

CALIFORNIA ENVIRONMENTAL QUALITY ACT NOTICE OF DETERMINATION

To: Office of Planning and Research
State Clearinghouse
P.O. Box 3044, 1400 Tenth Street, Room 212
Sacramento, CA 95812-3044

From: Department of Toxic Substances Control
Permitting Division
8800 Cal Center Drive
Sacramento, CA 95826

Subject: Filing of Notice of Determination in Compliance with Section 21108 of the Public Resources Code

Project Title: Safety Kleen of California, Inc. - Fresno (f.k.a. Evergreen Environmental Services) Hazardous Waste Facility Standardized Permit Renewal

State Clearinghouse Number: 1998109247

Project Location: 4139 North Valentine Avenue, Fresno, CA 93722

County: Fresno County

Project Applicant: Safety Kleen of California, Inc. – Fresno

Project Description: The California Department of Toxic Substances Control (DTSC) adopted an Addendum to the previous Initial Study/Negative Declaration (IS/ND) and approved the Hazardous Waste Facility Standardized Permit to continue operating a Hazardous Waste Storage and Transfer Facility for non-RCRA hazardous waste, pursuant to authority granted under California Health and Safety Code Chapter 6.5 and California Code of Regulations, Title 22, Division 4.5, Chapter 20. The term of this permit is ten years from date of issuance.

Safety Kleen of California, Inc. – Fresno (Safety Kleen-Fresno, f.k.a. Evergreen Environmental Services) operational activities consist of receiving used oil, antifreeze, oily water, and oily debris from offsite generators (e.g. gas stations, oil changers, auto repair shops) and consolidating the non-RCRA hazardous waste (i.e. used oil and antifreeze) received. Facility operations consist of collecting used oil and antifreeze from offsite generators and consolidating the used oil and antifreeze into one existing 10,500-gallon and two 12,100-gallon storage tanks respectively (Unit #1); utilization of a drum storage area where a maximum of ten 55-gallon sized containers may be stored (Unit #2); and a loading and unloading and truck-to-truck transfer area where up to two tanker trucks can be parked while transferring, loading, or unloading used oil (Unit #3). The used oil and antifreeze are stored in tanks and drums before being shipped to a hazardous waste treatment, recycling, or disposal facility. Because the permitted activities are consistent with operations of a previously approved project, DTSC has prepared an addendum to a previously adopted negative declaration (State Clearinghouse No. 1997101078) consistent with Public Resources Code section 21166 and California Code of Regulations, Title 14, sections 15162-15164.

As Lead Agency under the California Environmental Quality Act (CEQA), DTSC approved the above-described project on December 23, 2021, and has made the following determinations:

1. The project will not have a significant effect on the environment.
2. A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were not made a condition of project approval by DTSC.
4. A Statement of Overriding Considerations was not adopted for this project by DTSC.
5. Findings were not made pursuant to the provisions of CEQA by DTSC.

The administrative record for this project is available to the public by appointment at the following location:

Department of Toxic Substances Control
