NOTICE OF AVAILABILITY OF DRAFT ENVIRONMENTAL IMPACT STATEMENT/ENVIRONMENTAL IMPACT REPORT (DRAFT EIS/EIR) (State Clearinghouse No. 2012071090)
Project Title: Ballona Wetlands Restoration Project
Project Proponents: The California Department of Fish and Wildlife (CDFW) and the Los Angeles County Department of Public Works-Flood Control District (LACFCD)
Project Location: The project site includes approximately 566 acres within the Ballona Wetlands Ecological Reserve (Ballona Reserve) and approximately 4 acres comprised of seven potential natural gas storage well relocation sites proposed within the Southern California Gas Company (SoCalGas) Property located adjacent to the Ballona Reserve. The Ballona Reserve is located in southern California, south of Marina del Rey and east of Playa del Rey.
Comment Review Period: September 25, 2017 – November 24, 2017
In accordance with the California Environmental Quality Act (CEQA), CDFW, acting in the capacity of Lead Agency, has worked together with the U.S. Army Corps of Engineers (the Corps) in its capacity as Lead Agency under the National Environmental Policy Act (NEPA) to complete a joint Draft EIS/EIR for the Ballona Wetlands Restoration Project.
PROJECT BACKGROUND AND SUMMARY DESCRIPTION: The wetlands ecosystem in the vicinity of the Ballona Reserve once spanned more than 2,100 acres and supported a great diversity of wetland types that stretched from Playa del Rey to Venice and inland to the Baldwin Hills. As preliminarily delineated in 2011, the 577-acre Ballona Reserve now provides approximately 153 acres of potential wetlands, as well as approximately 83 acres of potential non-wetland waters of the U.S., including the Ballona Creek channel. The United States Environmental Protection Agency (USEPA) has determined that all wetland habitats within the Ballona Reserve are impaired, and a portion of the Ballona Reserve has been identified as among the most degraded wetlands in California using standardized wetland condition protocols. CDFW proposes a large-scale restoration of the Ballona Reserve that would entail restoring, enhancing, and establishing native coastal wetland and upland habitats within the Ballona Reserve, and incidental work necessitated by the proposed restoration activities.
SUMMARY OF IMPACT CONCLUSIONS: Issues addressed in the Draft EIS/EIR include Aesthetics; Agriculture and Forestry Resources; Air Quality; Biological Resources; Cultural and Paleontological Resources; Energy Conservation; Geology, Seismicity, and Soils; Greenhouse Gas Emissions/Climate Change; Hazards and Hazardous Materials; Hydrology and Water Quality; Land Use and Planning; Mineral Resources; Noise; Population and Housing; Public Services; Recreation; Transportation and Traffic; Utilities and Service Systems; and Socioeconomics and Environmental Justice. With implementation of mitigation measures, no significant and unavoidable direct, indirect, or cumulative impacts associated with these considerations would result due to implementation, operation, or management of the project.
DOCUMENT REVIEW AND COMMENT: The Draft EIS/EIR, appendices, and all documents referenced in the Draft EIS/EIR are available for public review during normal working hours at the following locations: 1. California State Coastal Conservancy, 1515 Clay St. 10th Floor, Oakland, CA 94612 2. Los Angeles Public Library, Playa Vista Branch, 6400 Playa Vista Drive, Los Angeles, CA 90094 3. County of Los Angeles Public Library, Lloyd Taber-Marina del Rey, 4533 Admiralty Way Marina del Rey, CA 90292 4. Los Angeles Public Library, Westchester-Loyola Village Branch, 7114 W Manchester Ave, Los Angeles, CA 90045
In addition to printed copies, the Draft EIS/EIR also is available electronically on the project website (https://www.wildlife.ca.gov/Regions/5/Ballona-EIR) and at www.ballonarestoration.org The public review period for the Draft EIS/EIR begins on September 25, 2017 and ends on November 24, 2017. THE PETITION FOR PROBATE requests that WILLIAM S. BALLINGALL be appointed as personal representative to administer the estate of the decedent.
THE PETITION requests authority to administer the estate under the Independent Administration of Estates Act. (This authority will allow the personal representative to take many actions without obtaining court approval. Before taking certain very important actions, however, the personal representative will be required to give notice to interested persons unless they have waived notice or consented to the proposed action.) The independent administration authority will be granted unless an interested person files an objection to the petition and shows good cause why the court should not grant the authority.

STANLEY MOSK COURTHOUSE,
111 NORTH HILL STREET

IF YOU OBJECT to the granting of the petition, you should appear at the hearing and state your objections or file written objections with the court before the hearing. Your appearance may be in person or by your attorney.
IF YOU ARE A CREDITOR or contingent creditor of the decedent, you must file your claim with the court and mail a copy to the personal representative appointed by the court within the later of either (1) four months from the date of first issuance of letters to a general personal representative, as defined in section 58(b) of the California Probate Code, or (2) 60 days from the date of mailing or personal delivery to you of a notice under section 9052 of the California Probate Code. Other California statutes and legal authority may affect your rights as a creditor. You may want to consult with an attorney knowledgeable in California law.
YOU MAY EXAMINE the file kept by the court. If you are a person interested in the estate, you may file with the court a Request for Special Notice (form DE-154) of the filing of an inventory and appraisal of estate assets or of any petition or account as provided in Probate Code section 1250. If Your Private Information Was Accessed by Anthony Pellicano in California
You Could Get Money from a Class Action Settlement.

A Settlement has been reached in a class action lawsuit involving the improper confidential access of private information belonging to approximately 345 separate individuals by former LAPD Sgt. Mark Arneson on behalf of Anthony Pellicano. The lawsuit claims that Defendant, The City of Los Angeles violated privacy and intrusion laws when Mr. Arneson performed the improper searches while working as an LAPD employee. The Defendants deny this. Mr. Arneson went to jail for his crimes and is currently serving his sentence.

WHAT DOES THE SETTLEMENT PROVIDE?
The City of Los Angeles has agreed to pay $285,600 into a Settlement Fund (the "Fund"). After deducting costs and fees associated with notifying the Class and administering payments to Class Members, the Fund will be distributed to Class Members who file claims. It is estimated that Class Members will receive a first payment of between $700-$1,100. The Settlement Agreement, available at the website www.cptgroup.com/pellicano, contains more details.

WHO IS INCLUDED?
You are included if you are on a confidential list which was provided by the United States Government pursuant to a special, sealed discovery request made to discern the names of affected individuals that were discovered during the trial of Mr. Arneson and Mr. Pellicano. There are 345 names on the list.

NOTICE OF AVAILABILITY OF DRAFT ENVIRONMENTAL IMPACT STATEMENT/ENVIRONMENTAL IMPACT REPORT (DRAFT EIS/EIR)

FILED
OCT 18 2017
DEAN C. LOGAN
REGISTRAR-RECORDER/COUNTY CLERK
S. SMITH DEPUTY

To: All Interested Agencies, Organizations and Persons

From: California Department of Fish and Wildlife

Subject: Notice of Availability of Draft Environmental Impact Statement/Environmental Impact Report (Draft EIS/EIR) (State Clearinghouse No. 2012071090)
[REVISED TO CORRECT COASTAL CONSERVANCY ADDRESS]

Project Title: Ballona Wetlands Restoration Project

Project Proponents: The California Department of Fish and Wildlife (CDFW) and the Los Angeles County Department of Public Works-Flood Control District (LACFCD)

Project Location: The project site includes approximately 566 acres within the Ballona Wetlands Ecological Reserve (Ballona Reserve) and approximately 4 acres comprised of seven potential natural gas storage well relocation sites proposed within the Southern California Gas Company (SoCalGas) Property located adjacent to the Ballona Reserve. The Ballona Reserve is located in southern California, south of Marina del Rey and east of Playa del Rey. It extends roughly from the Marina Freeway (State Route 90) to the east, the Westchester bluffs to the south, Playa del Rey to the west, and Fiji Way to the north. It is primarily located in the western portion of the City of Los Angeles and partially within unincorporated Los Angeles County, approximately 1.5 miles west of the San Diego Freeway (Interstate 405) and approximately 0.25 mile southeast of Santa Monica Bay. The Ballona Reserve is bisected by and includes a channelized reach of Ballona Creek, and it is traversed by Culver Boulevard, Jefferson Boulevard, and Lincoln Boulevard. SoCalGas owns in fee, occupies, and operates the Playa del Rey Storage Facility, which is a natural gas storage system located at 8141 Gulana Avenue, Los Angeles. The SoCalGas Property consists of Site 1 through Site 7, which range between 0.19 and 0.99 acre in size and represent potential future locations for SoCalGas wells to be relocated from the Ballona Reserve as part of the project.

Date of Notice: September 25, 2017

Comment Review Period: September 25, 2017 – November 24, 2017

In accordance with the California Environmental Quality Act (CEQA), CDFW, acting in the capacity of Lead Agency, has worked together with the U.S. Army Corps of Engineers (the Corps) in its capacity as Lead Agency under the National Environmental Policy Act (NEPA) to complete a joint Draft EIS/EIR for the Ballona Wetlands Restoration Project. This notice briefly describes the project and its location, identifies the potential significant impacts of the project, describes how the Draft EIS/EIR and the reference material relied upon its drafting may be accessed electronically, and states where printed copies of the Draft EIS/EIR are available for inspection.

PROJECT BACKGROUND AND SUMMARY DESCRIPTION: The California State Legislature provided for the establishment of ecological reserves, like the Ballona Reserve, to further a policy of protecting threatened or endangered native plants, wildlife, or aquatic organisms or specialized habitat types, both terrestrial and non-marine aquatic, or large heterogeneous natural gene pools for the future use of mankind. The wetlands ecosystem in the vicinity of the Ballona Reserve once spanned more than 2,100 acres and supported a great diversity of wetland types that stretched from Playa del Rey to Venice and inland to the Baldwin Hills. As preliminarily delineated in 2011, the 577-acre Ballona Reserve now provides approximately 153 acres of potential wetlands, as well as approximately 83 acres of potential non-wetland waters of the U.S., including the Ballona Creek channel. The United States Environmental Protection Agency (USEPA) has determined that all wetland habitats within the Ballona Reserve are impaired, and a portion of the Ballona Reserve has been identified as among the most degraded wetlands in California using standardized wetland condition protocols.

CDFW proposes a large-scale restoration of the Ballona Reserve that would entail restoring, enhancing, and establishing native coastal wetland and upland habitats within the Ballona Reserve, and incidental work necessitated by the proposed restoration activities. The project is intended to return the daily ebb and flow of tidal waters where practically feasible to achieve predominantly estuarine conditions, enhance freshwater conditions, and enhance physical and biological functions within the Ballona Reserve. Restoring wetland functions and services would reestablish native wetland vegetation and provide important habitat for a variety of wildlife species. A restored, high-functioning wetland also would benefit the adjacent marine environment and enhance the quality of tidal waters. More specifically, the project would:

1. Establish 81.0 acres of new and enhance 105.8 acres of existing native wetland waters of the U.S. (total wetland waters of the U.S established or enhanced: 186.8 acres);

2. Establish 38.7 acres of new and enhance 58.0 acres of existing non-wetland waters of the U.S. (total non-wetland waters of the U.S established or enhanced: 96.7 acres);

3. Subject 31.4 acres of wetland waters of the U.S. to permanent loss, 0.2 acre to permanent loss of function, and 30.2 acres to temporary impacts;

4. Subject 5.2 acres of non-wetland waters of the U.S. to permanent loss, 5.7 acres to permanent loss of function, and 25.0 acres to temporary impact;

5. Work within 58.3 acres of navigable waters of the U.S. (16.2 acres of permanent loss of waters, 5.9 acres of permanent loss of function, and 36.2 acres of temporary impacts);

6. Reposition between 2,290,000 and 2,420,000 cy of dredged or fill material on the project site as perimeter levees, transition zones, and upland restoration areas to allow Ballona Creek to reconnect with its historic floodplain;

7. Export from the site between 10,000 and 110,000 cy of excavated soil via trucks or barge;

8. Remove approximately 9,800 feet of existing Ballona Creek levees and construct new engineered levees set back from the existing Ballona Creek channel;

9. Realign Ballona Creek to a "meander-shaped" channel configuration;

10. Restore, enhance, and establish estuarine aquatic and associated upland habitats connected to the realigned Ballona Creek;

11. Install, operate, and maintain new hydraulic structures (potentially including culverts with self-regulating tide gates or similar structures) to allow for controlled tidal exchange;

12. Improve tidal circulation into the site and implementing other modifications to create dynamic interactions between the Ballona Creek channel, aquatic resources within the Ballona Reserve, and the Santa Monica Bay and thereby support estuarine and associated habitats within the Ballona Reserve;

13. Implement public access-related improvements including trails, a new three-story parking structure and other parking improvements, and encouragement of appropriate and legal public use throughout the Ballona Reserve by enhancing public safety;

14. Modify existing infrastructure and utilities as necessary to implement restoration activities, potentially including the abandonment or relocation of SoCalGas wells and pipelines; and

15. Implement long-term post-restoration activities, as needed, including inspections, repairs, clean-ups, vegetation maintenance, and related activities.

SUMMARY OF IMPACT CONCLUSIONS: Issues addressed in the Draft EIS/EIR include Aesthetics; Agriculture and Forestry Resources; Air Quality; Biological Resources; Cultural and Paleontological Resources; Energy Conservation; Geology, Seismicity, and Soils; Greenhouse Gas Emissions/Climate Change; Hazards and Hazardous Materials; Hydrology and Water Quality; Land Use and Planning; Mineral Resources; Noise; Population and Housing; Public Services; Recreation; Transportation and Traffic; Utilities and Service Systems; and Socioeconomics and Environmental Justice. With implementation of mitigation measures, no significant and unavoidable direct, indirect, or cumulative impacts associated with these considerations would result due to implementation, operation, or management of the project.

Dear Mr. Brody and Mr. Swenson,

Please find the attached list of names and letters in support of robust and science-based restoration of the Ballona Wetlands Ecological Reserve.

These comments of support were submitted through the goggle form that can be found at this link: https://docs.google.com/forms/d/1G7KwHkVMM-YaL6dtxgyB89okUo0MtkoJm6-dTRL-xks/edit#response=ACYDBNiz4lVlCVF7xSIxagiCfAUzlO2N6xyxpNOLSHdlztifi8F_4_PHcuVQ8w

The form says the following:

Endorsement in Support of a Robust Science-based Restoration of the Ballona Wetlands Ecological Reserve

By submitting this form, I endorse a robust science-based restoration of the Ballona Wetlands based on the Wetlands Restoration Principles (www.wetlandsrestoration.org), written by the Coalition including Heal the Bay, Friends of Ballona Wetlands, LA Waterkeeper, Trust for Public Land, and Surfrider Foundation.

Together we encourage the Department of California Fish and Wildlife to:

1. Protect, enhance and create diverse habitats for native plants and wildlife. Optimize diversity and enhance quality of wildlife habitats throughout Ballona, including wetland, riparian, dune, and upland environments.
2. Maximize and enhance wetland acreage and function. Also maximize diversity of created/restored wetland habitats, i.e. low, mid, and high marshes, salt pan, and brackish marsh.
3. Increase watershed connectivity.
4. Create nurseries for fish and nesting habitat for birds.
5. Manage for rare and sensitive species.
6. Create public access that is open, accessible, and welcoming to all people throughout Los Angeles using well-regulated trails for public access and educational opportunities that are compatible with restoration goals that protect habitat.
7. Ensure long-term resilience and sustainability with estimated future sea level rise.
8. Reduce habitat fragmentation by providing wildlife travel corridors to minimize wildlife injury and mortality from vehicles.
9. Safeguard as much wildlife as possible and minimize losses.
10. Use appropriate measures of law enforcement to protect Ballona from trespassing, dumping, and other negative impacts.

Thank you for considering these comments,

--
