

APPENDIX 3.11-C: EXISTING AND PROPOSED RAILROAD CROSSINGS

APPENDIX 3.11-C: EXISTING AND PROPOSED RAILROAD CROSSINGS

All proposed crossings include the following:

HSR Alignment	Proposed Grade of the HSR Track Alignment or Corridor
HSR at-grade	HSR track on the surface (on embankment, at-grade, ground level)
HSR below grade	HSR track below the surface (below grade, trenched, retained cut, etc.)
HSR above grade	HSR track above the surface (above grade, rail bridge, aerial structure, etc.)
Road Realign	Proposed roadway realignment or construction in the vicinity of the at-grade crossing
None	No significant roadway realignment or construction
Minor	Minor reconstruction of local roadways
Major	Major reconstruction of local roadways

HSR = high-speed rail

Where the Central Valley Wye alternatives are within 0.5 mile of an existing highway–railroad crossing the following information is included:

RR Xing Type	Proposed Grade of the HSR Track Alignment or Corridor
Existing RR Xing Type	Existing highway–railroad crossings
At-grade	Currently roadway crosses the railroad at-grade
Road above	Currently roadway above railroad
Road below	Currently roadway below railroad
RR Xing Change	Proposed physical change to the highway–railroad crossing
No change	Railroad crossing and immediate vicinity would NOT be physically affected
Close	Railroad crossing would be eliminated
Changes	Railroad crossing would remain with physical modification, including the addition of RR or HSR at an existing railroad grade separation.
Proposed RR Xing Type	Proposed grade of the HSR track alignment or corridor
At-grade	Roadway crosses the railroad at-grade
Road above	Roadway above railroad
Road below	Roadway below railroad

RR Xing = railroad crossing
HSR = high-speed rail
