Project Title: City of Cupertino General Plan 2040 and Zoning Code Amendments

CEQA Document: Subsequent Environmental Impact Report

State Clearinghouse Number: 2014032007

Lead Agency: City of Cupertino

Lead Agency Contact Name: Luke Connolly, Interim Director of Community Development

Email: LukeC@cupertino.org **Phone Number:** 408-777-1275

Project Location (City and County): City of Cupertino, Santa Clara County

Project Description (Proposed actions, location, and/or consequences):

The City of Cupertino is proposing updates to the General Plan 2040 that are required to bring the Housing Element and Health and Safety Element up to date and into compliance with State law. Subsequent updates to the Mobility and Land Use and Community Character Elements, and Zoning Code are also required as a result of updates to the Housing Element and to bring into compliance with State law. The proposed project is considered a policy/planning action and does not constitute approval of any physical development or grant any entitlements for development. All future discretionary projects will be reviewed in accordance with CEQA and for consistency with the goals and policies of the General Plan 2040 and development standards. The City is preparing a Subsequent EIR to the Certified General Plan EIR (SCH # 2014032007).

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Subsequent EIR for the proposed project will address the range of impacts that could result from the proposed project. The following environmental topics will be examined in the SEIR: aesthetics, air quality, biological resources, cultural and tribal cultural resources, energy, geology and soils, greenhouse gas emissions, hazards and hazardous materials, hydrology and water quality, land use and planning, noise, population and housing, public services, parks, and recreation, transportation, utilities and system services, and wildfire. The topics of forestry and mineral resources would have less-than-significant impacts and will not be evaluated in detail in the EIR.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
