Mr. Jaden Robbins
Worthe Real Estate Group
100 Wilshire Boulevard, Suite 1600
Santa Monica, California 90401

Subject: Phase I Environmental Site Assessment (Assessment)

**Site: Assessor's Parcel Numbers (APNs) 4291-014-016, -017, -018, -024, and -025
101 to 129 Santa Monica Boulevard and 1327 to 1357 Ocean Avenue,
Santa Monica, California**

Dear Mr. Robbins:

SCS Engineers (SCS) is pleased to present this report (Report) of the Assessment of the above-described Site. This Report summarizes the results of the Assessment that was conducted in order to evaluate the Site's current environmental conditions. The work described in this Report was performed by SCS in general accordance with Exhibit 01 to the Consulting Agreement between SCS and Worthe Real Estate Group (Client). Exhibit 01 was fully executed on March 16, 2018. The Contract was fully executed on August 22, 2017. This Phase I Assessment was originally issued on April 18, 2018 and has been revised with building permit information from the City of Santa Monica.

Because your full understanding of the Assessment is important to us, SCS recommends that you read the Report in its entirety. However, if time does not allow you a complete reading, summaries may be found in text boxes at the end of each section (pages 10, 17, and 23 through 25), and our conclusions and recommendations may be found on pages 25 through 28. A glossary of terms commonly used in environmental assessments is also provided in the Appendices to this Report.

SCS enjoyed working with you on this project. Providing economical environmental solutions to meet your needs is more than our goal—it is our mission and the measure of our success. If we may assist you in any way, now or in the future, please call our office at (858) 571-5500.

Sincerely,

Tyler Overton
Staff Professional

Environmental Regulatory Database Report

Résumés

1 BACKGROUND

The site consists of five parcels of land identified as Assessor' Parcel Numbers (APNs) 4291-014-016, -017, -018, -024, and -025, which comprise approximately 1.875 acres of land identified with the addresses of 101 to 129 Santa Monica Boulevard and 1327 to 1357 Ocean Avenue, Santa Monica, California (Site) (Figure 1). The Site is currently developed with several commercial buildings occupied by offices, restaurants, residences, and retail establishments. The current Site owner, the Worthe Real Estate Group, is proposing to redevelop the Site into a mixed-use development with a hotel, retail establishments, cultural uses, residential units, and subterranean parking. Note that the Site building identified with the current addresses of 101 to 115 Santa Monica Boulevard is also identified with the address of 1357 Ocean Avenue. The Site also has been associated with the following addresses; 131, 133, and 135 Santa Monica Boulevard, 1344, 1348, 1350, 1358, and 1360 2nd Street and 1359 Ocean Avenue.

A review of our in-house ParcelQuest database of information from the County of Los Angeles Assessor's Office indicated the following in connection with the Site:

APN	Address	Acre	Description
4291-014-016	1337 Ocean Boulevard	0.166 acre	Commercial use
4291-014-017	1333 Ocean Boulevard	0.166 acre	Commercial use
4291-014-018	1327 Ocean Boulevard	0.166 acre	Commercial use
4291-014-025	101 Santa Monica Boulevard	0.665 acre	Commercial use
4291-014-024	129 Santa Monica Boulevard	0.711 acre	Commercial use

2 STANDARDS BACKGROUND

This Assessment was conducted in general accordance with the following:

- U.S. Environmental Protection Agency (EPA), 40 Code of Federal Regulations (CFR) 312, Standards and Practices for All Appropriate Inquiries; Final Rule (AAI)
- American Society for Testing and Materials (ASTM) Standard Practice for Phase I Environmental Site Assessment Process E1527-13
- The scope, conditions, and limitations of Exhibit 01

The Client understands that the above-referenced EPA and ASTM standards were not developed to identify all environmental risk to property. The standards were developed to allow a user (Client) to qualify for the innocent purchaser defense, bona fide prospective purchaser defense, and contiguous property owner defense to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA, a.k.a. Superfund) liability. This Assessment is intended to constitute an appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice, as part of the due diligence process required by CERCLA, the Superfund Amendments and Reauthorization Act of 1986,

and the Small Business Liability Relief and Brownfields Revitalization Act of 2002 (collectively, Acts).

While this Assessment may initially qualify the Client for a CERCLA defense, after purchase, there may be continuing obligations that must be implemented in order to preserve this defense through the term of property ownership. There may be additional requirements under state law that also apply. The Client should contact qualified legal counsel regarding matters of liability, interpretation of the Acts, and potential continuing obligations. Although it is outside the scope of this Assessment, SCS would be pleased to work with the Client's legal counsel to develop and implement a strategy to preserve the Client's CERCLA liability defenses through the term of its ownership.

This Assessment focused on potential sources of hazardous substances and petroleum products that could be considered either a recognized environmental condition,¹ controlled recognized environmental condition², or historical recognized environmental condition³, and potentially a liability due to their presence in significant concentrations (e.g., above acceptable limits set by the federal, state, or local government) or due to the potential for exposure and risk due to contaminant migration and complete exposure pathways (e.g., soil vapor inhalation or groundwater ingestion). Materials that contain substances that are not currently deemed hazardous by the EPA or the California Environmental Protection Agency were not considered as part of this Assessment.

Unless specifically included in SCS's scope of services, building materials such as asbestos, lead-based paint, urea formaldehyde, and pressure-treated lumber, as well as lead in drinking water, are not considered in this Assessment, nor are building issues such as fire safety, indoor air quality (with the possible exception of vapor intrusion), mold, or similar matters. SCS did not evaluate the Site for compliance with land use, zoning, wetlands, or similar laws. This Assessment also excludes regulatory compliance, cultural and historic resources, industrial

¹ *Recognized environmental conditions*, as defined by ASTM, include the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. However, the term is not intended to include *de minimis* conditions (a condition that generally does not present a threat to human health or the environment and that generally would not be subject to an enforcement action if brought to the attention of appropriate governmental agencies). A condition considered *de minimis* is not a recognized environmental condition.

² *Controlled recognized environmental condition*, as defined by ASTM, is a *recognized environmental condition* resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity use limitations, institutional controls, or engineering controls).

³ *Historical recognized environmental condition*, as defined by ASTM, is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

hygiene, health and safety, ecological resources, endangered species, and high-voltage power lines. This Assessment is not intended to be an environmental compliance audit.

Hazardous substances occurring naturally in plants, soils, and rocks (e.g., heavy metals, naturally occurring asbestos, and radon) are not typically considered in these investigations. Similarly, construction debris (e.g., discarded concrete, asphalt) is not considered, unless obvious indications suggest that hazardous substances are likely to be present in significant concentrations or likely to migrate.

An evaluation of business environmental risk associated with a parcel of commercial real estate may necessitate investigation beyond that included herein.

3 OBJECTIVE

The objective of the scope of services was to assess the likelihood that recognized environmental conditions are present at the Site as a result of the current or historical Site land use or from a known and reported off-Site source.

4 SCOPE OF SERVICES

The scope of services designed and conducted to meet the objective was as follows:

- Site Reconnaissance, Site Research, Interviews, and User Requirements
- Topography, Geology, Hydrogeology, and Water Quality Survey
- Site Vicinity Reconnaissance and Off-Site Source Survey
- Historical Site and Site Vicinity Land Use Review
- Identification of Data Gaps
- Data Evaluation, Figure Preparation, and Assessment Report Preparation

SITE RECONNAISSANCE

On March 20, 2018, SCS personnel conducted a Site reconnaissance to observe and document existing Site conditions¹. The general Site location is shown in Figure 1, and a Site and Site Vicinity Plan is shown in Figure 2. Selected color photographs of the Site and Site vicinity are presented as Figures 3a through 3g.

The interiors of the Site buildings were observed, and the Site grounds and Site perimeter were systematically traversed on foot during the Site reconnaissance. Mr. Josh Levy accompanied SCS personnel, provided access to the observed features, and answered questions posed by SCS personnel. Due to the largely occupied nature of the Site buildings with a multi-family residential land use, only five residential living spaces were observed during the Site reconnaissance due to

tenant privacy concerns. Additionally, the interior of the wellness center located at 1333 Ocean Avenue was not available for observation during the time of Site reconnaissance.

General Information

The following table summarizes general information in connection with the Site.

APNs	4291-014-016, -017, -018, -024, and -025
Address	101 to 129 Santa Monica Boulevard and 1327 to 1357 Ocean Avenue
Area	1.875 acres
Site Land Use	Multi-family residential, restaurants, commercial offices
Occupant	Various residential tenants, restaurants include BOA Steakhouse, Blue Plate Oysterette, Little Ruby, Stout restaurant, and Tumbi (Office Tenant Summary list is included in the Appendices)
Figure Reference	Figures 3a-1 through 3e-1

Site Buildings

The following table summarizes information in connection with the Site buildings.

Number of Buildings	Five
Interpreted Construction Date	101 to 115 Santa Monica Boulevard (below 1357 Ocean Avenue) – 1925 1327 Ocean Avenue – 1951 1333 Ocean Avenue – 1906 1333 Ocean Avenue (back building) – 1941 1337 Ocean Avenue – 1926 1357 Ocean Avenue (above 101 to 115 Santa Monica Boulevard) – 1925
Number of Stories	Two (with a rooftop penthouse located at 1357 Ocean Avenue)
Construction Type	101 to 115 Santa Monica Boulevard (below 1357 Ocean Avenue) – wood frame, brick-covered exterior walls, concrete slab-on-grade foundation 1327 Ocean Avenue – wood frame, stucco-covered exterior walls 1333 Ocean Avenue – wood frame, wood-covered exterior walls 1333 Ocean Avenue (back building) – wood frame, wood-covered exterior walls 1337 Ocean Avenue – wood frame, stucco-covered exterior walls 1357 Ocean Avenue (above 101 to 115 Santa Monica Boulevard) – wood frame, brick and plaster-covered exterior walls, concrete slab-on-grade foundation
Figure Reference	Figures 3a-1, 3b-1, and 3b-2

The Site building designated as 1357 Ocean Avenue was observed to include 19 residential apartment units, which each containing between one and two bedrooms, living areas, a kitchen, and restrooms. The interior of a representative unit is shown in Figure 3c-2. The following five units were accessed and inspected during the Site reconnaissance: 3, 5, 7, 14 and 18. A penthouse apartment was noted to be present above the second-floor residential units but was not available for observation at the time of Site reconnaissance. Five restaurants with the following addresses were observed to be located below the residential units at 1357 Ocean Avenue:

- Blue Point Oysterette – 1355 Ocean Avenue
- BOA Steakhouse – 101 Santa Monica Boulevard
- Little Ruby – 109 Santa Monica Boulevard
- Stout – 111 Santa Monica Boulevard
- Tumbi Craft Indian Restaurant – 115 Santa Monica Boulevard

Maintenance and janitorial supplies were observed to be stored in the materials storage areas located at the rear of the restaurants and within the courtyard of the 1357 Ocean Avenue building. Additionally, compressed gas cylinders, propane canisters, and grease receptacles were observed to be located in the materials storage area (Figures 2, 3c-1, and 3d-2). No indications of leaks and spills were noted around the materials storage areas. A further discussion regarding hazardous materials and wastes can be found below.

The Site buildings located at 1327, 1333 and 1337 Ocean Avenue were observed to contain multiple professional offices including, but not limited to; law offices, graphic and web design, nail and hair salons, and a wellness center (Figure 3d-1). A full list of current tenants located at 1327, 1333 and 1337 Ocean Avenue can be found in the appendices of this Report.

Site Grounds

The Site grounds around the apartment building, restaurants, and offices were observed to be improved with landscaped areas and concrete-paved sidewalks at the southwestern, southeastern, and northeastern edges of the Site perimeter. Two asphalt-paved parking lots were observed to be located at the Site; one to the northwest of the 1357 Ocean Avenue Site building and the second, identified with the address of 129 Santa Monica Boulevard, to the northeast of the 1357 Ocean Avenue Site building, separated from the remainder of the Site by an alley.

Two storm drain inlets were observed at the intersection of Ocean Avenue and Santa Monica Boulevard along the southeastern and southwestern portions of the Site perimeter (Figure 3e-2). Additionally, an electrical transformer was observed to the north of the 1357 Ocean Avenue Site building. No obvious indications of leaks, such as stained pavement, were noted beneath the transformer.

Hazardous Materials / Petroleum Products

Hazardous materials and petroleum products observed to be used or stored at the Site are summarized in the table below.

Hazardous Materials / Petroleum Products	Storage Location	Approximate Amount
Propane gas cylinders (Figures 2 and 3c-1)	Material storage area (rear of restaurants)	Approximately 30 cylinders
Compressed gas cylinders (Figures 2 and 3d-2)		4 cylinders
Cleaning materials		SRQs

Note:

SRQs = Small retail quantities; i.e., quantities of hazardous materials in containers of 5 gallons or less, and less than 50 gallons in aggregate.

The hazardous materials and petroleum products were observed to be stored in their original containers with no obvious evidence of spills or releases.

Hazardous Wastes

Hazardous wastes observed to be generated at the Site are summarized in the table below.

Hazardous Waste	Location	Approximate Amount
Medical sharps (1327 Ocean Avenue Suite I)	Sharps container within Suite I	Approximately 30-50 sharps
Fluorescent light bulbs	Materials storage area at the rear of the restaurants	Approximately 20-35 bulbs
Cooking grease	Materials storage area at the rear of the restaurants	Approximately 20 – 30 gallons

Indications of Releases of Hazardous Materials/Wastes or Petroleum Products

With the exception of minor surficial staining (interpreted to be from automotive lubricants) observed at various locations on the asphalt-paved parking areas, no obvious indications were observed that a release of hazardous materials/wastes or petroleum products had occurred at the Site. The minor surficial releases identified above on paved surfaces are considered likely to be *de minimis* as defined by ASTM.

On-Site Utilities

Gas and Electricity	Reported to be SoCal Gas and SoCal Edison
High-power Transmission Lines	None observed at or adjacent to the Site
Storm Drains	Two storm drain inlets were observed at the Site, at the intersection of Santa Monica Boulevard and Ocean Avenue northwest area of the parking area
Source of Heating and Cooling	Reported to be SoCal Gas and SoCal Edison
Potable Water Source	Reported to be supplied by the City of Santa Monica Water Department
Wastewater Conveyance	Reported to be operated by the City of Santa Monica Wastewater Department

One electrical transformer was observed to be located at the Site. No obvious indications of leaks, such as stained pavement, were noted beneath the transformer. With the exception of above-ground grease trap receptacles (Figures 2 and 3c-1), no obvious indications of wells, cisterns, pits, sumps, dry wells, or bulk storage tanks were observed at the Site.

SITE RESEARCH

County of Los Angeles Fire Department, Health Hazardous Materials Division File Review

The County of Los Angeles Fire Department (LACFD, Health Hazardous Materials Division), which serves as the local Certified Unified Program Agency (CUPA) for the City of Santa Monica, was contacted regarding records for the Site. The LACFD responded that no records are maintained for the Site. Copies of the LACFD correspondence are included in the Appendices of this Report.

Review of Client-Provided Documents

The Client provided a report titled *Phase I Environmental Assessment*, which was for the select Site addresses of 1327, 1333 and 1337 Ocean Avenue and was prepared by IVI Due Diligence Services, Inc. and dated June 22, 2007. At the time of this report was prepared, the Site was utilized as offices. This report provided the following conclusions and recommendations in connection with the Site:

- “This assessment has revealed no evidence of recognized environmental conditions in connection with the Subject; however, the following item of environmental concern was identified which warrants mention:

Asbestos-Containing Material (ACM)

No friable ACM was identified in readily accessible areas on the Subject. However, the

non-friable resilient floor finish assemblies, wallboard assemblies, mastics, caulking, and built-up roofing system materials may contain asbestos. Since these non-friable materials are in good condition and the potential for fiber release is low, no further action is recommended at this time, other than maintaining the materials in good condition under an Asbestos Operations and Maintenance (O&M) Program.”

Building Department Records Review

The City of Santa Monica Department of Building and Safety (SMDBS) records were reviewed for the Site and are summarized in the table belowⁱⁱ. Copies of the SMDBS records for the Site are included in the Appendices.

Year	Description	Reported Applicant/Owner
101 Santa Monica Boulevard		
1936	Electrical permit for wiring upgrades	Fred Lavie
1954	Plumbing permit for water upgrades	Wallace
2010	Construction permit for temporary structure	All Access
113 Santa Monica Boulevard		
1955	Plumbing permit for heating appliance	Joe Backle
1337 Ocean Avenue		
1969	Plumbing permit for drain pipe	J. Payne
2005	Commercial office permit	Steel Toe Enterprises DBA

South Coast Air Quality Management District (SCAQMD) Records Review

The SCAQMD was contactedⁱⁱⁱ regarding records for the Site. Ms. Stacey Garcia of the SCAQMD provided records available for the Site, which are summarized in the table below:

Year	Description	Reported Applicant/Owner
1989	Equipment list for natural gas charbroiler	Crocodile Cafe located at 101 Santa Monica Boulevard
2004	Application for charbroiler	Innovative Dining SM, LLC

Los Angeles County Sanitation District (LACSD) Records Review

The LACSD was contacted^{iv} regarding records for the Site. According to the LACSD, no records are maintained for the Site. Copies of the LACSD correspondence are included in the Appendices of this Report.

Regional Water Quality Control Board (RWQCB) Records Review

The Los Angeles RWQCB was contacted^v regarding records for the Site. According to the RWQCB, no records are maintained for the Site. Copies of the RWQCB correspondence are included in the Appendices of this Report.

INTERVIEWS

The previously referenced EPA and ASTM standards require that attempts be made to conduct interviews with past and present owners and occupants of the Site to obtain information indicating recognized environmental conditions in connection with the Site. As part of this Assessment, the following contacts were either interviewed or attempts were made to conduct interviews.

Contact	Affiliation to Site	Description	Interview Date
Mr. Josh Levy	Current Site owner's representative	Discussed below	March 20, 2018
Mr. Jaden Robbins	Current Site owner's representative	Discussed below	March 28, 2018

Mr. Josh Levy, Property Manager with Worthe Real Estate Group for 8 months, stated that, to his/ knowledge, and with the possible exception of typical restaurant supplies and cleaning materials, hazardous materials and petroleum products were not used or stored at the Site and that hazardous wastes were not generated at the Site. Also, to his knowledge, there have been no releases of hazardous materials, petroleum products, and/or hazardous waste at the Site.

Mr. Jaden Robbins, Real Estate Analyst with Worthe Real Estate Group, stated that he was not aware of environmental cleanup liens or activity and use limitations (e.g., engineering controls, deed restrictions) that have been recorded for the Site. He was not aware of pending or threatened litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Site. He was not aware of notices from governmental entities regarding possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site.

USER REQUIREMENTS

In order to qualify for one of the landowner liability protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (discussed in the "Background" section), 40 CFR 312 requires that the user (Client) provide the following information to the environmental professional. Mr. Jaden Robbins, Analyst with Worthe Real Estate Group,

completed the User Questionnaire on March 13, 2018. The following table summarizes the responses by the Client.

Question	Response
Have environmental cleanup liens been filed or recorded against the Site?	No
Are activity or land use limitations in place at the Site, or have they been filed or recorded in the registry?	No
Does the user have specialized knowledge or experience in connection with the Site?	No
Does the purchase price being paid for the Site reasonably reflect the fair market value of the Site?	N/A
Is the Client aware of commonly known or reasonably ascertainable information about the Site that would indicate releases or threatened releases?	No
Are there obvious indications that point to the presence of contamination at the Site?	No

The Client described that from 1977 to the present, the properties listed with the addresses of 101 to 129 Santa Monica Boulevard have been designated as mixed-use retail, offices, restaurants, and multi-family housing. The Client stated that various commercial tenants including law firms, nail salon, etc. are currently located at the properties listed with the addresses of 1327 to 1337 Ocean Avenue.

DATA GAPS IN CONNECTION WITH CURRENT SITE LAND USE

Based on observations and research, and with the possible exceptions discussed below, there are no obvious indications of data gaps in connection with the current Site land use:

- During the time of the Site reconnaissance, the following residential units were not available to be accessed; 1, 2, 4, 6, 8, 9, 10, 11, 12, 13, 15, 16, 17, 19. This data gap is not a significant data gap in our opinion considering that five representative residential units were observed and were considered to be representative of the living areas and based on the availability of other relevant information.
- Interview gaps (former owners and former tenants were not available for interviews). This data gap is not a significant data gap in our opinion considering the current site land use as residential units, offices, and restaurants, and based on the availability of other relevant information.

Findings and Opinions—Current Site Land Use

Based on observations and research, it is our opinion that there are no recognized environmental conditions at the Site as a result of the current Site land use.

TOPOGRAPHY, GEOLOGY, HYDROGEOLOGY, AND WATER QUALITY SURVEY

Topography

A topographic map for the Site vicinity was reviewed and is summarized in the following table.

Reported Elevation	Approximately 70 to 75 feet above mean sea level
Reported Slope Direction	Slopes gently down to the south/southwest
Source	United States Geological Survey 7.5 Minute Topographic Map, Beverly Hills Quadrangle, California – Los Angeles County, 2015

Geology

A geological map for the Site vicinity was reviewed and is summarized in the following table.

Reported Formation	Marine and nonmarine (continental) sedimentary rocks (Qoa)
Reported Description	Older alluvium, lake, playa, and terrace deposits
Source	California Department of Conservation, California Geologic Survey website: http://maps.conservation.ca.gov/cgs/gmc/

Hydrogeology

Data regarding depth to groundwater and flow direction for the Site were not readily available. In the absence of Site-specific data, depth to groundwater and flow direction information was reviewed for properties within the Site vicinity using the State Water Resources Control Board GeoTracker database. The following table summarizes the results of this review.

Property Location	Former Sears Auto Center No. 6081, 402 Colorado Avenue, Santa Monica, California, approximately 1,630 feet to the southeast of the Site
Reported Depth to Groundwater	Approximately 47 feet below grade
Reported Groundwater Flow Direction	Reported to be southerly
Source	<i>Report of Remediation of Former Underground Storage Tanks (USTs) and Piping, Former Sears Auto Center #6081, 402 Colorado Avenue, Santa Monica, California, prepared by Mactec and dated August 31, 2010</i>

Many variables influence depth to groundwater and flow direction, and the actual depth to groundwater and flow direction at the Site may be different than presented in this section.

Water Quality Survey

The following table summarizes the reported water quality in the Site vicinity.

Reported Hydrologic Area	Upper Santa Monica Bay (404.50)
Reported Hydrologic Unit	Santa Monica Bay (404)
Reported Beneficial Use	Municipal, agricultural, industrial, industrial process supply
Source	County of Los Angeles Department of Public Works website: http://www.ladpw.org/wmd/watershed/smb/

SITE VICINITY RECONNAISSANCE AND OFF-SITE SOURCE SURVEY

Current Site Vicinity Conditions

The following table summarizes land use and observations in the immediate Site vicinity^{vi}. For the purpose of this Report, the immediate Site vicinity includes those properties judged to be adjacent⁴ to the Site.

Direction	Land Use	Comments
North	Various offices and restaurants including Flower Child (1332 2nd Street)	No obvious indications of the use, storage, or generation of hazardous materials/wastes or petroleum products were observed.
Northeast	Office building and restaurants (1333 2nd Street)(Figure 3f-1)	
Northeast	Equinox Santa Monica, various offices and restaurants (201 Santa Monica Boulevard)	
Southeast	Ye Olde Kings Head Restaurant (116 Santa Monica Boulevard)	
Southeast	Plan Check Kitchen + Bar (1401 Ocean Avenue) (Figure 3f-2)	
Southwest	Santa Monica Veterans Memorial – park (APN 4291-032-905) (Figure 3g-1)	
Northwest	Residential (1323 Ocean Avenue) (Figure 3g-2)	

Environmental Regulatory Database Report

An environmental regulatory database report (Radius Map™ report^{vii}) was prepared by Environmental Data Resources, Inc. (EDR) for the Site. Local, state, and federal regulatory databases were reviewed for the Site and for those facilities within up to 1 mile of the Site. The

4. *Adjacent* is defined by ASTM E1527-13 as any real property or properties the border of which is contiguous or partially contiguous with that of the Site or that would be contiguous or partially contiguous with that of the Site but for a street, road, or other public thoroughfare separating them.

Radius Map™ report was reported to have been prepared in general accordance with the ASTM standard for the regulatory database review for Phase I Environmental Site Assessments. The locations of the referenced facilities relative to the Site are shown on the overview maps, included in the Radius Map™ report. A description of the various databases, as well as the date each database was most recently updated, is included in the Radius Map™ report. The Radius Map™ report is included in the Appendices to this Report.

Based on a review of the Radius Map™ report, the following table summarizes the facilities within the selected search radii and whether the Site or a facility that was interpreted to be adjacent to the Site was listed on each database.

Federal or State Government Database	Search Radius	Number of Reported Facilities	On Site	Adjacent to the Site
National Priorities List (NPL)	1.00 mile	0	No	No
NPL Delisted	1.00 mile	0	No	No
Superfund Enterprise Management System (SEMS)	0.50 mile	0	No	No
No Further Remedial Action Planned (NFRAP)	0.50 mile	0	No	No
Resource Conservation and Recovery Act– Corrective Action (RCRA COR ACT)	1.00 mile	0	No	No
RCRA Treatment and Disposal Facilities (RCRA TSD)	0.50 mile	0	No	No
RCRA Generators (RCRA GEN)	0.25 mile	8	No	No
Federal Engineering and Institutional Controls (IC/EC)	0.50 mile	0	No	No
Emergency Response Notification System (ERNS)	0.12 mile	0	No	No
State/Tribal- Equivalent NPL	1.00 mile	0	No	No
State/Tribal-Equivalent CERCLIS (ENVIROSTOR)	1.00 mile	6	No	No
State/Tribal Solid Waste List (SWL)	0.50 mile	0	No	No

N/A = Not applicable

The Site was listed on the following databases:

- HAZNET database as Mike Farzam, 1333 Ocean Avenue, Santa Monica, California 90401
- EDR Historical Cleaner database as Gorman E.T., 135 Santa Monica Boulevard, historical cleaner from 1936 to 1982
- EDR Historical Cleaner database as Miller A.D., 133 Santa Monica Boulevard, historical cleaner in 1928

The HAZNET listing for 1333 Ocean Avenue at the Site was listed in the EDR report as disposal of 0.16 tons of asbestos containing waste in 2003. No violations were listed. Based on the nature of the listing for asbestos containing materials, and the lack of violations, this listing on the HAZNET database is not considered to represent a recognized environmental condition for the Site.

The historical cleaner listings for 133 and 135 Santa Monica Boulevard are further discussed in the 'Historical Site Land Use' section below.

Off-Site facilities listed in the Radius Map™ report were evaluated as to their potential to impact the Site. The databases included in the Radius Map™ report can be grouped into two general categories: databases reporting unauthorized releases of hazardous substances or petroleum products (e.g., LUSTs, RCRA COR ACT facilities, National Priorities List [a.k.a. Superfund] sites) and databases reporting permitted hazardous materials users and hazardous waste generators for which a release has not been reported to, and recorded by, the regulatory agency.

SCS evaluated each of the off-Site facilities listed in the Radius Map™ report as to their potential to impact the Site, based on the following factors:

- Reported distance of the facility from the Site⁵
- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials, petroleum products, or hazardous wastes
- Reported case type (e.g., soil only, failed UST test only)
- Reported substance released (e.g., chlorinated solvents, gasoline, metals)
- Reported regulatory agency status (e.g., case closed, “no further action”)
- Location of the facility with respect to the reported groundwater flow direction and depth to groundwater (discussed in the “Hydrogeology” section of this Report)

Based on one or more of the factors listed above, and with possible exceptions discussed in the Additional SCS Research section below, there is a low likelihood that the off-Site facilities listed in the Radius Map™ report represent a recognized environmental condition in connection with the Site. EDR did not list any facilities as being “orphans,” which are facilities for which EDR does not have sufficient information to accurately locate them on a map.

Additional SCS Research

Historical cleaners/laundries – 122 and 134 Santa Monica Boulevard (historically adjacent to the east of the Site)

Based on their listing on the EDR Historical Cleaners database and their proximity to the Site, available records for the addresses of 122 and 134 Santa Monica Boulevard were reviewed. Based on the EDR Report, historical cleaners were located at the address of 122 Santa Monica Boulevard in 1940 and at the address of 134 Santa Monica Boulevard in 1933. The EDR report did not state that any releases had occurred at these properties, nor did it provide any information regarding the types and quantities of hazardous materials stored at these addresses.

Additionally, multiple agencies, including the SCAQMD and the RWQCB were contacted in regards to records for 122 and 134 Santa Monica Boulevard addresses, but they stated that no records were available for these addresses. A review of city directories showed that in 1940, a hand laundry was present at 122 Santa Monica Boulevard. No additional years of dry cleaning

⁵ Based on “Technical Justification for Groundwater Media-Specific Criteria,” (Groundwater Study) (March 2012) developed to support the State of California “Low Threat Closure Policy” (adopted May 2012), “plume length studies recognize that petroleum plumes stabilize in length due to natural attenuation.” The Groundwater Study goes on to cite Shih et al., 2004 that a peer-reviewed study of plume lengths at 500 petroleum UST sites in the Los Angeles area is widely accepted as representative of plume lengths at California UST sites. Shih et al. reports methyl tertiary butyl ether (MTBE), with 90th percentile maximum plume lengths of 540 feet. Therefore, the detailed review radius for open groundwater cases has been conservatively established by SCS at 0.20 mile (approximately 1,000 feet). For non-release cases (e.g., permitted facilities), only those facilities that were judged to be immediately adjacent to the Site were interpreted to have the potential to represent a recognized environmental condition.

and/or laundry use was listed at 122 Santa Monica Boulevard. City directories also stated that clothes cleaners were present at 134 Santa Monica Boulevard from 1933 to 1940.

Based on the absence of disposal violations, the lack of known and reported releases, and the interpreted cross-gradient groundwater flow direction (southerly), there is a low likelihood that a recognized environmental condition exists at the Site in connection with these listings on the Historical Cleaners database.

Historical cleaners/laundries –1347 2nd Street (historically adjacent to the north of the Site)

Based on its listing on the EDR Historical Cleaners database and its proximity to the Site, available records for the addresses of 1347 2nd Street were reviewed. Based on the EDR Report, historical cleaners were located at the address of 1347 2nd Street from 1933 to 1948. The EDR report did not state that any releases had occurred at this property, nor did it provide any information regarding the types and quantities of hazardous materials stored at this address.

Additionally, multiple agencies, including the SCAQMD and the RWQCB were contacted in regards to records for 1347 2nd Street and the requests yielded no records.

Although no disposal violations were noted and no known releases were reported, the former facility was interpreted to be up-gradient in regards to groundwater flow direction (southerly), thus there is a low to moderate likelihood that a recognized environmental condition exists at the Site in connection with this listings on the Historical Cleaners database. Note that a former dry cleaner was present at the Site and a further discussion can be found in the 'Historical Site Land Use' section below.

Historical gasoline and automobile service station – 1401 Ocean Avenue (historically adjacent to the south of the Site)

Based on its listing on the EDR Historical Auto database and its proximity to the Site, available records for 1401 Ocean Avenue were reviewed. Based on the EDR Report, a historical gasoline service station was located at the address of 1401 Ocean Avenue from at least 1928 to 1987. The EDR report did not state that any releases had occurred at this property, nor did it provide any information regarding the types and quantities of hazardous materials stored at this historic facility. The State of California's Geotracker website was also reviewed for 1401 Ocean Avenue, but no listings or records were available for the facility.

Based on the absence of disposal violations, the lack of known and reported releases, and the interpreted down-gradient groundwater flow direction (southerly), and the length of time this gas station was present, there is a low to moderate likelihood that a recognized environmental condition exists at the Site in connection with this listing of on the Historical automobile gasoline and service station database. For further confidence in this determination, subsurface investigation (e.g., soil vapor sampling) could be conducted on the Site to assess whether releases from this former gas station have migrated beneath the Site.

California Division of Oil and Gas

SCS personnel reviewed the California Division of Oil and Gas Map regarding oil and gas well locations within 1 mile of the Site^{viii}. There were no wells interpreted to be located within a 1-mile radius of the Site.

DATA GAPS IN CONNECTION WITH OFF-SITE SOURCES

Based on the Site vicinity reconnaissance and off-Site source survey, there are no obvious indications of data gaps in connection with off-Site sources.

Findings and Opinions—Off-Site Source Survey

Based on the off-Site source survey, several facilities in the Site vicinity were reported to have had releases of hazardous materials/waste or petroleum products. With the possible exceptions below, it is our opinion that there are no recognized environmental conditions at the Site as a result of known and reported releases of hazardous materials/wastes or petroleum products from an off-Site source. This judgment is based on one or more of the following: the reported regulatory status (e.g., case closed), the media affected (e.g., soil contamination only), the distance from the Site, the direction from the Site with respect to the reported groundwater flow direction, and information obtained through a of Los Angeles County Fire Department files.

- Historical cleaners/laundries –1347 2nd Street (historically adjacent to the north and upgradient of the Site from approximately 1933 to 1948). Low to moderate likelihood of a recognized environmental condition.
- Historical gasoline and automobile service station – 1401 Ocean Avenue (historically adjacent to the south and down gradient of the Site from approximately 1928 to 1987). Low to moderate likelihood of a recognized environmental condition.

For further confidence in these determinations, subsurface investigation (e.g., soil vapor sampling) could be conducted on the Site to assess whether releases from these former facilities have migrated beneath the Site.

HISTORICAL LAND USE REVIEW

In accordance with the ASTM Standard and AAI rule, numerous reasonably ascertainable standard historical information sources were reviewed, and an attempt was made to interpret the historical Site and Site vicinity land use back to the obvious first developed use of the Site. The following table summarizes the historical resources reviewed as part of this Assessment.

Resource	Source	Years Available
Aerial Photographs	NETR Online http://www.historicaerials.com/ Google Earth	1947, 1952, 1964, 1967, 1972, 1980, 1989, 1994, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016

Historical Site Land Use

The following table provides a chronology of the apparent historical Site land uses, as interpreted from a review of information from the sources referenced.

Year	Interpreted Site Tenants	Interpreted Site Use
1887-1924	Various residential tenants, Bennett and Cannon Real estate offices	Single-family residences, boarding house, real estate offices
1928-1982	135 Santa Monica Boulevard (1936 – 1982) Towne Cleaners, E. T. Gorman cleaners, and W. N. Craig cleaners 133 Santa Monica Boulevard (1928) A. D. Miller cleaners (Various clothes cleaners, Various residential tenants, offices, various residential tenants, restaurants, chamber of commerce)	Dry cleaners , multi-family residential, retail, chamber of commerce
1985-2018	Various residential tenants, restaurants, offices, various hair and nail salons	Residential, retail, restaurants

Because many of the dates listed above are based on a limited selection of historical resources, they are considered to be approximations only; the actual beginning/ending dates for many of the Site uses listed above may have been earlier or later than indicated.

With the possible exception below, no obvious historical facilities, features of concern, or land uses indicative of the use, storage, or generation of hazardous materials/wastes or petroleum products were found in the historical resources reviewed.

Laundry Facilities

Historical cleaners were reported to be present at 133 to 135 Santa Monica Boulevard on the eastern portion of the Site from approximately 1928 to 1980. Based on our experience, it is possible that these facilities were used as dry cleaners. These facilities operated prior to the time that environmental regulations and records were maintained; hence we are unable to determine with available information if a release occurred at these facilities. It is likely that these facilities initially used petroleum hydrocarbon-based solvents, such as Stoddard solvent. However, since one of these facilities operated until 1980, it is possible that this facility eventually switched over to the use and storage of tetrachloroethylene (PCE), and generated waste (such as still bottoms and used filters). The use of these solvents may have resulted in releases to the soil, soil vapor, and/or groundwater.

In our experience, over time, petroleum hydrocarbon-based solvents and PCE liquid and vapor have the ability to permeate flooring and building foundations, entering the subsurface soils and potentially groundwater. It is not known what time frame is required for this to occur. Many property owners and lenders have established a Phase II sampling “trigger” of 5 to 7 years (i.e., dry cleaning facilities in operation over 5 or more years are subject to Phase II subsurface testing for the presence of PCE), and in some cases, as little as two years. Laundry facilities have reportedly occupied the Site for approximately 52 years. SCS believes that possible use of petroleum hydrocarbon-based solvents and/or PCE at these facilities creates the potential for subsurface impacts, given the tendency for these solvents to migrate through flooring and building foundations.

SCS understands that the Site is proposed to be redeveloped with a mixed-use commercial and residential land use. Potential solvent impacts to the subsurface have the potential to volatilize and migrate through the soil column and into buildings (vapor intrusion), resulting in potential human health risks, and, if a release was significant enough, to result in impacts to groundwater. The historical clothes cleaning operations were interpreted to have been located at the eastern portion of the Site (historically 133 to 135 Santa Monica Boulevard), an area which is currently used as a parking lot; however this does not preclude dry cleaning operations (the dry cleaning ‘plant’ versus the retail or store front) from being present in the other buildings on the Site. Based on the length of time this portion of the Site was potentially utilized for dry cleaning and the potential use of solvents associated with these uses, in our experience, there is a moderate to high likelihood that a recognized environmental condition exists at the Site as a result of the historical clothes cleaning facilities. To assess the potential for solvent impacts, additional assessment activities (i.e., soil vapor, soil, and/or groundwater sampling) would be necessary.

Burn Ash and Refuse Dumps

The Site was previously occupied by residential land uses as early as 1887. Based on our experience with properties in older urban neighborhoods, there is the potential for burned or incinerated ash from “backyard” incinerators (“burn pits”) or metal-bearing fill material to be

present or mixed with the soil. In addition, elevated concentrations of metals may exist in the shallow soil from other sources as well (e.g., imported fill, aerially deposited lead, paint from historical structures, etc.). Burn ash or metal-bearing fill material may contain high concentrations of contaminants of concern, notably certain metals (e.g., copper, lead, zinc, mercury, and cadmium).

Based on our limited historical review, the Site was interpreted to have consisted of residences since circa 1887. While there were no obvious indications of the presence of burn ash or Constituent of Concern (CoC)-bearing fill material at the Site, it is not possible, in our experience, to accurately assess this condition unless an extensive area of the soil at the Site is exposed (e.g., as a result of demolition/grading/trenching).

The enforcement actions requiring the remediation of burn ash or metals-bearing fill material at a property are typically driven by redevelopment and/or excavation as well as potential exposure concerns, if present. The Site grounds were observed to be covered parking lots and Site buildings. If the soil beneath the Site did contain burn ash or CoC-bearing fill material, we judge that under normal circumstances (i.e., no redevelopment or excavation), there is a low likelihood that complete exposure pathways are present for direct dermal contact with, or ingestion or inhalation of, burn ash or metals-bearing fill material (if present).

Based on our experience, if burn ash is present in soil, the likelihood of an enforced remediation is low as long as the soil remains undisturbed. However, it is our understanding that the Site is to be redeveloped. Redevelopment plans include a mixed-use development with subterranean parking. If burn ash or metals-bearing fill material is present, it would typically be considered a waste management issue if disturbed or particularly if the soil was exported. Any such disturbed materials should be handled, possibly as regulated or hazardous waste, in accordance with appropriate laws and regulations.

Based on the available data, we are unable to assess with confidence the likelihood that burn ash or metals-bearing fill material is present at the Site. If shallow soil (possibly containing burn ash) at the Site is disturbed, excavated, or exported in connection with Site development, soil sampling should be conducted. Such assessment would ideally involve trenching and sampling of the shallow subsurface soil at the Site and subsequent analysis for typical burn ash constituents. In addition, if any soil at the Site is not covered by hardscape or landscape, the soil should be assessed for burn ash constituents to ensure there is no human health risk to future Site occupants.

Historical Site Vicinity Land Use

The following table provides a chronology of the apparent historical Site vicinity land uses as interpreted from a review of information from the sources referenced.

Years	Interpreted Site Vicinity Tenants	Interpreted Site Vicinity Use
1332 2nd Street (North)		
1887-1968	Various residential tenants	Single- and multi-family residential

Years	Interpreted Site Vicinity Tenants	Interpreted Site Vicinity Use
1972-2014	Monica Theatres, Monica 4 Plex	Movie theaters
2015-2018	Santa Monica Film Festival, offices, Flower Child restaurant	Theater, offices, restaurants
1333 2nd Street (Northeast)		
1887-1900	None	Vacant
1902-1934	Various residential tenants	Single and multi-family residential
1936-1989	None	Parking lot
1994-2018	Various offices and restaurants	Commercial offices and restaurants
1347 2nd Street (Northeast)		
1887-1918	Various residential tenants	Single-family residential
1928	Neurenberg Real Estate, Mrs. Marie restaurant	Office and restaurant
1933-1950	Aved Yergot cleaners, Mrs. Marie restaurant	Laundry/clothes cleaner facility and restaurant
1952-1981	None	Auto parking
1985-2018	Taka Sushi and various restaurants	Restaurant
201 Santa Monica Boulevard (Northeast)		
1887-1909	Various residential tenants	Single and multi-family residential
1910-1915	Unknown	Land use information not provided on topographic maps reviewed
1918-1950	Various residential tenants and stores	Single and multi-family residential, commercial retail
1952-1981	Parking lot and store fronts	Parking and commercial retail
1985-2018	Equinox Santa Monica, U.S. Bank, restaurants	Offices, restaurants
116 Santa Monica Boulevard (historically known as 122 Santa and 134 Monica Boulevard) (Southeast)		
1887-1895	Various residential tenants	Single and multi-family residential
1902-1909	None	Unknown
1910-1915	Unknown	Land use information not provided on topographic maps reviewed

Years	Interpreted Site Vicinity Tenants	Interpreted Site Vicinity Use
1918-2018	Various commercial stores, restaurants	Laundry (1940), Commercial retail, Ye Olde King's Head bar and restaurant
1401 Ocean Avenue (Southeast)		
1887-1918	Various residential tenants	Single and multi-family residential
1921-1925	Unknown	Land use information not provided on topographic maps reviewed
1928-1980	Auto repair and gasoline station	Auto repair and gasoline station
1981	Unknown	Land use information not provided on topographic maps reviewed
1989-2018	Various commercial offices, restaurants	Plan Check restaurant
APN 4291-032-905 (Southwest)		
1887-2018	None	Vacant, Undeveloped, City of Santa Monica Veterans Memorial Park
1323 Ocean Avenue (Northwest)		
1887-2018	Various residential tenants, Gussie Moran House	Single and multi-family residential

Because many of the dates listed above are based on a limited selection of historical resources, they are considered to be approximations only; the actual beginning/ending dates for many of the Site vicinity uses/development described above may have been earlier or later than indicated.

With the possible exceptions described in the 'Additional SCS Research' section above and the discussion below, no obvious historical facilities, features of concern, or land uses indicative of the use, storage, or generation of hazardous materials/wastes or petroleum products were found in the historical resources reviewed:

- Laundry/clothes cleaner facility at 1347 2nd Street
- Laundry/clothes cleaner facility at 116 Santa Monica Boulevard (historically known as 122 Santa and 134 Monica Boulevard)
- Auto repair and gasoline station at 1401 Ocean Avenue

Please see the 'Additional SCS Research' section above for a further discussion regarding the above mentioned facilities.

DATA GAPS IN CONNECTION WITH THE HISTORICAL SITE LAND USE

Readily available historical information was limited, and information was not available that would provide 5-year data intervals between 1940 and 1947. Based on the corroborating data from the historical information reviewed (i.e., the Site was interpreted to have been used for residential purposes in each of these years), SCS judged it likely that the historical Site land use during this time period was not significantly different from the interpretation presented in the table above.

Historical information prior to 1887 was not readily available. Thus, SCS is unable to determine the Site usage from the date of first development as recommended by ASTM. Based on SCS's experience and available historical information, the Site was interpreted to have possibly first been developed for residential use.

Findings and Opinions—Historical Site and Site Vicinity Land Use

Based on a review of historical resources and with the possible exceptions below, it is our opinion that there are no recognized environmental conditions at the Site as a result of a release of hazardous materials/wastes or petroleum products from a known or interpreted historical Site or Site vicinity land use.

Laundry Facilities

Historical cleaners were reported to be present at 133 to 135 Santa Monica Boulevard on the eastern portion of the Site from approximately 1928 to 1980. Based on our experience, it is possible that these facilities were used as dry cleaners. These facilities operated prior to the time that environmental regulations and records were maintained; hence we are unable to determine with available information if a release occurred at these facilities. It is likely that these facilities initially used petroleum hydrocarbon-based solvents, such as Stoddard solvent. However, since one of these facilities operated until 1980, it is possible that this facility eventually switched over to the use and storage of tetrachloroethylene (PCE), and generated waste (such as still bottoms and used filters). The use of these solvents may have resulted in releases to the soil, soil vapor, and/or groundwater.

In our experience, over time, petroleum hydrocarbon-based solvents and PCE liquid and vapor have the ability to permeate flooring and building foundations, entering the subsurface soils and potentially groundwater. It is not known what time frame is required for this to occur. Many property owners and lenders have established a Phase II sampling “trigger” of 5 to 7 years (i.e., dry cleaning facilities in operation over 5 or more years are subject to Phase II subsurface testing for the presence of PCE), and in some cases, as little as two years. Laundry facilities have reportedly occupied the Site for approximately 52 years. SCS believes that possible use of petroleum hydrocarbon-based solvents and/or PCE at these facilities creates the potential for subsurface impacts, given the tendency for these solvents to migrate through flooring and building foundations.

SCS understands that the Site is proposed to be redeveloped with a mixed-use commercial and

Findings and Opinions—Historical Site and Site Vicinity Land Use

residential land use. Potential solvent impacts to the subsurface have the potential to volatilize and migrate through the soil column and into buildings (vapor intrusion), resulting in potential human health risks, and, if a release was significant enough, to result in impacts to groundwater. The historical clothes cleaning operations were interpreted to have been located at the eastern portion of the Site (historically 133 to 135 Santa Monica Boulevard), an area which is currently used as a parking lot; however this does not preclude dry cleaning operations (the dry cleaning ‘plant’ versus the retail or store front) from being present in the other buildings on the Site. Based on the length of time this portion of the Site was potentially utilized for dry cleaning and the potential use of solvents associated with these uses, in our experience, there is a moderate to high likelihood that a recognized environmental condition exists at the Site as a result of the historical clothes cleaning facilities. To assess the potential for solvent impacts, additional assessment activities (i.e., soil vapor, soil, and/or groundwater sampling) would be necessary.

Burn Ash and Refuse Dumps

The Site was previously occupied by residential land uses as early as 1887. Based on our experience with properties in older urban neighborhoods, there is the potential for burned or incinerated ash from “backyard” incinerators (“burn pits”) or metal-bearing fill material to be present or mixed with the soil. In addition, elevated concentrations of metals may exist in the shallow soil from other sources as well (e.g., imported fill, aerially deposited lead, paint from historical structures, etc.). Burn ash or metal-bearing fill material may contain high concentrations of contaminants of concern, notably certain metals (e.g., copper, lead, zinc, mercury, and cadmium).

Based on our limited historical review, the Site was interpreted to have consisted of residences since circa 1887. While there were no obvious indications of the presence of burn ash or Constituent of Concern (CoC)-bearing fill material at the Site, it is not possible, in our experience, to accurately assess this condition unless an extensive area of the soil at the Site is exposed (e.g., as a result of demolition/grading/trenching).

The enforcement actions requiring the remediation of burn ash or metals-bearing fill material at a property are typically driven by redevelopment and/or excavation as well as potential exposure concerns, if present. The Site grounds were observed to be covered parking lots and Site buildings. If the soil beneath the Site did contain burn ash or CoC-bearing fill material, we judge that under normal circumstances (i.e., no redevelopment or excavation), there is a low likelihood that complete exposure pathways are present for direct dermal contact with, or ingestion or inhalation of, burn ash or metals-bearing fill material (if present).

Based on our experience, if burn ash is present in soil, the likelihood of an enforced remediation is low as long as the soil remains undisturbed. However, it is our understanding that the Site is to be redeveloped. Redevelopment plans include a mixed-use development with subterranean parking. If burn ash or metals-bearing fill material is present, it would typically be considered a waste management issue if disturbed or particularly if the soil was exported. Any such disturbed materials should be handled, possibly as regulated or hazardous waste, in accordance with

Findings and Opinions—Historical Site and Site Vicinity Land Use

appropriate laws and regulations.

Based on the available data, we are unable to assess with confidence the likelihood that burn ash or metals-bearing fill material is present at the Site. If shallow soil (possibly containing burn ash) at the Site is disturbed, excavated, or exported in connection with Site development, soil sampling should be conducted. Such assessment would ideally involve trenching and sampling of the shallow subsurface soil at the Site and subsequent analysis for typical burn ash constituents. In addition, if any soil at the Site is not covered by hardscape or landscape, the soil should be assessed for burn ash constituents to ensure there is no human health risk to future Site occupants.

Historical cleaners/laundries –1347 2nd Street (historically adjacent to the north of the Site)

Based on its listing on the EDR Historical Cleaners database and its proximity to the Site, available records for the addresses of 1347 2nd Street were reviewed. Based on the EDR Report, historical cleaners were located at the address of 1347 2nd Street from 1933 to 1948.

Although no disposal violations were noted and no known releases were reported, the former facility was interpreted to be up-gradient in regards to groundwater flow direction (southerly), thus there is a low to moderate likelihood that a recognized environmental condition exists at the Site in connection with this listings on the Historical Cleaners database. Note that a former dry cleaner was present at the Site and a further discussion can be found in the ‘Historical Site Land Use’ section below.

Historical gasoline and automobile service station – 1401 Ocean Avenue (historically adjacent to the south of the Site)

Based on its listing on the EDR Historical Auto database and its proximity to the Site, available records for 1401 Ocean Avenue were reviewed. Based on the EDR Report, a historical gasoline service station was located at the address of 1401 Ocean Avenue from at least 1928 to 1987.

Based on the absence of disposal violations, the lack of known and reported releases, and the interpreted down-gradient groundwater flow direction (southerly), there is a low to moderate likelihood that a recognized environmental condition exists at the Site in connection with this listing of on the Historical automobile gasoline and service station database.

5 CONCLUSIONS AND RECOMMENDATIONS

SCS has performed an Assessment of 101 to 129 Santa Monica Boulevard and 1327 to 1357 Ocean Avenue, Santa Monica, California (Site), in general conformance with the American Society for Testing and Materials (ASTM) Standard Practice for Phase I Environmental Site Assessment Process E 1527-13 and the U.S. Environmental Protection Agency, 40 Code of Federal Regulations 312, Standards and Practices for All Appropriate Inquiries, Final Rule

(AAI). Any exceptions to, or deletions from, the ASTM and AAI Scope of Work were previously described in this Report where applicable.

With the possible exceptions below, this Assessment has revealed no evidence of a recognized environmental condition in connection with the Site.

Laundry Facilities

Historical cleaners were reported to be present at 133 to 135 Santa Monica Boulevard on the eastern portion of the Site from approximately 1928 to 1980. Based on our experience, it is possible that these facilities were used as dry cleaners. These facilities operated prior to the time that environmental regulations and records were maintained; hence we are unable to determine with available information if a release occurred at these facilities. It is likely that these facilities initially used petroleum hydrocarbon-based solvents, such as Stoddard solvent. However, since one of these facilities operated until 1980, it is possible that this facility eventually switched over to the use and storage of tetrachloroethylene (PCE), and generated waste (such as still bottoms and used filters). The use of these solvents may have resulted in releases to the soil, soil vapor, and/or groundwater.

In our experience, over time, petroleum hydrocarbon-based solvents and PCE liquid and vapor have the ability to permeate flooring and building foundations, entering the subsurface soils and potentially groundwater. It is not known what time frame is required for this to occur. Many property owners and lenders have established a Phase II sampling “trigger” of 5 to 7 years (i.e., dry cleaning facilities in operation over 5 or more years are subject to Phase II subsurface testing for the presence of PCE), and in some cases, as little as two years. Laundry facilities have reportedly occupied the Site for approximately 52 years. SCS believes that possible use of petroleum hydrocarbon-based solvents and/or PCE at these facilities creates the potential for subsurface impacts, given the tendency for these solvents to migrate through flooring and building foundations.

SCS understands that the Site is proposed to be redeveloped with a mixed-use commercial and residential land use. Potential solvent impacts to the subsurface have the potential to volatilize and migrate through the soil column and into buildings (vapor intrusion), resulting in potential human health risks, and, if a release was significant enough, to result in impacts to groundwater. The historical clothes cleaning operations were interpreted to have been located at the eastern portion of the Site (historically 133 to 135 Santa Monica Boulevard), an area which is currently used as a parking lot; however this does not preclude dry cleaning operations (the dry cleaning ‘plant’ versus the retail or store front) from being present in the other buildings on the Site. Based on the length of time this portion of the Site was potentially utilized for dry cleaning and the potential use of solvents associated with these uses, in our experience, there is a moderate to high likelihood that a recognized environmental condition exists at the Site as a result of the historical clothes cleaning facilities. To assess the potential for solvent impacts, additional assessment activities (i.e., soil vapor, soil, and/or groundwater sampling) would be necessary.

Burn Ash and Refuse Dumps

The Site was previously occupied by residential land uses as early as 1887. Based on our experience with properties in older neighborhoods of Los Angeles, there is the potential for burned or incinerated ash from “backyard” incinerators (“burn pits”) or metal-bearing fill material to be present or mixed with the soil. In addition, elevated concentrations of metals may exist in the shallow soil from other sources as well (e.g., imported fill, aerially deposited lead, paint from historical structures, etc.). Burn ash or metal-bearing fill material may contain high concentrations of contaminants of concern, notably certain metals (e.g., copper, lead, zinc, mercury, and cadmium).

Based on our limited historical review, the Site was interpreted to have consisted of residences since circa 1887. While there were no obvious indications of the presence of burn ash or Constituent of Concern (CoC)-bearing fill material at the Site, it is not possible, in our experience, to accurately assess this condition unless an extensive area of the soil at the Site is exposed (e.g., as a result of demolition/grading/trenching).

The enforcement actions requiring the remediation of burn ash or metals-bearing fill material at a property are typically driven by redevelopment and/or excavation as well as potential exposure concerns, if present. The Site grounds were observed to be covered parking lots and Site buildings. If the soil beneath the Site did contain burn ash or CoC-bearing fill material, we judge that under normal circumstances (i.e., no redevelopment or excavation), there is a low likelihood that complete exposure pathways are present for direct dermal contact with, or ingestion or inhalation of, burn ash or metals-bearing fill material (if present).

Based on our experience, if burn ash is present in soil, the likelihood of an enforced remediation is low as long as the soil remains undisturbed. However, it is our understanding that the Site is to be redeveloped. Redevelopment plans include a mixed-use development with subterranean parking. If burn ash or metals-bearing fill material is present, it would typically be considered a waste management issue if disturbed or particularly if the soil was exported. Any such disturbed materials should be handled, possibly as regulated or hazardous waste, in accordance with appropriate laws and regulations.

Based on the available data, we are unable to assess with confidence the likelihood that burn ash or metals-bearing fill material is present at the Site. If shallow soil (possibly containing burn ash) at the Site is disturbed, excavated, or exported in connection with Site development, soil sampling should be conducted. Such assessment would ideally involve trenching and sampling of the shallow subsurface soil at the Site and subsequent analysis for typical burn ash constituents. In addition, if any soil at the Site is not covered by hardscape or landscape, the soil should be assessed for burn ash constituents to ensure there is no human health risk to future Site occupants.

Historical cleaners/laundries –1347 2nd Street (historically adjacent to the north of the Site)

Based on its listing on the EDR Historical Cleaners database and its proximity to the Site, available records for the addresses of 1347 2nd Street were reviewed. Based on the EDR Report, historical cleaners were located at the address of 1347 2nd Street from 1933 to 1948.

Although no disposal violations were noted and no known releases were reported, the former facility was interpreted to be up-gradient in regards to groundwater flow direction (southerly), thus there is a low to moderate likelihood that a recognized environmental condition exists at the Site in connection with this listings on the Historical Cleaners database. Note that a former dry cleaner was present at the Site and a further discussion can be found in the ‘Historical Site Land Use’ section below.

Historical gasoline and automobile service station – 1401 Ocean Avenue (historically adjacent to the south of the Site)

Based on its listing on the EDR Historical Auto database and its proximity to the Site, available records for 1401 Ocean Avenue were reviewed. Based on the EDR Report, a historical gasoline service station was located at the address of 1401 Ocean Avenue from at least 1928 to 1987.

Based on the absence of disposal violations, the lack of known and reported releases, and the interpreted down-gradient groundwater flow direction (southerly), there is a low to moderate likelihood that a recognized environmental condition exists at the Site in connection with this listing of on the Historical automobile gasoline and service station database.

This Assessment has been conducted by an environmental professional whose qualifications⁶ were made known to the Client. The conclusions and recommendations presented above are based on the review of readily available data obtained as part of this Assessment, current regulatory guidelines, the Site and Site vicinity reconnaissance, and SCS’s experience.

6 REPORT USAGE AND FUTURE SITE CONDITIONS

This Report is intended for the sole usage of the Client and other parties designated by SCS. The methodology used during this Assessment was in general conformance with the requirements of the Client and the specifications and limitations presented in the Consulting Agreement (Contract) between the Client and SCS. This Report contains information from a variety of public and other sources, and SCS makes no representation or warranty about the accuracy, reliability, suitability, or completeness of the information. Any use of this Report, whether by the Client or by a third party, shall be subject to the provisions of the Contract between the Client and SCS. Any misuse of or reliance upon the Report shall be without risk or liability to SCS.

Assessments are qualitative, not comprehensive, in nature and may not identify all environmental problems or eliminate all risk. For every property, but especially for properties in older downtown or urban areas, it is possible for there to be unknown, unreported recognized environmental conditions, USTs, or other features of concern that might become apparent through demolition, construction, or excavation activities, etc. In addition, the scope of services for this project was limited to those items specifically named in the scope of services for this

6. SCS declares that, to the best of its professional knowledge and belief, the reviewer meets the definition of Environmental Professional as defined in section 312.10 of 40 CFR 312 and has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. SCS has developed and performed All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR 312. The qualifications of the report preparers are included in the Appendices.

Report. Environmental issues not specifically addressed in the scope of services for this project are not included in this Report.

Land use, condition of the properties within the Site, and other factors may change over time. The information and conclusions of this Report are judged to have been relevant at the time the work described in this Report was conducted. This Report should not be relied upon to represent future Site conditions unless a qualified consultant familiar with the practice of Phase I Environmental Site Assessments in the County of Los Angeles is consulted to assess the necessity of updating this Report.

The property owners at the Site are solely responsible for notifying all governmental agencies and the public of the existence, release, or disposal of any hazardous materials/wastes or petroleum products at the Site, whether before, during, or after the performance of SCS's services. SCS assumes no responsibility or liability for any claim, loss of property value, damage, or injury that results from hazardous materials/wastes or petroleum products being present or encountered within the Site.

Although this Assessment has attempted to assess the likelihood that the Site has been impacted by a hazardous material/waste release, potential sources of impact may have escaped detection for reasons that include, but are not limited to, (1) inadequate or inaccurate information rightfully provided to SCS by third parties, such as public agencies and other outside sources; (2) the limited scope of this Assessment; and (3) the presence of undetected, unknown, or unreported environmental releases.

7 SPECIAL CONTRACTUAL CONDITIONS BETWEEN USER AND ENVIRONMENTAL PROFESSIONAL

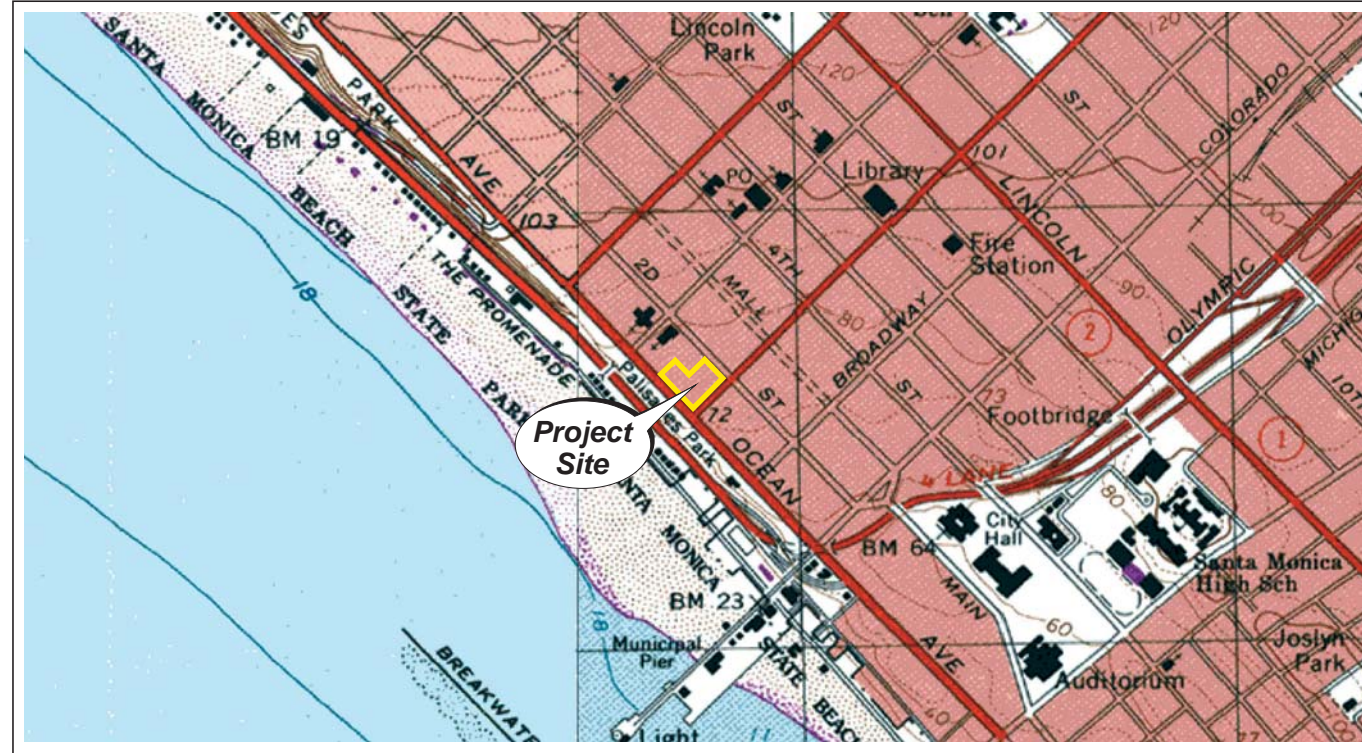

There were no special contractual conditions between the user of this Assessment, the environmental professional, and SCS.

APPENDICES

GLOSSARY

- adjacent property.** Any real property or properties the border of which is contiguous or partially contiguous with that of the Site or that would be contiguous or partially contiguous with that of the Site but for a street, road, or other public thoroughfare separating them.
- aerial photographs.** Photographs taken from an airplane or helicopter of areas encompassing the Site.
- asbestos.** Six naturally occurring fibrous minerals found in certain types of rock formations. Of the six, the minerals chrysotile, amosite, and crocidolite have been the most commonly used in building products. When inhaled in sufficient quantities, asbestos fibers can cause serious health problems.
- asbestos-containing material (ACM).** Any material or product that contains more than 1% asbestos.
- construction debris.** Any concrete, brick, asphalt, and other building materials discarded in the construction of a building or other improvement to property.
- Controlled recognized environmental conditions.** A *recognized environmental condition* resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity use limitations, institutional controls, or engineering controls).
- de minimis condition.** A condition that generally does not present a threat to human health or the environment and that generally would not be subject to an enforcement action if brought to the attention of appropriate governmental agencies). A condition considered *de minimis* is not a *recognized environmental condition*.
- drum.** A container (typically, but not necessarily, holding 55 gallons of liquid) that may be used to store hazardous substances or petroleum products.
- dry well.** Underground areas where soil has been removed and replaced with pea gravel, coarse sand, or large rocks. Dry wells are used for drainage, to control storm runoff, for the collection of spilled liquids (spilled intentionally or not), and for wastewater disposal (often illegal).
- fill dirt.** Dirt, soil, sand, or other earth that is obtained off site and that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities.
- fire insurance map.** Maps produced for private fire insurance map companies that indicate uses of properties at specified dates and that encompass the property.
- hazardous material.** Any material that, because of its quantity, concentration, or physical and chemical characteristics, poses a significant present or potential hazard to human health and safety or to the environment if released into the workplace or the environment. Hazardous materials include, but are not limited to, hazardous substances, hazardous waste, and any material which a handler or the administering agency has a reasonable basis for believing would be injurious to the health or safety of persons or harmful to the environment if released into the workplace or the environment.
- hazardous substance.** Pursuant to CERCLA, hazardous substances include the following:

- 1) All toxic pollutants and hazardous substances listed under the Clean Water Act
- 2) Hazardous wastes regulated under RCRA
- 3) Any hazardous air pollutant under the Clean Air Act
- 4) Chemicals designated as “immediately hazardous” under the Toxic Substance Control Act

The EPA is also allowed to designate additional substances as hazardous if they present a substantial danger to the public health or welfare or the environment when released.

hazardous waste. A substance defined pursuant to the Solid Waste Disposal Act amended by RCRA, a hazardous waste is a solid waste, or a combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics, may contribute to an increase in mortality or an increase in serious irreversible, or incapacitating illness or pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.

historical recognized environmental condition. A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

landfill. A place or area of land used for the disposal of solid wastes as defined by state solid waste regulations. Synonymous with the term *solid waste disposal site*, a landfill is also known as a garbage dump or trash dump.

likelihood. As used in this Report, the term *likelihood* pertains to the probability of a match between the prediction of an event and its actual occurrence. As used by SCS Engineers, the term *low likelihood* approximates a percentage range to 10 to 20 percent; *moderate likelihood* approximates 40 to 60 percent; and *high likelihood* approximates 80 to 90 percent.

Material Safety Data Sheet (MSDS). Written or printed material concerning a hazardous substance which is prepared by chemical manufacturers, importers, and employers for hazardous chemicals pursuant to OSHA standards.

obvious. That which is plain or evident. The term refers to a condition or fact that could not be ignored or overlooked by a reasonable observer while physically observing the property.

PCE. Perchloroethene/perchloroethylene, or “Perc”; also tetrachloroethene/tetrachloroethylene; commonly used as a solvent for dry-cleaning.

petroleum products. Petroleum, including crude oil, natural gas, natural gas liquids, liquefied natural gas, synthetic gas usable for fuel, kerosene, diesel oil, jet fuels, motor oil, hydraulic oil, gear oils, and fuel oil.

recognized environmental conditions (RECs). Recognized environmental conditions, as defined by the American Society for Testing and Materials (ASTM), include the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. However, the term is

not intended to include *de minimis* conditions.

retail quantities (RQs). Quantities of hazardous materials usually less than 50 gallons, 100 pounds, or 200 cubic feet of gas (under the regulatory reporting limits).

small retail quantities (SRQs). Quantities of hazardous materials in containers of 5 gallons or less, and less than 50 gallons in aggregate.

solvent. A chemical compound that is capable of dissolving another substance and is itself a hazardous substance, such as TCE, TCA, PCE, Stoddard solvent, paint thinner, mineral spirits, and acetone. Solvents are used in a number of manufacturing or industrial processes.

TCA. Trichloroethane; also 1,1,1 TCA; a commonly used industrial solvent for degreasing/cleaning.

underground storage tank (UST). Any tank, including underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10 percent or more beneath the surface of the ground.

visually and/or physically observed. This term refers to observations made by vision during the Site visit while walking through the Site or Site building(s), and observations made by the sense of smell, particularly awareness of noxious or foul odors.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by SCS Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Sanborn® Library search results

Certification #: 8FCF-49D5-8995

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

SCS Engineers (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/30/2017 has revealed that there are 6 CA ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

CA HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTATES]. This listing is no longer updated by the state agency.

A review of the CA HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 13 CA HIST CORTESE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

EDISON/SANTA MONICA	819 COLORADO AVE	ENE 1/2 - 1 (0.560 mi.)	R100	123

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 38 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 17 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Date: 08/24/1992
Comments: The Southern California Edison's former manufactured gas plant (MGP) was operated at the site from 1900 to 1903 and dismantled prior to 1909. MGPs such as the subject facility in Santa Monica were operated by various utility companies from the 1800s to the mid-1900s to produce gas from coal or oil. The gas manufacturing and purification processed yielded various byproducts or residues, consisting of lampblack, light oils, tars, sludges, and other petroleum products. During the investigation, polynuclear aromatic hydrocarbons (PAHs) and

metals were detected. The Dept. received a PEA report on May 14, 1992. On August 24, 1992 the Department completed review of the PEA. The PEA recommended "No Further Action" was needed at the site. The PAH concentration at the site exceeded the PEA screening values. Therefore, the Department recommended that "Further Action" was necessary at the site.

 Completed Date: 08/24/1992
 Comments: The Southern California Edison's former manufactured gas plant (MGP) was operated at the site from 1900 to 1903 and dismantled prior to 1909. MGPs such as the subject facility in Santa Monica were operated by various utility companies from the 1800s to the mid-1900s to produce gas from coal or oil. The gas manufacturing and purification processed yielded various byproducts or residues, consisting of lampblack, light oils, tars, sludges, and other petroleum products. During the investigation, polynuclear aromatic hydrocarbons (PAHs) and metals were detected. The Dept. received a PEA report on May 14, 1992. On August 24, 1992 the Department completed review of the PEA. The PEA recommended "No Further Action" was needed at the site. The PAH concentration at the site exceeded the PEA screening values. Therefore, the Department recommended that "Further Action" was necessary at the site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704

Number of Days to Update: 92	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346
Date Made Active in Reports: 01/12/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 04/30/2018
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 04/09/2018
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/22/2017	Source: Department of the Navy
Date Data Arrived at EDR: 06/13/2017	Telephone: 843-820-7326
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 02/09/2018
Number of Days to Update: 94	Next Scheduled EDR Contact: 05/28/2018
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/27/2017	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 02/27/2018
Number of Days to Update: 74	Next Scheduled EDR Contact: 06/11/2018
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/27/2017	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1590F	FEMA FIRM Flood data

06037C1569F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BEVERLY HILLS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
1	1/4 - 1/2 Mile ENE	Not Reported
2	1/2 - 1 Mile East	S
1G	1/4 - 1/2 Mile ENE	Not Reported
2G	1/2 - 1 Mile East	S

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
 clay
 silt loam
 loamy sand
 sandy loam
 fine sand
 clay loam
 gravelly - sandy loam
 coarse sand
 gravelly - sand
 sand

Surficial Soil Types: loam

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Professional Experience

Mr. Montague is a Professional Geologist (PG) and licensed contractor with 17 years of experience in environmental consulting, general contracting, commercial and residential development, and property and asset management. He has performed and reviewed over 500 Phase I Environmental Site Assessments (ESAs), and has completed Phase II subsurface investigations, Human Health Risk Assessments (HHRAs), Remedial Action Plans (RAPs), site remediation activities, geotechnical investigations, asbestos and lead-based paint (LBP) surveys, and asbestos air monitoring. His development, general contracting, and property and asset management experience includes managing construction through lease-up; lease administration and property operations and maintenance; contract procurement and administration; oversight of subcontractors and staff; and interfacing with clients, owners, tenants, and regulatory agencies.

Mr. Montague's project experience is summarized below.

Brixton Capital, Gasoline Service Station Redevelopment with Retail Buildings, Chula Vista, CA. As Project Manager, Mr. Montague oversaw the assessment, remedial planning, and remediation consisting of oversight, segregation, and on-site burial of residual petroleum hydrocarbon (PHC) impacted soils from a former gasoline service station release property redeveloped with new retail buildings.

RD Brown Company, Leaking Underground Storage Tank (LUST) Case Assessment and Remediation, City of Imperial, CA. As Project Manager, Mr. Montague oversaw several on- and off-site soil, soil vapor, and groundwater assessments, and is currently overseeing ongoing remediation and monitoring of a proposed senior living facility at a former gasoline service station.

San Diego County Water Authority (SDCWA), Environmental Consulting Services, San Diego, CA. As Project Manager, Mr. Montague completed several ESAs and subsurface assessments to assist the SDCWA in obtaining easements required to complete the Carlsbad Desalination Project.

City of Encinitas, Site Investigation and Planning, Encinitas Community Park, Encinitas, CA.

As Project Geologist, Mr. Montague provided oversight for the mitigation and monitoring activities of pesticides in soil from the Hall property, which consists of 43 acres of coastal bluff that was formerly used as a nursery and was redeveloped into a community park. Under the oversight of the County of San Diego Department of Environmental Health (DEH), work consisted of Phase II ESAs, remedial planning and implementation of on-site reuse/burial of 45,000 cubic yards of pesticide-impacted soil in a Soil Management Zone, and creation of a land-use covenant. SCS received an award for this project with the Industrial Environmental Association (IEA).

Los Angeles Unified School District (LAUSD), Assessment and Remediation, Various Locations in Los Angeles County, CA.

Mr. Montague managed and performed the environmental characterization and cleanup of various proposed school redevelopment projects overseen by the California Department of Toxic Substances Control (DTSC) that required Phase I ESAs, preliminary environmental assessments or subsurface investigations, and preparation and implementation of removal action work plans to obtain “no further action” status prior to redevelopment.

City Heights Revitalization Corporation, Brownfields Assessment and Remediation, City Heights, CA.

Mr. Montague managed a subsurface investigation for an entire Brownfields city block planned for redevelopment. The investigation included extensive drilling, trenching, and hand auguring to estimate the volume of lead- and hydrocarbon-impacted soil from residual contamination from a former service station and from lead-based paint. Work also included negotiation of cleanup levels with the local regulatory agency.

Casmalia Steering Committee, Remedial Investigation, Casmalia, CA. Mr. Montague managed and performed soil vapor sampling at the Casmalia Hazardous Waste Management Facility, a Class I hazardous waste site, for a remedial investigation and feasibility study of soil gas impacts submitted to the US Environmental Protection Agency (EPA). Soil gas impacts to ecological receptors were assessed, considering specific regulatory guidance, including the joint DTSC and Los Angeles Regional Water Quality Control Board (LARWQCB) Advisory on Active Soil Gas Investigations.

The Boeing Company, Underground Storage Tank (UST) Assessment, Long Beach, CA. Mr. Montague performed subsurface vapor intrusion to indoor air analysis at a former aeronautics manufacturing facility. Soil, soil vapor, and sub-slab soil vapor extraction (SVE) assessments were conducted to determine appropriate corrective actions associated with former solvent USTs. Work was performed under the corrective action consent agreement with the DTSC.

Trihydro Corporation, Soil Vapor Sampling, Hooven, OH. Mr. Montague performed SVE sampling from indoor air probes and outdoor multi-level probes at residences in Hooven, OH. This project focused on helping to evaluate the potential for subsurface vapor intrusion to indoor air from volatilization of PHCs in groundwater, or light, non-aqueous phase liquid petroleum product originating from an adjacent former fuel and asphalt petroleum refinery. The vapor intrusion pathway was evaluated based on a request by EPA, Region V, and was performed in accordance with the EPA-issued document, *Draft Guidance for Evaluating the Vapor Intrusion to Indoor Air Pathway from Groundwater and Soil*, 2002.

CSK Auto, Phase I ESAs, Various Sites in the Western US. Mr. Montague conducted Phase I ESAs, subsurface investigations, and geotechnical investigations for the development of auto parts chain stores in the western US. Work included site investigations, drilling operations, and records research.

AT&T/Gianni & Associates, Phase I ESAs and Geotechnical Investigations, San Diego, CA. Mr. Montague completed Phase I ESAs, transaction screen assessments, National Environmental Policy Act (NEPA) reports, asbestos surveys, and geotechnical investigations involving the development of wireless communications sites.

Ford Mance Company, Construction and Property Management, Mixed-Use Building at 111 Chesterfield Drive, Encinitas, CA. Mr. Montague served as Project Manager during the development and construction phases of a 2-story, Type V, 3,874-square-foot mixed-use building with subterranean parking. Responsibilities included managing all phases of construction and shell and tenant improvements, and assisting in construction supervision activities and lease-up. Development activities included oversight and collaboration of architectural, mechanical, electrical, and plumbing plans preparation, assisting with design research and decisions, obtaining various permits, and preparing cost and budgets. After construction, Mr. Montague also served as the Property and Asset Manager.

Ford Mance Company, Construction and Property Management, Del Norte Medical Plaza, Carlsbad, CA. Mr. Montague served as Project Manager during the development and construction of a 2-story, Type II, medical building with subterranean parking. Responsibilities included contracting out all phases of shell construction of 22,000 square feet of rentable area for medical use, collaborative oversight concerning architectural, mechanical, electrical, and plumbing plans preparation, assisting with design research and decision-making, obtaining various permits, and preparing costs and budgets. After construction, he also served as Property and Asset Manager.

California Department of Fish and Game, Carpinteria Creek Watershed Plan, Carpinteria, CA. Mr. Montague collaborated with local and state government representatives, and various stakeholders, to aid in preparing the Carpinteria Creek Watershed Plan under the Cachuma Resource Conservation District for the California Department of Fish and Game (CDFG). Work consisted of research, meetings, various field assessments, report writing, and map creation. The Plan served as an amendment to the Water Quality Control Plan for the Central Coast Region.

TYLER OVERTON

Education

BA – Environmental Studies/Geography, University of Colorado, 2002

Specialty Certifications

OSHA 40-Hour EPA-Approved Hazardous Waste Operations and Emergency Response Training

Professional Experience

Mr. Overton is an environmental professional specializing in the application of due diligence, including Phase I and Phase II Environmental Site Assessments (ESAs). His experience includes subsurface investigations, remediation, soil management, landfill evaluations, health risk assessments (HRAs), ambient air monitoring, groundwater sampling and monitoring, watershed analysis, land use studies, litigation support, and property assessments. In working with developers, investors, lending institutions, and municipalities in performing Phase I ESAs, he has completed site reconnaissance, regulatory agency record reviews, historical record reviews, historical land use interpretations, data collection, data evaluation, and site assessment reports. He can accurately assess sites and provide valuable information for reports that meets regulatory agency requirements.

Mr. Overton's project experience is summarized below.

Community Housing Works, Excavation Monitoring, San Diego, CA. Mr. Overton provided oversight for the excavation monitoring of lead-bearing soil placed below the footprint of a new LGBT senior-housing facility. Work was conducted under the oversight of the County of San Diego Department of Environmental Health (DEH), and consisted of the implementation of a Soil Management Plan.

Lowe's, Excavation Monitoring, San Diego, CA. Mr. Overton served as a soil technician for the excavation monitoring of contaminated soil below the footprint of a new building, including the removal of underground storage tanks (USTs). Work and tank removal were conducted under the oversight of the County of San Diego Department of Environmental Health (DEH), and consisted of Phase II ESAs and preparation and implementation of a Property Mitigation Plan.

Republic Services, Inc., Gas Monitoring Probe Installation for Sycamore Landfill, Santee, CA. Mr. Overton served as the Project Coordinator for the installation of six new perimeter monitoring probes at the Sycamore Landfill. Installation included drilling and construction of probes up to 470 feet deep, which allowed for the detection of migrating landfill gas (LFG).

Pacific Steel, Resource Conservation and Recovery Act (RCRA) Soil Shipping, San Diego, CA. Mr. Overton served as the point of contact for the removal and disposal of a hazardous waste soil stockpile. SCS monitored dust emissions and the loading and shipping of hazardous soil to ensure that safe handling practices were followed.

Excavation Monitoring of Contaminated Soils for SDG-Left Field and Cistera Building, San Diego, CA. Mr. Overton served as a soil technician for the excavation monitoring of lead-, diesel-, and gasoline-contaminated soils removed as a part of the new building's below-ground parking structure. Work was conducted under the oversight of the County of San Diego DEH, and consisted of Phase II ESAs and preparation and implementation of a Property Mitigation Plan.

Community Housing Works, Excavation Monitoring of Contaminated Soils, Vista, CA. Mr. Overton served as a soil technician for the excavation monitoring of gasoline-, diesel-, and motor oil-impacted soils that were removed prior to construction of a new subterranean parking structure. Approximately 2,000 cubic yards of soils were classified as hazardous and removed from the project site as a part of the mitigation.

Phase I and Phase II ESAs for Carlsbad Desalination Project, Carlsbad, CA. Mr. Overton completed several Phase I and Phase II ESAs for easements on many locations, including former agricultural lands. Locations included previous soil sampling conducted to determine the presence of pesticides, which were evaluated using the waste export criteria, based on pesticide concentrations found.

Republic Services, Inc., Stage 3B Cell Development for Sycamore Landfill, Santee, CA. Mr. Overton served as Project Manager for the construction of a new waste disposal cell at Sycamore Landfill. Construction included managing the excavation of soils, grading of the cell, identifying the correct location of the leachate collection system, and installation of a composite liner system. The construction of this disposal cell prolonged the life and increased capacity of the landfill by approximately 1 million cubic yards.

Bank of Hawaii Information Systems and Communications Office (ISCO), Remediation, Chino Hills, CA. Mr. Overton performed remediation activities at a former retail fueling facility with four USTs containing gasoline and diesel. He was directly involved in the implementation of a groundwater remediation system to inject hydrogen peroxide into the subsurface to remediate impacts from petroleum hydrocarbons (PHCs).

Storm Water Sampling for Lake San Marcos Study, San Marcos, CA. Mr. Overton was part of the SCS team investigating Lake San Marcos and San Marcos Creek, both listed as EPA Clean Water Act 303(d) Category 5 Impaired Water Bodies. He conducted storm water sampling and provided insight on laboratory analysis.

RD Brown Company, Leaking Underground Storage Tank (LUST) Case Assessment and Remediation, City of Imperial, CA. As Project Manager, Mr. Overton participated in several on- and off-site soil, soil vapor, and groundwater assessments, and is currently involved with ongoing remediation and monitoring of a proposed senior living facility at a former gasoline service station.
