Present Land Use/Zoning/General Plan Designation:

Open space - ruderal

Project Description: (please use a separate page if necessary)

The proposed modifications for River Road Dike consists of a compacted earth fill dike, approximately 1,750 feet in length. At the south end, the dike would abut the existing raised ground of the residential tract (Tract No. 31961) in a nearly east-west direction. The dike would then turn north across a tributary drainage to Mill Creek and former dairy land and then turn west and parallel the southern edge of residential tracts (Tract No. 30905 and Tract 29997), ending just west of Port Arthur Drive (Figure 2). The existing concrete channel will be extended 532 feet to the two proposed 48" culverts. An additional proposed 230 feet concrete channel will connect to the concrete channel. The concrete channel would be constructed in the southeastern corner of the site to allow drainage into Mill Creek

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
