Project Location

The proposed project would allow for a total vertical height of up to 140 feet msl, an approximately 43-foot increase from the currently permitted maximum height of the Landfill at closure of 97 feet. The proposed vertical height increase would allow for an additional approximately 2.2 million CY of solid waste to be disposed of at the Landfill. Operations would still be limited to a total permitted daily throughput of 4,125 tons of material and a maximum of 480 vehicles per day. As such, the proposed project would not alter the existing operations. However, the proposed project would result in an extension of the overall lifetime of the Landfill by five to eight years, depending on solid waste disposal rates.
