^aState motor gasoline prices are the same for the commercial, industrial, and transportation sectors.

Notes: Motor gasoline estimates include fuel ethanol blended into motor gasoline. • Totals may not equal sum of components due to independent rounding.

^bDue to consumption weighting, U.S. average commercial price is \$22.87 per million Btu, U.S. average industrial price is \$22.68 per million Btu, U.S. average transportation price is \$22.51 per million Btu, and the U.S. average price of all sectors is \$22.52 per million Btu.

Sources: Data sources, estimation procedures, and assumptions are described in the Technical Notes.

Where shown, (s) = Btu value less than 0.05.
