

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: USE PERMIT APPLICATION NO. PLN2014-0108 – ISABEL MACHADO DAIRY

Lead Agency: Stanislaus County

Contact Name: Teresa McDonald, Associate Planner

Email: mcdonaltdt@stancounty.com Phone Number: 209-525-6330

Project Location: Turlock, Stanislaus
City County

Project Description (Proposed actions, location, and/or consequences).

Request to expand an existing dairy facility, operating on a 59.39± acre parcel in the General Agriculture (A-2-40) zoning district, to allow for an increase to the herd size, from 1,260 mature cows to 2,860. This project requests to expand the number of combined milk and dry cows from 1,180 mature cows (1,100 milk cows and 80 dry) to 1,700 mature cows (1,500 milk cows and 200 dry); and to increase support stock numbers from 80 to 1,160. The total number of animals is to increase by 1,600. Consequently, additional waste will be generated. The dairy's existing Waste Management Plan (WMP) and Nutrient Management Plan (NMP) were revised to account for the increase in waste and resulting storage and disposal needs associated with the increase in herd size. The updated WMP estimates that the expansion will increase the daily manure production will increase by 1,900 cubic feet, for a total of 4,586 cubic feet per day±, which equates to approximately 4,117,194 gallons and 550,389 cubic feet of manure per year (pre-separation). The estimated wastewater storage needs will be accommodated by the existing capacity of the on-site lagoons.
*** See 30 day referral for complete PD***

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant impacts to ground water quality reduced to less than significant impact by incorporating mitigation measures.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Potential impacts to ground water quality

Provide a list of the responsible or trustee agencies for the project.
