STATE CLEARINGHOUSE

The City is proposing modifications to the previously approved recycled water distribution pipeline alignment as analyzed in the Recycled Water Distribution System, Southwest Quadrant Tiered Mitigated Negative Declaration (MND). In total, the refined pipeline alignments would result in an addition of approximately 4 miles of pipeline. The Tiered MND analyzed approximately 22 miles of pipeline which was reduced by approximately 1,600 feet with the revisions analyzed in the 2017 Addendum. Therefore, when compared to the original pipeline length analyzed of approximately 22 miles, and the reduction of 1,600 feet as part of the 2017 Addendum, an increase of 4 miles as part of this Addendum would result in a net increase of 3.70 miles or a 16.82 percent increase in overall pipeline length from the Tiered MND. The following describes the changes in detail.

The first additional segment would begin at the intersection of West Belmont Avenue and North Brawley Avenue where it would connect to segment SW 1B of the existing alignment. From there the segment would run south along North Brawley Avenue for approximately 1,800 feet before travelling east into Nielsen Basin for approximately 1,600 feet before terminating.

The second additional segment would connect to segment SW 1A of the existing alignment at the intersection of South Cornelia Avenue and West Madison Avenue and extend approximately 9,000 feet east along West Madison Avenue before terminating. The alignment would also extend north along South Valentine Avenue between West Madison Avenue and West Whitesbridge Avenue for approximately 2,500 feet. Lastly, the alignment would extend along West Whitesbridge Avenue for approximately 5,900 feet from 700 feet west of the intersection of South Valentine Avenue and West Whitesbridge Avenue to the intersection of South Hughes Avenue and West Whitesbridge Avenue where it would connect to the segment SW 1C2 of the existing alignment.

Installation of the pipelines along the refined alignments would be consistent with the construction considerations described in Chapter 1, Project Description, pages 1-8 through 1-11 of the Tiered MND.
