State Clearinghouse  
P.O. Box 3044, 1400 Tenth Street,  
Room 212  
Sacramento, CA 95812-3044

From: Department of Toxic Substances Control  
Permitting Division  
9211 Oakdale Avenue  
Chatsworth, CA 91311

**Subject:** Filing of Notice of Determination in Compliance with Section 21108 of the Public Resources Code

**Project Title:** Industrial Service Oil Company, Inc. Hazardous Waste Facility Permit Renewal

**State Clearinghouse Number:** 1995101030

**Project Location:** 1700 South Soto Street, Los Angeles, CA 90023

**County:** Los Angeles County

**Project Applicant:** Industrial Service Oil Company, Inc.

**Project Description:** The California Department of Toxic Substances Control (DTSC), prepared an addendum to a previously certified Environmental Impact Report (EIR). Pursuant to authority granted under Division 4.5, California Code of Regulations, Title 22, Chapter 20, DTSC approved the Hazardous Waste Facility (HWF) Permit renewal for the Industrial Service Oil Company, Inc. (ISOCI) Hazardous Waste Facility (Facility), for ten additional years. DTSC received a permit renewal application for the Facility as authorized by the California Health and Safety Code, Chapter 6.5. The Facility is located at 1700 South Soto Street, Los Angeles, CA 90023 and operates under a current HWF Permit. ISOCI receives, stores, and processes petroleum waste such as used oil, wastewater, waste antifreeze, and oil/water mixtures.

The Facility is located on approximately 5-acre parcel and has been in operation since 1974 in the City of Los Angeles. The ISOCI HWF Permit was originally approved in 2008. There is no disposal of hazardous waste or any other wastes on-site. Wastes that are not recycled or transferred on-site are transported to offsite permitted recycling or disposal facilities.

This project would not affect any aspect of the environment and requires no new construction. All additional activities will continue to be consistent with the HWF Permit and will not result in physical changes. There are no proposed physical changes to the Facility that were not included in the previously approved Final EIR, for which the addendum was prepared.

As Lead Agency under the California Environmental Quality Act (CEQA), DTSC approved the above-described project on May 2, 2023, and has made the following determinations:

1. The project will not have a significant effect on the environment.
2. An EIR was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were made a condition of project approval by DTSC.
4. A Statement of Overriding Considerations was adopted for this project by DTSC.
5. Findings were made pursuant to the provisions of CEQA by DTSC.

The administrative record for this project is available to the public by appointment at the following location:
