Project Title: Alameda Marina Shoreline Improvement Project (California Endangered Species Act Incidental Take Permit No. 2081-2020-009-07-A1(ITP))

Project Location (include county): The Alameda Marina Shoreline Improvement Project is located within the Oakland Inner Harbor Channel along the Oakland estuary, which is located immediately South of the San Francisco-Oakland Bay Bridge within the City of Alameda, Alameda County, at 1815 Clement Avenue.

Project Description: Project Description: This Project involves the redevelopment and improvement of 20.87 acres of the Alameda Marina to address climate resiliency and to rehabilitate the existing marina. Project activities include riprap removal and placement, seawall maintenance, wharf refurbishment, outfall installation, marina reconfiguration, and a boat hoist installation and removal, and other activities associated with mobilization and demobilization. This ITP Amendment (Minor Amendment No. 2) extends the Project timeline by 9 months to purchase the required mitigation credits. Due to issues with an approved mitigation bank being available for the purchase of credits, the permittee has requested additional time until the mitigation bank is able to accept the credit purchase.

The Amended Project will result in no additional impacts beyond the original 0.20 acres of Longfin Smelt (*Spirinchus thaleichthys*) and Chinook Salmon (*Oncorhynchus tshawytscha*) habitat including temporary impacts to 17 acres; The project is expected to result in incidental take of Longfin Smelt and Spring Run Chinook, designated as threatened, and Winter Run Chinook Salmon which is designated as an endangered species under the California Endangered Species Act. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.

This is to advise that CDFW, acting as [the lead agency / a responsible agency] approved the above-described project on May 17, 2022 and made the following determinations regarding the above-described project:

1. The project [will / will not] have a significant effect on the environment (This determination is limited to effects within CDFW's permitting jurisdiction as a responsible agency).
 2. [An environmental impact report / A negative declaration] was prepared by the lead agency for the original project.
 3. Additional mitigation measures [were / were not] made a condition of CDFW's approval of the project.
 4. A mitigation reporting or monitoring plan [was / was not] adopted by CDFW for this project.
 5. A Statement of Overriding Considerations [was / was not] adopted by CDFW for this project.
 6. Findings [were / were not] made by CDFW pursuant to Public Resources Code § 21081(a).
 7. Compliance with the environmental filing fee requirement at Fish and Game Code § 711.4 (check one):
 - Payment is submitted with this notice.
 - A copy of a receipt showing prior payment was submitted to CDFW.
- Responsible Agency statement: The EIR prepared by the lead agency for the Project is available to the general public at the office location listed above for the lead agency. CDFW's administrative record of proceedings related to the incidental take permit is available to the public for review at CDFW's regional office.
