Environmental Document Transmittal for the City of Oxnard Public Works Integrated Master Plan Project SCH2016071078
Ventura County

Dear Mr. Brown:

The Division of Safety of Dams (DSOD) has reviewed the Notice of Completion and Environmental Document Transmittal for the City of Oxnard Public Works Integrated Master Plan Project for the above referenced project (Project) which describes a proposed construction of an infiltration basin, to be used for stormwater retention on the subject parcels.

Insufficient information is provided regarding the infiltration basin in the Project description to make an accurate jurisdictional determination with regards to the described work and it is unclear whether part or all the work will be subject to State jurisdiction for dam safety. The information provided mentions an infiltration basin, but design drawings were not provided. Therefore, the City of Oxnard needs to submit preliminary plans so that DSOD can make an accurate jurisdictional determination.

As defined in Sections 6002 and 6003, Division 3, of the California Water Code, dams 25 feet or higher with a storage capacity of more than 15 acre-feet, and dams higher than 6 feet with a storage capacity of 50 acre-feet or more are subject to State jurisdiction. The dam height is the vertical distance measured from the maximum possible water storage level to the downstream toe of the barrier.

If the dam is subject to State jurisdiction, a construction application, together with plans, specifications, and the appropriate filing fee must be filed with the Division of Safety of Dams for this project. All dam safety related issues must be resolved prior to approval of the application, and the work must be performed under the direction of a Civil Engineer registered in California. Erik Malvick, our Design Engineering Branch Chief, is responsible for the application process and can be reached at (916) 565-7840.

If you have any questions or need additional information, you may contact Field Engineer Ashley Moran at (909) 214-1503 or me at (916) 565-7827.

Sincerely,

ORIGINAL SIGNED BY

Rick G. Draeger, Regional Engineer
Southern Region
Field Engineering Branch
Division of Safety of Dams
