Project Description

The Tierra Norte Project (project) presents a request for a General Plan Amendment, Zone Amendment and Development Plan to establish a Planned Block Development (PBD) Overlay District for the property located at 4617 (western parcel) and 4665 (eastern parcel) North River Road to allow for future residential development of the site.

The western parcel is comprised of 15.9 gross acres of land located on APN 157-060-17. The adjacent eastern parcel is located on APN 157-060- 40 and consists of 9.7 acres which completes a total of an approximately 25.6-acre project site. The project site is located in the North Valley Neighborhood on the south side of North River Road generally between Avenida Descanso and Calle Montecito.

Both parcels are under a current General Plan designation of Light Industrial (LI). A General Plan Amendment is proposed to designate the site as Medium Density - C Residential (MDC-R) to provide for appropriate densities and use types that will allow for the envisioned multi-family development of the site. The proposed medium-density residential use will also provide a transition between the light industrial uses located to the south and east, and the existing residential uses located to the north and west. The MDC-R designation will allow for a density range of 15.1 – 20.9 dwelling units per acre.

The project site is currently designated as Limited Industrial (IL) under the City's Zoning Ordinance. A Zone Amendment is proposed to designate the project site as Medium Density Residential C (RM-C) consistent with the proposed MDC-R land use. The RM-C designation will allow for future implementation of a multi-family development.

A separate document has been prepared to serve as the Planned Block Development Plan (PBDP) for the proposed Overlay District and is provided as an appendix to the Draft Environmental Impact Report (DEIR). The intended purpose of the PBD Planned Block Development Overlay District (PBD Overlay District) is to permit flexibility in land-use regulation and site development standards under control of the Planning Commission and City Council where flexibility or coordinated planning for a large site or a site under multiple ownerships will enhance the potential for superior urban design.

The PBDP establishes the land use and development standards that will regulate future residential development proposals for the property. The PBDP also presents site planning and architectural design criteria intended to promote development of a well thought-out, highly livable residential community which is compatible with the surrounding neighborhood. Detailed site layouts and residential building designs will ultimately be identified as part of future development plans specifically proposed for the property. While a comprehensive project may be proposed for the entire Overlay District, it is recognized that each parcel exists under separate ownership and that multiple development plans may also be considered.
