Present Land Use/Zoning/General Plan Designation:
 Open Space and Flood Control Structure

Project Description: (please use a separate page if necessary)
 The project is proposing to build an embankment connector to provide a raised connection between the Prado Dam, Prado Spillway and the Auxiliary Dike. However, the project design has been updated from the previously authorized project described in the 2001 SEIS/ EIR Prado Basin and Vicinity. The updated project is proposing to demolish the existing spillway ogee weir and spillway chute and construct a new labyrinth weir, a modified chute and chute walls and a modified flip bucket. The new design will be at a height of minimum 563 feet NVD 29 to provide capacity for higher flood waters and reduce risk of damn failure and flooding down stream.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
