complete and secure electronic transmission, please check the electronic transmission against the hard copy version for conformity.

Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/28/2020 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

31209025 INSIGHT PRO	200 RYLAND STREET	NNW 0 - 1/8 (0.109 mi.)	H38	68

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/27/2020 has revealed that there are 19 ENVIROSTOR sites within approximately 1 mile of the target property.

HIST LUST: A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

A review of the HIST LUST list, as provided by EDR, and dated 03/29/2005 has revealed that there are 42 HIST LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that

EXECUTIVE SUMMARY

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 27 CUPA Listings sites within approximately 0.25 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 08/31/2020 has revealed that there is 1 CIWQS site within approximately 0.001 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 07/20/2020 has revealed that there is 1 CERS site within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within

EXECUTIVE SUMMARY

approximately 1 mile of the target property.

GARDEN CITY GAS WORK	W. ST JOHN AND MONTG	SSW 1/4 - 1/2 (0.442 mi.)	AC164	411
SAN JOSE GAS WORKS	E. SAN FERNANDO AND	ESE 1/2 - 1 (0.651 mi.)	AL191	497

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Status Date: 06/12/2019
Global Id: SL0608515396
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number: Not reported
Latitude: 37.3389995038696
Longitude: -121.897766876335
Case Type: Cleanup Program Site
Case Worker: MBR
Local Agency: Not reported
RB Case Number: 43S1105
File Location: Regional Board
Potential Media Affected: Under Investigation
Potential Contaminants of Concern: * Metals, Diesel
Site History: The approximately 0.65-acre Site is located at 235 West Julian Street near the intersection of Terraine Street and West Julian Street in San Jos, California in a commercial/light industrial area. The Site was occupied by Ropers Fruit Packing Depot in 1891; Bean Spray and Pump Company (with on-Site spray mixing, spray storage and machine shop activities) in 1915; a U.S. Government Warehouse in 1950; and foundry and lithograph businesses in 1969. A 2005 SECOR environmental investigation (Phase I and II) revealed elevated metal concentrations (arsenic, chromium, copper, lead, nickel and zinc in the upper 2 feet of soil. Diesel ranged petroleum hydrocarbons also were at depths ranging from 15 to 20 feet. Secor also reported elevated diesel ranged petroleum hydrocarbons in ground water (SB-8 @ 12,000 ppm). The results of the human health risk assessment indicated that potential on-Site construction workers and potential future residents will not incur significant carcinogenic or noncarcinogenic health effects via indoor and outdoor inhalation of the Chemicals of Concern in soil, soil vapor and ground water. The Site is zoned for commercial/industrial use but will be rezoned to high density residential use. The proposed Site use is for a 10 to 16 story residential tower. Construction is planned to commence in 2014 but could be as early as 2011. The discharger is proposing capping the Site with the development effectively limiting exposure to future residents.

Case Type: Cleanup Program Site
Case Worker: AC
Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Soil
Potential Contaminants of Concern: Arsenic, Lead, Nickel
Site History: The approximately 0.6-acre Site is located at the northwest corner of Bassett and Terraine Streets in San Jose, California. The Site is bounded by: Bassett Street to the south; the terminus of Terraine Street to the east; the Union Pacific Rail Road (UPRR; formerly Southern Pacific) right-of-way to the north; and Highway 87 to the west. The Assessors Parcel Numbers (APNs) for the Site are: 259-23-027; 259-23-016; and a portion of 259-51-006. The proposed Site development includes construction of an approximately 75,600 square-foot six-story apartment building with hardscapes and

NORTH SAN PEDRO APARTMENTS LP (Continued)

S121647155

landscaping. The building will be constructed with a first floor parking garage and 135 one-bedroom and studio apartments between the 2nd and 6th floors. The Site Management Plan (SMP) states that soil containing polycyclic aromatic hydrocarbons (PAHs), arsenic and lead is present in the upper 5-feet at the site above applicable human health screening criteria. During site development, soil within the upper 3-feet of current grade (approximately 3,100 cubic yards), will be excavated during grading and construction of engineered foundations at the site and transported off-site for disposal as hazardous waste. The remaining 2-feet of contaminated soil will be managed on-site (encapsulated) for reuse as engineered fill. The 2-feet of contaminated soil will be encapsulated between 5 feet and 10 feet below future (pad) grade. An orange delineation non-woven geotextile (or equivalent) will be installed to demarcate the soil containing chemicals above applicable screening criteria (approximately 5 feet below pad grade) and the soil above it. Site redevelopment is proposed to begin in 2019.

 Local Agency: Not reported
 RB Case Number: 43S1223
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affected: Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
 Potential Contaminants of Concern: Not reported
 Site History: August 2018 Block BF LLC is planning to construct a 5-story podium-style apartment building with one full level of ventilated, subterranean parking. Prior commercial operations at the site date back to 1884 and have included underground storage tanks, oil water separators, associated piping, a railroad spur(s), and manufacturing of specialty bicycle parts. The Regional Water Board has issued several no further action letters for parcels within the site when the site was zoned for commercial use. Block BF LLC has submitted a vapor intrusion mitigation system (VIMS) VIMS Design Report that includes the following elements: Excavation of soil at the entire site to approximately 10 feet below ground surface (bgs) to allow for the subterranean parking Excavation of soil at the elevator pit locations to approximately 15 feet bgs Vapor barrier under the entire building footprint Vapor collection system installed beneath the vapor barrier with 50 spacing Ventilation risers to the roof fitted with active fans on the rooftop Implementation of a construction

Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Eval Date: 09-25-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: A Hazardous Material Business Plan (HMBP) inspection was conducted with Mickey Pierce on 9/24/2018 and the report was given on today's date. The facility submitted an HMBP on 12/21/2017 via Front Counter. CERS ID 10349731. The facility owner is also the property owner. The following reportable hazardous materials were observed at the time of the inspection: 1. New fuels: -1000 gallon tank of B20 BioDiesel Note: Please provide clarification on the product(s) stored in the various fuel tanks, including the generator belly tank. The tank labeling, site map and inventory have conflicting information. While these fuels are similar in use, they are different chemicals and have different hazards associated with them. In order to reduce future confusion, it is recommended to update the labels on the fuel tanks to reflect the common or product name as it is listed on the Safety Data Sheet. Noted that the main tank is not fitted with a visual overfill indicator

Violation Date: 4/18/2017
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: No annual training in safety procedures has been documented. Ensure that annual training for employees covers all the content in the Hazardous Materials Business Plan and is documented.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-18-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: NOTE 1: Observed 2 unknown cylinders on property; attempt to identify contents and return to vendor if possible. If vendor will not accept, dispose of as hazardous waste. NOTE 2: Observed 1x55 gal drum with unknown contents. Drum is in structurally poor condition. Owner states drum was left on-site by previous business (auto repair) and suspects contents to be antifreeze or oil. Arrange for disposal as hazardous waste by a licensed hazardous waste vendor within the next 3 months. FACILITY CURRENTLY HAS APPROXIMATELY 150 GALLONS OF USED OIL ON-SITE IN A TANK. OWNER'S PERSONAL AND BUSINESS VEHICLES HAVE BEEN SERVICED AT THIS LOCATION. IF YOU INTEND TO CONTINUE THIS PRACTICE, SUBMIT AN

Site ID: 163723
Site Name: TUC'S AUTO BODY & PAINT
Violation Date: 8/22/2013
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Observed the following containers beyond their accumulation time limit: 1x55 gal container of lacquer thinner dated 12-15-11, 1x 30 gal container of lacquer thinner dated 5-19-09.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-22-2013
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Performed a routine hazardous waste inspection consisting of a walk-through inspection and a review of documents. A review of documents revealed the facility generates less than 100kg/yr. Facility currently has 1x55gal of lacquer waste and 1x55gal spray booth filter waste which subjects the business to the Hazardous Materials Business Plan. Facility states they will dispose of drums and will no longer handle quantities of those wastes above 30 gallons.

 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affected: Aquifer used for drinking water supply, Sediments, Soil, Soil Vapor, Surface water
 Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride, Other Petroleum
 Site History: The area of the Site is approximately 13 acres, centered on Old West Julian Street, bounded on the west by the Guadalupe River, on the east by the Guadalupe Parkway (Route 87), on the north by the Union Pacific Railroad, and on the south by West Julian Street. The Site is under development by Sobrato Development Companies (SDC), the current owner. Two buildings and a parking structure have been completed. Construction on a third building was discontinued prior to completion due to economic reasons. FMC and predecessor companies occupied the Site from the early 1900s through 1986. Manufacturing operations, including production of agricultural machinery, food-processing equipment, and military tracked vehicles, occurred at the Site beginning in the early 1900s. Manufacturing operations at the Site ceased in 1986 and the facility was leased for warehousing and other storage purposes. In June 1998, FMC sold the property to SDC. FMC initiated environmental investigations at the Site in 1986. Soil sampling in former manufacturing and product storage areas revealed the presence of petroleum hydrocarbons, volatile organic compounds (VOCs), and metals. Further investigations included the installation of groundwater monitoring wells that detected VOC constituents in two shallow water-bearing zones beneath the Site. Quarterly groundwater monitoring was conducted from the third quarter of 1989 through the first quarter of 2001. Semi-annual groundwater monitoring and reporting began in April 2001. On June 21, 1989, the State of California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) adopted Order Number 89-107, Site Cleanup Requirements

for FMC Corporation-Ground Systems Division, 333 West Julian Street, San Jose, Santa Clara County (RWQCB, 1989). On August 15, 1990, Order Number 90-122 (RWQCB, 1990) was adopted by the RWQCB, amending Order Number 89-107 with respect to the adoption of final Site cleanup levels. On January 21, 1998, Order Number 98-006 was adopted (RWQCB, 1998) for the Site, amending Orders 89-107 and 90-122 with respect to revising soil cleanup standards and adding additional tasks to protect groundwater and address risks associated with exposure to residual soil contamination. On March 21, 2001, Order No. 01-031, Final Site Cleanup Requirements and Rescission of Orders Nos. 89-107, 90-122, and 98-006 for FMC Corporation, for the property located at 333 West Julian Street, San Jose, Santa Clara County (RWQCB, 2001) was adopted by the RWQCB. This annual compliance report is being submitted to the RWQCB as required by Order No. 01-031, Provision D.5. FMC implemented VOC source removal using a Soil Vapor Extraction system in the southwest portion of the Site from 1991 through March 1994. In addition, a groundwater extraction and treatment system for the A-level aquifer operated at the Site from March 1992 through January 1997, when it was discontinued due to changed groundwater flow directions, limited mass removal over time, and completion of effective source removal. Authorization to discontinue operation of the groundwater extraction and treatment system was given by the RWQCB in their letter to FMC, dated January 2, 1997 (RWQCB, 1997). The RWQCB documented the achievement of meeting the Site soil cleanup goals for chlorinated solvents in prior Order No. 98-006. FMC performed a natural attenuation evaluation in 2000 (HSI GeoTrans, 2000) to consider methods of remediating the residual VOCs present in Site groundwater. The evaluation concluded that VOC degradation could be accelerated through the introduction of an electron donor that would enhance the biodegradation. Cheese whey was selected as the electron donor material, and, in accordance with Task C.2. of Order Number 01-031 and the Work Plan for In-Situ Bioremediation Using Cheese Whey Injection (Work Plan) dated May 30, 2001 (GeoTrans, 2001), cheese whey injection was conducted at ten Site monitoring wells and piezometers in July 2001 to enhance biodegradation of VOCs in groundwater. Additional cheese whey was injected at nine monitoring wells and piezometers in May 2003 to increase the in-situ reactive zone and further promote an environment for biodegradation. Groundwater sampling was conducted to evaluate the effectiveness of enhanced biodegradation on a monthly basis from September through December 2001, and on a semi-annual basis from March 2002 to March 2005. Discharger was urged to evaluate the site for case closure under the low threat closure criteria in February 2015.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to maintain a complete copy of the SPCC Plan at the facility if the facility is normally attended at least four hours per day, or at the nearest field office if the facility is not so attended.

Violation Notes: Neither facility representatives (Cliff Beard or Jeff Hancock) were unaware of or able to provide the SPCC during the inspection.

Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 422262
Site Name: New Santa Clara Family Justice Center, JCC 43-B5
Violation Date: 3/9/2020
Citation: HSC 6.67 25270.2(o)(1)(C)(iv)(III) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.2(o)(1)(C)(iv)(III)

Violation Description: Failure to have secondary containment and/or leak detection, pursuant to 24 CCR Part 9, Chapter 57, Section 5703.6.2.2, if piping connected to a tank in an underground area (TIUGA) cannot be directly viewed on all sides. This does not apply to: 1. Piping connected to a tank that contains new oil/used oil for lubricant or coolant in a motor engine or transmission, or oil-filled operational/manufacturing equipment. 2. Piping connected to a tank used solely in connection with a fire pump or emergency system, legally required standby system, or optional standby system. 3. Piping connected to a petroleum hazardous waste tank that complies with hazardous waste tank standards (22 CCR Ch. 15, Art. 10) and facility has been issued a unified program facility permit pursuant to HSC Section 25404.2 for generation, treatment, accumulation, or storage of hazardous waste.

Violation Notes: ROB: I am wondering if this is the best violation for the storm water/sewer drain. But I don't understand why this violation text states the above items don't apply. Help!

Violation Program: APSA
Violation Source: CERS

Site ID: 422262
Site Name: New Santa Clara Family Justice Center, JCC 43-B5
Violation Date: 3/9/2020
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and tests, including integrity tests, signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and tests, including integrity tests, for at least three years. 3. Keep comparison records.

Violation Notes: As per the SPCC, monthly and annual inspections are conducted in accordance with STI SP001 Tank Inspection Standards with a custom checklist for monthly inspections and the STI standard annual inspection checklist located in Appendix C-1. However, the facility engineer stated that he was unfamiliar with these checklists. He demonstrated that he conducts an annual and quarterly tank inspection using an on-site generated checklist. He also conducts an abbreviated monthly PMS checklist related to running the generator. This "generator inspection log sheet" is missing SP001-standard items to check such as security measures and secondary containment inspections. Additionally, the on-site generated annual tank inspection PMS does not meet industry standards in that it is missing multiple items, including but not limited to, solenoid valve testing, interstitial leak detection equipment and emergency vent cover testing. Ensure that the monthly and annual inspections are [Truncated]

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to include in the SPCC Plan: 1. A contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all Federal, State, and local agencies who must be contacted in case of a discharge 2. Information and procedures that would enable a person reporting an oil discharge to relate all information as described in 40 CFR 112.7(a)(4), unless facility submitted a Facility Response Plan.

Violation Notes: During the initial inspection preparation process, it was discovered that the primary emergency contact person (Pella McCormick) is no longer in this capacity. Update all contact information to reflect the current emergency coordinators. Note: There are multiple locations throughout the SPCC that Pella McCormick is mentioned as the primary contact. Ensure that entire document is updated to reflect these changes.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-17-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Conducted an Aboveground Petroleum Storage Act (APSA) Inspection walk through with Rob Ward on 3/09/2020 and issued the report on this date. The facility has 1000 gallons of diesel fuel storage and is a Tier I Qualified Facility. Facility created an SPCC Full plan that was last certified on 01/18/2018 by a PE. The SPCC Plan was provided by request via email prior to the inspection by Jerry Ripperda. The Annual Tank Statement was last certified by the facility 2/13/2020. CERS ID #10723117. There is 1 TIUGA (tank in an underground area) at this facility. This tank is a Convault TIUGA that uses automated software to monitor the fuel system. The overfill prevention system includes a visual indicator gage at the fill port with audible and visual alarms. There is also an automatic shut off valve located in the fill line that activates at 90% full. There is a 250 gallon diesel day tank and a 69 gallon oil-filled crank case on the penthouse floor, leaving the [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Case Type: Cleanup Program Site
 Case Worker: AC
 Local Agency: SANTA CLARA COUNTY LOP
 RB Case Number: Not reported
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
 Potential Contaminants of Concern: Arsenic, Lead
 Site History: The Site is slated for redevelopment that will consist of an on-grade, multi-family residential development. During redevelopment activities, Site grading activities are anticipated to result in the removal of approximately 750 cubic yards of soil to create the new grade. Although additional details are anticipated to be provided in a future Site Management Plan (SMP), the anticipated path forward is to remove the initial 750 cubic yards of soil from the eastern portion of the Site, resulting in previously identified soil that contains elevated lead and arsenic remaining on-Site and buried beneath hardscape and/or the building. Soil to remain onsite will be covered by the proposed building which is anticipated to cover the

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 06/14/1994
Comments: Pursuant to the MOU, DTSC has reviewed a Phase I Environmental Site Assessment and other documents for the Family Health Foundation of Alviso, Inc., St. James Health Center (FHFA). The subject property is an existing health clinic which is owned and operated by FHFA. No change in use is being proposed. A Supplemental Phase I Environmental Assessment Report was prepared by DTSC and concluded that no action was needed for this property there is no contamination on the property.

Name: COLLEGE PARK YARD - UP
Address: 483 COLEMAN AVE
City,State,Zip: SAN JOSE, CA 95110-2007
Region: STATE
Facility Status: Open - Verification Monitoring
Status Date: 01/01/2014
Global Id: SL18381801
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number: Not reported
Latitude: 37.3384147007674
Longitude: -121.907644271851
Case Type: Cleanup Program Site
Case Worker: RWP
Local Agency: Not reported
RB Case Number: 43S0936
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Diesel, * Petroleum, Lead
Site History: Site includes two properties: - Former Lenzen Yard: 13 acres with PHC plume within the property boundary. - College Park Yard - Parcel 2: 8 acres with no groundwater impact. Contaminated soil from use as an old railyard now being redeveloped for a variety of uses including residential and a Caltrain (JPB) maintenance center. Extraction-well maintenance of an open excavation removed thousands of gallons of groundwater heavily contaminated with petroleum hydrocarbons (PHCs). GAC treatment of the PHC-contaminated water removed hundreds of pounds of PHCs from the subsurface.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 RB Case Number: 14-444
 Local Agency: SANTA CLARA COUNTY LOP
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Local Case Number: 07S1E08M03f
 Potential Media Affect: Aquifer used for drinking water supply, Soil
 Potential Contaminants of Concern: Benzene, Toluene, Trichloroethylene (TCE), Xylene, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating

Site History: In 1997 a Phase I Environmental Site Assessment (ESA) was performed and a potential UST was noted near the northern site boundary. In January 1998, a Phase II ESA was performed and discovered the presence of petroleum hydrocarbons and related constituents in soil and groundwater beneath the site. In May 1998 two USTs were removed from the site. On May 10, 1998 a UST (Tank 1) with an estimated volume of 8,000 gallons was removed and was suspected to have contained leaded gasoline. On May 19, 1998 a second UST (Tank 2) with an estimated volume of was removed and was suspected to have also contained leaded gasoline. The UST removal included overexcavation of the impacted soils. However, excavation of visibly impacted soils to the north was stopped due to concerns regarding the integrity of Carlyle Street. The maximum level of TPH-g detected below the tank were was 3,300 ppm. At that time 460 tons of soil was removed to Kirby Canyon landfill in Morgan Hill. In September 1999 additional soil sampling was performed. The maximum level of contamination in soil was 280 ppm TPH-g, 2 ppm benzene, 9 ppm toluene, 8.5 ppm ethylbenzene and 38 ppm xylenes. Groundwater contamination was up to 2,400 ppb TPH-g, 11 ppb benzene, 44 ppb toluene, 28 ppb ethylbenzene and 170 ppb xylenes. MTBE was not detected. On December 9, 1999 additional soil was excavated from the area around the former USTs. Approximately 344 tons of soil was removed and disposed of at the Forward Landfill in Manteca on December 17, 1999. Eight soil samples were collected in and around the excavated area. The maximum detected soil concentrations were 14 ppm lead, 19 ppm TPG-g and 0.22 ppm benzene. On December 29, 1999 approximately 93 tons of soil was excavated from the area near the former USTs (between shoring columns 10 and 14) and eventually disposed of at the Forward Landfill in Manteca. Confirmation soil samples detected TPH-g and benzene up to 250 and 1.6 ppm, respectively in sample location E-1-19'). On December 30, 1999 302 tons of soil was excavated and transported to Forward Landfill. Confirmation soil samples collected from sample location E-13 identified an area of concern. Consequently, on December 31, 1999 further excavation was performed between columns 17 and 19 and confirmation samples E-14 through E-16 were collected for chemical analyses. It was determined that the area of concern had been removed. Approximately 302 tons of soil was removed to the Forward Landfill. On February 10, 2000 approximately 20 tons of soil was excavated and disposed at Forward Landfill. Confirmation soil samples taken from the excavation indicated that all constituents were below the affected zone criteria. Prior to March 13, 2000 13 soil samples were collected from the base of the northern portion of the site excavation area. A sample collected between columns 13 and 14 at a depth of 23.5 feet contained 0.83 ppm benzene. Approximately 5 cubic yards (7 tons) of soil was excavated at this location and disposed of off-site. Two additional soil samples collected at this

location on January 10, and February 18, 2000. The soils samples were below the affected zone criteria. Groundwater extraction was used to dewater the site to allow for construction activities beginning on October 11, 1999. Extraction rates varied between 5 and 30 gallons per minute (gpm) from the eleven extraction wells. The permit to discharge water was terminated on March 9, 2000. Approximately 7,176,000 gallons of impacted water was discharged to the sanitary sewer during site development activities.

submit a response to the 11/7/2012 inspection report.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 73081
Site Name: T & S PRODUCE CO INC
Violation Date: 3/10/2017
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 04/17/2017. The secondary containment of the used oil drum was filled with empty new oil containers. Remove the containers and keep the secondary containment clean and available to accept any potential spills or leaks.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 73081
Site Name: T & S PRODUCE CO INC
Violation Date: 3/10/2017
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 04/17/2017. Facility could not produce used oil pickup receipts. Locate and submit the last pickup receipt with the response to this report. Ensure 3 years worth of receipts are available for review.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 73081
Site Name: T & S PRODUCE CO INC
Violation Date: 3/10/2017
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 04/17/2017. Facility does not have an EPA ID number. Obtain an EPA ID number and keep it active while generating hazardous waste. Assisted with DTSC form 1358 completion during the inspection.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker: GOR
RB Case Number: 10-079
Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E07Q01f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: The site is located in a commercial and industrial area of San Jose on the northern corner of North Montgomery and West Saint John Streets. The property (APN 259-29-001), presently vacant, was occupied by the San Jose Foundry until 2008. A combined warehouse and office building is located along the eastern, southern, and western property boundaries. The central and northern areas of the site are paved. Prior to this phase of work, a network of three groundwater monitoring wells were installed at the site (Figure 3, Table 1). The San Jose Arena is located south and west of the site, and commercial parcels are located north and east of the site. The confluence of the Guadalupe River and the Los Gatos Creek is approximately 750 feet east of the site. Evidence of gasoline leakage into soils at the site was discovered when an underground gasoline storage tank (UST) was excavated in March 1987. The former UST location is illustrated in Figure 3. Analytical results for soil samples collected during a 1987 phase of investigation indicated that soils in the immediate vicinity of the former UST contained up to 2,200 parts per million (ppm) of total petroleum hydrocarbons as gasoline (TPHg). Four exploratory soil borings, SB-1 through SB-4 were drilled in the vicinity of the former UST in 1987 (Figure 3). The results for the analysis of two soil samples from Boring SB-4 located approximately 24 feet east of the tank excavation area ranged from 50 to 110 ppm of TPHg (Table 2). Two groundwater monitoring Wells, LF-1 and LF-2 were installed at the site in 1991. A third groundwater monitoring well, LF-3, was installed in 1992. A soil sample collected at a depth of 14 feet from the boring for well LF-1 contained 3,500 ppm of TPHg. Concentrations of gasoline compounds in groundwater samples collected from Well LF-1 have remained at levels above regulatory concern since the well was installed in 1991. Groundwater testing data collected from Wells LF-2 and LF-3 have not indicated any significant gasoline-impact above laboratory reporting levels for TPHg, BTEX, and MTBE during the six sampling events for these wells. The historic groundwater flow direction has been toward the northeast. Cores recovered during previous drilling operations revealed that the upper 10 to 13 feet of sediments beneath the site are composed generally of silty and clayey sediments. Thin sandy units interbedded with silts and clays have been logged in sediments beneath 13 feet bgs to the total depths explored (28 feet bgs). Soil samples collected from the boring from well LF-1, drilled near the former UST, indicate that the vertical extent of the petroleum hydrocarbon release attenuates with depth. In various phases WELLTEST has advanced a total of 11 direct-push exploratory borings and collected continuous soil-core and grab-groundwater samples from these borings. Groundwater was first encountered approximately 16 feet bgs in the borings. Based upon the historical groundwater monitoring data and the results of the grab groundwater samples collected, the plume appears to be migrating toward the northeast. The lateral extent of the plume has been defined to the north, east and west, and has been defined to moderate concentrations to the south.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 05/02/2008
Comments: The remedy (cap) continues to be protective of public health, safety and the environment. the next 5 year review is due March 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/20/1991
Comments: Report of Completion of Interim Remedial Measure/Removal Action (IRM/RA). Polynuclear aromatic hydrocarbons (PAHs) contaminated soil (23,000 cubic yards(CY)) resulting from a former PG&E gas manufacturing site was excavated and encapsulated into the nearby parking lots. Gasoline contaminated soil (17,000 CY) was also excavated and stockpiled nearby for vapor extraction treatment. The excavated area was backfilled with clean fill.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/28/1991
Comments: Completion of Phase I Construction Documentation Report. Required a deed restriction to be filed. PNA contaminated soil from a former PG&E site was excavated and encapsulated into a nearby parking lot. Gasoline contaminated soil was also excavated and stockpiled on a nearby lot for vapor extraction treatment. The excavated areas were backfilled with clean soil. The volume of excavation for PNA contaminated soil was approximately 23,000 cubic yards. The volume of excavation for gasoline contaminated soil was approximately 17,000 cubic yards. Groundwater treatment was performed under San Francisco RWQCB's requirements. Current files at the RWQCB list the site closed on 06/20/97.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 05/23/2003
Comments: A Deed Restriction limiting future use of property including the material encapsulation areas which requires no disturbance of the encapsulated areas and the slurry wall. If the areas are disturbed, DTSC is to be notified, a health and safety plan prepared, the material from the encapsulation area will be handled properly, and repairs to the area will be done as quickly as possible.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 04/27/2007
Comments: No problems noted during inspection.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Soils Management Plan
Completed Date: 07/21/2006
Comments: Comments on the report were: a soil management plan is required; asphalt removal, if needed and liquifaction issues for the SE corner will need to be addressed, and any other project ("Ball Park") that might involve a parking structure to be added to the parking lot at the HP pavilion.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/27/2003
Comments: Site Screening completed which recommended No Further Action. The soil remediation was completed in 1992 by a paved parking lot system, slurry wall around the Arena footprint, and soil cap at the Arena Green. The site was approved as closed by RWQCB in 1997. A deed restriction was recorded by DTSC in May 2003.

Completed Date: 06/27/2003
Comments: Site Screening completed which recommended No Further Action. The soil remediation was completed in 1992 by a paved parking lot system, slurry wall around the Arena footprint, and soil cap at the Arena Green. The site was approved as closed by RWQCB in 1997. A deed restriction was recorded by DTSC in May 2003.

Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 05/30/2012
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay

Background Info: The current address on the building is 525 West Santa Clara Street. The site is bounded by Autumn Street to the east; West Santa Clara Street to the south; Julian Street, Montgomery Street, and St. John Street to the north; and the Southern Pacific Railroad tracks to the west. In May 1987, a site screening identified contaminants in the soil as polycyclic aromatic hydrocarbons (PAH's) from a former Pacific Gas & Electric (PG&E) site with concentrations ranging from non-detect to above 3,000 ppm in localized areas. EPA completed screening site inspection in 1989. The City of San Jose Redevelopment Agency (SJRA) acquired 22 parcels in a former industrial area in downtown San Jose that had a former Pacific Gas & Electric (PG&E) coal gasification plant, various automobile repair and service businesses, underground storage tanks, oil/water clarifiers, and drums.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 04/22/2015
Comments: The Upgradient Groundwater Investigation Workplan outlines a scope of work primarily for the purpose of determining the presence or absence of volatile organic compounds upgradient of the Site. The scope of work consists of three mobilizations along three subsurface boring transects (upgradient, along Asbury Street and Coleman Avenue). The August 29, 2014 Workplan was modified by a March 17, 2015 Response to Comments document submitted by ARCADIS to address DTSC's comments on the Workplan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/19/2015
Comments: The field investigation activities included in the Upgradient Groundwater Investigation Workplan were started on June 19, 2015.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 06/12/2015
Comments: A work notice was distributed to inform the community about drilling and groundwater sampling to be conducted at 22 locations along Asbury Street and Coleman Avenue, and which was to be scheduled to begin on June 19, 2015.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 07/07/2016
Comments: The Additional Soil Vapor Investigation Work Plan outlines additional investigation activities to delineate the occurrence and concentrations of volatile organic compounds in shallow soil vapor near occupied properties across Chestnut Street, immediately east of the site. The additional investigation activities include the installation of four additional nested soil vapor probes, with two to three probes in each boring. An additional round of soil vapor sampling is to be performed in 32 existing soil vapor probes (16 locations at 2 depths) and in the new soil vapor probes that are to be installed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

S103961881

Violation Description: Failure to provide either a posted sign stating "Danger Hazardous Waste Area - Keep Out" or to provide one of the following means of security to the active hazardous waste portion of the facility: 1) A 24-hour surveillance system (e.g., television monitoring or surveillance by guards or facility personnel) which continuously monitors and controls entry; or 2) A) An artificial or natural barrier (e.g., a fence in good repair or a fence combined with a cliff), which completely surrounds area; and B) A means to control entry, at all times, through the gates or other entrances (e.g., an attendant, television monitors, locked entrance, or controlled roadway access to the facility).

Violation Notes: While a fence is used to prevent and control entry into the facility, security signage as identified below is not posted.

Violation Division: Santa Clara County Environmental Health
Violation Program: PBR
Violation Source: CERS

Site ID: 112809
Site Name: Du-All Anodizing Corporation
Violation Date: 11/8/2016
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16

Violation Description: Failure to provide employees with hazardous waste training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility.

Violation Notes: Per Mr. Athans, hazardous waste management training is provided at the time of hire and refreshed at least annually and observations are consistent with this statement, but employee training is not documented in accordance with the requirements below.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 112809
Site Name: Du-All Anodizing Corporation
Violation Date: 11/8/2016
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: 1 x 55 gallon drum of wastewater treatment sludge is open when no waste is being added or removed

Violation Notes: the facility where the FTU is operating: 1) The waste analysis plan for the treatment operation; 2) The written inspection schedule; 3) All training documents; 4) The contingency plan; 5) A copy of the most recent treatment notification and a copy of the most recent acknowledgement received from the Department, CUPA or authorized agency; 6) A copy of any local Air District permit and other permits required for the operation of the FTU; 7) A copy of the closure plan; 8) A copy of documents related to the environmental investigation and any cleanup, abatement or other necessary remedial action taken; and 9) Documentation of any convictions, judgments, settlements, or orders resulting from any action by any local, State, or federal environmental or public health enforcement agency concerning the operation of the facility within the last three years, as the documents would be available under the California Public Records Act. Facility was determined to be subject to regulation as a Permit By Rule (PBR) treatment facility in 2012. In 2014 the facility was noted to have modified its operations so to be eligible for onsite recycling exemptions, which removed the PBR operating requirements The facility asked for and was granted (by DEH) "deferred closure" of the wastewater treatment system to allow for continued use of the system in the ongoing recycling activities. Because the system was once determined to be be subject to PBR, facility must generate and maintain a closure plan to be followed at the time of its closure.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-08-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site for a routine excluded recyclable material inspection. The facility operates a wastewater treatment system (see Permit by Rule Inspection Report) and a portion of the treated wastewater is reclaimed and re-used as "clean" rinse water pursuant to HSC 25143.2(d)(6). NOTES: - Tanks that reclaim the recyclable rinsewater are inspected daily and the inspections are logged. - A flow meter is installed on the ancillary piping that returns the reclaimed rinsewater to the rinsewater baths. The flow meter volumes are logged in the daily inspection log. **RECOMMEND ACQUIRING ADDITIONAL INFORMATION AS TO WHAT "TTL1" AND "TTL2" REFER TO ON THE FLOW METER, SO A MORE DETAILED RECORD OF RECYCLABLE MATERIAL COMPLIANCE CAN BE MAINTAINED [HSC 25143.2(f)].**

Eval Type: Routine done by local agency
Eval Notes: Facility is recycling treated rinsewaters for reuse as rinse water. Recyclable materials report is required to be filed by July 1 of each even numbered year. Believe that facility qualifies for recycling under HSC 25143.2(d) "reuse in place of commercial product".

Eval Division: Santa Clara County Environmental Health
Eval Program: HWRrecycler
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-08-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection. The facility is an aluminum parts anodizer that conducts Type II, passivation, chemical film processes. The facility generates between 11-12,000 gallons of hazardous waste per month from corrosive rinsewaters and wet floor aqueous wastes. All hazardous waste is "immediately" treated in an on-site hazardous waste treatment system and is excluded from RCRA waste counting per 40 CFR 261.5(c)(2), but is counted when determining California ("non-RCRA") generator status. Therefore, the facility is a non-RCRA large quantity generator. The following hazardous wastes are accumulating at the time of inspection: - 2 x 55 gallon drums of wastewater treatment sludge (Accumulation Dates: 8/13/2016, 10/8/2016) - 1 x approximately 8 gallon container accumulating filter press sludge (Empty Daily) - 1 x 600 gallon wastewater treatment tank (elementary neutralization) NOTES: - Sludge waste generated from on-site treatment [Truncated]

Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-08-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine inspection of an on-site hazardous waste treatment system deemed to have a Permit by Rule (PBR). Wastewaters generated from the rinsewater wastes, container rinsing residuals, and "wet floor" aqueous wastes are automatically directed to treatment system for on-site treatment. The "in-use" rinsewater baths were pH strip tested during the inspection: acidic rinsewater bath's pH = 1-2, caustic rinsewater bath's pH = 11-12, soap rinsewater bath's pH = 6-7. Two Fixed Treatment Units (FTUs) operate under Permit by Rule: All wastestreams* are combined and directed to Unit 1, "Mixer Tank," for elementary neutralization batch treatment (FTU "Unit 1"). The pH of the influent wastewater is monitored by a continuous pH meter and logged on a chart recorder. Depending on the pH of the influent wastewater, the wastewater is automatically neutralized with 30% sodium hydroxide or 50% sulfuric acid. *55 gallon drums are triple rinsed for the purpose of [Truncated]

Case Worker: REG
Local Agency: Not reported
RB Case Number: 43S1112
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History: The Williams Manufacturing Facility encompasses 560 - 595 Emory Street and 790 Chestnut Street parcels. The site is a former metal stamping facility family owned and operated since 1942. The facility ceased operations in 2003. The site comprises several buildings on either side of Emory Street and is rented to different commercial/industrial users. Soil, soil vapor, and GW sampling results show elevated concentrations of TPG and VOCs (PCE & TCE) are present in all media. 790 Chestnut Street property- a former UST at this location; that case (43-3139) was closed in December 2008. Partial closure by RWQCB for the 760 Emory Street parcel - NFA letter 6/30/2014 (APN 259-09-020). One groundwater monitoring well MW-1 and 16 soil vapor extraction wells were decommissioned in October 2014. The NW corner of Chestnut and Emory St. remains open for solvent release; additional site characterization and recommendations for corrective action are required. Phase II Environmental Site Assessment for the property located at 561- 595 Emory Street (1-ac) was conducted in 2015; elevated concentrations of TCE up to 1,200 ug/L in the GW sample (B-1).

Completed Date: 06/16/2016
Comments: Request for Agency Oversight Application.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/20/2017
Comments: DTSC reviewed several Phase I Environmental Site Assessment reports as well as Limited Soil Sampling and Analysis Reports prepared for the site. Organochlorine pesticides and metals were detected at relatively low concentrations in soil samples collected from the site in June 2016. Lead was detected in 8 soil samples at concentrations greater than DTSC's screening level for residential land use. The lead screening exceedances were localized and limited in extent, with most of the exceedances at 1.5 feet below ground surface (bgs), with one exceedance at 3 feet bgs. The lead-impacted soil was removed when excavation for the construction of an underground parking garage occurred. The lead- and arsenic-impacted soil was disposed at Republic Services Newby Island Landfill in Milpitas, California. DTSC concluded that no further action is required at the Site and that the planned residential development is acceptable.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Site Screening
 Completed Date: 12/27/1991
 Comments: Completed Site Screening. In January 1989, additional sampling was conducted at the site. Soil boring results detected total oil and grease (TOG) and total petroleum hydrocarbons as diesel (TPHd) in excess of 1000 ppm. Lead was detected at 938 ppm. In May 1989, two groundwater monitoring wells (MW-1 and MW-2) were installed at the property. Lead was detected in groundwater at a concentration of

0.181 ppm. In May 1989, contaminated soil was removed from the previous sampled area. Final soil sample results indicated only one sample contained TOG at 780 ppm and lead at 191 ppm. The sample that contained the TOG and lead was collected beneath the foundation of the building. The excavations were backfilled with clean, imported fill.

 Background Info: In 1983 the Santa Clara County Jail had three transformers (located on the roof, in the basement and near a prisoner holding area) that leaked small quantities ("a teaspoonful to less than a coffee cupful") of polychlorinated biphenyl (PCB) contaminated oil. The contamination of the three spots ranged from 12 micrograms per sample to 6,600 micrograms per sample before cleanup.
 Comments Date: 09011983
 Comments: CERT and RA - A cleanup level of 100 micrograms per square foot
 Comments Date: 09011983
 Comments: was chosen for the wipe tests. After cleanup, the areas tested
 Comments Date: 09011983
 Comments: were between non-detect and 25 micrograms per square foot. The
 Comments Date: 09011983
 Comments: cleanup was completed by September 1, 1983 and was certified.

Eval Notes: On site to witness the annual monitoring system certification performed by Mr. Jesus Saldivar (all certifications current) of Tanknology. NOTE: The spill bucket testing and paperwork review were performed on 1/13/2017. See that inspection report for details. The annular, under dispenser containment (UDC) and sump sensors were tested in water and provided audible and visible alarms. The turbine sump and UDC sensors also provided positive shutdown of the turbines. Sensor out and power out (fail safe) triggered positive shutdown of all turbines. The electronic line leak detectors (ELLD) were tested and detected a simulated 3 gph leak at 10 PSI using the Tanknology LDT-5000 tester and provided turbine shutdown. Overfill protection is provided by flapper valves in the fill tubes. The emergency shut off (ESO) button was tested and shut down both turbines. email: sbala4@yahoo.com, Jamil.Hershewe@7-11.com Submit a copy of the Monitoring Certification and [Truncated]

Eval Notes: On-site to witness the underground storage tank system secondary containment (SB989) testing performed by Mr. Jarrod Cooke (certifications current) of Tanknology. Product piping is flexible pipe and the secondary was tested at 5 psi for one hour with no loss. The annular space of the tanks were tested at 10 inHg for one hour. The regular passed one hour with no loss. The Super test could not be completed due to time constraints. The piping sumps and under dispenser containment (UDC) were tested with a Tanknology VPLT accelerated test. The sumps passed a 30 minute test and the UDCs passed a 15 minute test. Contact our office at least two days prior to testing the Premium tank annular space. Submit a copy of the Secondary Containment Test report to our office within 30 days and keep a copy available for review for at least 3 years. Reports may be sent via email to USTinspector@deh.sccgov.org.

Eval Notes: TODAY'S ANNUAL UST MONITORING EQUIPMENT TESTING WAS PERFORMED BY UST SERVICE TECHNICIAN BRENT BOWEN OF TANKNOLOGY INC. MR. BOWEN HAS CURRENT ICC UST SERVICE TECHNICIAN CERTIFICATION (EXP. 07/03/2015), VEEDER-ROOT LEVEL 2/3 CERTIFICATION (EXP. 03/12/2015) AND VMI TLDT-5000 TESTER (EXP. 03/25/2015). THE FOLLOWING UST MONITORING EQUIPMENT WAS TESTED AND FUNCTIONED PROPERLY: TWO TANK ANNULAR SPACE SENSORS, TWO STP SUMP SENSORS AND TWO UDC SENSORS. THE TWO SPILL BUCKETS WERE HYDROSTATICALLY TESTED AND PASSED. SENSOR OUT AND POWER OUT PROVIDED POSITIVE TURBINE SHUTDOWN. THE TWO LINE LEAK DETECTORS WERE TESTED WITH A SIMULATED 3.0 G.P.H. LEAK AND PASSED. FLAPPER VALVES WERE OBSERVED IN THE DROP TUBES OF BOTH FUEL TANKS. * AT THE END OF THE INSPECTION THE VEEDER-ROOT TLS 350 MONITORING PANEL WAS CHECKED AND IT WAS FOUND TO STILL SHOW TWO ALARMS FOR L2 AND L4 ANNULAR SPACE SENSORS THAT HAD NOT CLEARED FROM THE PANEL SCREEN. THE UST SERVICE TECHNICIAN TROUBLESHOT THE SYSTEM [Truncated]

Eval Notes: On site 1-22-14 accompanied by Greg Breshears to oversee annual UST monitoring system and spill bucket testing performed by Mr. Darren Sciume of Tanknology. Mr. Sciume holds valid ICC and Veeder-Root certifications. Site consists of two tanks (87 and 91). Monitoring panel is a Veeder-Root TLS 350 panel. Sumps, annular spaces, and UDCs are monitored by veeder-Root sensors. Sumps were dry upon arrival. TESTING: 87 and 91 sump sensors were tested with water and provided audible and visible alarms in addition to positive shutdown of the

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site with Ana Bui of HMCD to witness the annual monitoring system certification performed by Jarrod Cooke of Tanknology. Verified Mr. Cooke's ICC Certification, ICC-8155550 expires 4/5/19, Veeder Root Certification, B35255 expires 5/9/18, and VMI Certification, expires 2/23/19. 2 tanks: 87 and 91. Annular, STP, and under dispenser containment(UDC) sensors were tested in water and provided audible and visual alarms. STP and UDC sump sensors also provided positive shutdown. Sensor out and power out (fail safe) were tested and provided positive shutdown of all turbines. Overfill prevention is provided by flapper vales in the fill tubes. A 3 gph leak at 10 psi was simulated using the Tanknology LDT-5000 apparatus. The electronic line leak detectors were able to detect the simulated leak and shut down all turbines. Spill buckets for 87 and 91 are direct buried and were tested using Tanknology's vacuum apparatus with no loss. DUSTO monthly reports, DUSTO [Truncated]

Eval Notes: On site to witness the annual monitoring system certification and spill bucket test performed by Mr. Steve Willems (all certifications current) of Tanknology. The site's dispenser handles have been red-tagged by SCC Weights and Measures. Since the dispensers cannot be activated to verify positive shutdown, failsafe and the line leak detectors, the sensor testing will have to be done after the red tags have been properly removed by SCC Weights and Measures. Ensure sensor testing is performed by January 31, 2017 to remain in compliance with your testing schedule. Contact USTinspector@deh.sccgov.org to schedule the testing. The spill buckets are direct buried and were hydrostatically tested for one hour with no loss. Performed a limited inspection by reviewing DUSTO Monthly Reports, DUSTO Training records, testing reports and maintenance documentation. Tank and monitoring system information submitted to the California Environmental Reporting System (CERS) on [Truncated]

Background Info: Facility size is approx 7.0 acres. Sites include a grease rack and inactive vehicle wash rack. A draft PA was completed in February 1999 and a final SI work plan was prepared in August 2000. The grease rack was constructed in the early 1950s and is no longer used. The Army considers the vehicle wash rack and oil water separator to be a compliance (RCRA) issue for funding purposes. The wash rack pad and oil water separator were removed on August 15, 2000. Shallow soil sampling was conducted around the grease rack in 1997. A UST (fuel tank) was closed by County in the early 1990s. Contaminants of concern are primarily grease oil, fuels and solvents. Ground water is relatively shallow, approx 60 ft below ground surface. Impacts to groundwater from grease rack are unknown, but will be determined by the August 2000 SI field work.

Violations:

Site ID: 120254
Site Name: GORDON BIRSCH BREWING CO
Violation Date: 5/4/2017
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: - Lerasept SR: 165 gallons observed - 55 gallons of Lerades CSR is reported in the Hazardous Materials Inventory, but 115 gallons was observed. - 304 cubic feet of Nitrogen is reported, but 1340 cubic feet was observed. - 55 gallons of bleach is reported, but 288 gallons

was observed.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 1/2/2017
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient Report
Violation Notes: Failed to submit Level 1 ERA Report by 1/1/17 deadline
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 5/4/2017
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include one or more elements in the Contingency Plan including but not limited to the following: description of actions personnel will take in response to a release or emergency, arrangements with local authorities, list of emergency coordinators including name, addresses & phone numbers, list of emergency equipment and their physical description, location and capabilities,- evacuation plan, and OES phone number. (If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) Plan or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions.)
Violation Notes: The facility's Contingency Plan does not contain the required information: - The names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator. Note: Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates. - All of the emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment). Furthermore, the plan does not include a physical description of each item on the list, and a brief outline of its capabilities.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 5/4/2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: 1) Chemical Room: A white-ish, opaque liquid with a small amount of foam was observed in the 5 gallon open bucket container located underneath the 50% sodium hydroxide and 36% sulfuric acid fill ports that is used as a spill bucket during deliveries. Mr. Chavez stated

Map ID

Site

Database(s)

EDR ID Number
EPA ID Number

CONTINENTAL CAN CO USA PLT. #12 (Continued)

S103655146

that the liquid in the container cannot be used and is a waste. NOTE: While Mr. Chavez stated that the same spill bucket is not used for both the sulfuric acid and sodium hydroxide fill ports, no other spill bucket was observed in the room. Ensure that incompatible hazardous wastes (sulfuric acid and sodium hydroxide) are not commingled in the same container. Determine if the liquid is a hazardous waste, as instructed below. 2) Room near Cooling Tower: The lid of a 5 gallon container labeled as G Scale SolveG descaler was observed to be broken and a brown, pungent smelling liquid was observed to be spilling out of the container and onto the floor. Determine if the contents of the container is a waste or is [Truncated]

Violation Date: 5/4/2017
Citation: 40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33

Violation Description: Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.

Violation Notes: Chemical Storage Room: Observed one emergency eye wash bottle marked with an expired expiration date (02/2017).

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 5/4/2017
Citation: HSC 6.5 25201 - California Health and Safety Code, Chapter 6.5, Section(s) 25201

Violation Description: Failure to obtain a permit or grant of interim status after generator has accumulated hazardous waste on-site for longer than 90 days.

Violation Notes: Used oil generated from facility-wide equipment maintenance is consolidated into 5 gallon containers in the used oil accumulation area on the second floor and is taken to a household hazardous waste (HHW) drop-off location to be discarded. Mr. Chavez stated that pumps and equipment require oil changes approximately once per year and equipment and pumps observed during inspection were labeled with the most recent G serviceG dateG and next service due date. The five gallon bucket currently used to accumulate used oil was observed to be marked with an initial accumulation date of 2/11/2017, but per the augerG s label, the used oil consolidated into the container during inspection (see corrected container marking violation below) was generated on approximately 1/26/2017. Furthermore, HHW receipts reviewed during inspection only identified used oil being disposed of on 3/29/2017 and 4/2/2015 during the past three years. Hazardous waste cannot accumulate on-site for longer than [Truncated]

Site Name: GORDON BIERSCHE BREWING CO
Violation Date: 5/4/2017
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: The facility routinely generates hazardous waste and has CA EPA ID Number CAL000335296, but the ID Number has been inactive since 6/30/2014. Furthermore, the facility has repeatedly obtained temporary EPA ID Numbers to dispose of hazardous waste at household hazardous waste collection facilities (see comments section below). All generators who routinely generate hazardous waste must obtain a permanent EPA ID Number and the EPA ID Number must remain active pursuant to HSC 25205.16(c). Temporary EPA ID Numbers are not for use by generators who routinely generate hazardous waste. A copy of DTSC FORM 1358 will be provided with this inspection report.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 120254
Site Name: GORDON BIERSCHE BREWING CO
Violation Date: 5/4/2017
Citation: HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description: Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to this chapter.
Violation Notes: 1) The pH chart recorder for the two wastewater neutralization tanks and sampling point prior to POTW discharge were reviewed for the time period between 11/29/2016 G 4/11/2017. At least five occurrences of the sample pointG s pH being at or greater than 12.5 (e.g. 12.9, 12.5-12.7, 12.8) and the pH of the second neutralization tank being greater than 12.5 were observed on the chart recorders for the time period between 3/5/2017-4/11/2017. Three of the corrosive discharges continued for a prolonged period of time, while the others were short spikes. The sample pointG s pH was also recorded as 12.6 for least one time period between 2/3/2017-3/5/2017 and once between 11/29/2016-1/4/2017. 2) HMCD was notified by San Jose-Santa Clara Regional Wastewater that a sample of the facilityG s discharged corrosive wastewater on 12/30/2015 had a pH of 1.8. Upon inquiry as to what caused the illegal discharge of pH 1.8 corrosive wastewater on 12/30/2015, Mr. Chavez said that there was a [Truncated]

Violation Date: 5/4/2017
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Used oil was observed to be leaking and accumulating on the floor near the mixing tank. Some of the spill was observed to still be in liquid form, while dried used oil residue was observed in other places on the floor. Furthermore, the drains in the floor are automatically directed to the on-site elementary neutralization unit (before POTW discharge), which is not equipped to separate and capture used oil from the other aqueous waste streams. Ensure that any spilled used oil is immediately collected and managed as hazardous waste.

arrangements with local authorities, list of emergency coordinators including name, addresses & phone numbers, list of emergency equipment and their physical description, location and capabilities, - evacuation plan, and OES phone number. (If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) Plan or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions.)

Violation Notes: The facility's Contingency Plan does not contain the required information: - The names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator. Note: Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates. - All of the emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment). Furthermore, the plan does not include a physical description of each item on the list, and a brief outline of its capabilities.

Violation Date: 5/4/2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Violation Notes: 1) Chemical Room: A white-ish, opaque liquid with a small amount of foam was observed in the 5 gallon open bucket container located underneath the 50% sodium hydroxide and 36% sulfuric acid fill ports that is used as a spill bucket during deliveries. Mr. Chavez stated that the liquid in the container cannot be used and is a waste. NOTE: While Mr. Chavez stated that the same spill bucket is not used for both the sulfuric acid and sodium hydroxide fill ports, no other spill bucket was observed in the room. Ensure that incompatible hazardous wastes (sulfuric acid and sodium hydroxide) are not commingled in the same container. Determine if the liquid is a hazardous waste, as instructed below. 2) Room near Cooling Tower: The lid of a 5 gallon container labeled as G Scale SolveG descaler was observed to be broken and a brown, pungent smelling liquid was observed to be spilling out of the container and onto the floor. Determine if the contents of the container is a waste or is [Truncated]

Site Name: GORDON BIERSCH BREWING CO
Violation Date: 5/4/2017
Citation: HSC 6.5 25201 - California Health and Safety Code, Chapter 6.5, Section(s) 25201

Violation Description: Failure to obtain a permit or grant of interim status after generator has accumulated hazardous waste on-site for longer than 90 days.

Violation Notes: Used oil generated from facility-wide equipment maintenance is consolidated into 5 gallon containers in the used oil accumulation area on the second floor and is taken to a household hazardous waste (HHW) drop-off location to be discarded. Mr. Chavez stated that pumps and equipment require oil changes approximately once per year and equipment and pumps observed during inspection were labeled with the most recent G service date and next service due date. The five gallon bucket currently used to accumulate used oil was observed to be marked with an initial accumulation date of 2/11/2017, but per the auger's label, the used oil consolidated into the container during inspection (see corrected container marking violation below) was generated on approximately 1/26/2017. Furthermore, HHW receipts reviewed during inspection only identified used oil being disposed of on 3/29/2017 and 4/2/2015 during the past three years. Hazardous waste cannot accumulate on-site for longer than [Truncated]

Violation Date: 5/4/2017
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12

Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Violation Notes: The facility routinely generates hazardous waste and has CA EPA ID Number CAL000335296, but the ID Number has been inactive since 6/30/2014. Furthermore, the facility has repeatedly obtained temporary EPA ID Numbers to dispose of hazardous waste at household hazardous waste collection facilities (see comments section below). All generators who routinely generate hazardous waste must obtain a permanent EPA ID Number and the EPA ID Number must remain active pursuant to HSC 25205.16(c). Temporary EPA ID Numbers are not for use by generators who routinely generate hazardous waste. A copy of DTSC FORM 1358 will be provided with this inspection report.

Site Name: GORDON BIERSCHE BREWING CO
Violation Date: 2/14/2014
Citation: HSC 6.95 25503.6 - California Health and Safety Code, Chapter 6.95, Section(s) 25503.6
Violation Description: Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.
Violation Notes: Returned to compliance on 03/06/2014.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 120254
Site Name: GORDON BIERSCHE BREWING CO
Violation Date: 5/4/2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Laboratory Area: One 500 mL beaker used to accumulate waste iso-octane in the fume hood area prior to the wasteG s consolidation in the hazardous waste container in the flammable cabinet is labeled only as G organic wasteG with no other required information outlined below. Note that G Empty DailyG can be used for an initial accumulation date if the beakerG s contents are transferred to the consolidation container daily. Otherwise, a date (month/day/year) must be used. Mixing Tank Area: Observed one 3 gallon, un-labeled container of used oil.

Site Name: GORDON BIERSCH BREWING CO
Violation Date: 5/4/2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: The following hazardous materials/wastes were observed in HMBP reportable quantities, but not included in the HMBP: - Diatomaceous Earth: Approximately 6,000 pounds. - Lerapur 3800XP: 60 gallons - The two wastewater settling tanks, two elementary neutralization tanks, and one reclaim tank used to accumulate and treat wastewater - The propylene glycol tank and propylene glycol in the fermentation tank cooling system - Sodium Hydroxide G Caustic TankG for CIP activities - Sulfuric Acid G Acid TankG for CIP activities - Battery Electrolyte (e.g. forklift batteries) The following hazardous materials are incorrectly reported: - Carbon dioxide compressed gas incorrectly reported in pounds, rather than cubic feet - Lerasept Special CC is incorrectly reported in pounds, rather than gallons

Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 5/4/2017
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes: 1) The facility is a brewery who is in SIC Code Major Group 20 (SIC Code 2082) and is exempted from obtaining a hazardous waste treatment permit for the elementary neutralization of their 2.8%-5% sodium hydroxide wastes and 1.4%-5% sulfuric acid wastes generated from CIP activities pursuant to HSC 25201.13(c). However, the facility also directs any corrosive wastes, including wastes which meet hazardous waste corrosivity criteria, generated from leaking pipes, equipment malfunctions, and spills to the neutralization units via the drains located throughout the facility. At the time of inspection, a pipe associated with the G caustic tankG holding 5% sodium hydroxide used for CIP activities was leaking and mixing with the water condensate on the floor underneath and in front of the tank. The resultant caustic-water condensate mixture was pH stripped and determined to have a pH = 11, which is consistent with the spilled caustic solution having a pH > 12.5. Mr. Chavez and [Truncated]

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-14-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Observed 1x5 gal of used oil with improper hazardous properties. Facility has changed it from "combustible" to "toxic".

Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-14-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine inspection performed. Visual walk-through portion confirmed 13 reportable materials and permit will be reduced from BP05 (16-21) to BP04 (10-15). HMBP submitted on CERS 12-16-13 was reviewed prior to inspection and found consistent with visual inspection. Some reportable materials were only listed by their product name. Next inventory submission you must specify actual hazardous constituents instead of a generic product name.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-10-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: NOTES TO FACILITY: Employees are provided with HMBP training and the training is documented for 2017. However, the facility's environmental compliance contact stated that employees were formerly provided with annual refresher training, but refresher training has recently been conducted less frequently than annually. ENSURE THAT ALL EMPLOYEES ARE PROVIDED WITH INITIAL AND ANNUAL REFRESHER HMBP TRAINING, THE TRAINING IS DOCUMENTED, AND THE TRAINING RECORDS ARE READILY AVAILABLE FOR REVIEW FOR THREE YEARS [HSC 25505(a)(4)]. On-site to conduct a routine hazardous materials business plan (HMBP) inspection. The following hazardous materials/wastes were observed in quantities at or above HMBP-reportable thresholds: 1) Lerasapt SR: 165

Violation Date: 11/9/2015
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16

Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Training record indicates that hazardous waste training will be provided by an outside vendor every 3 years. last noted exterior provider training was by Du-All Safety in 2009.

Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194

Violation Description: Failure to maintain the following general tank operating requirements:
a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank, its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail. b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: 1) Spill prevention controls (e.g., check valves, dry discount couplings); 2) Overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and 3) Maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., dike or trench), a drainage control system or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank.

Violation Notes: Tanks are indicated as being 350 gallons in size and are operated with an open top. Logs of treatment quantities indicate batches of 350 gallons routinely treated. Tanks area not equipped with overfill prevention and do not appear to have at least two feet of freeboard maintained while waste is in the tanks.

Violation Date: 11/9/2015
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52

Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Notes: Facility could not produce a complete contingency plan. Portions of the plan were available but a complete plan was not available. Unidocs version of the Contingency plan from 2012 was onsite, but was incomplete in that it did not have updated phone numbers for the CUPA or the names or emergency contacts.

Citation: 22 CCR 15 66265.197 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.197

Violation Description: Failure to properly close a hazardous waste tank system ensuring the minimization of further maintenance and that the following requirements are met: a) The owner or operator shall remove or decontaminate all waste residues, contaminated containment system components (liners, etc.), contaminated soils, and structures and equipment contaminated with waste, and manage them as hazardous waste. The closure plan, closure activities, cost estimates for closure, and financial responsibility for tank systems shall meet all of the requirements specified in articles 7 and 8 of this chapter. b) If the owner or operator demonstrates that not all contaminated soils can be practicably removed or decontaminated as required in subsection (a) of this section, then the owner or operator shall close the tank system and perform post-closure care in accordance with the closure and post-closure care requirements that apply to landfills (section 66265.310). In addition, for the purposes of closure, post-closure, and financial responsibility, such a tank system is then considered to be a landfill, and the owner or operator shall meet all of the requirements for landfills specified in articles 7 and 8 of this chapter. c) If an owner or operator has a tank system which does not have secondary containment that meets the requirements of section 66265.193(b) through (f) and which has not been granted a variance from the secondary containment requirements in accordance with section 66265.193(g), then: 1) The closure plan for the tank system shall include both a plan for complying with subsection (a) of this section and a contingent plan for complying with subsection b) of this section; 2) A contingent post-closure plan for complying with subsection (b) of this section shall be prepared and submitted as part of the permit application; 3) The cost estimates calculated for closure and post-closure care shall reflect the costs of complying with the contingent closure plan and the contingent post-closure plan, if these costs are greater than the

Violation Notes: Three tanks used for the treatment of hazardous waste were replaced in 2015 but documentation of proper closure and disposal of the tanks was not available. Corrective Action: Please explain how these tanks were closed and were disposed of. Tanks must either be managed as hazardous wastes or must be certified as clean according to Title 22, CCR, section 67383.3 standards.

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Site map submitted 7/1/15 is incomplete. CERS response on 8/2/15 asked for map to be revised prior to next inspection. Map does not indicate storage areas 8, 2, 3, or 5 or the oxidizer shed. It also is missing the locations of local water and gas shut-offs, locations of emergency equipment or the location of University Avenue.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020	Source: EPA

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Cornerstone Earth Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.
