

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Regional Water Reclamation Facility (RWRF) Upgrade and Expansion Project

Lead Agency: Elsinore Valley Municipal Water District (EVMWD)

Contact Name: Nelson Nuezca, P.E.

Email: nnuezca@evmwd.net Phone Number: (951) 674-3146 Ext. 8786

Project Location: City of Lake Elsinore, Riverside County

City

County

Project Description (Proposed actions, location, and/or consequences).

The proposed project component addressed in the Second Addendum to the MND consists of the temporary installation and use of construction trailers at a site adjacent to the RWRF, including minor site grading, installation of the trailers, utility and communications lines connections, and chain link fencing. Following construction of the RWRF expansion, the trailers, utility and communications connections, and fencing would be removed. The MND being addended addressed EVMWD's proposal to expand its RWRF from an existing capacity of 8 million gallons per day (MGD) to 12 MGD. An NOD for the proposed project was filed with the State Clearinghouse on July 31, 2018. The first Addendum to the MND addressed additional construction staging and laydown areas; an NOD for that first Addendum was filed with the State Clearinghouse on April 5, 2022. EVMWD's RWRF is located at 31315 Chaney Street in the City of Lake Elsinore, approximately 0.5 mile northeast of Lake Elsinore. The proposed construction trailers site addressed in the Second Addendum to the MND is located between the RWRF and Strickland Avenue, encompassing Assessor's Parcel Numbers 375-291-007 through 375-291-015 (Coordinates 33.685472°N, 117.346197°W).

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Second Addendum to the MND incorporates the mitigation measures that were included in the MND and adopted when the proposed project was approved by Elsinore Valley Municipal Water District (Lead Agency). The mitigation measures applicable to the proposed installation and use of construction trailers adjacent to the proposed project site include pre-construction nesting bird/burrowing owl surveys, implementation of a cultural resources plan in case previously undetected archaeological resources are uncovered during ground disturbance, and implementation of a Tribal Cultural Resources plan in case previously undetected archaeological resources are uncovered during ground disturbance. As mitigated, the proposed project, including the use of the proposed construction trailers site addressed in the Second Addendum, will not have significant impacts on the environment.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No known areas of public controversy.

Provide a list of the responsible or trustee agencies for the project.

The State Water Resources Control Board is a CEQA Responsible Agency because of the proposed SRF funding for this project. Agencies that have or may have permit authority over the project include the Regional Water Quality Control Board - Santa Ana Region; California Department of Transportation (permit for heavy transport vehicles on State Highways); City of Lake Elsinore; and South Coast Air Quality Management District.
