Project Title: College Lake Integrated Resources Management Project

Project Location (include county): Santa Cruz County and City of Watsonville, California

Project Description: An EIR for the College Lake Project was certified in October 2019. Subsequently, design progressed and an Addendum was prepared to document changes in the Project Description and impacts on the environment. The primary purposes of the Project are to help balance the groundwater basin, prevent further seawater intrusion, and meet water supply needs in PV Water's service area by developing College Lake as a water storage and supply source. Modified Project components include the weir structure and pump station, water treatment plant, and 6-mile-long pipeline. On average, the Project would generally supply approximately 1,800 to 2,300 acre-feet per year of water to growers in the Pajaro Valley.

This is to advise that the Pajaro Valley Water Management Agency has approved the above described project on July 20, 2022 and has made the following determinations regarding the above described projects.

- 1. The project will have a significant effect on the environment.
2. An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were made a condition of the approval of the project.
4. A mitigation reporting or monitoring plan was adopted for this project.
5. A statement of Overriding Considerations was adopted for this project.
6. Findings were made pursuant to the provisions of CEQA.

This is to certify that the final EIR with comments and responses and record of project approval, or the Negative Declaration, is available to the General Public at:

Pajaro Valley Water Management Agency, 36 Brennan Street, Watsonville, CA 95076
