Chapter 1 Introduction

This Addendum assesses the environmental impacts of the City’s Proposed Phase 4 Refinements (Proposed Changes) to the City of Ukiah’s (City) Recycled Water Project. In March 2013, the City prepared an Initial Study/Mitigated Negative Declaration (IS/MND) on the City’s Recycled Water Pipeline Project and on June 5, 2013 adopted the Final IS/MND and approved the Project (SCH #2013032072), which was based on the City’s 2012 Recycled Water Feasibility Study. Subsequently in May 2015, July 2017 and December 2018, the City prepared and approved three Addendums on minor project changes to the original Proposed Project description and further evaluated the potential effects of reducing flows to the Russian River. These documents are included by reference. In addition, the State Water Resources Control Board (State Water Board) is providing partial funding for the Proposed Project under the State Revolving Fund (SRF) Program and in August of 2015 issued Order WW0082 approving the City’s petition to change the purpose of use and the place of use of 1,472 acre-feet per year (afy) of treated wastewater.

The City, as the lead agency under the California Environmental Quality Act (CEQA), will consider the potential incremental environmental impacts of the Proposed Project changes when it considers whether or not to approve this Addendum to the Project. This Addendum is an informational document and is intended to be used by the City under Public Resources Code section 21166 and the related CEQA Guidelines, specifically sections 15162 through 15164.¹ Further, this Addendum is a modified Addendum, as the State Board is requiring this Addendum to be circulated for a 15-day public review period, which is not required for traditional addendums. As such, this document discloses some changes to the Project that go beyond the traditional limits of the CEQA addendum process and uses the public review process to disclose those changes.

The conclusion of this Addendum is that the Proposed Phase 4 Refinements will not result in new significant impacts, substantially increase the severity of previously disclosed impacts, nor involve any of the other conditions related to changed circumstances or new information that can require a subsequent or supplemental EIR under Public Resources Code section 21166 and CEQA Guidelines section 15162 beyond those impacts and conditions already identified in the City’s Public Draft and Final IS/MND (SCH #2013032072) (also referred to as IS/MND throughout this document), which was certified and approved by the City on June 5, 2013 as well as the May 2015, July 2017, and December 2018 Addendums. As discussed in this Addendum, with the inclusion of the 15-day public review process, CEQA and the CEQA Guidelines do not require a subsequent or supplemental Negative Declaration or Environmental Impact Report (EIR) for the proposed changes.

1.1 California Environmental Quality Act (CEQA)

For a proposed modified project, State CEQA Guidelines (Sections 15162 and 15164) provide that an Addendum to an adopted IS/MND may be prepared if only minor technical changes or additions are necessary or none of the following conditions calling for the preparation of a subsequent IS/MND have occurred:

- Substantial changes in the project which require major revisions to the IS/MND due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
- Substantial changes with respect to the circumstances under which the project is undertaken which require major revisions to the IS/MND due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

¹ The CEQA Guidelines are contained in Title 14 of the California Code of Regulations.

- New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time of IS/MND adoption, shows any of the following:
 - i) The project will have one or more significant effects not discussed in the IS/MND,
 - ii) The project will result in impacts substantially more severe than those disclosed in the IS/MND,
 - iii) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponent declines to adopt the mitigation measure or alternative, or
 - iv) Mitigation measures or alternatives that are considerably different from those analyzed in the IS/MND would substantially reduce one or more significant effects on the environment, but the project proponent declines to adopt the mitigation measure or alternative.

Specific CEQA language in CEQA Guidelines Section 15162 and 15164 is presented below.

15162. Subsequent EIRs and Negative Declarations

- (A) When an EIR has been certified or a negative declaration adopted for a project, no subsequent EIR shall be prepared for that project unless the lead agency determines, on the basis of substantial evidence in the light of the whole record, one or more of the following:
- (1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
 - (2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or Negative Declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or
 - (3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the Negative Declaration was adopted, shows any of the following:
 - a. The project will have one or more significant effects not discussed in the previous EIR or negative declaration;
 - b. Significant effects previously examined will be substantially more severe than shown in the previous EIR;
 - c. Mitigation measures or alternatives previously found not to be feasible would in fact be feasible, and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

- d. Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.
- (B) If changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, the lead agency shall prepare a subsequent EIR if required under subsection (a). Otherwise, the lead agency shall determine whether to prepare a subsequent negative declaration, an Addendum, or no further documentation.
- (C) Once a project has been approved, the lead agency's role in project approval is completed, unless further discretionary approval on that project is required. Information appearing after an approval does not require reopening of that approval. If after the project is approved, any of the conditions described in subsection (A) occurs, a subsequent EIR or negative declaration shall only be prepared by the public agency which grants the next discretionary approval for the project, if any. In this situation no other responsible agency shall grant an approval for the project until the subsequent EIR has been certified or subsequent negative declaration adopted.
- (D) A subsequent EIR or subsequent negative declaration shall be given the same notice and public review as required under Section 15087 or Section 15072. A subsequent EIR or negative declaration shall state where the previous document is available and can be reviewed.

As described in Chapter 3 of this Addendum, none of the conditions described in CEQA Guidelines section 15162 (which implements Public Resources Code section 21166) has occurred. Under such circumstances, CEQA Guidelines section 15164 allows for the preparation of an Addendum as described below:

15164. Addendum to an EIR or Negative Declaration

- (A) The lead agency or responsible agency shall prepare an Addendum to a previously certified EIR if some changes or additions are necessary but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred.
- (B) An Addendum to an adopted Negative Declaration may be prepared if only minor technical changes or additions are necessary or none of the conditions described in Section 15162 calling for the preparation of a subsequent EIR or negative declaration have occurred.
- (C) An Addendum need not be circulated for public review but can be included in or attached to the final EIR or adopted negative declaration.
- (D) The decision-making body shall consider the Addendum with the final EIR or adopted negative declaration prior to making a decision on the project.
- (E) A brief explanation of the decision not to prepare a subsequent EIR pursuant to Section 15162 should be included in an Addendum to an EIR, the lead agency's findings on the project, or elsewhere in the record. The explanation must be supported by substantial evidence.

1.2 Purpose of this Addendum

The purpose of this Addendum is to evaluate proposed changes to the original project analyzed in the IS/MND to demonstrate that the Proposed Project changes do not trigger any of the conditions described

above. Based on the analysis provided below, an Addendum to the IS/MND is the appropriate CEQA document.

1.3 Impact Terminology

This Addendum uses the terminology below to describe the levels of significance of impacts that the IS/MND concluded that Proposed Project would have. This terminology is helpful for determining how the environmental impacts, if any, of the proposed pipeline alignment changes compare to the environmental impacts described in the IS/MND.

- The Proposed Project is considered to have *no impact* on a particular resource topic if the analysis concludes that it would not affect that particular resource.
- An impact is considered *less than significant* if the analysis concludes that the impact would cause no substantial adverse change to the environment and that accordingly it would not require mitigation.
- An impact is considered *less than significant with mitigation incorporated* if the analysis concludes that, with the inclusion of mitigation measures to which the project proponent has agreed, the impact would cause no substantial adverse change to the environment.
- An impact is considered *potentially significant* if the analysis concludes that the impact exceeds applicable regulatory thresholds of significance and cannot be reduced to a less-than-significant level with potentially feasible mitigation.

In assessing the impacts of the proposed alignment changes to the project as originally approved, the City is not assessing whether impacts are significant compared with existing physical conditions (i.e., conditions without implementation of any part of the project). Rather, the City is assessing how the incremental impacts, if any, associated with the proposed changes compare with the impacts disclosed in the IS/MND. This approach is expressly sanctioned by the governing statutory and regulatory provisions and case law. (See Public Resources Code, § 21166; CEQA Guidelines, § 15162; *Bowman v. City of Petaluma* (1986) 185 Cal.App.3d 1065, 1078-1082; *Temecula Band of Luiseño Mission Indians v. Rancho Cal. Water Dist.* (1996) 43 Cal.App.4th, 425, 438-439).

1.4 Organization of this Document

CEQA Guidelines do not specify the format of addendums. The content and format of this Addendum is as follows.

- Chapter 1, “Introduction,” identifies the purpose, terminology, and organization of the Addendum.
- Chapter 2, “Description of Proposed Project Change,” identifies the proposed project refinements in detail.
- Chapter 3, “Environmental Analysis,” presents the analysis for each component of the project change. This chapter identifies the proposed project change's impacts in relevant resource categories.
- Chapter 4, “Conclusion,” summarizes the conclusions of the environmental review in this Addendum.

Chapter 2 Description of Proposed Project Changes

This chapter provides a summary of the Proposed Phase 4 Refinements to the City’s Proposed Recycled Water Project as was described in the March 2013 Public Draft IS/MND, the May 2013 Final IS/MND, as well as the May 2015, July 2017, and December 2018 Addendums. These are included by reference.

2.1 Proposed Phase 4 Refinements

As originally described in the March 2013 Public Draft IS/MND, the May 2013 Final IS/MND, and as revised in the May 2015, July 2017, and December 2018 Addendums, the City’s Recycled Water Pipeline Project includes the construction and operation of 9.4-mile pipeline system to serve a combined set of agricultural and urban landscape irrigation demands in the Ukiah Valley with tertiary treated recycled water from the City’s existing Ukiah Wastewater Treatment Plant. As shown on Figure 1, the IS/MND and Addendums identified and evaluated four (4) construction phases. The storage facility for Phases 1-3 was originally sized at a capacity of approximately 1.6 million gallon (MG) in the IS/MND and was revised to 3 MG during the May 2015 Addendum and then increased to 66 MG during the July 2017 Addendum. In August of 2015 the State Board issued Order WW0082 approving the City’s petition to change the purpose of use and the place of use of 1,472 acre-feet per year (afy) of treated wastewater.

Currently, Phases 1-3 of the City of Ukiah’s Recycled Water Pipeline Project are now constructed. The City would now like to implement the complete project as originally planned in the 2012 Recycled Water Feasibility Study, which includes one remaining phase (i.e. Phase 4) of pipeline and customers. Phase 4 includes 21 parcels and 190 acres, all urban landscape irrigation sites. The Phase 4 customer sites include one (1) City owned golf course at the end of the line, a cemetery, some City parks and several City public schools. The City has already acquired signed recycled water use agreements from the planned Phase 4 customers. The City evaluated the construction of the pipeline alignments in the original IS/MND. However, due to the fact that many details were not known at the time the 2012 Recycled Water Feasibility Study and the subsequent 2013 IS/MND and the 2015, 2017, and 2018 Addendums, the City could not clearly outline or define the Phase 4 storage requirements. Now the storage requirements for Phase 4 are better known and defined, the Proposed Phase 4 Refinements of this Addendum and Proposed Changes to the Original Project include the following and are illustrated on Figure 2:

- Miscellaneous upgrade improvements at the existing tertiary filtration/disinfection system at the existing Ukiah WWTP, which mainly includes improvements to electrical, instrumentation & controls, monitoring and testing equipment, etc.
- At the existing WWTP, the former sludge storage area will be repaired and retrofitted to be an impermeable facility that will accept secondary effluent prior to tertiary treatment. This facility will need to be over-excavated and have the existing soil examined and properly disposed of. In converting this facility, some trenching will be required to provide inlet and outlet piping. The new storage pond will be equipped with a small pumpstation and electrical building to convey flows for advanced treatment.

A new 2 MG Recycled Water Storage Tank (Prestressed Concrete, 36-feet high and 115-feet in diameter with electrical/radio equipment (antenna) located on the top of the tank for SCADA transmission), 300 horsepower (hp) booster pump station at the City of Ukiah’s Water Treatment Facility, and a 650-foot long, 12-inch diameter, pipeline to the interconnection of the existing Phase 3 pipeline and the planned Phase 4 pipeline of the Recycled Water Pipeline Project. The pump station will be placed on a pad measuring approximately 20-feet by 50-feet with an adjacent electrical building approximately 24-feet by 14-feet by 18-feet high. The storage tank and pump station will be located at the City’s water treatment

plant that zoned industrial property and which already has a large storage tank, pump station and a Ranney well collector. Further, this site has no nearby residents or housing and is screened by mature Sequoia or California Redwoods.

- The Phase 4 pipeline is approximately 9,000 linear feet of 4-inch to 18-inch pipe. The pipeline will serve approximately 12 new users.
- The Project includes the replacement of an existing pedestrian bridge over Orr Creek (approximately 90-foot span)
- Minor utility relocations will take place along the Phase 4 alignment.

2.1.1 Construction Considerations

The Proposed Phase 4 Refinements construction activities are projected to begin in spring of 2023 and take approximately 24 months to complete. The Proposed Phase 4 Refinements would follow the same construction commitments and mitigation measures identified in the Original May 2013 Public Draft IS/MND and the approved July 2013 Final IS/MND, and as amended. These are included by reference. In addition, the following environmental commitments will be employed as part of the overall Phase 4 Refinements Project Description to ensure that there are no additional environmental impacts that were already disclosed in the Original IS/MND document, and as amended. These include:

- The 2 MG storage tank and booster pump station will be painted in neutral colors such as a beige, or light brown, in order to blend in with the surrounding environment and will be shielded by a fence and/or trees to be hidden from the public to the extent practical. Further, the two pump stations will be housed in buildings/structures to ensure noise attainment and provide an additional layer of protection from vandalism.
- The 2 MG storage tank and adjacent pump station will have security lighting to provide protection against vandalism, but will be shielded in order to not create a new source of substantial light or glare that would adversely affect day or nighttime views in the area.

2.1.2 Operations and Maintenance Considerations

The Proposed Phase 4 Refinements would follow the same operations and maintenance commitments and mitigation measures identified in the Original May 2013 Public Draft IS/MND and the approved July 2013 Final IS/MND, and as amended.

Chapter 3 Environmental Analysis

This chapter evaluates the potential for the proposed changes to have new significant impacts on the environment that were not previously addressed in the IS/MND, substantially more severe environmental impacts than were addressed in the IS/MND, or trigger the new information standards stated in CEQA Guideline section 15162. The purpose of this review is to evaluate the categories in terms of any “changed condition” (i.e. changed circumstances, project changes, or new information of substantial importance) that may result in a changed environmental result. A determination that no such changed condition exists does not necessarily mean that the overall project will have no potential impacts in an environmental category, but that the change to the Project will result in a reduction or no change in the condition or status of the impact since it was analyzed and addressed with mitigations in the IS/MND.

3.1 Explanation of Environmental Review Process

Table 1 evaluates any potential environmental impacts from the construction and operation of the proposed changes with the environmental impacts of the original storage facility size as discussed in the IS/MND. This comparative analysis has the following elements, which are the basis for the discussion in Table 2 below:

(A) Were the Impact(s) Analyzed in the IS/MND?

This column provides a cross-reference to the pages of the IS/MND where information and analysis may be found relative to the environmental issue listed under each topic.

(B) What were the Environmental Impact Conclusions in the IS/MND?

This column provides a summary of the original environmental impact conclusions for implementing the Proposed Project in the IS/MND.

(C) Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

Pursuant to Section 15162(a)(1) of the CEQA Guidelines, this column indicates whether the proposed project change will result in new significant impacts that have not already been considered and mitigated by the IS/MND or a substantial increase in the severity of a previously identified significant impact.

(D) Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?

Pursuant to Section 15162(a)(2) of the CEQA Guidelines, this column indicates whether there have been changes to the circumstances under which the project is being undertaken which have occurred subsequent to the City’s adoption of the IS/MND that would result in the revised pipeline facilities having new significant environmental impacts that were not considered in the IS/MND or that substantially increase the severity of a previously identified significant impact.

(E) Any New Information Requiring New Analysis or Verification?

Pursuant to Section 15162(a)(3)(A-D) of the CEQA Guidelines, this column indicates whether new information of substantial importance which was not known and could not have been known with the exercise of reasonable diligence at the time the City adopted the IS/MND is available requiring an update to the analysis of the IS/MND because the new information shows that:

- (1) The project will have one or more significant effects not discussed in the IS/MND; or

- (2) Significant effects previously examined will be substantially more severe than shown in the IS/MND; or
- (3) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or that
- (4) Mitigation measures or alternatives which are considerably different from those analyzed in the IS/MND would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

If the answer to any of the above questions (C) through (E) for the incremental impacts of the project change is ‘Yes,’ then the preparation of a subsequent or supplemental IS/MND or an EIR could be required. However, if the additional analysis completed as part of this Addendum finds that the applicable conclusions of the IS/MND remain the same and no new significant impacts are identified, or identified environmental impacts are not found to be more severe, or additional “considerably different” mitigation unacceptable to the proponent is not necessary, then the question would be answered ‘No’ and no supplemental or subsequent IS/MND or EIR is required.

(E) Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts

This column indicates whether the prior environmental documents provide mitigation measures to address effects in the related impact category. In some cases, the mitigation measures have already been implemented. A “yes” response will be provided in either instance. If “NA” is indicated, this Addendum concludes that the impact does not occur with this project change and therefore no mitigation measures are needed.

(F) Discussion and Mitigation Section

IS/MND Discussion

A discussion of the relevant portions of the IS/MND is provided under each environmental category in order to clarify the answers. The discussion provides information about the IS/MND’s treatment of the particular environmental issue and the status of any mitigation measure that the IS/MND required or that has already been implemented.

IS/MND Mitigation Measures

Applicable mitigation measures from the IS/MND that apply to the project are listed under each environmental category.

Project Change Discussion

A discussion of the environmental impacts, if any, of the revised pipeline alignment under the standards established by CEQA Guidelines section 15162(a) for each environmental resources section or category.

3.2 Evaluation of Proposed Changes

Table 1 evaluates the potential for the proposed changes to have new significant impacts on the environment that were not previously addressed in the IS/MND, substantially more severe environmental impacts than were addressed in the IS/MND or trigger the new information standards stated in CEQA Guideline section 15162. The purpose of this review is to evaluate the categories in terms of any “changed condition” (i.e. changed circumstances, project changes, or new information of substantial importance) that may result in

a changed environmental result. A determination that no such changed condition exists does not necessarily mean that the overall project will have no potential impacts in an environmental category, but that the change to the Project will result in a reduction or no change in the condition or status of the impact since it was analyzed and addressed with mitigations in the IS/MND.

Table 1 Environmental Review of Proposed Project Changes						
<i>Environmental Issue Area</i>	<i>Where Impact(s) were Analyzed in Prior Environmental Documents.</i>	<i>What were the Environmental Impact conclusions for the Original Proposed Project?</i>	<i>Do Proposed Changes Involve New Significant or Substantially More Severe Impacts?</i>	<i>Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?</i>	<i>Any New Information Requiring New Analysis or Verification?</i>	<i>Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts?</i>
Aesthetics/Visual	IS/MND Page 3-2	LTS	No	No	No	N/A
<p>IS/MND Discussion: As identified in the IS/MND, The Proposed Project, including the location of the proposed storage facility is not located in or near any designated scenic vista, designated highway, and would not affect any visual resources. Further, the implementation of the Proposed Project would have no to less than significant potential impacts to aesthetic and visual resources. As a result, implementation of the Proposed Project as described in the IS/MND would not result in significant unavoidable impacts to the visual character or add substantial amounts of light and glare.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> • None identified or necessary. <p>Project Change Discussion: The Proposed Phase 4 Refinements to the Proposed Project would generally have the same impacts to aesthetic/visual resources as was identified in the Original Proposed Project. The construction activities associated with the Phase 4 Refinements would be substantially the same as they were originally described in the IS/MND and as amended. Specifically, the 2 MG storage tank and the pump station buildings will be located at the City’s Water Treatment Plant which is zoned industrial property and already has a large water storage tank, pump station and a Ranney well collector and would not add any new or significant feature to the area, which is not considered to be a scenic area. Further, this site has no nearby residents or housing and is screened by mature Sequoia or California Redwoods. In addition, the 2 MG storage tank and booster pump station will be painted in neutral colors such as a beige, or light brown, in order to blend in with the surrounding environment and will be shielded by a fence and/or trees to be hidden from the public to the extent practical. Further, the two pump stations will be housed in buildings/structures to ensure noise attainment and provide an additional layer of protection from vandalism. Further, the 2 MG storage Tank and adjacent pump station would have security lighting to provide protection against vandalism, but will be shielded in order to not create a new source of substantial light or glare that would adversely affect day or nighttime views in the area. As a result, the Proposed Project change will not result in new significant impacts that have not already been considered and mitigated by the IS/MND or result in a substantial increase in the severity of a previously identified significant impact. The Revised Proposed Project, therefore, would not have any incrementally significant aesthetics/visual effects as defined in CEQA Guideline section 15162(a).</p>						
Agricultural Resources	IS/MND Pages 3-3 and 3-4	LTS	No	No	No	N/A

Table 1 Environmental Review of Proposed Project Changes						
<i>Environmental Issue Area</i>	<i>Where Impact(s) were Analyzed in Prior Environmental Documents.</i>	<i>What were the Environmental Impact conclusions for the Original Proposed Project?</i>	<i>Do Proposed Changes Involve New Significant or Substantially More Severe Impacts?</i>	<i>Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?</i>	<i>Any New Information Requiring New Analysis or Verification?</i>	<i>Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts?</i>
<p>IS/MND Discussion: As identified in the IS/MND, implementation of the Proposed Project would have no to less than significant potential impacts to agricultural resources. The Proposed Project would not convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use. The Proposed Project would be primarily constructed within existing roadways within the City. In addition, the Proposed Project will not be located on any existing agricultural fields or farmlands. As a result, the Proposed Project would not convert any farmland to non-agricultural usage. No mitigation is required or necessary.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> • None identified or necessary. <p>Project Change Discussion: The Proposed Phase 4 Refinements to the Proposed Project would not have increased impacts to agricultural resources as was identified in the Original Proposed Project. The Proposed Phase 4 Refinements would not convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance, as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use. As a result, any of these impacts are not considered to be significant. Further, the construction activities associated with Phase 4 Refinements would be substantially the same as they were originally described in the IS/MND, and as amended. In addition, the lands the proposed 2MG Storage tank and Pump Station would be located on City-owned lands and are not on any agricultural lands. The proposed changes to the Proposed Project would not convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance, as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use. As a result, any of these impacts are not considered to be significant. The Proposed Phase 4 Refinements will not result in new significant impacts that have not already been considered and mitigated by the IS/MND or a substantial increase in the severity of a previously identified significant impact. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant effects to agricultural resources as defined in CEQA Guideline section 15162(a).</p>						
Air Quality	IS/MND Pages 3-5 through 3-10	LTS/M	No	No	Yes	Yes
<p>IS/MND Discussion: As described in the IS/MND, construction of the Proposed Project would result in temporary, but not significant and unavoidable, impacts to air quality. The Mendocino County Air Quality Management District (MCAQMD) has deferred to using the Bay Area Air Quality Management District’s (BAAQMD) Thresholds of Significance estimating air quality impacts. However, the Bay Area Air Quality Management District’s approach to analyses of construction impacts as noted in their BAAQMD CEQA Guidelines is to emphasize implementation of effective and comprehensive control measures rather than detailed quantification of emissions. As a result, the Proposed</p>						

Table 1 Environmental Review of Proposed Project Changes						
<i>Environmental Issue Area</i>	<i>Where Impact(s) were Analyzed in Prior Environmental Documents.</i>	<i>What were the Environmental Impact conclusions for the Original Proposed Project?</i>	<i>Do Proposed Changes Involve New Significant or Substantially More Severe Impacts?</i>	<i>Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?</i>	<i>Any New Information Requiring New Analysis or Verification?</i>	<i>Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts?</i>
<p>Project’s construction related dust impacts would be reduced further with the implementation of dust effective dust control measures and would remain less than significant.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> Mitigation Measure AIR-1: Dust Control <p>Project Change Discussion:</p> <p>The Proposed Phase 4 Refinements to the Proposed Project would generally have the same impacts to air quality as was identified in the Original Proposed Project. The construction activities associated with the Proposed Phase 4 Refinements would be substantially the same as they were originally described in the IS/MND. The construction of the additional storage facilities with the Phase 4 Refinements would result in an incremental increase in air quality emissions. However, these increased emissions would not exceed any of the established thresholds of significance. Further, BAAQMD’s approach to analyses of construction impacts as noted in their BAAQMD CEQA Guidelines is to emphasize implementation of effective and comprehensive control measures rather than detailed quantification of emissions. With implementation of these dust control measures (Mitigation Measures AIR-1 in the IS/MND and listed above), the Proposed Phase 4 refinement’s construction-related dust impacts would be even further reduced and would remain less-than-significant. Operations of the two pump stations of the Phase 4 Refinements will be connected to the existing electrical grid and will not produce any local or significant emissions. As a result, the Proposed Phase 4 Refinements will not result in new significant impacts that have not already been considered and mitigated by the IS/MND or a substantial increase in the severity of a previously identified significant impact. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant air quality effects as defined in CEQA Guideline section 15162(a).</p>						
Biological Resources	IS/MND Pages 3-11 through 3-17	LTS/M	No	No	Yes	Yes
<p>IS/MND Discussion:</p> <p>As identified in the IS/MND, the Proposed Project could have a substantial adverse effect, either directly or through habitat modifications, on species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the CDFW or USFWS. Specifically, the construction activities of the Proposed Project have the potential to affect these species in various ways ranging from removal and/or disturbance. However, with the implementation of the following mitigation measures any impacts would be reduced to less than significant levels.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> Mitigation Measure BIO-1: Conduct Breeding/nesting Surveys Mitigation Measure BIO-2: Conduct Pre-Construction Surveys for Western Pond Turtle Mitigation Measure BIO-3: Avoid Cutting Through Creeks/Drainages Mitigation Measure BIO-4: Implement Construction Best Management Practices Mitigation Measure BIO-5: Develop and Implement a Frac-Out Contingency Plan Mitigation Measure BIO-6: Obtain all Required Authorizations 						

Table 1 Environmental Review of Proposed Project Changes						
<i>Environmental Issue Area</i>	<i>Where Impact(s) were Analyzed in Prior Environmental Documents.</i>	<i>What were the Environmental Impact conclusions for the Original Proposed Project?</i>	<i>Do Proposed Changes Involve New Significant or Substantially More Severe Impacts?</i>	<i>Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?</i>	<i>Any New Information Requiring New Analysis or Verification?</i>	<i>Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts?</i>
<p>Project Change Discussion: The Proposed Phase 4 Refinements to the Proposed Project would generally have the same impacts to biological resources as was identified in the Original Proposed Project. As a result, the Proposed Phase 4 Refinements will not result in new significant impacts that have not already been considered and mitigated by the Original IS/MND and/or result in a substantial increase in the severity of a previously identified significant impact. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant effects on biological resources as defined in CEQA Guideline section 15162(a).</p>						
Cultural and Tribal Resources	IS/MND Pages 3-18 through 3-21	LTS/M	No	No	No	Yes
<p>IS/MND Discussion: The IS/MND concluded that the construction of the Proposed Project would not have any direct impacts on identified historical and archeological resources, including tribal cultural resources. However, construction of the Proposed Project could have significant impacts on unidentified and undiscovered buried cultural resources. However, with the implementation of the following mitigation measures, any impacts would be reduced to less than significant levels.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> • Mitigation Measure CR-1: Halt work if cultural resources are discovered • Mitigation Measure CR-2: Stop work if paleontological remains are discovered • Mitigation Measure CR-3: Halt work if human remains are found <p>Project Change Discussion: The Proposed Phase 4 Refinements would generally have the same impacts to cultural and/or tribal resources as was identified in the Original Proposed Project. The construction activities associated with the Phase 4 Refinements would be located on City-owned land. The Original Project was investigated and surveyed for cultural and tribal resources within a 0.5 radius area around the Proposed Project, which included the area where Phase 4 Refinements would be located². None of these investigations indicated that there are known cultural resources within the proposed footprints of the Phase 4 refinements. Further the construction activities of Phases 1-3 were monitored for cultural and tribal resources and no cultural and/or tribal resources were discovered. It is possible that during Phase 4 Refinement construction activities, cultural and/or tribal resources could be inadvertently discovered. However, the existing approved mitigation measures would ensure that any impacts would be reduced to less than significant impacts. As a result, the Proposed Phase 4 Refinements will not result in new significant impacts that have not already been considered and mitigated by the IS/MND or a substantial increase in the severity of a</p>						

² In 2013, the City investigated both Cultural and Tribal Resources together as it was prior to the specific requirements of AB52. Through this investigation, the City reached out to the Native America Heritage Commission (NAHC) and the local Native American Tribes to obtain information regarding any known sensitive tribal and/or cultural resources. None of the Native American Tribes responded with any information regarding any known sensitive tribal and/or cultural resources. Please see Appendix A for the City’s efforts to reach out to the NAHC and the local Native American Tribes.

Table 1 Environmental Review of Proposed Project Changes						
<i>Environmental Issue Area</i>	<i>Where Impact(s) were Analyzed in Prior Environmental Documents.</i>	<i>What were the Environmental Impact conclusions for the Original Proposed Project?</i>	<i>Do Proposed Changes Involve New Significant or Substantially More Severe Impacts?</i>	<i>Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?</i>	<i>Any New Information Requiring New Analysis or Verification?</i>	<i>Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts?</i>
previously identified significant impact. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant effects on cultural resources as defined in CEQA Guideline section 15162(a).						
Geology and Soils	IS/MND Pages 3-22 and 3-23	LTS/M	No	No	No	Yes
<p>IS/MND Discussion: As described in the IS/MND, the Proposed Project may be located in areas that consist of medium dense to dense fine granular soils. In addition, perched groundwater could be present. As such, the soil in some areas of the alignment may have a high susceptibility to liquefaction during seismic shaking. Other portions of the Project may be less susceptible to liquefaction and related damage. Lateral spreading, often associated with liquefaction, is less likely because there are no steep banks or hard ground bordering the Project area, but could still potentially be a hazard. However, with the implementation of the following mitigation measure, any impacts are reduced to less than significant levels. As a result, the following mitigation is proposed:</p> <p>IS/MND Mitigation Measure:</p> <ul style="list-style-type: none"> • Mitigation Measure GEO-1: Perform Geotechnical Investigation <p>Project Change Discussion: The Proposed Phase 4 Refinements would generally have the same impacts to geology and soils as the Original Proposed Project. The construction activities associated with the revised storage facility would be substantially the same as they were originally described in the IS/MND. As a result, the Proposed Phase 4 Refinements will not result in new significant geology and soils impacts that have not already been considered and mitigated by the IS/MND or a substantial increase in the severity of a previously identified significant impact. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant effects on geology and soils as defined in CEQA Guideline section 15162(a).</p>						
Greenhouse Gas Emissions	IS/MND Pages 3-24 through 3-25	LTS	No	No	No	Yes
<p>IS/MND Discussion: With the implementation of mitigation, the Proposed Project would not result in any residual significant and unavoidable impacts related to greenhouse gas emissions. Therefore, project implementation would not result in any residual significant impacts related to greenhouse emissions.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> • None Identified or Necessary <p>Project Change Discussion:</p>						

Table 1 Environmental Review of Proposed Project Changes						
<i>Environmental Issue Area</i>	<i>Where Impact(s) were Analyzed in Prior Environmental Documents.</i>	<i>What were the Environmental Impact conclusions for the Original Proposed Project?</i>	<i>Do Proposed Changes Involve New Significant or Substantially More Severe Impacts?</i>	<i>Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?</i>	<i>Any New Information Requiring New Analysis or Verification?</i>	<i>Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts?</i>
<p>The Proposed Phase 4 Refinements would have the same chances to cause a generate greenhouse gas emissions as was identified in the Original Proposed Project. The construction of the additional storage facilities with the Phase 4 Refinements would result in an incremental increase in air quality emissions. However, these increased emissions would not exceed any of the established thresholds of significance. Further, BAAQMD’s approach to analyses of construction impacts as noted in their BAAQMD CEQA Guidelines is to emphasize implementation of effective and comprehensive control measures rather than detailed quantification of emissions. With implementation of these dust control measures (Mitigation Measures AIR-1 in the IS/MND and listed above), the Proposed Project’s construction-related dust impacts would be even further reduced and would remain less-than-significant. Operations of the two pump stations of the Phase 4 Refinements will be connected to the existing electrical grid and will not produce any local or significant emissions. As a result, the proposed Phase 4 Refinements will not result in any new significant greenhouse gas impacts that have not already been considered and mitigated by the IS/MND or a substantial increase in the severity of a previously identified significant impact. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant effects on greenhouse gas emissions as defined in CEQA Guideline section 15162(a).</p>						
Hazards and Hazardous Materials	IS/MND Pages 3-26 through 3-29	LTS/M	No	No	No	Yes
<p>IS/MND Discussion: With the implementation of mitigation, the Proposed Project would not result in any residual significant and unavoidable impacts related to risks of upset or accidental release of hazards and hazardous materials. Therefore, project implementation would not result in any residual significant impacts related to hazards and hazardous materials.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> • Mitigation Measure HAZ-1: Store, Handle, Use Hazardous Materials in Accordance with Applicable Laws • Mitigation Measure HAZ-2: Properly Dispose of Contaminated Soil and/or Groundwater • Mitigation Measure HAZ-3: Properly Dispose of Hydrostatic Test Water • Mitigation Measure HAZ-4: Consult with FAA, Ukiah Municipal Airport, USFWS, and CDFW • Mitigation Measure HAZ-5: Develop and maintain Emergency Access Strategies • Mitigation Measure HAZ-6: Develop and implement Fire Management Plan³ <p>Project Change Discussion: The Proposed Phase 4 Refinements would generally have the same chances to cause a significant hazard to the public and/or the environment as was identified in the Original Proposed Project. The construction activities</p>						

³ Since the adoption of the City’s Recycled Water Project and IS/MND in 2013, CEQA has added a new Wildfire Category to the environmental checklist. However, the Original IS/MND fully analyzed the risks of the construction and operation of the entire Project, including Phase 4 activities to cause or contribute to wildfires. Further, this mitigation measure covers any potential risks to causing a wildfire(s) and will bring any significant impacts to a less-than-significant level.

Table 1 Environmental Review of Proposed Project Changes						
<i>Environmental Issue Area</i>	<i>Where Impact(s) were Analyzed in Prior Environmental Documents.</i>	<i>What were the Environmental Impact conclusions for the Original Proposed Project?</i>	<i>Do Proposed Changes Involve New Significant or Substantially More Severe Impacts?</i>	<i>Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?</i>	<i>Any New Information Requiring New Analysis or Verification?</i>	<i>Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts?</i>
<p>associated with the revised storage facility would be substantially the same as they were originally described in the IS/MND as it would be constructed on City-owned land. As a result, the Proposed Phase 4 Refinements will not result in new significant impacts that have not already been considered and mitigated by the IS/MND or a substantial increase in the severity of a previously identified significant impact. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant effects on the potential to cause a significant hazard to the public and/or the environment as defined in CEQA Guideline section 15162(a).</p>						
Hydrology and Water Quality	IS/MND Pages 3-30 through 3-33	LTS/M	No	No	No	Yes
<p>IS/MND Discussion: With implementation of the mitigation measures listed in the IS/MND, implementation of the Proposed Project would not result in any residual significant impacts related to increased risk of flooding from stormwater runoff, from water quality effects from long-term urban runoff, or from short-term alteration of drainages and associated surface water quality and sedimentation. Based on these circumstances, the Proposed Project would not result in any residual significant and unavoidable adverse impacts to surface water hydrology and water quality.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> • Mitigation Measure HWQ-1: Implement Construction Best Management Practices • Mitigation Measure HWQ-2: Implement Recycled Water Best Management Practices <p>Project Change Discussion: The Proposed Phase 4 Refinements would generally have the same impacts to hydrology and water quality as was identified in the Original Proposed Project. The construction activities associated with the Phase 4 Refinements would be substantially the same as they were originally described in the IS/MND and will help the City to reduce diversions from the Russian River by approximately 1 million gallons per day (mgd) and reduce the City’s discharge back into the Russian River by 20 percent, which was approved by the State Board in August 2015 as part of Order WW0082. As a result, the Proposed Phase 4 Refinements will not result in new significant impacts that have not already been considered and mitigated by the IS/MND or a substantial increase in the severity of a previously identified significant hydrology and water quality impacts. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant hydrology and water quality effects as defined in CEQA Guideline section 15162(a).</p>						
Land Use and Planning	IS/MND Page 3-34	NI	No	No	No	N/A
<p>IS/MND Discussion: The IS/MND concluded that the Proposed Project would not have any adverse or significant effects on land use or land use planning. Specifically, the Proposed Project would not result in a disruption, physical division, or isolation of existing residential or open space areas. The Proposed Project would not conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the Project area. The Proposed Project would also</p>						

Table 1 Environmental Review of Proposed Project Changes						
<i>Environmental Issue Area</i>	<i>Where Impact(s) were Analyzed in Prior Environmental Documents.</i>	<i>What were the Environmental Impact conclusions for the Original Proposed Project?</i>	<i>Do Proposed Changes Involve New Significant or Substantially More Severe Impacts?</i>	<i>Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?</i>	<i>Any New Information Requiring New Analysis or Verification?</i>	<i>Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts?</i>
<p>not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Conservation Community Plan, or other approved local, regional, or state habitat conservation plan. As a result, no mitigation is necessary.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> None identified or necessary. <p>Project Change Discussion:</p> <p>The Proposed Phase 4 Refinements would have the same impacts to land use and land use planning as was identified in the Original Proposed Project. As a result, the Proposed Phase 4 Refinements will not result in new significant impacts that have not already been considered and mitigated by the IS/MND or a substantial increase in the severity of a previously identified significant impact. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant land use and land use planning effects as defined in CEQA Guideline section 15162(a).</p>						
Mineral Resources	IS/MND Page 3-35	NI	No	No	No	Yes
<p>IS/MND Discussion:</p> <p>The Proposed Project is not located in an area identified as containing mineral resources classified MRZ-2 by the State geologist that would be of value to the region and the residents of the state. As a result, the Proposed Project would not result in the loss of availability of known mineral resources; therefore, no impact is expected. No mitigation is required.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> None identified or necessary. <p>Project Change Discussion:</p> <p>The Proposed Phase 4 Refinements would have the same impacts to mineral resources as was identified in the Original Proposed Project. The construction activities associated with the revised storage facility would be substantially the same as they were originally described in the IS/MND. As a result, the Proposed Phase 4 Refinements will not result in new significant impacts to mineral resources that have not already been considered and mitigated by the IS/MND and/or result in a substantial increase in the severity of a previously identified significant impact. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant mineral resource effects as defined in CEQA Guideline section 15162(a).</p>						
Noise	IS/MND Pages 3-36 through 3-38	LTS/M	No	No	No	Yes
IS/MND Discussion:						

Table 1 Environmental Review of Proposed Project Changes						
<i>Environmental Issue Area</i>	<i>Where Impact(s) were Analyzed in Prior Environmental Documents.</i>	<i>What were the Environmental Impact conclusions for the Original Proposed Project?</i>	<i>Do Proposed Changes Involve New Significant or Substantially More Severe Impacts?</i>	<i>Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?</i>	<i>Any New Information Requiring New Analysis or Verification?</i>	<i>Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts?</i>
<p>The Proposed Project has the potential to generate noise during the construction phase through the use of equipment and construction vehicle trips. Once constructed, the Proposed Project would not create any new sources of operational noise. Therefore, operation of the pipeline would not result in permanent noise impacts. Construction of the Proposed Project would generate temporary and intermittent noise. Noise levels would fluctuate depending on the particular type, number, and duration of use of various pieces of construction equipment.</p> <p>Back-up beepers associated with trucks and equipment used for material loading and unloading at the staging area would generate significantly increased noise levels over the ambient noise environment in order to be discernable and protect construction worker safety as required by OSHA (29 CFR 1926.601 and 29 CFR 1926.602). Businesses and residences in the vicinity of the project area could thus be exposed to these elevated noise levels.</p> <p>Construction activities associated with the project would be temporary in nature and related noise impacts would be short-term. However, since construction activities could substantially increase ambient noise levels at noise-sensitive locations, construction noise could result in potentially significant, albeit temporary, impacts to sensitive receptors. Compliance with the City noise ordinance and implementation of the following mitigation measures is expected to reduce impacts related to construction noise, to a less-than-significant level.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> • Mitigation Measure NOI-1: Limit Construction Hours • Mitigation Measure NOI-2: Locate Staging Areas away from Sensitive Receptors • Mitigation Measure NOI-3: Maintain Mufflers on Equipment • Mitigation Measure NOI-4: Idling Prohibition and Enforcement • Mitigation Measure NOI-5: Equipment Location and Shielding <p>Project Change Discussion:</p> <p>The Proposed Phase 4 Refinements would generally have the same impacts on noise and sensitive receptors as was identified in the Original Proposed Project. The construction activities associated with the Phase 4 Refinements would be substantially the same as they were originally described in the IS/MND. As a result, the Proposed Phase 4 Refinements will not result in new significant noise impacts that have not already been considered and mitigated by the IS/MND and/or result in a substantial increase in the severity of a previously identified significant noise impact. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant effects on noise and sensitive receptors as defined in CEQA Guideline section 15162(a).</p>						
Population and Housing	IS/MND Page 3-39 through 3-40	NI	No	No	No	N/A
<p>IS/MND Discussion:</p> <p>The Proposed Project would not induce population growth either directly or indirectly. The Proposed Project/Action would be to serve the City with up to 2,500 afy of tertiary treated recycled water for irrigation purposes. This would help supplement the City’s current groundwater supplies, but would not be a sufficient supply to induce urban growth in the area. Construction of the Proposed Project/Action would avoid the need to demolish any existing houses and would not affect any other housing structures. In addition, construction, operation, and</p>						

Table 1 Environmental Review of Proposed Project Changes						
<i>Environmental Issue Area</i>	<i>Where Impact(s) were Analyzed in Prior Environmental Documents.</i>	<i>What were the Environmental Impact conclusions for the Original Proposed Project?</i>	<i>Do Proposed Changes Involve New Significant or Substantially More Severe Impacts?</i>	<i>Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?</i>	<i>Any New Information Requiring New Analysis or Verification?</i>	<i>Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts?</i>
<p>maintenance would not result in any substantial increase in numbers of permanent workers/employees. Therefore, no impacts are anticipated and no mitigation is required.</p> <p>IS/MND Mitigation Measures:</p> <ul style="list-style-type: none"> • None identified or necessary. <p>Project Change Discussion:</p> <p>The Proposed Phase 4 Refinements would have the same impact on population and/or housing as was identified in the Original Proposed Project. **Table 1
 Environmental Review of Proposed Project Changes**

<i>Environmental Issue Area</i>	<i>Where Impact(s) were Analyzed in Prior Environmental Documents.</i>	<i>What were the Environmental Impact conclusions for the Original Proposed Project?</i>	<i>Do Proposed Changes Involve New Significant or Substantially More Severe Impacts?</i>	<i>Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?</i>	<i>Any New Information Requiring New Analysis or Verification?</i>	<i>Are Prior Mitigation Measures Sufficient for Addressing Any New Potential Changes or Impacts?</i>
Mandatory Findings of Significance	Pages 3-49 and 3-50					

IS/MND Discussion:

With the incorporation of the previously identified mitigation measures, the Proposed Project will not substantially degrade the quality of the environment, reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory. Any impacts from the Proposed Project in these areas are considered here to be less-than-significant with the implementation and incorporation of the above mentioned mitigation measures. In accordance with CEQA Guidelines Section 15183, the environmental analysis in this Initial Study was conducted to determine if there were any project-specific effects as a result of the Proposed Project. No direct project-specific significant effects were identified that could not be mitigated to a less-than-significant level. Mitigation Measures incorporated herein mitigate any potential contribution to cumulative (as well as direct) impacts associated with these environmental issues. Therefore, the Proposed Project does not have impacts that are individually limited, but cumulatively considerable. As a result of mitigation included in this environmental document, the Proposed Project would not result in substantial adverse effects to humans, either directly or indirectly.

IS/MND Mitigation Measures:

- See previous mitigation measures for each resource category as identified above.

Project Change Discussion:

The Proposed Phase 4 Refinements would have the same or fewer impacts the environment and humans as the Original Proposed Project. The construction activities associated with the Phase 4 Refinements would be substantially the same as they were originally described in the IS/MND. As a result, the Proposed Phase 4 Refinements will not result in new significant impacts that have not already been considered and mitigated by the IS/MND and/or result in a substantial increase in the severity of a previously identified significant impact. The Proposed Phase 4 Refinements, therefore, would not have any incrementally significant effects on the environment and humans as defined in CEQA Guideline section 15162(a).

Chapter 4 Conclusion

The conclusion of this Addendum is that the Proposed Phase 4 Refinements will not result in new significant impacts, substantially increase the severity of previously disclosed impacts or involve any of the other conditions related to changed circumstances or new information that can require a subsequent or supplemental EIR under Public Resources Code section 21166 and CEQA Guidelines section 15162 beyond those impacts and conditions already identified in the City’s Public Draft and Final IS/MND (SCH #2013032072), which was certified and approved by the City on June 5, 2013. Thus, an Addendum is the appropriate level of CEQA analysis and the appropriate method of amending the June 5, 2013 Adopted IS/MND, pursuant to Sections 15162 and 15164 of the CEQA Guidelines. As discussed in this Addendum, CEQA and the CEQA Guidelines do not require a subsequent or supplemental negative declaration or environmental impact report for the proposed alignment changes. Therefore, it would be appropriate for the City to approve the Proposed Changes and supplemental analysis to the Proposed Project based on this Addendum.

**Subject: Sacred Land Files and Native American Contact List Request for the City of Ukiah's
Proposed Recycled Water Project, Mendocino County**

To Whom It May Concern:

SMB Environmental, Inc. (SMB) is assisting the City of Ukiah (City) prepare environmental documentation for its proposed Recycled Water Project. The Proposed Project consists of approximately 9.4-miles of recycled water pipeline ranging in size from 16-8 inches in diameter from the Ukiah Wastewater Treatment Plant to serve approximately 990 acres of agricultural and urban landscape irrigation lands within the Ukiah Valley. Phases 1-3 are now under construction and Phase 4 needs some additional refinements and subsequent environmental review. The Proposed Project is located on the Ukiah, California USGS 7.5 Minute Topographic Map and generally located at Section 20 Township 15 West and Range 12 West (S20 T15N R12W). Please see attached request form.

We would appreciate your checking the Sacred Lands Files to see if there are any culturally sensitive areas within the immediate project vicinity. We would also like to receive a list of Native American organizations that may have knowledge in the area and we will attempt to contact them to solicit their written input/concerns about the Proposed Project.

Thank you for your cooperation and assistance. I look forward to your earliest possible reply. If any questions, please feel free to contact me at 916-517-2189 or at steve@smbenvironmental.com.

Sincerely,

A handwritten signature in blue ink, appearing to read "SJB", is written over a light blue horizontal line.

Re: City of Ukiah's Proposed Recycled Water Project, Mendocino County.

Dear Mr. Brown:

A record search of the sacred land file has failed to indicate the presence of Native American cultural resources in the immediate project area. The absence of specific site information in the sacred lands file does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Enclosed is a list of Native Americans individuals/organizations who may have knowledge of cultural resources in the project area. The Commission makes no recommendation or preference of a single individual, or group over another. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated, if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe or group. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from any of these individuals or groups, please notify me. With your assistance we are able to assure that our lists contain current information. If you have any questions or need additional information, please contact me at (916) 653-4038.

Sincerely,

A handwritten signature in black ink, appearing to read "Debbie Pilas-Treadway".

Subject: Request for Information Regarding Known Cultural Resources Sites for the Proposed City of Ukiah Recycled Water Project, Mendocino County

Dear Mr. Feliz:

SMB Environmental, Inc. (SMB) is assisting the City of Ukiah (City) prepare environmental documentation for its proposed Recycled Water Project (Proposed Project). The Proposed Project would primarily consist of the construction of an approximately 9.4-mile pipeline system to serve a combined set of agricultural and urban landscape irrigation demands in the Ukiah Valley with approximately 1,375 acre-feet per year (afy) of tertiary treated recycled water from the City's existing Ukiah Wastewater Treatment Plant (UWWTP) that meets the requirements for disinfected tertiary recycled water "unrestricted use" as defined in California Code of Regulations (CCR), Title 22, Sections 60301 through 60355. The pipeline system would be primarily located within existing paved City roadways and agricultural service roads through the Ukiah Valley east of Highway 101 and west of the Russian River. Please see attached Project Map.

The Native American Heritage Commission was contacted about the Proposed Project and provided us with a list of Native American individuals and organizations that may have knowledge of cultural resources in the project area. As a result, we are requesting that you please provide us with any information you may have about cultural resources or sites in the project area so that we can determine ways to protect those sites, including archeological sites and other locations of special value to Native Americans.

Thank you for your cooperation and assistance. I look forward to your earliest possible reply. If any questions, please feel free to contact me at 916-517-2189 or at steve@smbenvironmental.com.

Sincerely,

Dear Leona Williams:

SMB Environmental, Inc. (SMB) is assisting the City of Ukiah (City) prepare environmental documentation for its proposed Recycled Water Project (Proposed Project). The Proposed Project would primarily consist of the construction of an approximately 9.4-mile pipeline system to serve a combined set of agricultural and urban landscape irrigation demands in the Ukiah Valley with approximately 1,375 acre-feet per year (afy) of tertiary treated recycled water from the City's existing Ukiah Wastewater Treatment Plant (UWWTP) that meets the requirements for disinfected tertiary recycled water "unrestricted use" as defined in California Code of Regulations (CCR), Title 22, Sections 60301 through 60355. The pipeline system would be primarily located within existing paved City roadways and agricultural service roads through the Ukiah Valley east of Highway 101 and west of the Russian River. Please see attached Project Map.

The Native American Heritage Commission was contacted about the Proposed Project and provided us with a list of Native American individuals and organizations that may have knowledge of cultural resources in the project area. As a result, we are requesting that you please provide us with any information you may have about cultural resources or sites in the project area so that we can determine ways to protect those sites, including archeological sites and other locations of special value to Native Americans.

Thank you for your cooperation and assistance. I look forward to your earliest possible reply. If any questions, please feel free to contact me at 916-517-2189 or at steve@smbenvironmental.com.

Sincerely,

A handwritten signature in blue ink, appearing to read "SJB", is written over a light blue horizontal line.

Subject: Request for Information Regarding Known Cultural Resources Sites for the Proposed City of Ukiah Recycled Water Project, Mendocino County

Dear Chairperson:

SMB Environmental, Inc. (SMB) is assisting the City of Ukiah (City) prepare environmental documentation for its proposed Recycled Water Project (Proposed Project). The Proposed Project would primarily consist of the construction of an approximately 9.4-mile pipeline system to serve a combined set of agricultural and urban landscape irrigation demands in the Ukiah Valley with approximately 1,375 acre-feet per year (afy) of tertiary treated recycled water from the City's existing Ukiah Wastewater Treatment Plant (UWWTP) that meets the requirements for disinfected tertiary recycled water "unrestricted use" as defined in California Code of Regulations (CCR), Title 22, Sections 60301 through 60355. The pipeline system would be primarily located within existing paved City roadways and agricultural service roads through the Ukiah Valley east of Highway 101 and west of the Russian River. Please see attached Project Map.

The Native American Heritage Commission was contacted about the Proposed Project and provided us with a list of Native American individuals and organizations that may have knowledge of cultural resources in the project area. As a result, we are requesting that you please provide us with any information you may have about cultural resources or sites in the project area so that we can determine ways to protect those sites, including archeological sites and other locations of special value to Native Americans.

Thank you for your cooperation and assistance. I look forward to your earliest possible reply. If any questions, please feel free to contact me at 916-517-2189 or at steve@smbenvironmental.com.

Sincerely,

The pipeline system would be primarily located within existing paved City roadways and agricultural service roads through the Ukiah Valley east of Highway 101 and west of the Russian River. Please see attached Project Map.

The Native American Heritage Commission was contacted about the Proposed Project and provided us with a list of Native American individuals and organizations that may have knowledge of cultural resources in the project area. As a result, we are requesting that you please provide us with any information you may have about cultural resources or sites in the project area so that we can determine ways to protect those sites, including archeological sites and other locations of special value to Native Americans.

Thank you for your cooperation and assistance. I look forward to your earliest possible reply. If any questions, please feel free to contact me at 916-517-2189 or at steve@smbenvironmental.com.

Sincerely,

Subject: Request for Information Regarding Known Cultural Resources Sites for the Proposed City of Ukiah Recycled Water Project, Mendocino County

Dear Erika Williams:

SMB Environmental, Inc. (SMB) is assisting the City of Ukiah (City) prepare environmental documentation for its proposed Recycled Water Project (Proposed Project). The Proposed Project would primarily consist of the construction of an approximately 9.4-mile pipeline system to serve a combined set of agricultural and urban landscape irrigation demands in the Ukiah Valley with approximately 1,375 acre-feet per year (afy) of tertiary treated recycled water from the City's existing Ukiah Wastewater Treatment Plant (UWWTP) that meets the requirements for disinfected tertiary recycled water "unrestricted use" as defined in California Code of Regulations (CCR), Title 22, Sections 60301 through 60355. The pipeline system would be primarily located within existing paved City roadways and agricultural service roads through the Ukiah Valley east of Highway 101 and west of the Russian River. Please see attached Project Map.

The Native American Heritage Commission was contacted about the Proposed Project and provided us with a list of Native American individuals and organizations that may have knowledge of cultural resources in the project area. As a result, we are requesting that you please provide us with any information you may have about cultural resources or sites in the project area so that we can determine ways to protect those sites, including archeological sites and other locations of special value to Native Americans.

for the City of Ukiah's Proposed Phase 4 Refinements to the Recycled Water Project**

Dear: Redwood Valley or Little River Band of Pomo Indians

The City of Ukiah (City) is requesting a formal government-to-government consultation with your organization to discuss the City's Proposed Phase 4 Refinements to its Recycled Water Project (Proposed Project) and the potential that the Proposed Project could have on tribal and/or cultural resources in the area. Please see attached Figure.

The Native American Heritage Commission was contacted about the Proposed Project and provided us with a list of Native American individuals and organizations that may have knowledge of tribal and/or cultural resources in the Project Area as part of the AB52 requirements. As a result, we are requesting that you please provide us with any information you may have about cultural resources or sites in the project area so that we can determine ways to protect those sites, including archeological sites and other locations of special value to Native Americans.

Thank you for your cooperation and assistance. I look forward to your earliest possible reply. If we do not receive a request from you (or your organization) within 30 days, we will assume that you do not want to have a formal consultation and agree with our assessment that the Proposed Project would not have any impacts to Tribal Cultural Resources that you are aware of. If you have any questions, please feel free to contact me at (707) 467-5712 or at swhite@cityofukiah.com.

**Subject: Request for Government-to-Government Consultation under Assembly Bill 52 (AB-52)
for the City of Ukiah's Proposed Phase 4 Refinements to the Recycled Water Project**

Dear: Potter Valley Tribe

The City of Ukiah (City) is requesting a formal government-to-government consultation with your organization to discuss the City's Proposed Phase 4 Refinements to its Recycled Water Project (Proposed Project) and the potential that the Proposed Project could have on tribal and/or cultural resources in the area. Please see attached Figure.

The Native American Heritage Commission was contacted about the Proposed Project and provided us with a list of Native American individuals and organizations that may have knowledge of tribal and/or cultural resources in the Project Area as part of the AB52 requirements. As a result, we are requesting that you please provide us with any information you may have about cultural resources or sites in the project area so that we can determine ways to protect those sites, including archeological sites and other locations of special value to Native Americans.

Thank you for your cooperation and assistance. I look forward to your earliest possible reply. If we do not receive a request from you (or your organization) within 30 days, we will assume that you do not want to have a formal consultation and agree with our assessment that the Proposed Project would not have any impacts to Tribal Cultural Resources that you are aware of. If you have any questions, please feel free to contact me at (707) 467-5712 or at swhite@cityofukiah.com.

Sincerely,

Sean K. White
Director of Water Resources

Responses From Native American Tribes

SHERWOOD VALLEY RANCHERIA

August 21, 2012

Steve Brown, Principal
SMB Environmental
PO Box 381
Roseville, CA 95661

RE: Request for Information Regarding Known Cultural Resources Sites for the
Proposed City of Ukiah Recycled Water Project, Mendocino County

Dear Mr. Brown:

This letter is in response to your August 17, 2012 correspondence regarding the request for information on the areas that are known cultural resources sites in the area of the proposed Ukiah Recycled Water Project. Extensive and aggressive natural resources extraction and construction activities have occurred throughout the indigenous territories of the Pomo peoples for the last 150+ years, leaving many ancestral villages, sacred sites, places of worship, and burial places desecrated.

California had the densest pre-contact population of any place now within the United States. The areas of potential effect are not located on/near the aboriginal territory boundaries of the Sherwood Valley Rancheria (Tribe). However, the project lies within the aboriginal boundaries of the Yokayo Rancheria who may have additional comments regarding this project

The Tribe appreciates your communication efforts. If you have any further questions or additional comments, please contact Talisha Melliush, Cultural Resource Specialist, at (707) 459-1039 or email at sherwoodvalleyCRM@gmail.com.

Sincerely,

A handwritten signature in blue ink, appearing to read "Michael Fitzgerral", is written over a light blue horizontal line.

Regarding Project: **Ukiah Recycled Water Project, Mendocino County**

As far as I am able to determine the area described has no archaeological or cultural significance to the Redwood Valley Little River Band of Pomo Indians. I would like to inform you that the project area you have described is with-in the aboriginal boundaries of many Pomo Tribes. Therefore please keep us informed about your project.

Sincerely,

Benjamin R Henthorne III
Environmental Assistant
