### Lathrop Integrated Water Resources Master Plan Draft Environmental Impact Report

#### LEAD AGENCY

Greg Gibson, Senior Civil Engineer  
City of Lathrop, Public Works Department  
390 Towne Centre Drive  
Lathrop, CA 95330  
(209) 941-7430

#### EIR CONSULTANT

Steve McMurtry  
De Novo Planning Group  
1020 Suncastr Lane, Suite 106  
El Dorado Hills, CA 95762  
(916) 580-9818

PROJECT TITLE: Lathrop Integrated Water Resources Master Plan

#### PROJECT LOCATION:

The project site is located throughout Lathrop, California. The City of Lathrop is located in San Joaquin County, approximately 10 miles south of the City of Stockton and directly west of the City of Manteca. The City's water service area is generally contiguous with the City limits and includes the railroad cargo container commercial enterprise that is outside of the City limits. The City's wastewater collection system service area is generally contiguous with the City limits. The City's existing recycled water distribution system is generally contiguous with the City limits, and some of the future facilities are planned for north of the City limits.

#### PROJECT DESCRIPTION:

The proposed project includes adoption and implementation of the IWRMP, which includes the improvement projects summarized in the proposed Water System Master Plan, Wastewater System Master Plan, and Recycled Water System Master Plan. The Water System Master Plan focuses on development of water demand unit factors and projections, hydraulic assessment of the City's existing water infrastructure and key planned improvements, and development of recommended water system capital improvement projects (CIPs). The Wastewater System Master Plan focuses on development of wastewater flow unit factors and projections, hydraulic assessment of the City's existing infrastructure and key planned conveyances, and development of recommended wastewater CIPs. The Recycled Water System Master Plan focuses on an evaluation of recycled water use and disposal alternatives, recycled water balance analyses, hydraulic assessment of the City's existing recycled water infrastructure and key planned improvements, and development of recommended recycled water system improvements and operational recommendations.

Generators would be provided in conjunction with the proposed water pump station improvements. Additionally, Supervisory Control and Data Acquisition (SCADA) communication towers would also be provided.

#### SIGNIFICANT ENVIRONMENTAL EFFECTS:

According to the Initial Study and Draft EIR, all environmental issues were determined to have no impact, less than significant impacts, or less than significant impacts with mitigation measures incorporated into the project.

#### PUBLIC REVIEW PERIOD:

A 45-day public review period for the Draft EIR will commence on August 15, 2019 and end on September 30, 2019. Any written comments on the Draft EIR must be received at the above address within the public review period. Copies of the Draft EIR are available for review at the City of Lathrop, 390 Towne Centre Drive, Lathrop, CA 95330. The Draft EIR also may be reviewed at the City of Lathrop's web site at: <https://www.ci.lathrop.ca.us/com-dev/page/public-review-documents>. If we do not receive a response from your agency or organization, we will presume that your agency or organization has no response to make.
