

TABLE OF CONTENTS

Continental Grand Campus Specific Plan Recirculated Partial Draft Environmental Impact Report

	<u>Page</u>
Chapter 1, Introduction	1-1
A. Purpose of the Recirculated Partial Draft EIR	1-1
B. Summary of Revisions	1-2
C. New Comments	1-3
D. Public Review of the Recirculated Partial Draft EIR	1-3
Chapter 2, Project Description	2-1
A. Introduction	2-1
B. Project Location and Surrounding Uses	2-1
C. Site Background	2-4
D. Existing Conditions	2-5
E. Statement of Project Objectives	2-7
F. Description of the Project	2-8
G. Project Design Features	2-14
H. Construction Schedule	2-19
I. Project Approvals	2-19
Chapter 3, Basis for Cumulative Analyses	3-1
Chapter 4, Environmental Impact Analysis	
4.B Air Quality	4.B-1
4.J Transportation and Circulation	4.J-1

Appendices

- Appendix A – Refined Construction Health Risk Assessment
- Appendix B – Air Quality Worksheets from the 2017 DEIR
- Appendix C – Continental Grand Campus TIA

List of Figures

2-1 Regional and Vicinity Location Map.....2-2

2-2 Aerial Photograph of the Site and Project Vicinity2-3

2-3 Existing Site Plan2-6

2-4 Proposed Site Plan2-9

2-5 Rendering from East of Continental Boulevard Looking West 2-11

2-6 Rendering from Grand Avenue Looking East..... 2-13

3-1 Related Projects Map (Revised)3-8

4.J-1 Study Intersection Locations, Lane Configuration, and Traffic Control
(Revised).....4.J-5

List of Tables

2-1 Continental Grand Campus Specific Plan Existing and
Proposed Development 2-10

3-1 Related Projects List3-5

4.B-1 Ambient Air Quality Standards..... 4.B-5

4.B-2 Monitoring station Ambient Air Quality Data 4.B-14

4.B-3 South Coast Air Basin Attainment Status (Los Angeles County) 4.B-19

4.B-4 Cancer Risk Exposure Parameters..... 4.B-31

4.B-54 Maximum Unmitigated Regional Construction Emissions
(pounds per day) 4.B-41

4.B-65 Maximum Unmitigated Regional Operational Emissions
(pounds per day) 4.B-42

4.B-76 Maximum Unmitigated Localized Construction Emissions (pounds per day) .. 4.B-44

4.B-87 Maximum Unmitigated Localized Operational Emissions (pounds per day).... 4.B-45

4.B-9 Construction Maximum Incremental Increase in Cancer Risk..... 4.B-47

4.B-10 Construction Maximum Chronic Hazard Index 4.B-47

4.B-118 Comparison of the Project to Applicable Air Quality polices of
the General Plan 4.B-48

4.J-1 Study Intersections.....4.J-4

4.J-2 Level of Service Descriptions – ICU Methodology4.J-7

4.J-3 Level of Service and Delay Ranges – HCM Methodology4.J-7

4.J-4 Intersection Operations – Existing Conditions4.J-8

4.J-5 Freeway Segment Operations – Existing Conditions4.J-9

4.J-6 Summary of Project Trip Generation4.J-18

4.J-7 Intersection Operations – Existing with Project Conditions4.J-25

4.J-8 Intersection Operations –Year 2022 with Project Conditions4.J-27

4.J-9 Intersection Operations –Year 2023 with Project Conditions4.J-30

4.J-10 Freeway Segment Operations – Existing with Project Conditions4.J-33

4.J-11 Freeway Segment Operations –Year 2022 with Project Conditions4.J-34

4.J-12 Freeway Segment Operations –Year 2023 with Project Conditions4.J-35

4.J-13 Summary of Intersection Operations with Mitigation Measures4.J-42
