Project Description (Proposed actions, location, and/or consequences).

Site Development Permit SDP18-002 on a 80.1-acre site to allow the development of a 99-unit tent campground and supporting facilities such as a mobile kitchen, dining and reception tent, laundry facility, and bathrooms. On-site infrastructure would include internal access roads and pathways, potable water wells, and wastewater leach fields. Site preparation would include implementation of a Timber Harvest Plan to clear the site of hazardous wildfire fuels.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

No significant and unavoidable impacts have been identified. Potentially significant impacts for a number of issues would be mitigated to less-than-significant levels. Mitigation measures include those related to nesting birds, special-status bat species, wetlands, noise, and utilities.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

A number of issues were raised during the public comment periods for the Initial Study and Notice of Preparation, including: public services (fire, police, ambulance); affordable housing; recreation; water supply; wastewater management; air quality (wood smoke); traffic, aesthetics and light pollution; wildfire; and cumulative impacts.

Provide a list of the responsible or trustee agencies for the project.
