Mulqueeny Ranch Wind Repowering Project – Project Description

The proposed project would entail the replacement of approximately 518 previously existing old generation wind turbines installed in the 1980s with up to 36 new wind turbines. The project would have a generating capacity of up to 80 MW, using turbines rated between 2.2 and 4.2 MW per turbine. The project is proposed as an application for a conditional use permit (CUP) (Alameda County Planning case PLN2019-00226), as permitted by the County Zoning Ordinance for the subject site, and is reviewed in the Subsequent Environmental Impact Report (SEIR) pursuant to the California Environmental Quality Act (CEQA) Guidelines, Section 15162, as a project “tiered” under the Altamont Pass Wind Resource Area Repowering Program EIR (PEIR), which the County of Alameda (County) certified in November 2014.

The project site is located in the southeastern quadrant of the Alameda County portion of the Altamont Pass area, north and south of Patterson Pass Road between 1 and 2 miles north of Tesla Road, and approximately one mile south of Interstate 580. The project site comprises 29 parcels extending over approximately 4,600 acres (see Table 1 below) within the APWRA.

		Total	4,588.8

¹ The total project site acreage is approximately 4,600 acres including the right-of-way for Patterson Pass Road, which bisects the project site. The total acres of all parcels subject to the conditional use permit application is 4,588.8 acres as shown in this table.
